PUBLIC SERVICE COMMISSION OF WISCONSIN

Joint Application of Wisconsin Electric Power Company and Wisconsin Gas LLC for Authority to Adjust Electric, Natural Gas, and Steam Rates — 5-UR-110

FINAL DECISION

This is the Final Decision concerning the joint application of Wisconsin Electric Power Company (WEPCO) and Wisconsin Gas LLC (WG) (together, applicants) for authority to adjust electric, natural gas, and steam rates on January 1, 2023.

Final overall rate changes in 2023 are authorized consisting of a $283.5 million annual rate increase for WEPCO electric total company operations, a 9.11 percent increase; a $46.1 million annual rate increase for WEPCO natural gas operations, a 9.59 percent increase; a $7.6 million annual rate increase for WEPCO steam operations, a 35.30 percent increase; and a $46.5 million annual rate increase for WG, a 6.40 percent increase, for the test year ending December 31, 2023, based on a 9.80 percent return on common equity. For test year ending December 31, 2024, the applicants shall hold base steam rates flat and will file a limited electric and natural gas reopener as discussed in this Final Decision.

Introduction

On April 28, 2022, the applicants filed a joint application with the Public Service Commission (Commission) requesting authority to adjust electric, natural gas, and steam rates. The applicants requested an increase in annual electric revenues of $260.5 million, or 8.4 percent over present revenues for WEPCO electric operations, an increase in annual gas revenues of $50.7 million, or 10.7 percent over present revenues for WEPCO's gas operations; an increase in annual steam revenues of $3.3 million, or 15.5 percent over present revenues for WEPCO's steam operations; and an increase in annual gas revenues of $60.1 million, or 8.3 percent over present revenues for WG; with an effective date of January 1, 2023.

Additionally, WEPCO seeks a limited electric rate reopener for 2024 to address the revenue requirements associated with recovering new capital investments that will achieve commercial operation in 2023 and 2024 as well as to address reduced operations and maintenance (O&M) expenses from future coal plant retirements. The applicants also seek limited 2024 rate reopeners for WEPCO gas and WG to address the additional revenue requirements associated with a new facility being in service for a full year and a liquefied natural gas facility that will achieve commercial operation during 2024.

On June 9, 2022 the Commission issued a Notice of Proceeding. (PSC REF#: 439916.) Citizens Utility Board of Wisconsin (CUB), Wisconsin Industrial Energy Group (WIEG), RENEW Wisconsin, Inc. (RENEW), Milwaukee Metropolitan Sewerage District (MMSD), Walmart, Inc. (Walmart), Roundy's Supermarkets, Inc. (Roundy's), International Union of Operating Engineers, Local 420 (Local 420), International Brotherhood of Electrical Workers, Local 2150 (Local 2150), Clean Wisconsin, and Walnut Way Conservation Corp. (Walnut Way) intervened and were granted party status in the proceeding. (PSC REF#: 442572, PSC REF#: 443987, PSC REF#: 445931.)

On July 8, 2022, the applicants filed supplemental direct testimony updating their 2023 WEPCO electric operations test-year revenue requirements for three recent developments identified in Theodore Eidukas' supplemental direct testimony including extending the operating life of the Oak Creek Power Plant, the effect of the increase in the Federal Funds Rate on borrowing costs and the impact of how Standard & Poor's assesses the impact of power purchase agreements on a utility's credit rating. (Direct WEPCO/WG-Eidukas-s-1.) In addition, applicants' witness Joseph Zgonc identified the revenue requirement impacts in his supplemental direct testimony regarding the delay in bringing the Paris Solar Battery and Darien Solar and Battery projects online and the Badger Hollow II force majeure cost increases. In total, Mr. Zgonc identified that the total impact to the 2023 test year for the supplemental testimony provided by the applicants was a reduction of $3.3 million and $0.6 million for WEPCO electric operations and WEPCO gas operations, respectively. (Direct-WEPCO/WG-Zgonc-s-1-4.)

A Scheduling Order was issued on July 26, 2022, and amended on August 22, 2022, that identified the parties, established the issues, schedule, and other facilitation matters for this proceeding pursuant to Wis. Admin. Code § PSC 2.04(4). Notices of Hearing were issued on September 12, 2022 and September 27, 2022, establishing the dates for the party hearing (October 5, 2022), and public hearings (September 28, 2022 and November 3, 2022).

After Commission staff completed its audit of the application and following the exchange of multiple rounds of pre-filed testimony in accordance with the Scheduling Order, the parties concluded negotiations regarding the possibility of limiting the number of contested issues in this proceeding. On October 3, 2022, the applicants filed an Application for Approval of Settlement Agreement, indicating that a partial Settlement Agreement for the Commission's consideration was signed by the applicants, CUB, WIEG, RENEW, MMSD, Walmart, Roundy's, Local 420, and Local 2150 (together, settling parties) under the statutory settlement process contained in Wis. Stat. § 196.026. Two parties, Clean Wisconsin and Walnut Way, did not sign the partial Settlement Agreement. The settling parties agreed to resolve all issues in the case except authorized return on equity (ROE) and electric, gas, and steam revenue allocation. With regard to the 2023 fuel cost plan, the proposed partial Settlement Agreement reflected a preliminary fuel cost estimate.

As the proposed partial Settlement Agreement was not supported by all of the parties, the settling parties convened a conference on October 7, 2022 with notice and opportunity to participate provided to all parties. The applicants, CUB, WIEG, RENEW, MMSD, Walmart, Roundy's, Clean Wisconsin, Walnut Way, Local 420, and Local 2150 met to discuss the proposed partial Settlement Agreement.

On October 11, 2022, the applicants filed a Motion to Approve Modification of Issues and Supplementation of the Record that was agreed to by all of the parties. (PSC REF#: 449326.) All parties and Commission staff agreed on the additional process necessary to address the proposed partial settlement. In addition to the Settlement Application, Settlement Agreement, and Settlement Terms (PSC REF#: 452287), Theodore Eidukas on behalf of the applicants submitted supporting testimony and exhibits. (PSC REF#: 449556, PSC REF#: 449559, PSC REF#: 449557, PSC REF#: 449565, PSC REF#: 449558, PSC REF#: 449854.)

Based on Theodore Eidukas' testimony and exhibits, the settling parties agreed to a number of changes to Commission staff's proposed revenue requirement adjustments described in the record that resulted in the following:

- Net adjusted operating income at current rates of $252.2 million for total company WEPCO electric, $251.2 million for WEPCO's Wisconsin retail electric, $54.5 million WEPCO gas, ($2.3 million) for WEPCO steam, and $93.6 million for WG.

- Average net investment rate base of $5,665.4 million for total WEPCO's Wisconsin retail electric, $5,619.8 million for Wisconsin retail WEPCO electric, $1,099.1 million WEPCO gas, $49.5 million for WEPCO steam, and $1,693.4 million for WG.

As the partial Settlement Agreement did not address ROE, the final revenue requirement was not agreed to by the settling parties. The settling parties also agreed to several rate design issues, many of which were identified and addressed in the record leading up to the proposed Settlement Agreement.

Because the application sought and the proposed Settlement Agreement did include an increase to electric, natural gas, and steam rates, a hearing on the rate increase was required by law pursuant to Wis. Stat. § 196.20. Hearings were held on September 28, 2022 and October 5, 2022 in Madison, Wisconsin. On November 3, 2022, hearings were held in Milwaukee, Wisconsin, to receive public comments into the record. Public comments were also received on the Commission's website. The Commission received over 1,000 written public comments and numerous individuals testified at the public hearings.

CUB, WIEG, RENEW, Walmart, MMSD, and Roundy's filed responses reiterating their support for the partial Settlement Agreement as required by Wis. Stat. § 196.026(6). (PSC REF#: 451401, PSC REF#: 451420, PSC REF#: 451383, PSC REF#: 451418, PSC REF#: 451343, PSC REF#: 451455.) Settling parties Local 420 and Local 2150 did not file responses and per Wis. Stat. § 196.026(6), the lack of response constitutes nonobjection to the Settlement Agreement. Walnut Way objected to the Settlement Agreement and filed supplemental direct testimony and exhibits. (PSC REF#: 451425, PSC REF#: 451421, PSC REF#: 451422, PSC

REF#: 451423, PSC REF#: 451424. In addition, Walnut Way and Clean Wisconsin objected to the proposed Settlement Agreement in a joint filing. (PSC REF#: 451425.)

The Commission considered the record in this proceeding at its open meeting of December 1, 2022. The Commission reviewed and approved this Final Decision at its open meeting of December 29, 2022. The parties, for purposes of review under Wis. Stat. §§ 227.47 and 227.53, are listed in Appendix A.

Findings of Fact

1. WEPCO is an investor-owned electric, natural gas, and steam public utility as defined in Wis. Stat. § 196.01(5)(a). WEPCO provides electric, natural gas, and steam service in eastern Wisconsin.

2. WG is an investor-owned natural gas public utility as defined in Wis. Stat. § 196.01(5)(a). WG provides natural gas service in Wisconsin.

3. The procedural requirements of Wis. Stat. § 196.026(4)-(6), (7)(a) and (7)(b) have been satisfied.

4. Presently authorized rates for WEPCO's Wisconsin retail electric utility operations will produce operating revenues of $3,065.9 million for the test year ending December 31, 2023, which results in a net operating income of $273.4 million and an annual revenue deficiency of $280.5 million, which is insufficient.

5. Presently authorized rates for WEPCO's natural gas operations will produce operating revenues of $480.7 million for the test year ending December 31, 2023, which results in a net operating income of $54.8 million and an annual revenue deficiency of $46.1 million, which is insufficient.

6. Presently authorized rates for WEPCO's steam operations will produce operating revenues of $21.5 million for the 2023 and 2024 test years, which results in a net operating loss of $1.4 million and an annual revenue deficiency of $7.6 million, which is insufficient.

7. Presently authorized electric, natural gas, and steam rates of WEPCO are unreasonable because they produce inadequate electric, natural gas, and steam revenues.

8. Presently authorized rates for WG's natural gas utility operations will produce operating revenues of $726.9 million for the test year ending December 31, 2023, which results in a net operating income of $96.8 million and an annual revenue deficiency of $46.5 million, which is insufficient.

9. Presently authorized natural gas rates of WG are unreasonable because they produce inadequate natural gas revenues.

10. For WEPCO's Wisconsin retail electric utility, the estimated rate of return on average net investment rate base of $5,422.3 million at current rates subject to the Commission's jurisdiction for the test year is 5.02 percent, which is inadequate.

11. For WEPCO's natural gas utility operations, the estimated rate of return on average net investment rate base of $1,065.8 million at current rates subject to the Commission's jurisdiction for the test year is 5.14 percent, which is inadequate.

12. For WEPCO's steam utility operations, the estimated rate of return on average net investment rate base of $49.0 million at current rates subject to the Commission's jurisdiction for the 2023 and 2024 test years is (2.92 percent), which is inadequate.

13. For the WG natural gas utility, the estimated rate of return on average net investment rate base of $1,626.9 million at current rates subject to the Commission's jurisdiction for the test year is 5.95 percent, which is inadequate.

14. A reasonable increase in operating revenue for the test year to produce an 8.77 percent return on average net investment rate base for WEPCO's Wisconsin retail electric operations is $280.5 million.

15. A reasonable increase in operating revenue for the test year to produce an 8.29 percent return on WEPCO's average net investment rate base for its natural gas operations is $46.1 million.

16. A reasonable increase in operating revenue for the 2023 and 2024 test years to produce an 8.37 percent return on WEPCO's average net investment rate base for its steam utility operations is $7.6 million.

17. A reasonable increase in operating revenue for the test year to produce an 8.03 percent return on WG's average net investment rate base for natural gas operations is $46.5 million.

18. WEPCO's and WG's filed operating income statements and net investment rate bases for the test year, as adjusted for Commission decisions, are reasonable.

19. It is reasonable to accept Commission staff's estimated natural gas price impacts related to storage inventory, working capital, and gas sales.

20. It is reasonable to accept the Full Time Equivalency (FTE) reduction relating to part-time seasonal and non-represented positions as proposed by Commission staff.

21. It is reasonable to include all of the maintenance adjustments proposed by Commission staff.

22. It is reasonable for the applicants to write off the entirety of COVID-19 regulatory asset deferral authorized in docket 5-AF-105, over a two-year period.

23. It is reasonable to include the Whitewater Power Station acquisition costs identified in docket 5-BS-264 in the 2023 test year revenue requirement.

24. It is not reasonable to include the West Riverside Energy Center (West Riverside) proposed acquisition costs identified in docket 5-BS-265 in the 2023 test year revenue requirements for this proceeding because the Commission has not approved the acquisition.

25. It is reasonable to authorize deferral accounting treatment, with carrying costs at the short-term debt rate, for the proposed acquisition costs identified in docket 5-BS-265 for the West Riverside project.

26. It is reasonable to include the *force majeure* cost increase for the Badger Hollow II Solar Farm (Badger Hollow II) in the 2023 test year revenue requirements.

27. It is reasonable to include the impacts of the steam system restoration and reliability improvements in the 2023 test year revenue requirement.

28. It is reasonable to require WEPCO to defer, with carrying costs at the short-term debt rate, any insurance proceeds received relating to the flooding identified in docket 6630-CU-104.

29. It is not reasonable to update the revenue requirements to reflect updated inflationary impacts.

30. It is reasonable to require the applicants to defer any impacts of the inflation Reduction Act (Act) with carrying costs at the short-term debt rate.

31. It is reasonable to accept Commission staff's revenue requirement impacts for electric, steam and natural gas plant and construction work in progress (CWIP).

32. It is reasonable to require deferral, with escrow accounting treatment, for the applicants' pension and other post-employment benefit (OPEB) costs for electric, natural gas, and steam operations for 2023 and 2024.

33. It is reasonable to include the revenue requirement increase related to the Standard & Poor's (S&P) methodology change for valuing off balance sheet obligations in the 2023 test year revenue requirements.

34. It reasonable to require deferral accounting treatment to capture the differences between estimated and actual revenue requirement impacts associated with retiring Oak Creek Power Plant (OCPP) 5 and 6 resulting from a change in the units' May 2024 retirement date.

35. A reasonable estimate of escrowed conservation expense to be recorded for WEPCO electric operations is $39.2 million and WEPCO natural gas operations is $6.7 million.

36. A reasonable estimate of escrowed conservation expense to be recorded for WG's operations is $10.0 million.

37. A reasonable period over which to amortize the remainder of the tax reform refunds associated with the Tax Cut and Jobs Act (TCJA) authorized in docket 5-AF-101 is 2 years (2023-2024), and it is reasonable to require a final true-up of the regulatory balance in docket 5-AF-101 in the applicants' next rate case proceeding.

38. It is reasonable for the applicants to amortize and include the revenue requirement impacts of the regulatory asset and regulatory liability amortizations as detailed in Appendix G, for all items listed for 2023 and 2024 or until the Commission authorizes a different amortization expense to be recorded.

39. It is reasonable to accept all other Commission staff audit adjustments made to the applicants' filed electric, natural gas, and steam revenue requirement not contested by any party.

40. It is reasonable to authorize the applicants to file a limited electric rate case reopener to address the revenue requirements associated with recovering new capital investments that will achieve commercial operation in 2023 and 2024, as well as to address reduced O&M expense from future coal plant retirements. The electric reopener shall also include details regarding its Storm Hardening Program, a report on all funding opportunities, including any federal grants or other forms of financial assistance, the applicants have pursued or are pursuing related to this program, and the analysis as to how to address the remaining unrecovered book balance of the Oak Creek Power Plant (OCPP).

41. It is reasonable to authorize the applicants to file a limited natural gas rate case reopener for 2024 to address the additional revenue requirements associated with a new facility being in service for a full year and a liquefied natural gas facility that will achieve commercial operation during 2024.

42. It is reasonable to forecast an increase in the applicants' 2023 monitored fuel costs by $215.6 million on a retail basis.

43. It is reasonable to set the applicants' 2023 Fuel Cost Plan level at $967,184,461, or $40.87 per megawatt-hour (MWh), as shown in Appendix F.

44. It is reasonable to establish an annual fuel cost tolerance bandwidth of plus or minus 2.0 percent for monitored fuel costs.

45. It is reasonable to reflect the revenue requirement impact of Commission staff's fuel cost update containing New York Mercantile Exchange (NYMEX) futures settlement prices as of October 17, 2022, for natural gas, heating oil, and the Argus Powder River Basin for spot coal as of mid-month of October 2022 to forecast the applicants' 2023 monitored fuel costs.

46. It is reasonable to incorporate all other Commission staff uncontested adjustments to the applicants' forecasted 2023 monitored fuel costs.

47. It is reasonable to allocate the increase in fuel cost approved by the Commission to various customer classes based on energy usage.

48. An appropriate target level for the test-year average common equity measured on a financial capital structure basis is 53.00 percent for both applicants.

49. A reasonable financial capital structure for WEPCO for the test year consists of 53.00 percent common equity, 36.41 percent long-term debt, 1.21 percent short-term debt, 0.33 preferred stock, and 9.05 percent debt equivalence for off-balance sheet obligations, including subsidiary debt.

50. A reasonable financial capital structure for WG for the test year consists of 53.00 percent common equity, 43.64 percent long-term debt, and 3.36 percent short-term debt.

51. It is reasonable to revise the applicants' dividend restriction based on the capital structure determinations in this proceeding, as set forth in the Opinion section in this Final Decision.

52. A reasonable utility ratemaking capital structure for WEPCO for the test year consists of 58.22 percent common equity, 40.08 percent long-term debt, 1.33 percent short-term debt, and 0.36 percent preferred stock.

53. A reasonable utility ratemaking capital structure for WG for the test year consists of 52.70 percent common equity, 43.97 percent long-term debt, and 3.33 percent short-term debt.

54. A reasonable return on utility common stock equity for both applicants is 9.80 percent.

55. A reasonable interest rate for short-term borrowing through commercial paper for WEPCO is 4.14 percent for the 2023 test year.

56. A reasonable interest rate for short-term borrowing through commercial paper for WG is 4.49 percent for the 2023 test year.

57. A reasonable average embedded cost for long-term debt for WEPCO is 4.40 percent for the 2023 test year.

58. A reasonable average embedded cost for long-term debt for WG is 3.68 percent for the 2023 test year.

59. A reasonable average cost for WEPCO's preferred stock is 3.95 percent for the test year.

60. A reasonable weighted average composite cost of capital for WEPCO is 7.54 percent.

61. A reasonable weighted average composite cost of capital for WG is 6.93 percent.

62. It is reasonable to require the applicants to submit an analysis of alternative recovery scenarios for generating units that will be retired prior to the end of their useful life in the applicants' next rate proceeding.

63. It is reasonable for the applicants to be required to report to the Commission on the sale of all or any portion of the Pleasant Prairie Power Plant property.

64. It is reasonable for the applicants' Revenue Sharing Mechanism (RSM), as approved in docket 5-AF-107, to remain in place until the applicants' next rate proceeding.

65. It is reasonable to approve the rate changes for electric service as shown in Appendix B.

66. It is reasonable to consider the full range of electric cost-of-service study (COSS) results, along with other factors, such as bill impacts, when allocating revenue responsibility and designing rates among various customer classes.

67. It is reasonable to accept the comprehensive electric rate design proposed by the applicants, as modified and conditioned by this Final Decision.

68. It is reasonable to authorize the applicants to set the electric residential and small commercial fixed charge at the daily equivalent of $15.00 per month for the 2023 test year.

69. It is reasonable to require that the applicants provide the results of a "basic customer cost" allocation methodology COSS in future rate case proceedings.

70. It is reasonable to authorize the applicants to offer a high load factor credit for the Cp-1 class, at the phased in credit value.

71. It is reasonable for the applicants to offer a renewable energy rider (RER) for its commercial and industrial customers.

72. It is reasonable to authorize the applicants to alter the rate structure of the Cg-3 rate class, consistent with the applicant's proposal in Ex.-WEPCO/WG-Nelson-17.

73. It is reasonable to authorize the applicants to reopen its Cp-FN interruptible tariff to new customers, as modified and conditioned by this Final Decision.

74. It is reasonable for the applicants not to make any alterations to the real time rate schedules before December 31, 2024.

75. It is reasonable for the applicants to alter how billing determinants are derived for customers in the Cp-1 class and to also allow physically connected customers to have their demand measured conjunctively.

76. It is reasonable to limit the maximum demand charges for customers with operations categorized in Standard Industrial Classification Code 4952.

77. It is reasonable for the applicants to eliminate the requirement to install check-meters on newly enrolled systems under WEPCO's CGS-NM and CGS-NP tariffs.

78. It is reasonable to require the applicants to submit a plan no later than the next rate case to allow parallel generation customers the option of installing bi-directional meters where technically feasible.

79. It is reasonable for the applicants to rename the "facilities charge" to "customer charge" in the applicants' tariffs.

80. It is reasonable for the applicants to work with WIEG on evaluating conjunctive demand modifications.

81. It is reasonable for the applicants to extend the current LIFT program and provide additional details regarding the program, in addition a comprehensive review of the applicants'

customer service rules and procedures, including the applicants' policy regarding $600 down payments for reconnection of low-income customer accounts, in separate TE/TG docket filings by the applicants.

82. It is reasonable for the applicants to work with CUB, Commission staff and other interested groups on developing alternative low-income assistance programs, including a potential Percentage of Income Payment Pilot, and a docket to investigate the development of such programs shall be opened by the Commission no later than April 1, 2023.

83. It is reasonable for the applicants to work with CUB, RENEW, and other interested groups on developing a Bring Your Own Device (BYOD) demand response pilot program.

84. It is reasonable to approve the rate changes for steam service as shown in Appendix C.

85. It is reasonable to update the applicant's base cost of fuel for steam service consistent with Ex.-PSC-Meulemans-2.

86. It is reasonable to consider the full range of natural gas COSS results presented in the record when allocating test year 2023 natural gas revenue responsibility.

87. It is reasonable to approve the rate changes for natural gas service as shown in Appendix D for WE-GO and Appendix E for WG.

88. It is reasonable to approve the applicants' proposal for WE-GO and WG to consolidate the agricultural seasonal use sales service classes into one class with a single fixed charge and a declining step block rate design.

89. It is reasonable to approve tariff changes for electric, steam, and natural gas service consistent with the rates shown in Appendices B, C, D, and E.

Conclusions of Law

1. The Commission has jurisdiction under Wis. Stat. §§ 1.12, 196.02, 196.025, 196.026, 196.03, 196.19, 196.20, 196.21, 196.37, 196.374, 196.395, 196.40, and Wis. Admin. Code chs. PSC 113, 116, 134, and 137 to enter a Final Decision authorizing the applicants to place in effect the rates and rules for electric, steam, and natural gas service set forth in Appendices B, C, D, and E, and the fuel cost treatment set forth in Appendix F.

2. The applicable procedural requirements of Wis. Stat. § 196.026(4)-(6) have been satisfied.

3. Each party has been given a reasonable opportunity to present evidence and arguments in opposition to the partial Settlement Agreement as required by Wis. Stat. § 196.026(7)(a).

4. The public interest is adequately represented by the settling parties as required by Wis. Stat. § 196.026(7)(b).

5. The rates and rules for electric, natural gas, and steam service set forth in this Final Decision and Appendices B, C, D, and E, and the fuel cost treatment set forth in Appendix F, are just and reasonable.

6. The Commission's determinations in this Final Decision comply with the Energy Priorities Law.

Opinion

Applicants and its Business

The applicants are public utilities, as defined in Wis. Stat. § 196.01(5). WEPCO conducts its operations primarily in three operating segments: an electric utility segment (WEPCO electric), a natural gas utility segment (WEPCO gas), and a steam utility segment (WEPCO steam). In Wisconsin, WEPCO serves approximately 1,145,000 electric customers and approximately 506,000 natural gas customers. WG is a natural gas distribution public utility that serves approximately 657,000 natural gas customers in Wisconsin. WEPCO steam serves about 400 steam customers downtown and the near south side in Milwaukee, Wisconsin. WEPCO and WG are operating subsidiaries of WEC Energy Group, Inc., a holding company based in Milwaukee, Wisconsin.

Income Statement

The applicants filed a joint application with the Commission on April 28, 2022, requesting authority to adjust electric, natural gas, and steam rates on January 1, 2023. The applicants initially requested Wisconsin jurisdictional revenue increases of 258.3 million (8.5 percent) for its WEPCO electric operations, $50.7 million (10.7 percent) for its WEPCO natural gas operations, and $3.3 million (15.5 percent) for its WEPCO steam operations, based on a 10.00 percent return on common stock equity. The applicants also initially requested revenue increases of $60.1 million (8.3 percent) for its WG operations, based on a 10.20 percent return on common stock equity. On July 8, 2022, the applicants supplemented its initial filing, which had a total impact to the 2023 test year of a net increase of $24.9 million for WEPCO electric operations, $4.7 million for WEPCO gas operations, $0.3 million for WEPCO steam operations, and $1.8 million for WG operations. The applicants' last comprehensive rate case that adjusted base rates was the 2020 test year.[1]

The applicants indicated that the major drivers of the rate increases requested were related to ongoing capital investment to transition the applicants' electric generation fleet from coal to renewables and natural gas, and to enhance distribution reliability. Other significant drivers of revenue deficiency included transmission expense increases, expiring wholesale contracts, amortization of regulatory assets previously authorized by the Commission, and additional tax expense. Factors mitigating the rate increases included savings in day-to-day O&M expenses and reduction to cost of capital from debt refinancing.

Commission staff completed a comprehensive audit of the applicants' initial filing. Based upon its audit and Commission staff's adjustments, Commission staff estimated that at the total company level, a $271.2 million increase or 8.71 percent was needed for WEPCO electric operations, a $41.4 million increase, or 8.62 percent is needed for WEPCO natural gas operations, a $6.8 million increase, or 31.58 percent is needed for WEPCO steam operations, and a 47.2 million increase, or 6.49 percent is needed for WG operations for the 2023 test year. Commission staff's 2023 electric, natural gas, and steam revenue deficiencies were based on a 9.80 percent return on common stock equity. Commission staff's adjustments following the audit were summarized in Ex.-PSC-Probst-1 and included, by way of example, adjustments for items such as:

- Adjustments to natural gas sales revenue;
- Adjustments to fuel costs;
- Reduction to labor related expenses;

[1] Final Decision, *Joint Application of Wisconsin Electric Power Company and Wisconsin Gas, LLC for Authority to Adjust Electric, Natural Gas and Steam Rates*, Docket 5-UR-109 (Wis. PSC Dec. 19, 2019) (PSC REF#: 381305).

- Maintenance adjustments; and
- Adjustments for electric and natural gas plant and CWIP.

In testimony, the applicants and other parties responded to Commission staff's proposed adjustments.

Settlement

The Settlement Agreement

Following the completion of Commission staff's audit, the exchange of multiple rounds of pre-filed testimony, and two days prior to the start of the party hearing session, the applicants filed an Application for Approval of a Settlement Agreement wherein the Settling Parties agreed to resolve some of the issues in the proceeding. The Settlement Agreement was signed by the settling parties, which included most of the intervenors in this proceeding. The parties that did not sign the partial Settlement Agreement were Clean Wisconsin and Walnut Way (together, non-settling parties). The settling parties agreed not to accept many of Commission staff's proposed audit adjustments that had been described in testimony. The table below provides a summary of the percentage rate increase at a 9.80 percent ROE based on Commission staff's revenue deficiency and the Settlement Agreement revenue deficiency:

	Staff	**Settlement**
WEPCO Electric Percentage Rate Increase	8.71%	10.31%
WEPCO Gas Percent Rate Increase Based on Margin Revenue	22.10%	28.40%
WEPCO Steam Percentage Rate Increase	31.58%	40.04%
WG Percentage Rate Increase Based on Margin Revenue	13.92%	17.44%

The settling parties also agreed to several rate design issues, many of which were identified and addressed in the record leading up to the proposed Settlement Agreement.

The non-settling parties objected to the Settlement Agreement and argued that it would not result in rates that were just and reasonable because it failed to provide sufficient relief to low income customers, and failed to mitigate the rate increases by not increasing funding for energy efficiency, renewable energy, or other mitigation measures or alternative rate designs.

Settlement Law

Wisconsin Stat. § 196.026 provides that the Commission may approve a settlement agreement if all of the following are met: (1) each party who has either filed an objection, non-objection or failed to respond has been given reasonable opportunity to present evidence and arguments in opposition to the settlement agreement; (2) the Commission finds that the public interest is adequately represented by the parties who entered into the settlement agreement; and (3) the Commission finds that the settlement agreement represents a fair and reasonable resolution to the docket, is supported by substantial evidence on the record as a whole, and complies with applicable law, including that any rates resulting from the settlement are just and reasonable. Wis. Stat. § 196.026(7). The Commission may approve a settlement agreement in whole or in part and with conditions deemed necessary by the Commission. Wis. Stat. § 196.026(8). If the settlement does not resolve all of the issues in the docket, the Commission shall decide the remaining issues in accordance with applicable law and procedure. *Id.*

Compliance with Procedural Requirements of Wis. Stat. § 196.026(4)-(6), (7)(a) and 7(b)

Wisconsin Stat. § 196.026 establishes several procedural requirements that must be satisfied before the Commission can consider the merits of a proposed settlement. Wisconsin Stat. § 196.026(4) provides that parties to a docket may agree upon a resolution of some or all of the issues. Here, as discussed previously, the settling parties agreed to resolve all of issues except ROE and revenue allocation. Wisconsin Stat. § 196.026(4) requires that a written settlement agreement and any documents, testimony, or exhibits be filed with the Commission.

On October 3, 2022 and October 14, 2022, the applicants filed the Settlement Agreement and application for approval of a Settlement Agreement, along with supporting documentation, and certified the same were served on all parties in this docket satisfying the requirements of Wis. Stat. § 196.026(4).

Wisconsin Stat. § 196.026(5) provides that where a proposed settlement agreement is not supported by all of the parties, at least one conference must be convened, with notice and opportunity provided to all parties, to discuss the proposed settlement. On October 7, 2022, such a conference was held, thereby satisfying the requirements of Wis. Stat. § 196.026(5).

Wisconsin Stat. § 196.026(6) requires that, within 30 days of service of a settlement agreement, each party shall respond in writing by filing and serving on all parties the party's agreement, objection, or non-objection to the settlement agreement. A party objecting to the settlement agreement is required to state all objections with particularity and specify how the party would be adversely affected by each provision of the agreement. Wisconsin Stat. § 196.026(7)(a) requires that the Commission find that each party in the docket has been given a reasonable opportunity to present evidence and arguments in opposition to the settlement.

The Commission finds that all parties have been afforded an opportunity to present evidence and arguments in response to the Settlement Agreement through the submittal of written responses pursuant to Wis. Stat. § 196.026(6) and supplemental settlement-specific testimony and briefing. Walnut Way argued that it did not have an opportunity to participate in a hearing regarding the proposed Settlement Agreement. This argument ignores the fact that

Walnut Way, as a signatory to the October 11, 2022 Motion to Approve Modification of Issues and Supplementation of the Record, agreed that a "paper" hearing (i.e. submission of written testimony and briefs) was sufficient to address the proposed Settlement Agreement. Further, nothing in Wis. Stat. § 196.026 specifically requires a hearing on a settlement unless otherwise required by law. The settlement law specifically contemplates an opportunity to respond via the filing of written positions stating the parties' agreement, objection or nonobjection to the settlement. Wis. Stat. § 196.026(6).

CUB, WIEG, RENEW, Walmart, MMSD, and Roundy's filed responses reiterating their support for the Settlement Agreement.[2] Walnut Way objected to the Settlement Agreement and filed supplemental direct testimony and exhibits. In addition, Walnut Way and Clean Wisconsin objected to the proposed Settlement Agreement in a joint filing. Because this proceeding increased rates, a hearing was required and held pursuant to Wis. Stat. § 196.20. Walnut Way cross-examined witnesses during that hearing.

The public was also provided an opportunity to be heard in the form of testimony at the public hearings on September 28, 2022 and November 3, 2022 and through the submittal of written comments. For these reasons, the Commission finds that Wis. Stat. § 196.026(7)(a) has been satisfied.

Under Wis. Stat. § 196.026(7)(b), the Commission may approve the Settlement Agreement if it finds that the public interest is adequately represented by the parties who entered into the Settlement Agreement. In this case, CUB, WIEG, and RENEW, together represent residential, small business, and large industrial customers served by the applicants. MMSD is a

[2] For parties not responding to the settlement, the lack of a response is treated as a nonobjection under the law. Wis. Stat. § 196.026(6).

regional government agency that is a large customer of the applicants. Walmart is a national retailer of goods and services throughout the United States and has significant operations in Wisconsin. Roundy's operates numerous grocery stores in Wisconsin that purchase their electric supply from the applicants. Local 420 and Local 2150 have many members that live and work in the applicants' service territory. Non-settling parties argued that public interest was not adequately represented by the settling parties because none of the settling parties represent the specific, unique interests of the non-settling parties' constituency. Clean Wisconsin argued that none of the settling parties represented the environmental protection interests unique to it. Walnut Way argued that none of the settling parties represented the interests of low and moderate income and minority customers. The applicants disagreed, noting that the Settlement Agreement was signed by a wide array of parties, including groups whose interests align overall with the interests represented by the non-settling parties.

The Commission does not find merit in the non-settling parties' argument which seems to be arguing that the public can only be adequately represented where either all of the parties that have actively participated in the proceeding join the settlement, or where the settling parties represent the specific or unique interests of the parties who decide not to participate in the settlement. Such arguments find no support in the law. Wisconsin Stat. § 196.026 specifically contemplates disputed settlements, requiring that at least one settlement conference be held if the settlement is disputed. Wis. Stat. § 196.026(5). The law also requires objecting parties to state objections with particularity. Wis. Stat. § 196.026(6). The law also requires only that the "public interest", not any specifically identified individualized interests, be represented by the settling parties. The non-settling parties' position would allow one party to hold the entire settlement hostage. That is contrary to the law as drafted.

Here environmental and customer interests were represented by the settling parties. Accordingly, for these reasons and given the wide cross-section of customers represented by the settling parties, the Commission finds that the public interest is adequately represented. The Commission has repeatedly found that such a cross-section adequately represents the public interest.[3] The Legislature has also identified CUB as the consumer advocate for residential, small commercial, and small industrial energy utility customers. Wis. Stat. § 196.315(2)(a). For these reasons, the Commission finds that the procedural requirements of Wis. Stat. § 196.026(4)-(6), (7)(a) and (7)(b) have been satisfied.

Just and Reasonable Rates and Rules for Service

Notwithstanding compliance with the procedural requirements of Wis. Stat. § 196.026(4)-(6), (7)(a) and 7(b), there is nothing in Wis. Stat. § 196.026 that mandates that the Commission accept a settlement, either in whole or in part. Wisconsin Stat. § 196.026(7) and sub. (8) expressly recognize the discretionary nature of the Commission's approval, stating that the Commission "*may* approve a settlement agreement under sub. (4) . . . ." (emphasis added.) The Commission *may* only approve a settlement if it "finds that the settlement agreement represents a fair and reasonable resolution to the docket, is supported by substantial evidence on

[3] See, e.g., Final Decision, *Application of Wisconsin Power and Light Company for Authority to Adjust Electric and Natural Gas Rates*, docket 6680-UR-121 (Wis. PSC Dec. 20, 2018) (PSC REF#: 355884) (CUB and WIEG); *Final Decision, Application of Northern States Power Company-Wisconsin for Authority to Adjust Electric and Natural Gas Rates*, No. 4220-UR-124 (Wis. PSC Dec. 12, 2019) (PSC REF#: 380611) (CUB, WIEG, RENEW); Final Decision, *Application of Madison Gas and Electric Company for Authority to Change Electric and Natural Gas Rates*, docket 3270-UR-123 (Wis. PSC Dec. 29, 2020) (PSC REF#: 402247) (CUB, WIEG, RENEW, UW).

the record as a whole, and complies with applicable law, including that the rates resulting from the settlement agreement are just and reasonable." Wis. Stat. § 196.026(7)(c).

Nothing in Wis. Stat. § 196.026 changed the Commission's authority and responsibility to set just and reasonable rates in accordance with Wis. Stat. §§ 196.03 and 196.37.[4]

Rate setting, including reviewing settlements that adjust rates, is an area in which the Commission has special expertise. *Brookfield v. Milwaukee Metropolitan Sewerage Dist.,*141 Wis. 2d 10, 15, 414 N.W.2d 308 (Ct. App. 1987). It has set utility rates for more than 100 years. In ratemaking, the Commission exercises a legislative function. *Wis. Mfr. And Commerce v. Public Serv. Comm 'n (WMC),*94 Wis. 2d 314, 319, 319, 287 N.W.2d 844 (1979). "It is well established that the [Commission], in designing a rate structure that will enable a utility to recover the total revenue authorized, has wide discretion in determining the factors upon which it may base its precise rate schedule. . . . Rate-making agencies are not bound to any single regulatory formula; they are permitted to make the pragmatic adjustments, which may be called for by particular circumstances, unless their statutory authority plainly precludes this." *Id.* at 320, (citing *City of West Allis v Pub. Serv. Comm 'n,* 42 Wis. 2d 569, 167 N.W.2d 401 (1969) (footnotes omitted). Determining whether rates are just and reasonable often requires a high degree of discretion, judgment, and technical analysis. Such decisions involve intertwined legal, factual, and public policy determinations. The Commission, as fact finder, is charged with sifting through all of the information to reach a well-reasoned decision. In doing so, the Commission uses its experience,

[4] Wisconsin Stat. § 196.03 provides that any rate charged by a public utility for its service "shall be reasonable and just and every unjust or unreasonable charge for such service is prohibited and declared unlawful." Similarly, Wis. Stat. § 196.37 provides that if the Commission determines that any rate charged by a public utility for its service is unjust and unreasonable, the Commission "shall determine and order reasonable rates [and] charges[.]"

technical competence, and specialized knowledge to determine the credibility of each witness and the persuasiveness of highly technical evidence presented on each issue.

The Commission, in the exercise of its discretion under Wis. Stat. § 196.026, declines to approve the Settlement Agreement in whole or in part. The Commission was unable to reach consensus on which part or parts, if any, of the Settlement Agreement, taken individually or collectively, would result in a fair and reasonable resolution of the docket and rates that are just and reasonable.[5] Instead, in applying its experience and expertise, and based upon the substantial evidence in the record, the Commission establishes just and reasonable rates and terms of service as described more fully herein pursuant to its long-standing authority under Wis. Stat. §§ 196.03, 196.37, and 196.395 – just as it has done for decades predating the settlement law.[6]

Revenue Requirement

Natural Gas Storage Inventory, Working Capital, and Sales Adjustment

Commission staff proposed an adjustment to WG's natural gas revenues of $5.0 million as a result of a sales increase to the residential and the small commercial and industrial classes.

[5] Commissioner Nowak would have approved the Settlement Agreement as filed.

[6] *See, e.g.,* Final Decision, *Joint Application of Wisconsin Elec. Power Co. & Wisconsin Gas, LLC, Both d/b/a We Energies, for Auth. to Adjust Elec., Nat. Gas, & Steam Rates,* docket 5-UR-105 (Wis. PSC Nov. 3, 2011) (PSC REF#: 155380) (authorizing no rate change between 2012 and 2013 for Wisconsin Electric Power Company and Wisconsin Gas by suspending $148 million of amortizations); Final Decision, *Application of Madison Gas & Elec. Co. for Auth. to Freeze Elec. & Nat. Gas Rates, Subject to Conditions*, docket 3270-UR-119, (Wis. PSC July 26, 2013) (PSC REF#: 187928); Final Decision, *Application of Wisconsin Power & Light Co. for Auth. to Adjust Elec. & Nat. Gas Rates,* docket 6680-UR-118 (Wis. PSC July 19, 2012) (PSC REF#: 168724); Final Decision, *Application of Wisconsin Power & Light Co. Regarding the 2020 Test Year Elec. & Nat. Gas Base Rates*, docket 6680-UR-119 (Wis. PSC July 17, 2014) (PSC REF#: 210409); Final Decision, *Application of Wisconsin Power & Light Co. for Auth. to Adjust Elec. & Nat. Gas Rates,* docket 6680-UR-120, (Wis. PSC Dec. 22, 2016) (PSC REF#: 295820)*;* Final Decision, *Joint Application of Wisconsin Elec. Power Co. & Wisconsin Gas LLC for A Base Rate Freeze for Test Years 2018 & 2019 and Application of Wisconsin Pub. Serv. Corp. for A Base Rate Freeze for Test Years 2018 & 2019*, dockets 5-UR-108 and 6690-UR-125 (Wis. PSC Sept. 8, 2017) (PSC REF#: 330746).

For WG's natural gas residential class, Commission staff used a five-year linear trend to forecast the 2023 customer count and a four-year compound annual growth rate to forecast the 2023 use per customer. For the small commercial and industrial class, the 2020 three-year compound annual growth rate was used to forecast the 2023 customer count. The use per customer was adjusted to fit the historical average from 2017 through 2021. For both classes the main driving factor behind the adjustment is the use per customer. The applicants expect residential use to return to pre-pandemic levels and small commercial and industrial use to stay at current levels instead of returning to pre-pandemic levels. Commission staff's forecast uses both pre-pandemic and current levels to come out somewhere in the middle.

The applicants identified that higher financing costs the applicants are incurring to purchase gas for storage have dramatically increased the forecast weighted average cost of gas associated with the 13-month rolling average of natural gas in inventory. Based on that, the applicants proposed that working capital requirements for natural gas inventory should be updated prior to the Commission's deliberations, to ensure the applicants receive fair and reasonable recovery of their actual costs to finance gas that is purchased, stored, and withdrawn for the benefit of customers during times of peak demand and high prices. While Commission staff noted that it was not necessarily opposed to this request, staff observed that working capital impacts have not traditionally been subject to adjustment prior to the Commission's discussion of record.

The Commission finds Commission staff's methodology for estimating natural gas sales is reasonable and accepts Commission staff's natural gas price impacts related to gas sales for the 2023 test year. Commission staff looked not only at historic sales but also the linear growth rate. The Commission does not find reasonable the applicants' assumptions that residential use will return to pre-pandemic levels or that small commercial and industrial use will remain static. Including 2021 data in the forecast, as well as looking at historic data, strikes the right balance and results in a reasonable estimate of natural gas sales.

Commissioner Nowak dissents.

The Commission also finds it reasonable to not include the applicants' requested working capital adjustment because working capital impacts have not traditionally been subject to adjustment prior to the Commission's discussion of record and the Commission finds no reason to deviate from this past practice.

Commissioner Nowak dissents.

Full Time Equivalency Adjustment

Commission staff reduced the filed 2023 regular FTEs to reflect the year-to-date average through May 2022 for each utility, which is in line with the historic trend. For part-time and seasonal employees, Commission staff used a three-year average to determine FTEs and an appropriate expense level per FTE. Commission staff adjusted total company FTEs by 85 positions, which was comprised of approximately 18 management positions, 4 non-represented positions, and 63 represented positions. The represented FTE adjustment was comprised of 49 regular FTEs and 14 temporary and seasonal positions. While Commission staff did not support the return of all adjusted FTEs, given succession planning concerns and the difficulties of the labor market, Commission staff suggested it may be reasonable for the Commission to consider restoring a portion of the FTEs. However, Commission staff's recommended adjustment consideration could be focused on the regular represented FTEs as they may be less susceptible to seasonal fluctuations and provide for a more stable workforce.

(Direct-PSC-Probst-6-13; Surrebuttal-PSC-Probst-3:21.) Commission staff identified that should the Commission wish to retain the adjustments related to part-time seasonal and non-represented positions, the impact would be approximately $9.2 million for WEPCO electric operations, $1.0 million for WEPCO natural gas operations, $0.3 million for WEPCO steam operations, and $0.6 million for WG. (SA-Direct-PSC-Probst-6-8.)

The applicants argued that the forecasted employee headcount and associated cost reflects the number of employees that are needed, in management's judgment, to operate the company's electric and natural gas operations safely and reliably in 2023. (Rebuttal-WPSC-Zgonc-5-6.)

The applicants' headcount has been decreasing since 2016. While this downtrend will presumably plateau and stabilize, it is unclear from the record when that will occur or what the applicants' stable FTE level is or should be. The Commission is sensitive to challenges in the labor market identified by the applicants, and therefore does not accept all of Commission staff's FTE adjustments. The Commission rejects staff's adjustment to the regular represented FTEs, as those are less susceptible to seasonal fluctuations and accepts only Commission staff's FTE reduction relating to the part-time seasonal and non-represented positions.

Commissioner Nowak dissents.

Maintenance Adjustment

Commission staff proposed decreases to the maintenance expense for various operating plants including: a decrease of $0.4 million for Valley (Coal); a decrease of $0.07 million for Concord (Natural Gas), a decrease of $0.3 million for Paris (Natural Gas); and a decrease of $6.2 million for Port Washington (Natural Gas) in the 2023 test-year revenue requirement.

Based on the evidence in the record, the Commission finds it reasonable to accept all O&M maintenance adjustments proposed by Commission staff. The adjustments are based, in part, on historical data dispatch models that the Commission finds to be reasonable.

Commissioner Nowak dissents.

COVID–19 Regulatory Asset

The March 24, 2020 order in docket 5-AF-105 authorized deferral of expenditures incurred by utilities resulting from compliance with Emergency Order 11, orders by the Commission in docket 5-UI-120, and as otherwise required to ensure the provision of safe, reliable, and affordable access to utility services during the declared public health emergency for COVID-19. The December 22, 2021 Order in docket 5-AF-105 ended the deferral as of December 31, 2021 and directed utilities seeking recovery of the deferred regulatory asset to file a rate application within a one-to two-year period from the effective date of that Order.

The applicants initially sought Commission approval to amortize the deferred COVID-19 regulatory asset authorized in docket 5-AF-105 over a two-year period of 2023 through 2024. In response, CUB witness Corey Singletary suggested that the Commission could consider whether some adjustments or cost sharing between customers and the utility shareholders might be appropriate. Commission staff's revenue requirement presented the recovery period for COVID-19 costs over two years.

The Commission finds that it is reasonable to direct the applicants to write-off the entirety of the applicants' COVID-19 regulatory asset over two years. This reduces the applicants' test year revenue requirement by $9.5 million for WEPCO electric operations, $1.0 million for WEPCO natural gas operations, and $2.4 million for WG operations. The Commission's order in docket 5-AF-105 did not bind the Commission to any specific treatment for these costs in any future proceeding involving rates or other matters before the Commission.[7] Writing off these costs provides meaningful rate relief to customers who are experiencing economic hardships, and allowing the write-off to occur over a two-year period mitigates impacts to the applicants.

Commissioner Nowak dissents.

Whitewater Power Station

WEPCO applied for Commission approval to acquire a 50 percent ownership share of the Whitewater Power Station (Whitewater) in docket 5-BS-264. As the docket had not been authorized by the Commission at the time of audit completion, Commission staff removed it from the 2023 test-year plant estimates.

The Commission authorized the proposed acquisition of Whitewater in its Final Decision dated December 22, 2022. Therefore, it is reasonable to include the impacts of the Whitewater acquisition in the 2023 test year electric revenue requirement.

West Riverside Energy Center

In docket 5-BS-265, Wisconsin Power and Light Company(WP&L), Wisconsin Public Service Corporation (WPSC), and Madison Gas and Electric Company (MGE) sought approval from the Commission under Wis. Stat. § 196.80 to transfer ownership shares of the West Riverside Energy Center of 125 megawatt (MW) (100 MW from WP&L to WPSC, 25 MW from WP&L to MGE) of natural gas fired generating capacity at a cost of approximately $101.9 million for the transaction between WP&L and WPSC and $25.1 million for the transaction between

[7] Order, *Accounting Treatment for Utility Costs Incurred Due To and During Declared Public Health Emergency for COVID-19*, docket 5-AF-105 (Wis. PSC Mar. 24, 2020) (PSC REF#: 386353, at 4).

WP&L and MGE. WPSC planned to transfer the purchase option to acquire West Riverside to WEPCO electric. As the docket had not yet been authorized by the Commission at the time of audit completion, Commission staff removed it from the 2023 test-year plant estimates. In addition, due to an oversight, the corresponding O&M costs totaling $0.8 million were not removed from Commission staff's revenue requirement.

The Commission's December 22, 2022 Interim Order in docket 5-BS-265 approved the transaction between WP&L and MGE, however, the Commission directed Commission staff to conduct further investigation regarding the proposed ownership transfer from WP&L to WPSC consistent with its discussion. As the transaction has not been approved, the Commission finds it reasonable to not accept the impacts of the proposed acquisition of West Riverside, including O&M costs associated with the proposed acquisition, in WEPCO electric's revenue requirements for this proceeding.

The applicants requested that if approval of the acquisition is not granted prior to the test-year in this proceeding, that the Commission authorize the applicants to defer the amount with an appropriate carrying costs, for collection in future rates. Based on the criteria in SOP 94-01, the Commission finds this request reasonable and authorizes the deferral, with carrying costs at WEPCO's short-term debt rate.

Force Majeure Cost Increase

Badger Hollow II was approved by the Commission in its Final Decision dated March 6, 2022 in docket 5-BS-234. (PSC REF#: 385279.) On June 30, 2022, the applicants filed a *force majeure* notification for Badger Hollow II citing impacts caused by global supply chain events, labor market events, and supply chain and delivery challenges, which affected the vendor's major components and materials used in the project.[8] Commission staff removed the *force majeure* cost increase from WEPCO electric's revenue requirement pending a Commission decision on whether to authorize recovery of the *force majeure* cost increase identified in docket 5-BS-234.

Based on the evidence in the record, the Commission finds it reasonable to accept and include the *force majeure* costs associated with the Badger Hollow II project in WEPCO electric's revenue requirement for the 2023 test year. Timely notice of the *force majeure* event was received by the Commission, and WEPCO's explanation of the events and response thereto were reasonable.

Steam System Restoration and Reliability Improvements

WEPCO steam filed for authority to restore existing steam facilities associated with flooding of its mitigation infrastructure in docket 6630-CU-104. The request included steam restoration costs of $7.9 million and $7.1 million for steam reliability improvements. At the time of audit completion, the Commission had not yet issued a Final Decision in that proceeding. Therefore, Commission staff removed these costs from the 2023 test-year plant estimates. However, on July 29, 2022, the Commission issued a Final Decision granting authority for the $7.1 million reliability improvement project. In its Final Decision the Commission noted that it does not retroactively issue authority for work that is commenced or completed prior to receiving Commission authorization, but acknowledged that the applicants had provided notice of the $7.9 million restoration work. Of the $7.9 million identified, $1.5 million was expensed in 2021

[8] The applicants also filed a *force majeure* notification for the Paris Solar Farm and BESS, the construction and acquisition of which were authorized in dockets 9801-CE-100 and 5-BS-254, respectively. The applicants did not seek to include or otherwise address the impacts of the *force majeure* for Paris in this proceeding.

and is therefore considered retroactive in nature. Based on the evidence in the record, the Commission finds it reasonable to include the revenue requirement impacts of the steam system restoration and reliability improvements in the steam revenue requirement.

At the time of the Commission's discussion of the record in this proceeding, the applicants had not received any insurance proceeds relating to the flooding which caused the steam system restoration work. Therefore, the Commission authorizes a deferral, with carrying costs at the short-term debt rate, for any insurance proceeds relating to the flooding which resulted in the steam system restoration work.

Inflation Adjustment

The applicants requested an increase in revenue requirement of $12.5 million for WEPCO electric operations, $2.4 million for WEPCO natural gas operations, $0.2 million for WEPCO steam operations, and $3.6 million for WG operations for costs associated with higher interest rates and inflation experienced since the initial filing in this docket on April 28,2022.

Based on long standing Commission practice, the inflation rate is established at the date the application is filed and once set generally is not updated for revenue requirement purposes. Further, capital costs and CWIP estimates are not traditionally subject to inflationary adjustments after audit completion. However, Commission staff testified that given the economic uncertainty and supply chain issues, the Commission may wish to consider whether it would be appropriate to update O&M and rate base for the inflationary impacts identified by the applicants.

Based on the evidence in the record and past Commission practice, the Commission finds it reasonable not to reflect updated inflation data in the revenue requirement in this proceeding. While the Commission recognizes the current economic uncertainty and supply chain issues, this is not the first (and probably not the last) time utilities have had to navigate such challenges, and have been able to do so in the past without such an adjustment. Further, there are numerous other tools available to the applicants, including the fuel rules and deferrals, to mitigate risks associated with uncertain times.

Commissioner Nowak dissents.

Inflation Reduction Act

On August 16, 2022, the Inflation Reduction Act of 2022 (Act) was signed into law. At this time, it is unknown if there will be any potential impacts resulting from the Act. Therefore, the Commission finds it reasonable to require the applicants to defer, with carrying costs at the applicants' short-term debt rate, any impacts of the Act to a future rate proceeding. This ensures both the applicants and their customers remain whole as a deferral would capture any cost increases or savings.

Plant and CWIP

Commission staff plant and CWIP adjustments were comprised of multiple components. First, Commission staff adjusted the 2021 balance to reflect year-end actuals for plant in service, CWIP, and accumulated depreciation rather than the estimated 2021 year-end balances used by the applicants. Next, after isolating discrete large projects from the analysis, Commission staff applied historic budget-to-actual percentages to the remaining 2022 and 2023 electric and natural gas expenditures and plant additions. The adjustments reflected that based on a three-year average budget to actual analysis, the applicants have historically forecasted higher construction expenditures than what has occurred, and forecasted a faster entry of plant in service than what has occurred.

The applicants argued that high inflation rates have led to significant price increases by several vendors that support capital projects, (e.g. anticipated increased transformer costs and distribution poles cost and fuel price surcharges). As such, the applicants argued that the Commission should reject Commission staff's adjustments to plant and CWIP not associated with large projects.

The Commission is not swayed by the applicants' argument, and based on the information in the record, the Commission finds it reasonable to accept Commission staff's adjustments for electric, natural gas, and steam plant and CWIP. Capital costs and CWIP estimates have not traditionally been subject to inflationary adjustments after audit and the Commission does not find the facts and circumstances presented justify deviating from this past practice. As noted above, there are a number of other tools available to the applicants to mitigate risk associated with uncertainty.

Commissioner Nowak dissents.

Pension and Other Post-Employment Benefits (OPEB)

Given market volatility and the nature of many of the factors that determine the pension and OPEB costs being outside of the applicants' control, Commission staff suggested that the Commission may wish to apply escrow accounting treatment to these costs. This determination would be consistent with prior Commission decisions in dockets 3270-UR-123, 4220-UR-125, and 6680-UR-122. Additionally, 2021 Wisconsin Act 24 provides for escrow accounting treatment for pension and OPEB costs. The applicants did not request OPEB escrow accounting treatment.

In the applicants' last rate case, the Commission recognized that the applicants' historic treatment was atypical. (PSC REF#: 381305, at 60.) In that case, the Commission directed that the applicants, beginning January 1, 2022, request deferral accounting treatment for pension settlement costs. (*Id.*) The applicants did not do this. In docket 5-AF-107, the applicants requested and the Commission approved at that time a continuation of the unique approach of allowing the applicants to create a regulatory asset or liability for pension balance settlement costs or benefits as defined in the Final Decision in docket 5-UI-104 until December 31, 2022.[9] While the Commission recognized the reasonableness and benefits of a change that would require deferral of pension and OPEB expenses, the Commission agreed not to require such a change for 2022 based on the Commission's consideration of the overall agreement that had been reached with the parties, which resulted in no change in base rates. Although it was not ordered in docket 5-AF-107, the Commission has since required other public utilities to implement escrow accounting treatment for pension and OPEB expenses. Deferral of pension and OPEB expenses with escrow accounting treatment provides customers assurance that future rates will recover only those actual costs realized by the applicants for such expenses. Accordingly, the Commission finds it reasonable to require the applicants to implement escrow accounting treatment for pension and OPEB costs.

Commissioner Nowak dissents.

Standard and Poor's (S&P) Valuing Off Balance Sheet Obligations

The applicants requested an increase to the revenue requirement associated with information learned in June (after their initial direct filing) that S&P would start applying an

[9] Final Decision, *Joint Application of Wisconsin Electric Power Company and Wisconsin Gas LLC for Approval of Certain Accounting Treatments*, Docket 5-AF-107 (Wis. PSC Sept. 22, 2021) (PSC REF#: 421294, at 18).

updated methodology for valuing off balance sheet obligations across the utility industry. For WEPCO electric, this change relates to how the Point Beach purchase power agreement (PPA) off balance sheet obligation is valued. S&P's updated valuation matches revised methodology for assessing the impact of those off balance sheet obligations used to evaluate utilities' credit ratings. S&P noted that under this methodology approximately $600 million more of the future payment obligations under the Point Beach PPA is to be viewed as debt-equivalent.

The impact to WEPCO's revenue requirements is an increase of $19.9 million for WEPCO electric operations, $3.8 million for WEPCO natural gas operations, and $0.2 million for WEPCO steam operations. The revenue requirement impacts to WEPCO natural gas and WEPCO steam occur mechanically because WEPCO is capitalized as a legal entity and not by operating utility.

Based on the evidence in the record, the Commission accepts the revenue requirement increase related to the S&P's methodology change for valuing off balance sheet obligations.

Commissioner Huebner dissents.

Oak Creek Power Plant (OCPP) 5 and 6

WIEG witness Lane Kollen proposed in his direct testimony that because circumstances potentially affecting the retirement of OCPP units 5 and 6 and other units can and may change quickly, it is possible that the applicants may again reconsider the retirement dates of the units. (Direct-WIEG-Kollen-15.) The Commission recently addressed a similar concern regarding a potential delay in the retirement of Edgewater 5 in its Final Decision in docket 6680-UR-123. (PSC REF#: 427760.) In that proceeding, the Commission found it reasonable to defer any differences in estimated and actual revenue requirement associated with retiring Edgewater 5 resulting from a change in the units' retirement date.

Based on the evidence in the record, the Commission finds it is reasonable to require deferral accounting treatment to capture the differences between estimated and actual revenue requirement impacts associated with retiring Oak Creek Power Plant (OCPP) 5 and 6 resulting from a change in the units' May 2024 retirement date.

Conservation

The applicants proposed a total conservation budget of \$55.9 million, with \$39.2 million allocated to electric operations and \$16.7 million allocated to natural gas operations. Of the \$39.2 million for electric operations, \$33.8 million is for the applicants' required Focus on Energy (Focus) contribution and \$5.4 million was for customer service conservation (CSC) activities, including voluntary programs. Of the \$16.7 million allocated to natural gas operations, \$12.1 is for the applicants' required Focus contribution and \$4.6 is for CSC activities, including voluntary programs.

Clean Wisconsin and Walnut Way argued that the applicants' CSC activities and budget were insufficient. Walnut Way recommended that the applicants be required to adopt a geo-targeted income qualified pilot. Clean Wisconsin recommended that the applicants be directed to increase investment in voluntary energy efficiency programs over 4-years through an energy efficiency performance incentive mechanism.

While additional energy efficiency programs and expanded voluntary programs are worthy of further consideration, Wis. Stat. § 196.374(2)(a)3. prohibits the Commission from requiring the applicants to fund energy efficiency and renewable energy programs that are in addition to Focus. Wisconsin Admin. Code § PSC 137.08(2) requires a request to administer a voluntary program come from the applicants.

As a result, the Commission finds a reasonable level of expensed conservation costs recoverable in rates for the 2023 test year is $39.2 million for WEPCO electric operations, $6.7 million for WEPCO natural gas operations, and $10.0 million for WG. It is reasonable to direct the applicants to record these expense amounts annually until they are superseded by a Commission order authorizing new conservation escrow accruals.

The Commission encourages the applicants to consider the proposals offered in this proceeding. If the applicants have not filed for updated voluntary energy efficiency programs by June 30, 2023, the applicants shall instead file by that date a status report of the applicants' forward-looking energy efficiency programs to increase cost effective energy efficiency in its service territories. Such a plan may be in coordination with progress or outcomes from docket 5-EI-158, and any other collaborative initiatives or discussions involving the applicants, parties and/or customers. The revenue requirement for any new voluntary energy efficiency program could be included in the limited electric reopener for test year 2024.

Commissioner Nowak dissents as to the requirement to file a status report on the applicants' forward-looking energy efficiency programs.

Electric Fuel Costs

Pursuant to Wis. Admin. Code § PSC. 116.03, each of the five major investor-owned Wisconsin electric utilities must file a proposed fuel cost plan for each calendar year, known as the plan year, as part of a general rate case proceeding, or if the utility does not file a general rate case, as a proceeding limited in scope to fuel cost. This fuel cost plan must include a calculation of certain fuel costs as described in Wis. Admin. Code § PSC 116.02, as well as the other information required by Wis. Admin. Code § PSC 116.03(2). After a hearing, the Commission approves the utility's fuel cost plan and establishes the utility's rates in accordance with the approved fuel cost plan. Wis. Admin. Code § PSC 116.03(3).

The Commission finds that a reasonable estimate of the applicants' 2023 Fuel Cost Plan monitored fuel costs is $967,184,461, which reflects the costs of generation and purchased energy, minus revenues from opportunity sales of energy and capacity. The 2023 monitored fuel costs divided by the 2023 estimate of native energy requirements of 23,667,440 MWh results in an average net monitored fuel cost per MWh of $40.87. Appendix F shows the monthly fuel costs to be used for monitoring purposes.

It is reasonable to monitor the applicants' fuel costs using a plus or minus 2.0 percent bandwidth, as provided in Wis. Admin. Code § PSC 116.06(3).

Uncontested Fuel Adjustments and Delayed Fuel Cost Exhibit

Commission staff proposed the following uncontested adjustments:

- An increase of approximately $5,366,000 due to the removal of Whitewater and West Riverside generation facilities from the forecast;
- An increase of approximately $352,000 to reflect updating historical hydroelectric generation that supports the 2023 forecast;
- An increase of approximately $246,000 by adjusting historical wind generation that supports the 2023 forecast;
- A decrease of approximately $5,972,000 for the impact correcting Equivalent Unplanned Outage Rates (EUOR) for various units;
- A decrease of approximately $12,283,000 for the impact of the addition of bid adders and the removal of must run modelling for regional non-WEC coal units;

- An increase of approximately $59,645,000 to reflect the NYMEX updated natural gas pricing outlook for 2023 as of June 15, 2022;
- An increase of approximately $6,121,000 to reflect the impact of updated delivered cost of coal;
- A decrease of approximately $2,645,000 to reflect changes in WEC Energy Group Generation Reshaping Plan, including delaying the retirements of the South Oak Creek and Columbia coal units;
- A decrease of approximately $725,000 to reflect changing the Weston RICE generating plant dispatch modelling parameters from must run to economic;
- An increase of approximately $365,000 to reflect updating the cost of emission allowances;
- A decrease of approximately $664,000 to reflect modifying Weston 3 and Weston 4 coal unit’s outage schedule;
- A decrease of approximately $256,000 to reflect modifying West Riverside’s Equivalent Unplanned Outage Rates (EUOR);
- A decrease of approximately $135,000 to reflect updating the costs of biomass contracts for the Rothschild plant and natural gas related contracts for the Fox plant;
- A decrease of approximately $570,000 to reflect the removal of off-peak bid adders for Port Washington;
- A decrease of approximately $1,247,000 to reflect updating the Port Washington’s duct burner generating capabilities;

- An increase of approximately $5,759,000 to reflect the reduction of coal generation due to railroad coal delivery problems;
- A decrease of approximately $243,000 to reflect Commission's staff increase in retail sales for WPSC due to the fact that the increase in electric sales increases the Locational Marginal Prices (LMPs) for the applicants, making applicants' generation more valuable and thereby decreasing the applicants' monitored fuel cost;
- An increase of approximately $12,920,000 to reflect updates of a series of outside the models including a large reduction in capacity sales revenue;
- An increase of approximately $2,407,000 to reflect updated natural gas pricing as of October 17, 2022;
- An increase of approximately $14,705,000 to reflect updating the delivered coal costs of using mid-October 2022 pricing;
- A decrease of approximately $28,429,000 to reflect updating MISO/PJM coal constraints in mid-October 2022;
- A decrease of approximately $6,408,000 to reflect the updating the impact of applicants' and WPSC's coal rail constraints in mid-October 2022 (as with the electric sales adjustment for WPSC, the coal constraints for WPSC cause LMPs to increase, lowering applicants' monitored fuel costs);
- A decrease of approximately $4,723,000 to reflect applicants' 50 percent ownership share of the Whitewater generating station; and

- An increase of approximately $2,412,000 to reflect adjustments outside the model effective mid-October 2022.

The Commission finds it reasonable to accept Commission staff's uncontested fuel adjustments to the applicants' forecasted 2023 monitored fuel costs, and incorporate updated NYMEX futures settlement prices as of October 17, 2022, for natural gas, heating oil, and mid-October 2022 spot coal pricing.

Whitewater (5-BS-264) and West Riverside (5-BS-265) Proposed Generating Assets

The applicants included the yet to be approved Whitewater and West Riverside generating asset acquisitions in their initial fuel cost plan application for 2023. These generators were excluded from the 2023 fuel forecast pending the Commission consideration of the applications. At the open meeting of November 10, 2022, the Commission reviewed these proposed acquisitions. The Commission's December 22, 2022 Final Decision in docket 5-BS-264 authorized the acquisition of the Whitewater plant (50 percent ownership shares each for the applicants and WPSC) and therefore the impacts of Whitewater were included in the proposed 2023 fuel cost plan in the delayed exhibit. The Commission finds inclusion of these costs to be reasonable. The Commission's December 22, 2022 Interim Order in docket 5-BS-265 directed Commission staff to conduct additional review of the applicants' acquisition of West Riverside. Therefore, the impacts of the West Riverside plant were excluded from the 2023 fuel cost plan in the delayed exhibit. The Commission finds the exclusion of the West Riverside costs to be reasonable.

Regulatory Amortizations

The Commission finds the regulatory asset and liability amortizations as reflected in this

Final Decision in Appendix G to be reasonable. The annual amortization expense amounts identified shall be recorded for 2023 and 2024, or until the Commission authorizes a different amortization amount to be recorded.

Tax Cut and Jobs Act

To address the impacts of the TCJA, the Commission directed in docket 5-AF-101 that most investor-owned utilities (IOUs), including the applicants provide a bill credit to customers until the rates could be adjusted to reflect the new tax rate. The Commission also directed the IOUs to continue deferrals for any income statement savings or balance sheet tax savings.

The applicants requested Commission approval to amortize the remainder of the tax reform refunds associated with the TCJA authorized in docket 5-AF-101 over a two-year period of 2023 and 2024. The Commission finds that a reasonable period over which to amortize the remainder of the tax reform refunds associated with the TCJA and identified in this Final Decision in Appendix G is two years (2023 through 2024). The Commission also finds that it is reasonable to require a final true-up of the regulatory balance in 5-AF-101 in the applicants' next rate case proceeding.

Other Uncontested Adjustments to Revenue Requirement

There were a number of other Commission staff adjustments to the applicants' filed electric, natural gas, and steam revenue requirements that were not contested by any party. The Commission finds all of those adjustments to be reasonable.

Storm Hardening Program

The applicants identified in their application that WEPCO is planning a ten-year capital investment to "harden" or improve the reliability and resiliency of Wisconsin Electric's distribution system against the impact of severe storms. The Storm Hardening Program consists of undergrounding approximately 600-800 miles of overhead distribution lines in various areas of WEPCO's service territory; adding equipment that allows the applicant to isolate outages; and adding equipment that increases the automation of its distribution system. The Storm Hardening Program is similar in nature to WPSC's System Modernization and Reliability Project (SMRP) authorized in docket 6690-CE-198.[10]

WEPCO included $38 million of capital expenditures in the 2023 test year and anticipates the total cost to be approximately $700 million over the life of the program. The applicants identified that the overall project is comprised of multiple smaller individual projects that will not require separate Commission approval. The Commission finds inclusion of the 2023 capital expenditures in revenue requirement to be reasonable.

Commissioner Huebner dissents.

Given the level of anticipated expenditures for the Storm Hardening Program, the Commission finds that it is reasonable to require WEPCO, in its electric reopener for 2024, to submit addition details regarding its Storm Hardening Program, and to also report on all funding opportunities, including any federal grants or other forms of financial assistance, that it has pursued or is pursuing related to this program.

Retirement of Generation Units

As the applicants continue to assess its generating fleet and implement its Generation Reshaping Plan, it will be beneficial for the applicants to analyze alternative recovery scenarios for

[10] Final Decision, *Application of Wisconsin Public Service Corporation for its Electric Distribution System Modernization and Reliability Project*, Docket 6690-CE-109 (Wis. PSC Jul. 19, 2013) (PSC REF#: 187648) and Phase 2 Final Decision (Wis. PSC Mar. 9, 2017) (PSC REF#: 299079).

all generating units that will be retired prior to the end of their useful life. Stranded assets have presented concerns in prior Commission proceedings. In some cases, as in docket 6680-UR-123, the concerns have been addressed through the use of earnings sharing mechanism dollars. Securitization has been another means to reduce customer impacts of early retirements.[11]

So that the Commission can consider whether and how various financial arrangements with similar customer benefits might be used to allow the applicants to recover a reasonable return on undepreciated assets, while reducing the burden on customers, the applicants shall file an analysis of alternative recovery scenarios for all generating units that will be retired prior to the end of their useful life.

Commissioner Nowak dissents.

Securitization of $100 million of environmental controls at OCPP, extending the recovery period for 25 years, and levelizing the remaining OCPP unrecovered book balance after securitization were discussed in this proceeding. WEPCO observed that this change would reduce customer rate impacts of this soon-to-be-retired generating unit. While the applicants are not required to proceed with securitization for OCPP as considered in this proceeding, the applicants shall submit further analysis as to how to address the remaining unrecovered book balance for OCPP in the applicants' electric reopener for 2024.

Commissioner Nowak dissents on requiring this analysis as part of the electric reopener.

Pleasant Prairie Power Plant

In 2017, WEPCO announced its was closing the Pleasant Prairie Power Plant. In the Commission's Final Decision in docket 5-UR-109, the Commission accepted a Settlement Agreement that included a proposal to address the $400 million remaining book balance for the

[11] See dockets 5-UR-109 and 6630-ET-101.

Pleasant Prairie Power Plant by including $300 million of it in WEPCO's revenue requirement for that case and handling $100 million of it through securitization. (PSC REF#: 381305.) In docket 6630-ET-101, the Commission approved the financing for the securitization. (PSC REF#: 400098.)

So that the Commission can continue to consider the customer benefits associated with its previous decisions and its handling of the remaining book value of the plant, the Commission finds it reasonable to require the applicants to report to the Commission on the sale of all or any portion of the Pleasant Prairie Power Plant property.

Commissioner Nowak dissents.

Limited Reopener

The applicants identified in their application that WEPCO seeks a limited electric rate reopener for 2024 to address the revenue requirements associated with recovering new capital investments that will achieve commercial operation in 2023 and 2024, as well as to address reduced O&M expenses from future coal plant retirements. The Commission finds that it is reasonable to authorize the applicants to file for a limited electric rate reopener for 2024 to address the revenue requirements associated with recovering new capital investments that will achieve commercial operation in 2023 and 2024, as well as to address reduced O&M expense from future coal plant retirements. As discussed previously in this Final Decision, as part of this electric reopener, applicants shall also include the required reporting on its Storm Hardening Program and its analysis of alternative recovery scenarios for OCPP.

The applicants also seek limited 2024 rate reopeners for WEPCO gas and WG to address the additional revenue requirements associated with a new facility being in service for a full year and a liquefied natural gas facility that will achieve commercial operation during 2024.

Based on the facts in the record, the Commission finds that it is reasonable to authorize the applicants to file for a limited natural gas reopener for 2024 to address the additional revenue requirements associated with a new facility being in service for a full year and a liquefied natural gas facility that will achieve commercial operation during 2024.

Summary of Operating Income Statements at Present Rates

In addition to the findings regarding the specific items discussed in this Final Decision, the Commission authorizes the reflection in the electric, natural gas, and steam revenue requirements for WEPCO and natural gas revenue requirements for WG, the Commission staff adjustments not contested by any party and not listed separately as contested for a Commission decision. Accordingly, per Commission decision, the electric and natural gas operations 2023 test year and steam operation's 2023 and 2024 test years' operating income statements at present rates which were updated, and which are considered reasonable for the purpose of determining the revenue requirements in this proceeding, are as follows:

	WEPCO				
Revenues:	**Electric (000's)**	**Electric WI Jur (000's)**	**Gas (000's)**	**Steam (000's)**	**WG (000's)**
Sales Revenue	$ 3,111,305	$ 3,065,943	$ 480,683	$ 21,548	$ 726,882
Opportunity Sales	256,874	250,315	-	942	-
Other Operating Revenues	18,891	18,438	4,406	-	1,904
Total Operating Revenues	3,387,070	3,334,695	485,089	22,490	728,786

Total Operating Expenses	3,112,111	3,061,279	430,311	23,923	632,035
Net Operating Income	$ 274,959	$ 273,416	$ 54,778	$ (1,433)	$ 96,751

Summary of Average Net Investment Rate Base

In addition to the findings regarding the specific items discussed in this Final Decision, all other uncontested Commission staff adjustments to WEPCO's filed electric, natural gas, and steam, and WG's natural gas average net investment rate bases are appropriate. Accordingly, the estimated 2023 test year WEPCO electric and natural gas and WG natural gas and the 2023 and

2024 WEPCO steam average net investment rate bases, which the Commission finds reasonable for the purpose of determining the revenue requirements in this proceeding, are as follows:

	WEPCO				
	Electric (000's)	**Electric WI Jur (000's)**	**Gas (000's)**	**Steam (000's)**	**WG (000's)**
Plant in Service	$ 10,915,065	$ 10,818,884	$ 1,970,546	$118,180	$ 3,054,600

Financial Capital Structure

Financial Capital Structure and Off-Balance Sheet Obligations (OBOs)

Assessing the reasonableness of the applicants' capital structure depends upon three important principles. First, capital structure decisions must be based on the applicants' needs, not on the needs of the non-utility operations of the holding company. Second, the capital structure should provide adequate flexibility for the applicants and the Commission to allow proper utility investment now and in the future. Third, it should support a dividend policy comparable to peer utility dividend practices as long as the applicants' common equity ratio does not decline below the approved target level.

Generally, under Wis. Stat. § 196.795, the utility's capital needs must take precedence over non-utility needs if customers are to be protected. The identification of utility needs goes beyond foreseeable needs. The applicants must have flexibility to finance both foreseen and unforeseen capital requirements.

Off-balance-sheet financial obligations such as power purchase agreements and operating leases are viewed within the financial community as debt equivalents, which affect the borrowing power of the utility. Recognizing that OBOs affect the financial risks and credit ratings of the utility, the Commission includes imputed debt associated with OBO in calculating WEPCO's financial capital structure.[12] The imputed debt results in additional costs to customers, because additional common equity is included in the regulatory capital structure to maintain the utility's target equity level from a credit perspective. If common equity is not added to restore the capitalization to its prior proportions, the cost of capital will be unaffected, but the financial leverage will increase and have a negative impact on the credit ratings of the utility. However, if additional common equity is included to restore the financial capital structure ratios, the financial leverage and credit ratings of the utility will remain the same and the cost of capital is increased.

In calculating capital structure, on a financial basis, the Commission has imputed debt associated with obligations not reported on balance sheets. Detailed information regarding all off-balance sheet obligations for which the financial markets will calculate debt equivalent is necessary for the Commission to make an independent judgment regarding the applicants' financial capital structure. This information is most readily available from the applicants and shall be provided as part of its next rate case or rate case settlement proceeding. The information shall include, at a minimum, all of the following information:

[12] Imputing debt for off-balance-sheet obligations is not a common practice of other state utility commissions. The Commission is not obligated to adopt the risk assessment of an outside rating agency and will independently examine off balance sheet obligations, based on its assessment of risk.

1. The minimum annual lease and PPA obligations.

2. The method of calculation along with the calculated amount of the debt equivalent.

3. Supporting documentation, including all reports, correspondence, and any other justification that clearly established S&P and other major credit rating agencies' determination of the off-balance sheet debt equivalent to the extent available, and publicly available documentation when S&P and other major credit rating agencies' documentation is not available.

For the test year, the Commission finds it reasonable to impute $845,532,000 of WEPCO's debt equivalence for OBO, which includes $579,822,000 related to PPAs and operating leases. Incorporating the debt equivalences for OBO and other Commission determinations, the WEPCO's financial capital structure for the test year will consist of 53.00 percent common equity, 36.41 percent long-term debt, 1.21 percent short-term debt, 0.33 percent preferred stock, and 9.05 percent debt equivalence for OBO.

WG's financial capital structure included $116,123,000 in adjustments for nonutility property, goodwill, key man life insurance, and deferred tax assets. Incorporating the debt equivalences for OBO and other Commission determinations, WG's financial capital structure for the test year will consist of 53.00 percent common equity, 43.69 percent long-term debt, and 3.31 percent short-term debt.

Commissioner Huebner dissents on the imputed OBOs for WEPCO and WG.

The Commission recognizes the need to protect customers and to ensure that utility needs are placed before non-utility needs in capital structure and dividend policy choices. It is reasonable that the applicants' dividend restriction shall match the dividend restrictions of the other Wisconsin jurisdictional operating utilities within the WEC holding company. The applicants shall not pay dividends in excess of the amount forecasted in this proceeding if such dividends cause the average annual common equity ratio, on a financial basis, to fall below the test-year authorized level of 53.00 percent. The applicants shall not pay a special dividend in excess of the forecasted dividends at the end of the year unless the additional payment does not reduce the average annual common equity ratio, on a financial basis, below the forecasted level of 53.00 percent.

Regulatory Capital Structure and Cost of Capital

As in the previous rate case docket, in order to arrive at the common equity amount for the applicants' regulatory capital structure, Commission staff deducted from booked common equity the value of non-utility properties for both applicants, and net goodwill and key man life insurance for WG specifically. Incorporating these adjustments, the Commission finds it reasonable to authorize a rate making capital structure for the purposes of establishing just and reasonable rates for the test year consisting of 58.22 percent common equity, 40.08 percent long-term debt, 1.33 percent short-term debt, and 0.36 percent preferred stock. For WG, a ratemaking capital structure for the purpose of establishing just and reasonable rates for the test years consists of 52.70 percent common equity, 43.97 percent long-term debt, and 3.33 percent short-term debt.

Long-Term Debt

A reasonable estimate for the applicants' embedded cost of long-term debt for the test year is 4.40 percent for WEPCO and 3.68 percent for WG.

Chairperson Valcq dissents.

Short-Term Debt

A reasonable estimate of the applicants' average cost of short-term debt for the test year is 4.14 percent for WEPCO and 4.49 percent for WG.

Chairperson Valcq dissents.

Return on Common Equity

The principal factor used to determine the appropriate ROE is the investors' required return. Authorized returns of less than the investors' required return would fail to compensate capital providers for the risks they face when providing funds to the utility. Such sub-par returns would make it difficult for a utility to raise capital on an ongoing basis. On the other hand, authorized returns that exceed the investors' required return would provide windfalls to utility investors as they would receive returns that are in excess of the necessary level. Such high returns would be unfair to utility customers who ultimately pay for those returns. In reaching its determination as to the appropriate ROE, the Commission must balance the needs of investors with the needs of consumers, with due considerations to economic and financial conditions, along with public policy considerations.

The applicants, Commission staff, and multiple intervenors provided recommendations for the applicants' ROE in this docket. The applicants argued that its current ROE of 10.00 percent for WEPCO and 10.20 percent for WG be maintained. Walmart argued that the ROE should be less than the current ROEs. MMSD argued for a ROE of less than 9.80 percent. CUB argued for a 9.00 percent ROE. Commission staff presented a range from 8.46 percent to 9.79 percent for WEPCO and 8.43 percent to 9.80 percent for WG.

The Commission considered and weighed the evidence in this proceeding, which included national trends for ROEs for regulated electric and natural gas utilities, as well as the models used to estimate ROE. The Commission has traditionally made gradual, rather than dramatic, adjustments to ROE and considers both the needs of shareholders and customers when making decisions on ROE. Given these considerations, the Commission finds that an authorized return on common equity of 9.80 percent for both WEPCO and WG represents a gradual adjustment and strikes a reasonable balance between the needs of investors with the needs of customers.

Commissioner Nowak dissents.

Accordingly, the average utility capitalization ratios, annual cost rates, and the composite cost of capital rate considered reasonable and just for setting rates for the test year are as follows:

WEPCO

	Amount (000's)	Percent	Annual Cost Rate	Weighted Cost
Utility Common Equity	$4,939,111	58.22%	9.80%	5.71%
Preferred Stock	$30,450	0.36%	3.95%	0.01%
Long-Term Debt	$3,400,385	40.08%	4.40%	1.76%
Short-Term Debt	$113,231	1.33%	4.14%	0.06%
Total Utility Capital	$8,483,176	100.00%		7.54%

WG

	Amount (000's)	Percent	Annual Cost Rate	Weighted Cost
Utility Common Equity	$1,126,788	52.70%	9.80%	5.16%
Long-Term Debt	$940,000	43.97%	3.68%	1.62%
Short-Term Debt	$71,256	3.33%	4.49%	0.15%
Total Utility Capital	$2,138,044	100.00%		6.93%

The weighted average cost of capital of 7.54 percent for WEPCO and 6.93 percent for WG are reasonable for the applicants for the test year. It generates an economic cost of capital of 9.68 percent (WEPCO) and 8.86 percent (WG), and a pre-tax interest coverage ratio of 5.32 times (WEPCO) and 5.01 times (WG).

Revenue Sharing Mechanism

In docket 5-AF-107, the Commission approved a revenue sharing mechanism (RSM) where the applicants retain the first 15 basis points of earnings above the authorized rate of ROE. The applicants and its customers split the next 60 basis points of earnings and customers will receive a full refund of all earnings above 75 basis points. Such mechanisms, which are in place for many other Wisconsin utilities,[13] protect customers from paying excessive rates that would be unreasonable, while still providing shareholders the opportunity to earn a reasonable return on their investment.

As a result, the Commission finds that it is reasonable for the applicants' revenue sharing mechanism, as approved in docket 5-AF-107, to remain in place until the applicants' next full rate case proceeding.

Rate of Return on Rate Base

The composite cost of capital must be translated into a rate of return that can be applied to the average net investment rate base (NIRB) and used to compute the overall return requirement in dollars. The estimate of WEPCO's average NIRB plus CWIP for the test year is 89.19 percent of capital applicable primarily to utility operations plus deferred investment tax credits. The estimate of WG's average NIRB plus CWIP for the test year is 87.32 percent of capital applicable primarily to utility operations plus deferred investment tax credits. These

[13] Final Decision in docket 4220-UR-125 (PSC REF#: 427625); Final Decision in docket 6680-UR-123 (PSC REF#: 427760); Final Decision in docket 5-UR-109 (PSC REF#: 381305); Final Decision, in docket 5-AF-107 (PSC REF#: 421294)

estimates reflect all appropriate Commission adjustments and are reasonable and just for use in translating the composite cost of capital into a return requirement applicable to the average NIRB.

	WEPCO				
	Electric ($ in 000's)	Electric WI Jur ($ in 000's)	Gas ($ in 000's)	Steam ($ in 000's)	WG ($ in 000's)

Required Return on Average NIRB	8.77%	8.77%	8.29%	8.37%	8.03%

Calculation of Deficiencies

On the basis of the findings in this Final Decision, a $280.5 million increase in WEPCO electric Wisconsin retail utility revenues, a $46.1 million increase in WEPCO natural gas utility revenues, and a $46.5 million increase in WG natural gas utility revenues for 2023 and a $7.6 million increase in WEPCO steam utility revenues for 2023 and 2024, are reasonable for the purpose of determining reasonable and just rates in this proceeding. These increases are computed as follows:

	WEPCO				
	Electric ($ in 000's)	**Electric WI Jur ($ in 000's)**	**Gas ($ in 000's)**	**Steam ($ in 000's)**	**WG ($ in 000's)**
Adj Net Operating Income at Present Rates	$ 274,959	$ 273,416	$ 54,778	$ (1,433)	$ 96,751
Average NIRB	$ 5,484,193	$ 5,442,291	$ 1,065,821	$ 49,007	$ 1,626,876
Return on Average NIRB at Present Rates	5.01%	5.02%	5.14%	-2.92%	5.95%
Required Return on Average NIRB	8.77%	8.77%	8.29%	8.37%	8.03%
Earnings Deficiency as a Percent of Average NIRB	3.76%	3.75%	3.15%	11.29%	2.08%
Earnings Deficiency on Average NIRB	$ 206,240	$ 204,106	$ 33,526	$ 5,533	$ 33,824
Tax Gross-up Factor	1.3744	1.3744	1.3744	1.3744	1.3744
Revised Revenue Deficiency	**$ 283,457**	**$ 280,524**	**$ 46,079**	**$ 7,605**	**$ 46,487**

Electric Cost of Service and Rates

Electric Cost of Service

The applicants, intervenors, and Commission staff testified regarding electric cost of service and the appropriate allocation methods for the allocation of plant and expenses that make up the applicant’s revenue requirement. With its rate case application, the applicants proposed a COSS model that uses the applicant-preferred assumptions for COSS. At the request of

Commission staff, the applicants prepared a range of COSS models for Commission consideration. These models covered a variety of different allocations including the 12CP (coincident peak) and 4CP production allocators, and demand/energy splits for production plant. The applicants prepared the COSS models to reflect Commission staff's audit adjusted revenue requirement, and later at the various revenue requirements considered as part of the filed Settlement Agreement.

The testimony in this proceeding covered the various COSS models and discussed the philosophical underpinnings of those models in detail. WIEG did not submit its own COSS but indicated that it supported the 4CP model. CUB testified that the 12CP Capacity TOU model represented its preferred COSS approach.

No consensus was reached by the parties over the course of this proceeding regarding COSS methodologies. Furthermore, the Commission is not persuaded by the evidence that any of the proposed methods are unreasonable. The Commission's long-standing practice is to consider the results of several COSS for the purposes of allocating test-year revenue responsibility. The evidence in this proceeding supports a continuation of this practice. Therefore, the Commission finds it reasonable to consider the results of all cost-of-service studies in the record for the purposes of class revenue requirement allocation.

Electric Revenue Allocation

The applicants proposed an initial, and revised for Commission staff revenue requirement, electric revenue allocation for the 2023 test year that included above average increases for the small, medium, and large commercial and industrial classes, and below average increases for residential and street lighting classes. Commission staff proposed an alternative electric revenue allocation for the 2023 test year that had a narrower range of increases and decreases, and included above average increases for the residential classes, and below average increases for the small, medium, and large commercial and industrial classes, and street lighting classes. WIEG proposed an electric revenue allocation for the 2023 test year that was similar to that of Commission staff, but with a slightly higher allocation given to residential classes and a slightly lower allocation given to large industrial classes. While CUB did not submit a revenue allocation, it stated its support for the revenue allocation initially offered by the applicants. As the proceeding progressed through testimony, the applicants stated its support for the revenue allocation offered by WIEG.

Consistent with the determinations the Commission has made in previous rate proceedings and the above determination regarding cost of service, the Commission finds that it is useful to take into account the results of a number of different COSS in addition to other factors such as rate stability and customer bill impacts when making a determination on class revenue allocation in this case. Ultimately, the Commission finds it reasonable to approve the electric revenue allocation initially proposed by Commission staff, as adjusted for the final revenue requirement, and as shown in Appendix B. The Commission finds that this allocation facilitates a reasonable approach to rate design and results in a more equitable distribution among customer classes.

Chairperson Valcq dissents.

Rate Design

Rate Design Issues

Through the rounds of written testimony, the applicants, intervening parties, and Commission staff discussed and resolved several rate design issues. The list of rate design items considered in this proceeding include:

- A reduction of the monthly residential and small commercial electric fixed customer charge;
- Adopting a high load factor credit for the Cp-1 rate schedule;
- Implementing a RER tariff;
- Modifying the rate structure of the Cg-3 class, decreasing off-peak energy rates and increasing the system and customer demand rates;
- Reopening the CP-FN interruptible tariff;
- Continuation of and development of new low-income programs;
- Development of a Bring Your Own Device demand response pilot; and
- Other miscellaneous tariff clarifications or alterations.

Monthly Residential and Small Commercial Fixed Charge

WEPCO's current monthly residential and small commercial customer charge is $16.00, which the applicants maintained in its initial electric rate design proposal. In response to Commission staff data request (Data Request-PSC-Meulemans-2), the applicants provided results of a basic customer cost analysis. CUB, RENEW, and Commission staff all cited, to varying degrees, the influence that the results of the basic customer cost analysis had on their recommendations for the customer charge. As the proceeding progressed, the applicants offered a $15.00 per month customer charge for residential and small commercial customers for Commission consideration, which was ultimately supported by CUB and RENEW.

In consideration of the customer cost analysis presented in the record, the Commission finds sufficient evidence in this proceeding to lower WEPCO's monthly customer charge for residential and small commercial classes. This reduced customer charge is consistent with other Commission decisions.[14] The Commission finds it reasonable to lower WEPCO's monthly customer charge to the daily equivalent of $15.00 per month.

Commissioner Nowak dissents.

As the basic customer cost allocation methodology help inform the debate on an appropriate monthly customer charge, the applicants shall provide the results of a basic customer cost allocation methodology COSS in future rate case proceedings.

High Load Factor Credit

The applicants and WIEG worked together to develop and offer a High Load Factor Credit, which would offer a per/kWh credit to customers that have a load factor higher than the class average for the Cp-1 customer class. This proposal is based on the understanding that as a customer's load factor increases, a greater proportion of its energy consumption occurs in the off-peak periods, when system loads and energy costs are generally at their lowest levels. Further, since fixed costs are being recovered through energy charges, the rate design results in the recovery of a disproportionate amount of fixed costs from customer facilities with higher-than-class average load factors. The applicants and WIEG modeled this proposal off of

[14] Final Decision, *Application of Madison Gas and Electric Company for Authority to Change Electric and Natural Gas Rates*, Docket 3270-UR-124 (Wis. PSC Dec. 21, 2021) (PSC REF#: 427687); Final Decision, *Application of Northern States Power Company-Wisconsin For Authority to Adjust Electric and Natural Gas Rates*, Docket 4220-UR-125 (Wis. PSC Dec. 20, 2021) (PSC REF#: 427625).

an existing high load factor credit that is currently offered by Northern States Power-Wisconsin (NSPW), which the Commission had most recently reviewed in docket 4220-UR-125.

Further, the applicants and WIEG proposed that the high load factor credit be phased in, starting at the conclusion of this proceeding, and fully phasing in after the conclusion of the next rate case proceeding for the applicants. This phase in process would then allow the applicants and WIEG to verify there are no unintended results of this credit and gives the Commission an opportunity to review the credit before the full value is applied to applicable customers.

The Commission finds it reasonable for WEPCO to offer the high load factor credit for the Cp-1 class and directs that the rate design for the Cp-1 class reflect this credit while holding the revenue allocation constant.

Renewable Energy Rider

The applicants and WIEG worked together to develop and offer a RER tariff, which would allow commercial and industrial customers to purchase some or all of the power from a renewable resource that is procured by the applicants. The applicants and WIEG modeled this tariff on the renewable energy rider that is currently offered by MGE, which the Commission had authorized in docket 3270-TE-102.[15]

The Commission finds it reasonable to authorize the applicants to offer the renewable energy rider, as presented in Ex.-WEPCO/WG-Nelson-13r2.

[15] Final Decision, *Application of Madison Gas and Electric Company for Authority to Offer a Renewable Energy Rider*, Docket 3270-TE-102 (Wis. PSC Jul. 14, 2017) (PSC REF#: 327993.)

Cg-3 Rate Structure

Walmart and Roundy's proposed altering the existing rate structure of the Cg-3 class by lowering energy charges and increasing demand-related charges. Walmart and Roundy's stated that this proposal would alter the cost recovery of the Cg-3 rates to more accurately reflect how those costs are incurred to the utility. The applicants responded by demonstrating what the bill impacts of Walmart and Roundy's proposal would have on different customer profiles and recommended that the changes made to the Cg-3 rate structure be done in moderation.

The Commission considered a similar request in docket 5-UR-109,[16] where Walmart and the applicants also proposed to increase demand-related charges and decrease energy charges. In that proceeding, Walmart and the applicants also supported the proposal by stating that this restructure would align the rates of the Cg-3 class more closely with the COSS. Consistent with its finding in the previous proceeding for the applicants, the Commission finds the proposed rate restructuring is just and reasonable in order to bring the Cg-3 customer class closer to the cost of service.

Reopening the Cp-FN Interruptible Tariff

WIEG proposed that the applicants consider reopening their Cp-FN interruptible service, citing the applicants' need for capacity. In response to WIEG's proposal, the applicant identified an interest and ability to reopen the tariff, but with certain modifications. Specifically, the applicants made the following recommendations for reopening the interruptible tariff:

1. Reduce the current participation threshold to 75 MW from 150 MW of contracted interruptible capacity;

---

[16] Final Decision, *Joint Application of Wisconsin Electric Power Company and Wisconsin Gas LLC for Authority to Adjust Electric, Natural Gas, and Steam Rates*, Docket 5-UR-109 (Wis. PSC Dec. 19, 2019) (PSC REF#: 381305.)

2. Adjust the penalty provision to better align with the costs MISO and other entities pass along to the applicants for non-compliance during declared interruption events;

3. Add a provision that provides WEPCO with the ability to call economic interruptions based on an automatic economic trigger price;

4. Increase the maximum allowable constraint hours to 600 hours per year from 300 hours; and

5. Refine the language for customer re-nomination of their contracted firm service level to better align with the MISO planning year.

Commission staff responded to both WIEG's proposal and to the applicants' suggested modifications. Commission staff recommended a smaller decrease of the participation cap, additional transparency into how the non-compliance charges would be passed through to the customer, and also questioned the amount of allowable constraint hours in a year.

As the proceeding progressed, the applicants offered revised modifications to the Cp-FN tariff, which included the following changes:

- Adjust the participation level to 90 MW of contracted interruptible capacity;
- Adjust the penalty provision to better align with costs of MISO and other entities that are passed along to WEPCO for non-compliance during declared interruption events;
- Add a provision that provides WEPCO with the ability to call economic interruptions based on an automatic economic trigger price;
- Increase the allowable constraint hours to 600 hours per year from 300 hours; and

- Refine the language for customer re-nomination of their contracted firm service level to better align with MISO planning year.

No party offered any objection to the revised Cp-FN tariff modifications as proposed by the applicants. Therefore, in review of the evidence presented by the parties and Commission staff, the Commission finds it reasonable to approve the reopening of the Cp-FN tariff with the revised modifications discussed above.

Bring Your Own Device (BYOD) Demand Response Pilot

The Commission has previously approved a BYOD pilot for MGE, which has proven to be a successful program. To further explore BYOD pilots, the Commission finds that it is reasonable for the applicants to work with CUB, RENEW, and other interested groups in developing a BYOD demand response pilot. Any program that may result from this collaborative effort will require Commission approval prior to implementation.

Low Income Assistance Programs

LIFT Program

In docket 5-AF-107, the Commission's Final Decision found, "It is reasonable for the parties to negotiate on modifications to expand availability of the applicants' low-income payment plans." This resulted in the creation and implementation of the applicants' Low-Income Forgiveness Tool (LIFT).[17]

At both the public hearings and in the written comments received on the Commission's website, the Commission heard from many customers experiencing difficulties making ends meet and having to make choices between paying their utility bills or other necessities. While

[17] The Commission notes that the applicants' tariffs have not been updated to reflect this program.

there are other assistance programs available to low-income customers, some customers may either have difficulty accessing these programs or may not qualify for them.

In this proceeding, Walnut Way made proposals for modifying the existing LIFT program, including expanding the eligibility criteria to persons in the Supplemental Nutrition Assistance Program, incorporating the LIFT program (as modified) into the applicants' tariffed rates, and making service rule changes that incorporate certain practices and procedures regarding deferred payment arrangements. These proposals are worthy of further consideration.[18]

The Commission finds it reasonable for the applicants to extend the currentLIFT program and provide additional details regarding this program in separate TE/TG docket filings[19] by the applicants. In those dockets, there shall also be a comprehensive review of the applicants customer service rules and procedures, including the applicants' policy regarding $600 down payments for reconnection of low-income customer accounts.

Commissioner Nowak dissents.

Alternative Low-Income Assistance Programs

In addition to continuation of LIFT, there may be other innovative and alternative low-income assistance programs that are worthy of consideration. In this proceeding, Walnut Way made several proposals relating to the procedure for the development of alternative programs and to program design. Here again, many of those suggestions merit further development and consideration. To facilitate collaborative efforts, the Commission finds that it is reasonable to

[18] Proposals to modify the service rules in the Wisconsin Administrative Code are better addressed in a rulemaking proceeding rather than a rate case.
[19] If the applicants wish to address both electric and natural gas LIFT programs in a single docket, it could file using a new "TU" case type code.

require the applicants to work cooperatively with Commissions staff, CUB, and other interested groups such as Walnut Way in developing alternative low-income assistance programs, including a potential Percentage of Income Payment Pilot prior to the next rate case. A docket to investigate development of such programs shall be opened by the Commission no later than April 1, 2023.[20] Any program that may result from this collaborative effort will require Commission approval prior to implementation.

Commission Nowak dissents.

Keep Wisconsin Warm Fund

As a further way to support customers who are struggling to pay their utility bills, the applicants, along with WPSC, offered to make a total contribution to the Keep Wisconsin Warm Fund in the amount of $4 million.

The Commission appreciates and accepts the applicants' offer to make such a contribution.

Commissioner Nowak dissents.

Other Rate Design Issues

A number of other electric rate design issues and future commitments were developed and discussed throughout the proceeding, including the following proposals to:

- Alter how billing determinants are derived for customers in the Cp-1 class and to also allow physically connected customers to have their demand measured conjunctively;
- Work with WIEG on evaluating conjunctive demand modifications;

[20] Parties to the docket would be eligible to apply for intervenor compensation under Wis. Stat. § 196.31.

- Limit the maximum demand charges for customers with operations categorized in Standard Industrial Classification Code 4952;
- Rename the “facilities charge” to “customer charge” in the applicants’ tariffs;
- Commit to not making any alterations to real time rate schedules before December 21, 2024;
- Eliminate the requirement to install check-meters on newly enrolled systems under WEPCO’s CGS-NM and CGS-NP tariffs; and
- Submit a plan no later than the next rate case to allow parallel generation customers the option of installing bi-directional meters where technically feasible.

The aforementioned list of rate design issues received support from various intervening parties, include WIEG, CUB, and RENEW. No parties specifically objected to the proposals, although Walnut Way and Clean Wisconsin encouraged additional actions be made by the applicants to support low-and-moderate income customers. The Commission finds these other rate design issues represent reasonable moves on behalf of the applicants to address items of importance to the various parties in this proceeding and approves the items as proposed.

Overall Rate Design

The applicants proposed an initial electric rate design that held customer charges constant for residential and small commercial classes, with changes to energy charges and demand charges to reflect the applicants’ preferred revenue allocation and rate design. Commission staff used the same rate design structure proposed by the applicants and made changes to energy and demand charges to develop its offered revenue allocation and rate structures. The applicants also filed a revised rate design that captured the resolved rate design issues discussed in the previous sections of this Final Decision. No other parties proposed a complete rate design for all customer classes.

The Commission finds that the rate design proposed by Commission staff, as modified with the Commission determinations in the above sections of this Final Decision, is reasonable.

Chairperson Valcq dissents.

Furthermore, the Commission, upon its review of the impacts of the final fuel adjustments on rate design, finds that embedding the fuel costs into the base energy charges on a per kWh basis is reasonable. The authorized electric rates appear in Appendix B.

Steam Cost of Service and Rates

Steam Revenue Allocation and Rate Design

The applicants proposed a steam revenue allocation and rate design, and Commission staff filed an updated rate design for Commission staff's revenue requirement that largely mirrored the initial filing of the applicants. The overall steam increase is 35.3 percent for 2023. The applicants' proposed steam allocation and rate design was supported by Commission staff, and the Commission finds that the steam revenue allocation and rate design proposed by the applicants is reasonable. Additionally, the Commission finds that the uncontested issue of a new calculated base cost of fuel, as proposed by Commission staff, is reasonable. The steam revenue allocation and rate design, including the development of base cost of fuel rates, appear in Appendix C.

Natural Gas Cost of Service and Rates

Natural Gas Cost of Service

The applicants prepared three COSSs — a base case COSS, COSS A, and COSS B—for both WE-GO and WG. COSS A and COSS B were prepared using parameters established by

Commission staff and reflect Commission staff's audit adjustments. The applicants also provided a COSS A and COSS B for three different revenue requirements that reflected three different ROEs, as the applicants' ROE was not a settled issue in the proposed partial Settlement Agreement.

The Commission has not endorsed a particular natural gas COSS methodology in the past and has relied on the results of multiple COSS to provide a range of reasonableness for revenue allocation and rate design. The Commission finds that this continues to be a reasonable approach to setting natural gas rates. Because the Commission ultimately adopted the Commission staff-audited revenue requirement, the Commission considered only the results of the applicants' base case COSS, COSS A, and COSS B at the Commission staff-audited revenue requirement for the purpose of revenue allocation and rate design.

Natural Gas Revenue Allocation and Rate Design

The applicants and Commission staff prepared comprehensive revenue allocation and rate design proposals for both WE-GO and WG. Authorized rates for WE-GO and WG as set forth in Appendix D and E respectively are based on the cost of supplying natural gas service to the various rate classes and other rate setting goals, including gradualism in ratemaking.

A summary of the revenue rate impacts on a rate class basis is shown in Appendix D for WE-GO and in Appendix E for WG. The percentage rate change to any individual customer will not necessarily equal the overall percentage change to the associated rate class, but rather it will depend on the specific usage level of the customer. Typical natural gas bill impacts for residential service, comparing existing rates with new rates (including the cost of gas), are shown in Appendix D for WE-GO and in Appendix E for WG.

Overall, the rates authorized for WE-GO in Appendix D of this Final Decision will provide a 9.80 percent rate of return on the average gas net investment rate base. This represents an increase of 26.68 percent in margin rates (which exclude natural gas costs) and a 10.43 percent in total natural gas sales revenues. The Commission finds that the natural gas revenue allocation and rate design for WE-GO proposed by Commission staff in Ex.-PSC-Eiter-2, as adjusted for the final revenue requirement, are reasonable.

Commissioner Nowak dissents.

Overall, the rates authorized for WG in Appendix E of this Final Decision will provide a 9.80 percent rate of return on the average gas net investment rate base. This represents an increase of 13.69 percent in margin rates and a 6.39 percent in total natural gas sales revenues. The Commission finds that the natural gas revenue allocation and rate design for WG proposed by Commission staff in Ex.-PSC-Eiter-1, as adjusted for the final revenue requirement, are reasonable.

Commissioner Nowak dissents.

Agricultural Seasonal Use Sales Service Tariff Changes

The applicants proposed to consolidate the five agricultural seasonal use sales service classes (Ag-1, Ag-2, Ag-3, Ag-4, and Ag-5) into one class with a single customer charge and a declining step block rate design. This is a natural gas service for the primary purpose of crop drying and is for customers who would otherwise qualify for Commercial/Industrial Service.

The applicants' tariffs will change in two steps: the new rates will go into effect upon issuance of this Final Decision, and the new rate structure will take effect under a unified Ag-1 rate class on September 1, 2023. Because there are no revenue impacts of the delayed implementation plan, Commission staff did not identify any concerns with the applicants' proposal, provided that the change is effectively communicated to customers. The Commission, therefore, finds the natural gas tariff changes for the Firm Agricultural Seasonal Use Sales Service as proposed by the applicants to be reasonable.

Order

1. The authorized rate increases and tariff provisions that restrict the terms of service may take effect no sooner than January 1, 2023, provided that the applicants' file these rates and tariff provisions with the Commission and makes them available to the public pursuant to Wis. Stat. § 196.19 and Wis. Admin. Code §§ PSC 113.0406(1)(a) and 134.05 by that date. If these rate increases and tariff provisions are not filed with the Commission and made available to the public by that date, they take effect one day after the date they are filed with the Commission and made available to the public.

2. The applicants may revise its existing rates and tariff provisions for electric, natural gas, and steam utility service, substituting the rate increases and tariff provisions that restrict the terms of service, as shown in Appendices B, C, D, and E or as described in this Final Decision. These changes shall be in effect until the Commission issues an order establishing new rates and tariff provisions.

3. The applicants shall prepare bill messages that properly identify the rates authorized in this Final Decision. The applicants shall provide the messages to customers no later than the first billing containing the rates authorized in this Final Decision and shall file copies of these bill messages with the Commission before it provides the messages to customers.

4. The applicants shall file tariffs consistent with this Final Decision.

5. The applicants shall implement the comprehensive electric rate design proposed by the applicant, as modified and conditioned by this Final Decision.

6. The applicants shall set the electric residential and small commercial customer charge at the daily equivalent of $15.00 per month for the 2023 test year.

7. The applicants shall provide the results of a “basic customer cost” allocation methodology COSS in future rate case proceedings.

8. The applicants shall offer a high load factor credit for the Cp-1 class, at the phased in credit value.

9. The applicants shall offer a renewable energy rider for its commercial and industrial customers.

10. The applicants shall alter the rate structure of the Cg-3 rate class, consistent with the applicants’ proposal in Ex.-WEPCO/WG-Nelson-17.

11. The applicants shall reopen the Cp-FN interruptible tariff to new customers, as modified and conditioned by this Final Decision.

12. The applicants shall work with CUB, RENEW and other interested parties on the development of a BYOD demand response pilot program.

13. The applicants shall not make any alterations to real time rate schedules before December 31, 2024.

14. The applicants shall extend the current LIFT program and provide additional details regarding the program in separate TE/TG docket filings by the applicants. In those dockets, there shall also be a comprehensive review of the applicants’ customer service

rules/procedures, including the applicants' policy regarding $600 down payments for reconnection of low-income customer accounts.

15. The applicants shall work with CUB, Commission staff, and other interested groups in developing alternative low-income assistance programs, including a potential Percentage of Income Payment Pilot, and a docket to investigate the development of such programs shall be opened by the Commission no later than April 1, 2023.

16. The applicants shall limit the maximum demand charges for customers with operations categorized in Standard Industrial Classification Code 4952.

17. The applicants shall eliminate the requirement to install check-meters on newly enrolled systems under WEPCO's CGS-NM and CGS-NP tariffs.

18. The applicants shall submit a plan no later than its next rate case to allow parallel generation customers the option of installing bi-directional meters where technically feasible. The applicants shall rename the "facilities charge" to "customer charge" in its applicable tariffs.

19. The applicants shall work with WIEG on evaluating conjunctive demand modifications.

20. The applicants shall make the other electric and natural gas tariff changes discussed in this Final Decision.

21. The electric fuel costs in Appendix F shall be used for monitoring of the applicants' 2023 fuel costs pursuant to Wis. Admin. Code § PSC 116.06(3).

22. All 2023 fuel costs shall be monitored using a plus or minus 2.0 percent tolerance band.

23. The applicants shall write off the entirety of the COVID-19 regulatory assets deferral authorized in docket 5-AF-105, over a two-year period.

24. The applicants shall utilize deferral accounting treatment, with carrying costs at the short-term debt rate, for the cost impacts associated with the proposed acquisition in docket 5-BS-265 for the West Riverside project.

25. WEPCO shall defer, with carrying costs at the short-term debt rate, any insurance proceeds received relating to work to repair flooding damage identified in docket 6630-CU-104.

26. The applicants shall defer, with carrying costs at the applicant's short-term debt rate, any impacts of the Inflation Reduction Act.

27. The applicants shall implement escrow accounting treatment to record pension and OPEB costs.

28. The applicants shall utilize deferral accounting treatment to capture the differences between the estimated and actual revenue requirement impacts associated with retiring Oak Creek Power Plant 5 and 6 resulting from a change in the units' May 2024 retirement date.

29. WEPCO electric shall record annual conservation escrow expense of $39.2 million in 2023 and until the Commission authorizes a different amortization expense to be recorded.

30. WEPCO gas shall record annual conservation escrow expense of $6.7 million in 2023 and until the Commission authorizes a different amortization expense to be recorded.

31. WG shall record annual conservation escrow expense of $10.0 million in 2023 and until the Commission authorizes a different amortization expense to be recorded.

32. The applicants shall amortize and include the revenue requirement impacts of the regulatory assets and regulatory liability amortizations as detailed in Appendix G, for all items listed for 2023 and 2024, or until the Commission authorizes a different amortization expense to be recorded.

33. The applicants shall amortize the remainder of the tax reform refunds associated with the TCJA as authorized in docket 5-AF-101 over two years (2023 through 2024), and the applicants shall perform a final true-up of the regulatory balance in 5-AF-101 in the applicants' next rate case proceeding.

34. The applicants shall file a limited electric rate reopener for 2024 to address the revenue requirements associated with recovering new capital investments that will achieve commercial operation in 2023 and 2024, as well as to address reduced O&M expense from future coal plant retirements. The Commission also requires the applicants to include details regarding its Storm Hardening Program, and the applicants shall also report on all funding opportunities, including any federal grants or other forms of financial assistance, that the applicants have pursued or are pursuing related to this program and shall include the analysis of alternative recovery scenarios for OCPP.

35. The applicants shall file a limited natural gas reopener for 2024 to address the additional revenue requirements associated with a new facility being in service for a full year and a liquefied natural gas facility that will achieve commercial operation during 2024.

36. The applicants shall not pay dividends in excess of the amount forecasted in this proceeding if such dividends cause the average annual common equity ratio, on a financial basis, to fall below the test-year authorized level of 53.00 percent.

37. The applicants shall submit, in the next rate case application, detailed information regarding all off-balance-sheet obligations for which the financial markets will calculate a debt equivalent. The information shall include, at a minimum: (1) the minimum annual lease and PPA obligations; (2) the method of calculation along with the calculated amount of the debt equivalent; and (3) supporting documentation, including all reports, correspondence and any other justification that clearly established S&P's and other major credit rating agencies' determination of the off-balance sheet debt equivalent, to the extent available, and publicly available documentation when S&P and other major credit rating agencies' documentation is not available.

38. The applicants shall conduct an analysis of alternative recovery scenarios for generating units that will be retired prior to the end of their useful life.

39. The applicants shall report to the Commission on the sale of all or any portion of the Pleasant Prairie Power Plant property.

40. The Revenue Sharing Mechanism, as approved in docket 5-AF-107 shall remain in place until the applicants' next rate proceeding.

41. The applicants shall submit a 10-year financial forecast in its next rate case.

42. Jurisdiction is retained.

Concurrence and Dissent

Commissioner Nowak concurs in part, and dissents in part, and writes separately (see attached).

Commissioner Huebner concurs in part, and dissents in part, and writes separately (see attached).

Dated at Madison, Wisconsin, the 29th day of December, 2022.

By the Commission:

Cru Stubley
Secretary to the Commission

PUBLIC SERVICE COMMISSION OF WISCONSIN
4822 Madison Yards Way
P.O. Box 7854
Madison, Wisconsin 53707-7854

NOTICE OF RIGHTS FOR REHEARING OR JUDICIAL REVIEW, THE TIMES ALLOWED FOR EACH, AND THE IDENTIFICATION OF THE PARTY TO BE NAMED AS RESPONDENT

The following notice is served on you as part of the Commission's written decision. This general notice is for the purpose of ensuring compliance with Wis. Stat. § 227.48(2), and does not constitute a conclusion or admission that any particular party or person is necessarily aggrieved or that any particular decision or order is final or judicially reviewable.

PETITION FOR REHEARING

If this decision is an order following a contested case proceeding as defined in Wis. Stat. § 227.01(3), a person aggrieved by the decision has a right to petition the Commission for rehearing within 20 days of the date of service of this decision, as provided in Wis. Stat. § 227.49. The date of service is shown on the first page. If there is no date on the first page, the date of service is shown immediately above the signature line. The petition for rehearing must be filed with the Public Service Commission of Wisconsin and served on the parties. An appeal of this decision may also be taken directly to circuit court through the filing of a petition for judicial review. It is not necessary to first petition for rehearing.

PETITION FOR JUDICIAL REVIEW

A person aggrieved by this decision has a right to petition for judicial review as provided in Wis. Stat. § 227.53. In a contested case, the petition must be filed in circuit court and served upon the Public Service Commission of Wisconsin within 30 days of the date of service of this decision if there has been no petition for rehearing. If a timely petition for rehearing has been filed, the petition for judicial review must be filed within 30 days of the date of service of the order finally disposing of the petition for rehearing, or within 30 days after the final disposition of the petition for rehearing by operation of law pursuant to Wis. Stat. § 227.49(5), whichever is sooner. If an *untimely* petition for rehearing is filed, the 30-day period to petition for judicial review commences the date the Commission serves its original decision.[21] The Public Service Commission of Wisconsin must be named as respondent in the petition for judicial review.

If this decision is an order denying rehearing, a person aggrieved who wishes to appeal must seek judicial review rather than rehearing. A second petition for rehearing is not permitted.

Revised: March 27, 2013

PUBLIC SERVICE COMMISSION OF WISCONSIN

Joint Application of Wisconsin Electric Power Company and Wisconsin Gas LLC for Authority to Adjust Electric, Natural Gas, and Steam Rates — 5-UR-110

CONCURRENCE AND DISSENT OF COMMISSIONER ELLEN NOWAK

I write to explain my dissent on various issues in Commission's decision in the Joint Application of Wisconsin Electric Power Company and Wisconsin Gas LLC to Adjust Electric, Natural Gas and Steam Rates (Application).[1] While I did support several components of the Application, I did not support many issues that, I believe, cause concern about this Commission's process and create uncertainty for all parties appearing before the Commission should this proceeding be a harbinger of future decisions.

The applicants presented a comprehensive Settlement Agreement that was agreed to by the applicants and 8 intervenors representing a wide variety of interests. The Commission unanimously agreed that the settlement satisfied all procedural statutory requirements; however, the Commission did not adopt the settlement.

Overarching Concerns and the Future of Settlements in Wisconsin

Settlements, by their nature, do not accommodate the wishes of all parties. Issues are debated, traded and eventually settled. Parties take positions or concede on issues that, absent the spirit of compromise needed to reach a settlement, would not be presented as stand-alone matters. That is why when I have looked at settlements, the determining factor is whether the

[1] The comments addressed herein should be incorporated in my dissent in the *Application of Wisconsin Public Service Corporation for Authority to Adjust Electric and Natural Gas Rates,* docket 6690-UR-127.

agreement, as a whole, is reasonable. In this proceeding, I believed that the Settlement Agreement was reasonable and would have approved it without modification.

To be sure, the Commission is not bound to accept settlements. In the past, I have not accepted some settlements and articulated the rationale for my position.[2] Here, it is unclear why the majority did not accept this Settlement. At the initial discussion, Chair Valcq expressed dismay that the parties inserted a clause in the contract that represented the parties would withdraw the Settlement Agreement if the Commission were to change any part of the agreement (a "take it or leave it" clause).[3] This is standard language in settlements, not just at this Commission but elsewhere. It is basic contract language that this Commission has seen repeatedly and has also ignored, as we recognize that Wis. Stat. § 196.026(8) allows the Commission to accept a settlement "in whole or in part." Accordingly, when this standard language was raised as a reason for rejecting the Settlement Agreement in its entirety, I was surprised.

While I acknowledge that reasonable minds can disagree and the Settlement Agreement would be rejected, I do not understand the rationale for the process that followed. I can confidently say this was the strangest Commission deliberation I have seen in my 11 years at the Commission. If the Commission rejects a settlement, then all the positions that were agreed to

[2] Final Decision, *Application of Northern States Power Company-Wisconsin for Authority to Adjust Electric and Natural Gas Rates*, Docket 4220-UR-125 (Wis. PSC Dec. 20, 2021) and Final Decision, Application of Wisconsin Power and Light Company for Authority to Adjust Electric and Natural Gas Rates, Docket 6680-UR-123 (Wis. PSC. Dec. 22, 2021).

[3] At some point during the discussion the majority noted that the requested increase was "too high" without articulating any specifics about what would be acceptable (as if that is how rates are set) other than a desire to lower the requested increase. Compare that to increases approved last year where the majority accepted similar or larger increases without question. (See dockets 4220-UR-125, 3270-UR-124 and 6680-UR-123). CUB's position in this proceeding was also interesting. Following the execution of the settlement, CUB's public comments obfuscated the fact that they agreed to all of the revenue increases except the return on equity.

by all parties solely for the purpose of settlement should also be set aside. But that did not happen. The majority systemically walked through the components of the Settlement Agreement and crafted a one-sided result that was outcome-based, tossing away widely accepted rate-making principles and, in some circumstances, lacked any basis in law. For example, accepting a lower fixed charge, mandating a write-off of validly incurred expenses due to COVID, mandating how shareholders spend money, mandating a review of recoverability of certain assets and participation in discussions that create a sub-class of customers based solely on income, are just a few items that clearly were offered in the spirit of settlement but accepted by the majority without any evidence in some circumstances. I will discuss some of these in more detail later.

If this Commission claims to take the settlement process seriously, it should make a good faith effort to maintain the balance arrived at by the parties in good faith. Again, to state the obvious, the very nature of the settlement process requires that parties concede on issues that, absent a settlement, they would not offer to opposing parties. It is irresponsible for the Commission to ignore this basic point. Unfortunately, that is what happened here. If what occurred in this proceeding is the norm, it leaves parties vulnerable to the whims of the agency. Negotiating parties, in essence, are asked to show their cards to the Commission and the Commission can craft lopsided proceedings after dismantling the negotiations of parties. This cannot be the way forward for this Commission. If so, it will result in a destruction of the Commission's reputation and cause harm to utilities and consumers. It also creates a chilling atmosphere for future settlements.

The settlement process relies on trust and good faith among the parties. That is the only path to the give-and-take necessary for a win-win result. In the future, what party will give anything in a negotiation when Commissioners do nothing but take? In the environment created with this decision, parties can be expected to fight over every detail, unless they assume the Commission is only discriminatory against certain applicants.

As I noted, the Settlement Agreement was reached after Commission staff conducted a full audit, thus, the parties had the benefit of this information at the time of negotiation. In the past, when a settlement was reached prior to conclusion of staff's audit, this Commission has criticized the parties for reaching a settlement prematurely. However, at the initial deliberation, the majority was critical of the timing, noting that it was "late" in the process. Also concerning was the manner of presentation of the issues for the Commission's deliberation. Issues that were agreed upon in the Settlement Agreement (even those where the two non-settling parties did not take a position) were presented with Commission staff position as a potential alternative. This is problematic for two reasons. First, the parties had the benefit of staff's position and audit at the time of negotiation. It was not necessary to present them again. Agreement was reached. Second, Commission staff is not a party.[4] Noting the staff position a second time even though all parties were in agreement treats staff's position as something other than a guide for Commissioners to help evaluate the stated party positions.

Concerns Regarding Specific Provisions

I dissented on several individual issues in this proceeding. I will not address all of them but will touch on the most troubling ones.

[4] See Wis. Admin. Code PSC §2.03(1)

COVID Regulatory Asset Write-Off

In docket 5-AF-105 this Commission authorized the deferral of expenditures incurred by utilities resulting from compliance with Emergency Order 11, orders by the Commission in docket 5-UI-120, and as otherwise required to ensure the provision of safe reliable and affordable access to utility services during the declared public health emergency for COVID-19. The deferral ended December 31, 2021 and the applicants initially sought to amortize this regulatory asset over a two-year period.

As part of the Settlement Agreement, the applicants agreed to write-off the regulatory asset.[5] However, either acting as though the Settlement Agreement was still intact or just completely disregarding the need for having substantial evidence to order such a write-off of validly incurred expenses, the majority inexplicably mandated the applicants to absorb the costs. The Order lacks any evidence in support of this decision. This is not a close call – it is not permitted – and this Commission should and does know better. This type of baseless decision-making again jeopardizes this Commission's reputation.

The absurdity of this Commission ordering action and then denying recovery without evidence or justification cannot be overstated.

As with many of the punitive actions in this case, the majority denied recovery to one utility that was allowed others practically without discussion. Why would this Commission determine the same costs incurred in response to the exact same Commission orders be reasonable and recoverable for all utilities but one? There was nothing in the record that provided evidence that these costs were unreasonable or even different than COVID expenses

[5] The write off is material: $9.5 million for WEPCO electric operations, $1.0 million for WEPCO natural gas operations, and $2.4 million for WG operations.

from other utilities. This action is the definition of the type of capricious action that should be reversed in court.

Mandating Shareholder Spending

As part of the settlement negotiations, the applicants, along with Wisconsin Public Service Corporation, offered to make a total contribution to the Keep Wisconsin Warm Fund in the amount of $4 million.

Again, with the Settlement Agreement rejected, the majority still ordered the contribution. Rather than even try to argue there is substantial evidence to make such a decision, the Final Order contains a single, remarkable sentence to support the decision: '[t]he Commission appreciates and accepts the applicants' offer to make such a contribution." (*supra* at p. 70). This ignores two things. First, the "offer" was made for purposes of settlement. Second, the Commission lacks legal authority to mandate the use of shareholder funds absent substantial evidence in the record. Utilities have a fiduciary responsibility to their shareholders. It is entirely within their purview to commit to the expenditure of those dollars for what they determine to be the best interest of the shareholder they represent. In this case, the utility determined the expenditure of $4 million of shareholder funds was worthwhile as part of a settlement that impacted shareholders in many ways. When that settlement was abandoned, so was the purpose of the expenditure.

For more than a century, this Commission and its predecessor determined a reasonable return for privately owned utilities providing a public service. The idea that this Commission has the power to spend dollars that rightfully belong to shareholders cannot be termed a "contribution." It has the hallmarks of a government taking. While claiming concern for customers under economic stress, the majority voted to take dollars belonging predominantly to retired seniors whose income is based on dividends and pension funds that provide retirement income from the profits this Commission has allowed.

This is not about what constitutes a reasonable return. It is about whether investors and retirees can count on the Wisconsin Public Service Commission to keep its word. With this vote, the majority has violated a trust.

Mandating Review of Future Asset Recovery for Certain Assets

The majority was dangerously close to requiring the applicants to securitize $100 million of environmental controls at the Oak Creek Power Plant (OCPP) until I questioned the legal authority to do so. The fallback position was not much better. Now, the applicants must file an analysis of as to how to address the remaining unrecovered book balance for OCPP in the applicants' electric reopener for 2024.[6] This is a distinction without a difference. Also concerning was the statement from Commissioner Huebner that this Commission should explore disallowance of any return on generating facilities that are closed before being fully depreciated. This is particularly interesting since Commissioner Huebner has consistently advocated for a carbon reduction timetable that would necessitate such closures. Would these artificial carbon reduction goals, like the COVID issue above, result in this Commission ordering costs without allowing recovery? Such reckless statements have a real and quantifiable negative financial impact on utilities, shareholders and customers.

[6] The majority's requirement is actually broader – the Final Order also requires the applicants file an analysis of alternative recovery scenarios for all generating units that will be retired prior to the end of their useful life. (*Supra* at p. 48)

By calling into question the commitment (and legal obligation) of this Commission to stand by our written orders, these statements can have a chilling effect on the very investment for which Commissioner Huebner has advocated.

Return on Equity

While the majority landed at 9.8, a 20 basis point reduction for Wisconsin Electric, Wisconsin Public Service and a 40 basis point reduction for Wisconsin Gas, the discussion surrounding the appropriate return on equity was concerning. It appeared that the only metric used by the majority to determine ROE was Wisconsin utilities' stance in relation to the national average. That is a simplistic and incorrect method for determining ROE. We do not set rates, approve construction permits or authorize borrowing based on how other state commissions perform those tasks.

A utility's return on equity should be determined after reviewing the common methodologies, such as the discounted cash flow or capital asset pricing model in context of the current financial environment. Ignoring this sound economic basis for determining ROE risks injecting risk to the utility's financial health, which is a detriment to consumers, especially when combined with the added risk from erratic Commission actions. The financial health of a utility is important so that it can attract capital needed to transition the generation fleet and maintain reliable infrastructure for customers.

Considering the current financial environment (rising interest rates, inflation at a 40-year high, etc.) I would have maintained each utility's current ROE. Fortunately, the majority adhered to gradualism with respect to lowering the ROE's, although the rationale for doing so is suspect, and Commissioner Huebner indicated he would have reduced ROE's further.

Final Thoughts

Perhaps I am becoming more reflective as I prepare to end my tenure at the Commission, but I cannot help but look at this decision in light of where this Commission has been and where it might be headed.

This Commission is often faced with making many difficult decisions. It is critical that ratepayers, shareholders and the public can follow our decisions and, even if they disagree with the outcome, understand the decision was based an objective application of longstanding principles, not politics, preferred outcomes or the whim of commissioners.

Inconsistent decisions and decisions that lack evidentiary or legal support will harm this long-held and important reputation. I hope that does not happen.

PUBLIC SERVICE COMMISSION OF WISCONSIN

Joint Application of Wisconsin Electric Power Company and Wisconsin Gas LLC for Authority to Adjust Electric, Natural Gas, and Steam Rates | 5-UR-110

CONCURRENCE AND DISSENT OF COMMISSIONER TYLER HUEBNER

The record in this case presented me with a dichotomy. On the one hand are essential public services – electricity, natural gas, and steam heat – that require investment to operate efficiently and effectively for well over one million customers. At the end of the record development in this proceeding, we were presented with applicants' and settling parties' proposal, which at a 10.0 percent return on equity (ROE) for Wisconsin Electric Power (WEPCO) and 10.2 percent ROE for Wisconsin Gas (WG), would have led to an approximately 10.6 percent overall electric rate increase of $331.2 million, an approximately 11.5 percent overall natural gas increase of $55.2 million for Wisconsin Electric Gas Operations (WE-GO), an approximately 8.7 percent overall increase of $62.8 million for WG, and an $8.7 million increase to steam rates.[1]

On the other hand, we received (by my count) over 1,770 public comments[2], many of which came from customers who are struggling to pay their bills today – at one of the more expensive electric utilities in the Midwest – and who will struggle to afford a bill increase, especially as those same consumers are hit with economy-wide inflation in many areas of their

[1] Ex-WEPCO WG-Eidukas-SA2, Schedule 1 page 8 of 18 (PSC REF#: 449565)
[2] Ex.-PSC-Public Comment, PSC REF#: 453408, Tr. 01-66 Public Hearing Session - PSC REF#: 451882, and Tr. 384-577 Public Hearing Session - PSC REF#: 451884.

life. Numerous State Legislators also wrote and spoke with similar concerns on behalf of their constituents.[3]

And as many customers noted, the increase is being requested by utilities whose corporate parent just announced another record year of financial profits.[4]

In my view, this rate case highlighted that additional focus will be needed, now and into the future, among this Commission, the utilities we regulate, and intervenors and stakeholders to continue achieving the balance between the financial goals of the utilities and the ability of customers to afford the services. I must recognize applicants and their sister utility for the proposals they did present in this proceeding, such as proposing to write-off $16.9 million worth of previously-authorized deferrals related to COVID in 2023 (and the same amount in 2024), offering to make a $4 million shareholder contribution to the Keep Wisconsin Warm Fund, and proposing to extend the Low Income Forgiveness Tool program.

While I appreciated those proposals, I felt additional reductions were prudent that better maintained the balance between applicants and customers, some of which were adopted by the Commission and some which were not. In my decisions in this docket, my goal was to ensure the applicants can recover the costs they need to serve their customers with essential services, while ensuring substantial evidence existed to justify each increase. Going forward, I hope we can prudently identify cost savings in future rate and fuel cases as we continuously strive to achieve the right balance between applicants and their customers.

In addition, I strongly support extending and expanding efforts to identify solutions to make energy affordable for low-income customers. I supported the Commission's decision to

[3] "Joint Legislative Comments on Rate Cases by WEC Energy Group Utilities" PSC REF# 451445 and Tr. Public Hearing Session (PSC REF#: 451884) State Sen. Chris Larson (pages 397-401) and State Representative Supreme Moore Omokunde (pages 550-2)
[4] Comments of the City of Milwaukee in Opposition to We Energies Rate Increase Request, PSC REF#: 451898

direct the applicant to extend the Low Income Forgiveness Tool and to commit to open a new docket by April 1, 2023, to investigate the development of alternative low-income assistance programs. This docket will enable Commission staff involvement, and allow intervenor compensation to community organizations, and will include conducting a comprehensive review of applicants' service rules and explore updated or new programs to support energy affordability. One particular item, the $600 reconnection fee, was mentioned often in the public comments we received. I requested, and it was approved, that applicants supply a report on the purpose and efficacy of this fee, or a plan to replace it with a more customer-friendly proposal, as part of this new docket.

Return on Equity

Extensive testimony was filed on this issue. Applicants filed to continue to receive a 10.00 percent ROE for WEPCO and a 10.2 percent ROE for WG. I found Citizen Utility Board (CUB) Witness Dr. Steve Kihm's testimony valuable in separating the concepts of "cost of equity" from "return on equity," in addition to the numerous examples he provided regarding peer utilities' credit ratings and ability to raise capital.[5] Dr. Kihm concludes that industry-wide, ROEs are much higher than utility investors require them to be, and establishes a range of the *cost of equity* between 6.3 percent - 7.8 percent.[6] CUB concludes the ROE for applicants should be set at 9.0 percent.

[5] Direct-CUB-Kihm-72-73 (observing that Duke Energy's median ROE was only 7 percent for a decade, and its stock traded at a premium and it raised billions of dollars of capital); Direct-CUB-Kihm-73 (noting that ComEd's bonds are rated "A" with an ROE of 7.36 percent). See also the discussion of Consumers Power in Direct-CUB-Kihm-5-16. PSC REF#: 446996
[6] Surrebuttal-CUB-Kihm-r-7 Lines 1-2 PSC REF#: 449057

In addition, Walmart Witness Kronauer's testimony and MMSD Witness Pearsall provided helpful context regarding the ROE decisions of our peers – regulatory commissions across the country – regarding the utilities they regulate. The evidence showed Wisconsin's ROEs are above the national average of ROEs for electric utility cases decided in 2019, 2020, 2021, and 2022-to-date, which was 9.45 percent, for natural gas utilities which was 9.56 percent, and for vertically-integrated utilities which was 9.59 percent (yet trending down to 9.55 percent in 2021 and 9.32 percent in early 2022.)[7]

While Wisconsin ROEs have been above the national average, Staff Witness Adams further observed that industry-wide, "reductions in authorized ROEs have not matched the pace or magnitude of the decline in interest rates over the past 30 years."[8] This echoes much of what Dr. Kihm illustrates throughout his testimonies.

CUB's testimony, summarized in its Initial Brief, adequately rebutted applicants Witness Ms. Bulkley by showcasing how out-of-step many of her assumptions were.[9]

In summary, I concur with the reduction of ROE to 9.8 percent in this case. I would also have supported a lower ROE of 9.6 percent or 9.5 percent that would have brought applicants' ROEs in line with the national averages. The reduction in ROE to 9.8 percent reduced the rate increases by approximately $9.34 million for WEPCO Electric, $1.76 million for WEPCO-Gas Operations, and $5.46 million for Wisconsin Gas.[10]

[10] Ex.-PSC-Adams-1 Schedule 3 Page 1 of 4 for Electric, Page 2 of 4 for WE-GO, and Page 4 of 4 for Wisconsin Gas PSC REF#: 446845, "Staff Proposed" line in summary table at top left of each page

Staff Adjustments

I concur with the reductions that the Commission made regarding the applicant's staffing, operations and maintenance, inflation, and construction work in progress expenses. As a Commission, we utilize our professional staff's expert opinions, which span not only this case, this applicant's previous rate cases and operations, but ALL the rate cases of both investor-owned and municipal utilities that come before us. Their expertise and the analysis they put forth in the record helps us determine what is the most just and reasonable outcome of a rate case.

These reductions to the electric and natural gas revenue requirements, in addition to the other changes made to or impacting revenue requirement, including lowering the ROE, reduced applicant's proposed rate increases as follows:

Utility Service	Applicant Proposed Overall Increase[11]	Commission Approved Overall Increase[12]
WEPCO Electric	10.6% $331.2 million	9.11% $283.5 million
WE-GO	11.5% $55.2 million	9.59% $46.1 million
WEPCO Steam	$8.7 million	$7.6 million
WG	8.7% $62.8 million	6.4% $46.5 million

I will now discuss three items which I proposed that could have further reduced the rate increase in this case. Although they were not accepted for 2023, these items could be reviewed again starting in 2024 or applicants' next rate case.

[11] Ex-WEPCO WG-Eidukas-SA2, Schedule 1 page 8 of 18 (PSC REF#: 449565). I use the term "overall" to distinguish from rate impacts to any particular rate class.
[12] Final Decision at 1

<u>S&P Revision of Point Beach Nuclear Facility Power Purchase Agreement</u>

Applicants requested a $19.9 million revenue increase related to Standard & Poor's (S&P) methodology regarding power purchase agreements as off-balance sheet obligations.

In applicants' prior rate case, Order Point 36 stated:

> "36. WEPCO shall submit in its next rate case application detailed information regarding all off-balance sheet obligations for which the financial markets will calculate a debt equivalent. The information shall include, at minimum, the minimum annual lease and purchased power agreement obligations; the method of calculation along with the calculated amount of the debt equivalent; and supporting documentation, including <u>all reports, correspondence, and any other justification that *clearly establish* S&P's and other major credit rating agencies' determination of the off-balance sheet debt equivalent</u>, to the extent available, and publicly available documentation if S&P's and other credit rating agencies' documentation is not available."[13] (my emphases added)

In this docket, Applicant Witness Zgonc states S&P has "an updated methodology for valuing off balance sheet obligations across the utility space."[14] Mr. Zgonc continues, "[t]his analysis is further supported by Ex.-WEPCO/WG-Zgonc-6, which shows the updated calculation of the off balance sheet obligations. The impact to revenue requirements is an increase of $19.9 million for Wisconsin Electric's electric utility, $3.8 million for Wisconsin Electric – Gas Operations and $0.2 million for Wisconsin Electric's steam operations." In the Settlement

---

[13] Final Decision, *Joint Application of Wisconsin Electric Power Company and Wisconsin Gas LLC for Authority to Adjust Electric, Natural Gas, and Steam Rates*, (Wis. PSC Dec. 19, 2019) (PSC REF#: 381305)
[14] Direct-WEPCO/WG-Zgonc-s-7-8 PSC REF#: 442278

Agreement, the Settling Parties agreed not to ask ratepayers to fund the $3.8 million or $0.2 million adjustments, but did include ratepayer funding for the $19.9 million associated with the Point Beach Nuclear Power Plant.

However, a review of Ex.-WEPCO/WG-Zgonc-6 shows a stream of numbers, *none* of which includes a value of $19.9 million.[15] Furthermore, based on Order Point 36 from the previous docket, I do not find this one page of testimony and stream of numbers to be satisfactory to "including all reports, correspondence, and any other justification that clearly establish S&P's and other major credit rating agencies' determination of the off-balance sheet debt equivalent." There is no report. There is no correspondence. And what is provided is not clear. Without substantial evidence or compliance with our prior order point, I did not find this $19.9 million adjustment to be just and reasonable.

Furthermore, the Point Beach Nuclear Plant has been operated successfully since the 1970s. The long-term power purchase agreement between Wisconsin Electric Power Company and Point Beach's owner has not changed, at least not according to the record in front of us. And finally, Point Beach happens to be owned by the largest utility company (by stock market capitalization) in the United States, NextEra Energy.[16] While S&P may be applying changes industry-wide, I challenge whether such an adjustment is needed for *this particular plant and this particular power purchase agreement*.

I strongly encourage the applicant to pursue all remedies possible to get this off-balance sheet obligation removed in future test years so that we can reduce future ratepayer expenses for this as-yet-unsupported change, when no underlying risk factors have changed related to this power purchase agreement. All such documentation of efforts should be provided in the future.

---

[15] Ex.-WEPCO/WG-Zgonc-6
[16] https://www.nexteraenergyresources.com/what-we-do/nuclear/point-beach.html, accessed 12/2/2022.

If, after exhausting all remedies, this is something that cannot be avoided in customers' rates, then we need documentation that actually shows the cost impact, and actual documentation from S&P regarding this change. I hope applicant will advocate for its customers, and show us they have done so. In future cases, we can judge the prudency of such efforts to reduce or eliminate this $19.9 million increase to customers.

Capital Structure

We had a second chance to reduce some of the impact of that off-balance sheet obligation by adjusting the financial capital structure of WEPCO electric operations. By reducing the financial capital structure to 49.5 percent equity, we could have saved ratepayers approximately $11 million of the $19.9 million, and re-established a regulatory capital structure which included approximately the same equity percentage as applicants had originally filed, approximately 54.6 percent.[17]

Instead, the Commission supported a 53 percent financial equity layer, which leads to an eye-popping 58.19 percent regulatory equity layer for WEPCO, much higher than any other major utility we regulate.

I also do not accept the increase in the financial equity layer to 53 percent. Coming into this case, applicant's equity layer was 52.5 percent on a financial basis. This request is not free for customers. Witness Adams showcases the sensitivities of changing the equity layer, showing that at the 9.8 percent ROE that the Commission approved, the difference between an equity layer of 52.50 percent and 53.00 percent is equal to $2,455,000 in ratepayer expenses for

[17] Direct-PSC-Adams-r-7 PSC REF#: 448989 "Given that the applicants originally filed a forecasted ratemaking equity layer of 54.61 percent, the Commission may wish to consider imputing a lower target equity layer, on a financial basis, to reflect that originally publicized ratemaking equity layer. Imputing a financial common equity layer of approximately 49.50 percent would yield a similar result."

WEPCO Electric.[18] The savings would be approximately $463,000 for natural gas and $17,000 for steam, or $2.93 million in total for WEPCO, along with approximately $806,000 for Wisconsin Gas.[19]

Without justification as to the benefits to customers of this increased cost, I cannot accept it. Looking ahead, the Commission should continue examining this issue and be sure that the appropriate balance between customers and applicants is being struck, because the equity layer has continuously increased over the past decade:

Rate Case Docket and Decision Date	**Equity Layer**
5-UR-110 (Current Docket, Issued Dec. 2022)	53 percent WEPCO 53 percent Wisconsin Gas
5-UR-109 (Issued Dec. 2019)[20]	52.5 percent WEPCO 52.5 percent Wisconsin Gas
5-UR-107 (Issued Dec. 2014)[21]	51.0 percent WEPCO 49.5 percent Wisconsin Gas
5-UR-106 (Issued Dec. 2012)[22]	51.0 percent WEPCO 47.5 percent Wisconsin Gas

If the difference between 53 percent and 52.5 percent is about $3.7 million spanning these four utilities, then perhaps the difference between 53 percent and 51 percent may be four times that high, or approximately $14.8 million. Cost-benefit analysis and value proposition justification should be provided in detail for future decision making on this issue.

[18] Ex.-PSC-Adams-1, Schedule 3, Page 1 of 4 (PDF page 8) PSC REF#: 446845. The chart shows savings vs. a 53 percent equity layer at 10.0 percent ROE. Given the Commission reduced the ROE to 9.8 percent with a 53 percent equity layer, a $9,342,000 savings was achieved. At a 9.8 percent ROE but a 52.5 percent equity layer, an $11,797,000 savings would have been achieved, thus an additional $2,455,000 savings for electric customers.

[22] Final Decision, *Joint Application of Wisconsin Electric Power Company and Wisconsin Gas LLC, both d/b/a We Energies, for Authority to Adjust Electric, Natural Gas, and Steam Rates*, (Wis. PSC Dec. 21, 2012) (PSC REF#: 178105, Findings of Fact 80 and 81, Page 13)

Storm Hardening Program

Applicants' witness Pecha testifies about the electric Storm Hardening Program.[23] No witness challenged this testimony, however the Administrative Law Judge and Intervenor Walnut Way asked a number of questions at the Technical Hearing. This program would include a $38 million investment in 2023, as the start of a $700 million program over the next ten years.

In my scrutiny of this rate increase, I had questions about this expenditure which, in my view, was not developed sufficiently for the $38 million requested. I would have reduced this expense for 2023. Going forward, the Commission has ordered a more detailed plan to be filed, and I fully support that. In addition, applicants should pursue any and all forms of financial assistance including federal, state, grants, loans, or other, to help defray the costs of this initiative to customers. The federal government, through both the Bipartisan Infrastructure Law and the Inflation Reduction Act, has funded and prioritized resiliency and reliability of electricity systems through multiple grant programs and opportunities, and WEPCO customers deserve a full-faith effort by applicants to bring in outside funding to help defray the cost of this initiative in 2023 and beyond.

Various Rate Proposals

I appreciate the various rate proposals proposed and developed by parties related to certain rate classes, extension of programs, and new programs, and look forward to future collaboration towards win-win solutions. In particular, I support the Renewable Energy Rider (RER) and hope it will be as successful as the Madison Gas and Electric Company program upon

[23] Direct-WEPCO/WG-Pecha-1 PSC REF #436118

which it is based. The RER can lead to self-selecting customers fully paying for new, Wisconsin-based renewable energy resources to meet internal sustainability or renewable energy goals, while reducing the need for all other ratepayers to pay for the commensurate capacity and energy provided by those new resources to the entire system.

Additional Order Conditions

I appreciate the Commission adopting the core elements of four additional order conditions I proposed in the Open Meeting.

First, customers are still paying for Pleasant Prairie, a retired coal power plant with a remaining balance of $481,594,000 as of 12/31/2022 and an amortization in 2023 of $26,251,000.[24] News reports indicate applicants may be selling all or a portion of that property to an industrial developer. Given the unrecovered balance, we will require Applicant to report to the Commission on the sale of all or any portion of the Pleasant Prairie Power Plant property.

Second, in the Limited Reopener for next year, the applicants will provide a more fulsome plan related to the Storm Hardening Program, as well as all funding opportunities or forms of financial assistance it has pursued or is pursuing.

Third, we will open a docket to explore the Low Income Forgiveness Tool and other programs and options for low-income affordability. As part of that review, the $600 reconnection fee should be discussed, along with a comprehensive review of service rules.

Fourth, regarding voluntary energy efficiency programs. We cannot order the utilities to undertake additional voluntary energy efficiency programs, but evidence presented by Clean Wisconsin's witness Courtney Lane[25] reiterates what we have learned in docket after docket:

[24] Ex.-WEPCO/WG-Zgonc-3r, Page 3 "WEPCO P4 Retirement" line PSC REF# 442287
[25] Direct-Clean Wisconsin-Lane PSC REF#: 446985

additional energy efficiency investments would be cost-effective (to the tune of $3 in benefits for every $1 in cost[26]) for applicants' customers, and Wisconsin is saving less energy relative to neighboring states.[27] If applicants have not filed for updated voluntary energy efficiency programs by June 30, 2023, the applicant shall instead file by that date a status report on Applicant's forward-looking energy efficiency plans to increase cost-effective energy efficiency in its service territories. Such plans may be in coordination with progress or outcomes from the Performance-Based Ratemaking effort in Docket 5-EI-158, and any other collaborative initiatives/discussions involving Applicant, parties, and/or customers in the meantime. Revenue requirement for any new voluntary energy efficiency programs could be included in the 2024 Limited Reopener.

Conclusion

In summary, I concur with the setting of new rates for applicants with the conditions in the Final Decision and as discussed herein, and I respectfully dissent on the certain matters as noted in the Final Decision and as discussed more fully above.

Fuel Cost in Base Rate
Wisconsin Electric - District Steam Service
For Test Year ending December 31, 2023

Valley Fuel Cost in Steam Base Rates (New Method)

Total Valley Method	2023 Test Year
Total Valley Fuel Costs net of Fixed Gas Costs	$40,186,622
Heat Value of Fuel (MMBtu)	6,982,880
Valley Fuel Cost ($/MMBtu)	**$5.75502**
Conversion rate from MMBtu to Mlbs	1.01800
Valley Steam Fuel Cost ($/Mlb)	**$5.85861**
Current Valley Cost of Fuel in Base Steam Rates ($/MMBtu)	$ 3.38233
Test Year Valley Steam Fuel Cost Adjustment	$ 2.37269

Valley Fuel Conversion Rate

Valley Steam Heat Value of Fuel (MMBtu)	1,793,068
Valley Steam Sales (Mlbs)	1,762,158
Revised Conversion rate from million Btu production to Mlb sales	**1.018**
Current rate from million Btu production to Mlbs sales	1.008
Adjustment to conversion rate for test year	0.010

Steam Embedded Credit Calculation - Test Year 2023

		Downtown Milwaukee
1	Distribution Plant	$90,314,489
2	Distribution Plant Depreciation Reserve	$52,159,642
3	Depreciated Cost	$38,154,847
4	Total Consumption Mlbs	1,762,158
5	Embedded Credit $/Mlb.	**$22**
