Purposes of valuation

American Electric Power Co. (AEP or the Company) retained Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC (“Willis Towers Watson”), to perform an actuarial valuation of the American Electric Power System Retirement Plan for the purpose of determining the following:

1. The minimum required contribution in accordance with ERISA and the Internal Revenue Code (IRC) for the plan year beginning January 1, 2017.
2. The estimated maximum tax-deductible contribution for the tax year in which the 2017 plan year ends in accordance with ERISA as allowed by the IRC. The maximum tax-deductible contribution should be finalized in consultation with the Company's tax advisor.
3. Plan accounting information in accordance with FASB Accounting Standards Codification Topic 960 (ASC 960).
4. An assessment of ERISA §4010 reporting requirements for the plan for 2017.
5. Determination of the Funding Target Attainment Percentage (FTAP) under IRC §430(d)(2), as reported in the Annual Funding Notice required under ERISA 101(f).
6. The value of benefit obligations as of January 1, 2017 and American Electric Power Co.'s pension cost for fiscal year ending December 31, 2017 in accordance with FASB Accounting Standards Codification Topic 715 (ASC 715-30).
7. As requested by American Electric Power Co., a “specific certification” of the Adjusted Funding Target Attainment Percentage (AFTAP) for the American Electric Power System Retirement Plan under IRC §436 for the plan year beginning January 1, 2017. Please see Appendix C for additional information. Note that the AFTAP certification included herein may be superseded by a subsequent AFTAP certification for the American Electric Power System Retirement Plan for the plan year beginning January 1, 2017.

Limitations

This valuation has been conducted for the purposes described above and may not be suitable for any other purpose. In particular, please note the following:

1. This report does not determine the plan's liquidity shortfall requirements (if any) under IRC §430(j)(4). If applicable, we will determine such requirements separately as requested by the Company.
2. This report does not determine liabilities on a plan termination basis, for which a separate extensive analysis would be required. No funded status measure included in this report is intended to assess, and none may be appropriate for assessing, the sufficiency of plan assets to

cover the estimated cost of settling the plan's benefit obligations, as all such measures differ in some way from plan termination obligations. For example, measures shown in this report may reflect smoothed assets or interest rates, rather than current values, in accordance with funding and accounting rules. In addition, funded status measures shown in this report do not reflect the current costs of settling the plan obligations by offering immediate lump sum payments to participants and/or purchasing annuity contracts for the remaining participants (e.g., insurer profit, insurer pricing of contingent benefits and/or provision for anti-selection in the choice of a lump sum vs. an annuity).

3. The cost method for the minimum required contribution is established under IRC §430 and may not in all circumstances produce adequate assets to pay benefits under all optional forms of payment available under the plan when benefit payments are due.
4. The comparison of the plan's funding target to its actuarial value of assets (the funding shortfall (surplus) shown in Section 1) is used in determining required contributions for the coming year, and a contribution made on the valuation date equal to the shortfall would be considered to "fully fund" the plan for benefits accrued as of the valuation date under the funding rules, and thus is useful for assessing the need for and amount of future contributions. However, the funding shortfall (surplus) cannot be relied upon to determine either the need for or the amount of future contributions. The funding shortfall (surplus) is based on the interest rates elected to be used for funding purposes, which may be smoothed rates not reflecting current market conditions and will in any event change over time. It is also based on the actuarial value of assets, so if an asset smoothing method is used, it would be different than if based on market value of assets. In addition, asset gains and losses, demographic experience different from assumed, and future benefit accruals (if any) will all affect the need for and amount of future contributions.
5. There may be certain events that occurred since the valuation date that are not reflected in this valuation. See Subsequent Events (under the "Basis for valuation" portion of Section 1 below) for more information.
6. This valuation reflects our understanding of the relevant provisions of the Pension Protection Act of 2006 (PPA); the Worker, Retiree and Employer Recovery Act of 2008 (WRERA); the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 (PRA), the Moving Ahead for Progress in the 21st Century Act (MAP-21), the Highway and Transportation Funding Act of 2014 (HATFA), and the Bipartisan Budget Act of 2015. The IRS has yet to issue final guidance with respect to certain aspects of these laws. It is possible that future guidance may conflict with our understanding of these laws based on currently available guidance and could therefore affect results shown in this report.

Section 1: Summary of results

Summary of valuation results

All monetary amounts shown in US Dollars

Plan Year Beginning	01/01/2017	01/01/2016
Funding		
Market value of assets with discounted receivable contributions	4,831,883,160	4,764,796,511
Actuarial value of assets	4,959,332,851	4,845,528,901
Funding balances	764,027,069	732,713,704
Funding target	4,106,845,705	4,032,865,265
Target normal cost	88,460,077	79,939,884
Funding shortfall (surplus)	(88,460,077)	(79,949,932)
Funding target attainment percentage (FTAP)	102.15%	101.98%
Minimum required contribution		
Prior to application of funding balances	0	0
Net of available funding balances	0	0
Effective interest rate	5.80%	5.95%
U.S. GAAP Accounting (ASC 715) as of Measurement Date	01/01/2017	01/01/2016
Projected benefit obligation (PBO)	5,026,555,852	4,936,569,137
Fair value of assets (without receivable contributions)	4,831,883,160	4,764,796,511
Funded status	(194,672,692)	(171,772,626)
Total benefit cost/(income)	93,751,108	98,494,271
Discount rate	4.05%	4.30%
Participants as of Census Date	01/01/2017	01/01/2016
Active employees	16,899	16,859
Participants with deferred benefits	3,643	4,372
Participants receiving benefits	15,460	15,645
Total	36,002	36,876
Plan Accounting (ASC 960)	01/01/2017	01/01/2016
Present value of accumulated benefits	4,013,604,704	4,062,659,954
Market value of assets with receivable contributions	4,831,883,160	4,764,796,511
Plan accounting discount rate	6.00%	6.00%

Minimum required contribution and funding policy

All monetary amounts shown in US Dollars

Plan Year Beginning	01/01/2017	01/01/2016
Minimum Required Contribution (MRC)		
Prior to application of funding balances	0	0
Net of available funding balances	0	0
 Sponsor's Funding Policy Contribution	 96,356,000	 85,953,000

The plan sponsor's funding policy generally has been to contribute the greater of the ASC 715 service cost or the minimum required contribution. We understand the sponsor may deviate from this policy based on cash, tax, or other considerations.

The minimum required contribution includes a contribution to cover the benefits expected to accrue in the coming year (if any) plus expenses expected to be paid from the trust in the coming year (if any) (target normal cost), as well as a 7-year amortization (with a somewhat longer amortization period for shortfall amortization bases established in any year for which funding relief was elected) of any funding shortfall (amortization installments) (See Section 2.4 for a break-down of the minimum required contribution into target normal cost and amortization installments, and see Section 2.5 for a schedule of amortization installments for future years). Thus, assuming that all actuarial assumptions are realized and do not change and the plan sponsor contributes the minimum required contribution each year (target normal cost plus amortization installments), the plan would generally be expected to be fully funded in 7 years, and the minimum required contribution would be expected to drop to target normal cost. During the 7 year period, there will be some variability in minimum required contributions due to amortization installments from prior years dropping out as the 7-year amortization period ends (and for deferred asset gains or losses becoming reflected in assets if an asset smoothing method is used for the actuarial value of assets). In reality, gains and losses will occur, and the plan sponsor may fail to contribute the minimum required contribution (or may contribute more than the minimum required contribution in accordance with the funding policy described above), which may cause the plan to take more or less than 7 years to become fully funded. Note that being fully funded under the funding rules is not the same as being fully funded on a plan termination basis, as different assumptions apply (e.g., the cost of annuity contracts or lump sums to participants) on plan termination.

Target normal cost for individual participants accruing benefits will grow from year to year as participants age (and as their salaries increase, if benefit accruals are pay related), but the changes in total target normal cost will depend on the numbers of participants earning benefits and their ages. Because the number and ages of active participants covered by the plan are not expected to change significantly from year to year, target normal cost is expected to increase as salaries increase. Of course, changes in discount rates and other assumptions in future years will also influence the pattern of future required contributions.

The minimum required contribution for the 2017 plan year must be satisfied by September 15, 2018. This requirement may be satisfied through contributions and/or an election to apply the available funding balances. No quarterly installments are required. The minimum required contribution is determined assuming it is paid as of the valuation date for the plan year. Contributions made on a date other than the valuation date must be adjusted for interest at the plan's effective interest rate. The minimum funding schedule, before reflecting any funding balance elections or amounts already contributed for the 2017 plan year prior to the issuance of this report, is shown below.

All monetary amounts shown in US Dollars

Date	Funding Balance Applied	Current Plan Year Contributions	Discounted Value of Contributions as of Valuation Date	Portion of MRC Satisfied
April 15, 2017	0	0	0	0
July 15, 2017	0	0	0	0
October 15, 2017	0	0	0	0
January 15, 2018	0	0	0	0
September 15, 2018	0	0	0	0
Total				0

If a plan has a funding shortfall for the current plan year, quarterly contributions will be required for the following plan year.

Because the plan does not have a funding shortfall, no quarterly contributions will be required for the 2018 plan year based on this year's valuation results.

Change in minimum funding requirement and funding shortfall (funding surplus)

The minimum funding requirement is unchanged from \$0 for the 2016 plan year to \$0 for the 2017 plan year, and the funding shortfall (surplus) increased from \$(79,949,932) on January 1, 2016 to \$(88,460,077) on January 1, 2017.

Significant reasons for these changes include the following:

- The plan's effective interest rate decreased 15 basis points compared to the prior year, which decreased the funding surplus.
- Investment experience was more favorable than expected, which increased the funding surplus.
- Demographic experience was less favorable than expected which decreased the funding surplus.

Funding ratios

The Pension Protection Act of 2006 (PPA) defines several Funding Ratios. All of these ratios are based on a ratio of plan assets to plan liabilities, but the assets and liabilities are defined differently for different purposes. Depending on the purpose, the assets may be market value or, if different, a smoothed actuarial value of assets, and may be reduced by the prefunding balance or all funding balances. The liabilities may be based on the funding target, funding target disregarding at-risk assumptions, or the funding target calculated using at-risk assumptions (see the At-Risk status section below), and may or may not reflect stabilized interest rates.

Following are the key funding ratios and their implications for the 2017 or 2018 plan years. See Appendix E for details on how each ratio is calculated.

January 1, 2016 Funding ratios

Ratio Test Implications	Threshold	Ratio Value
1 Funding balances can be used to satisfy the 2017 Minimum Required Contribution (MRC) if threshold met	80%	105.98%
2 Quarterly contribution exemption applies in 2017 if threshold met	100%	101.98%
3 Plan is not at-risk for 2017 if the threshold for either the Prong 1 or Prong 2 test is met		
- Prong 1 Test	80%	101.98%
- Prong 2 Test	70%	N/A

January 1, 2017 Funding ratios

Ratio Test Implications	Threshold	Ratio Value
1 Funding balances can be used to satisfy the 2018 MRC if threshold met	80%	105.86%
2 Quarterly contribution exemption applies in 2018 if threshold met	100%	102.15%
3 Plan is not at-risk for 2018 if the threshold for either the Prong 1 or Prong 2 test is met		
- Prong 1 Test	80%	102.15%
- Prong 2 Test	70%	N/A
4 PBGC 4010 filing may be required in 2018 if threshold is not met by every plan in the controlled group	80%	86.91%
5 Plan is exempt from creating a new Shortfall Amortization Base (SAB) for 2017 when prefunding balance <u>is</u> applied to the 2017 MRC if threshold met	100%	105.86%
6 Plan is exempt from creating a new SAB for 2017 when prefunding balance <u>is not</u> applied to the 2017 MRC if threshold met	100%	120.75%
7 Previously established SABs are eliminated for 2017 if threshold met	100%	102.15%

Benefit limitations

The Adjusted Funding Target Attainment Percentage (AFTAP) for the plan year beginning January 1, 2017 is 120.75%. This AFTAP may be changed by subsequent events.

Under the PPA, a plan may become subject to various benefit limitations if its AFTAP falls below certain thresholds.

If the AFTAP is below 60% (100% if the plan sponsor is in bankruptcy, calculated ignoring stabilized interest rates), plans are prohibited from paying lump sums or other accelerated forms of distribution. If the AFTAP is at least 60% but less than 80%, the amounts that can be paid are limited. In addition, lump sums to the 25 highest paid employees may be restricted if a plan's AFTAP is below 110%. These limitations do not apply to mandatory lump sum cash-outs of \$5,000 or less. In addition, plans that were completely frozen before September 2005 are exempt from the restrictions on lump sums and other accelerated forms of distribution.

If the AFTAP is below 60%, benefit accruals must cease, amendments to improve benefits cannot take effect, and plant shutdown benefits and other Unpredictable Contingent Event Benefits (UCEBs) cannot be paid without being fully paid for. In addition, if the AFTAP would be below 80% reflecting a proposed amendment, the plan amendment cannot take effect unless actions are taken to increase plan assets.

To avoid these benefit limitations, a plan sponsor may take a variety of steps, including reducing the funding balances, contributing additional amounts to the plan for the prior plan year, contributing special "designated IRC §436 contributions" for the current plan year, or providing security outside the plan. Not all of these approaches are available for all of the restrictions discussed above. For example, restrictions on accelerated distributions cannot be avoided by making designated IRC §436 contributions.

As requested by AEP in your letter dated May 2, 2017, this report is intended to constitute a "specific certification" of the AFTAP, effective as of May 5, 2017, for the plan year beginning January 1, 2017 for the purpose of determining benefit restrictions under IRC §436 for the American Electric Power System Retirement Plan. This AFTAP certification is based on the data, methods, assumptions, plan provisions, annuity purchase information, and other information provided in this report. Please see the Appendices for additional information. Note that the AFTAP certification provided herein may be superseded by a subsequent AFTAP certification for the plan year beginning January 1, 2017. Please see Appendix C for a discussion of the implications of this certified AFTAP.

PBGC reporting requirements

Certain financial and actuarial information (i.e., a "4010 filing") must be provided to the PBGC if the PBGC Funding Target Attainment Percentage (PBGC FTAP) is less than 80% for any plan in the contributing sponsor's controlled group. However, this reporting requirement may be waived for

controlled groups with no more than \$15 million in aggregate funding shortfall (PBGC 4010 FS), or with fewer than 500 participants in all defined benefit plans. Note that interest rate stabilization does not apply for purposes of determining the PBGC FTAP or the PBGC 4010 FS.

The 2017 FTAP is 86.91%. In addition, we understand that all other pension plans within the Company's controlled group also have PBGC FTAPs of at least 80%. As a result, no 4010 filing is expected to be required for 2017 as a result of the plans' funded status. However, the only plans we have considered in this analysis are the American Electric Power System Retirement Plan; if there are other plans within the controlled group, a filing may be required. A filing may also be required if there are outstanding funding waivers or missed contributions within the controlled group.

At-Risk status for determining minimum required contributions

The plan is not in at-risk status, as defined in the PPA, for the 2017 plan year, because the plan's FTAP for the 2016 plan year was at least 80%, and/or the plan's FTAP measured using "at-risk assumptions" was at least 70%.

The plan will not be in at-risk status, as defined in the PPA, for the 2018 plan year, because the plan's FTAP for the 2017 plan year is at least 80%, and/or the plan's FTAP measured using "at-risk assumptions" is at least 70%.

When a plan is in at-risk status as defined in the PPA:

The plan is subject to potentially higher minimum contribution requirements. The funding target and target normal cost for purposes of determining the minimum required contribution must be measured reflecting certain mandated assumptions ("at-risk assumptions"). Specifically, participants eligible to retire within the next 11 years must be assumed to retire immediately when first eligible (but not before the end of the current year, except in accordance with the regular valuation assumptions), and all participants must be assumed to elect the most valuable form of payment available when they begin receiving benefits. In addition, plans that have been at-risk in past years may also be required to increase the funding target and target normal cost for prescribed assumed expenses. The net effect of these assumptions and expense adjustments in most cases is to increase required contributions and PBGC variable premiums.

The plan sponsor must indicate in the annual funding notice for the plan that the plan is at-risk and disclose additional at-risk funding targets.

Immediate taxation of non-qualified pension or deferred compensation for certain employees may occur if the plan sponsor is a public company. This may result when non-qualified pension or deferred compensation for such employees is funded during a period when a plan sponsored by the plan sponsor or another member of the plan sponsor's controlled group is in at-risk status.

Pension cost and funded position

The cost of the pension plan is determined in accordance with ASC 715. The Fiscal 2017 pension cost for the plan is \$93,751,108.

Under ASC 715, the funded position (fair value of plan assets less the projected benefit obligation, or “PBO”) of each pension plan at the plan sponsor’s fiscal year-end (measurement date) is required to be reported as an asset (for overfunded plans) or a liability (for underfunded plans). The PBO is the actuarial present value of benefits attributed to service rendered prior to the measurement date, taking into consideration expected future pay increases for pay-related plans. The plan’s overfunded/(underfunded) PBO as of January 1, 2017 was \$(194,672,692), based on the fair value of plan assets of \$4,831,883,160 and the PBO of \$5,026,555,852.

Fiscal year-end financial reporting information and disclosures are prepared before detailed participant data and full valuation results are available. Therefore, the funded position at December 31, 2016 was derived from a roll forward of the January 1, 2016 valuation results, adjusted for the year-end discount rate, changes in other key assumptions and asset values, as well as significant changes in plan provisions and participant population. The fiscal year-end December 31, 2017 financial reporting information will be developed based on the results of the January 1, 2017 valuation, projected to the end of 2017 and similarly adjusted for the year-end discount rate and asset values, as well as significant changes in plan provisions and participant population.

The actuarial gains/(losses) due to demographic experience, including any assumption changes, and investment return different from assumed during the prior year were \$(135,968,640) and \$41,530,945 respectively.

Change in pension cost and funded position

The pension cost declined from \$98,494,271 in fiscal 2016 to \$93,751,108 in fiscal 2017 and the funded position declined from \$(171,772,626) to \$(194,672,692), as set forth below:

All monetary amounts shown in US Dollars

	Net Periodic Cost	Funded Position
Prior year	98.5	(171.8)
Change due to:		
■ Expected based on prior valuation and contributions during prior year	(5.3)	69.7
■ Unexpected noninvestment experience	(0.4)	(19.6)
■ Unexpected investment experience	(1.8)	45.5
■ Assumption changes	2.7	(118.5)
■ Plan amendments	0	0
■ Settlements, curtailments, termination benefits	0	0
■ Acquisitions	0	0
■ Method changes	0	
■ Changes in estimation techniques		
Current year	93.7	(194.7)

Significant reasons for these changes include the following:

- The return on the fair value of plan assets since the prior measurement date was greater than expected, which decreased the pension cost and improved the funded position.
- The discount rate decreased 25 basis points compared to the prior year which increased the pension cost and caused the funded position to deteriorate.
- The lump sum conversion rate decreased from 4.50% to 4.20%, which decreased the pension cost and improved the funded position.
- Demographic experience was less favorable than expected, which increased the pension cost and caused the funded position to deteriorate.

Basis for valuation

Appendix A summarizes the assumptions and methods used in the valuation. Appendix B summarizes the principal provisions of the plan being valued, including a summary of any changes since the prior valuation. Unless otherwise described below under Subsequent Events, assumptions were selected based on information known as of the measurement date.

Changes in Assumptions

The discount rate decreased from 4.30% to 4.05%.

The mortality used to convert 417(e) based forms of payment was updated for an additional year of mortality improvements.

The lump sum conversion rate for accounting purposes decreased from 4.50% to 4.20%.

Changes in Methods

None.

Changes in Benefits Valued

None.

Subsequent events

None.

Actuarial certification

This valuation has been conducted in accordance with generally accepted actuarial principles and practices. However, please note the information discussed below regarding this valuation.

Reliances

In preparing the results presented in this report, we have relied upon information regarding plan provisions, participants, assets and sponsor elections provided by AEP and other persons or organizations designated by AEP. In addition, the results in this report are dependent on contributions reported for the prior plan year and maintenance of funding balance elections after the valuation date.

We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. Based on discussions with and concurrence by the plan sponsor, assumptions or estimates may have been made if data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

We have relied on all the information provided as complete and accurate. The results presented in this report are directly dependent upon the accuracy and completeness of the underlying data and information. Any material inaccuracy in the data, assets, plan provisions or information regarding contributions or funding balance elections provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by AEP, may produce materially different results that could require that a revised report be issued.

Assumptions and methods under ERISA and the Internal Revenue Code for funding purposes

The plan sponsor selected, as prescribed by regulation, key assumptions and funding methods (including asset valuation method and choice among prescribed interest rates) employed in the development of the contribution amounts and communicated them to us in the letter dated May 2, 2017.

To the extent not prescribed by ERISA, the Internal Revenue Code and regulatory guidance from the Treasury and the IRS, or selected by the sponsor, the actuarial assumptions and methods employed in the development of the contribution amounts have been selected by Willis Towers Watson, with the concurrence of the plan sponsor. It is beyond the scope of this actuarial valuation to analyze the reasonableness and appropriateness of prescribed methods and assumptions, or to analyze other sponsor elections from among the alternatives available for prescribed methods and assumptions.

Other than prescribed assumptions, ERISA and the Internal Revenue Code require the use of assumptions each of which is “reasonable (taking into account the experience of the plan and

reasonable expectations), and which, in combination, offer the actuary's best estimate of anticipated experience under the plan." The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated or selected by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A. Note that any subsequent changes in methods or assumptions for the 2017 plan year will change the results shown in this report and could result in plan qualification issues under IRC §436 if the application of benefit restrictions is affected by the change.

Assumptions and methods under U.S. GAAP

As required by U.S. GAAP, the actuarial assumptions and methods employed in the development of the pension cost have been selected by the plan sponsor. Willis Towers Watson has concurred with these assumptions and methods, except for the expected rate of return on plan assets selected as of January 1, 2017. Evaluation of the expected return assumption was outside the scope of Willis Towers Watson's assignment and would have required substantial additional work that we were not engaged to perform. U.S. GAAP requires that each significant assumption "individually represent the best estimate of a particular future event."

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for tax effects. Any tax effects in AOCI should be determined in consultation with American Electric Power Co.'s tax advisors and auditors.

Nature of actuarial calculations

The results shown in this report are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with any certainty. The effects of certain plan provisions may be approximated, or determined to be insignificant and therefore not valued. Reasonable efforts were made in preparing this valuation to confirm that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and are not excluded or included inappropriately. Any rounding (or lack thereof) used for displaying numbers in this report is not intended to imply a degree of precision, which is not a characteristic of actuarial calculations.

If overall future plan experience produces higher benefit payments or lower investment returns than assumed, the relative level of plan costs or contribution requirements reported in this valuation will likely increase in future valuations (and vice versa). Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period) or additional contribution requirements based on the plan's funded status; and changes in plan

provisions or applicable law. It is beyond the scope of this valuation to analyze the potential range of future pension contributions, but we can do so upon request.

See Basis for Valuation in Section 1 above for a discussion of any material events that have occurred after the valuation date that are not reflected in this valuation.

Limitations on use

This report is provided subject to the terms set out herein and in our Masters Consulting Services agreement dated July 29, 2004 and any accompanying or referenced terms and conditions.

The information contained in this report was prepared for the internal use of American Electric Power Co. and its auditors and any organization that provides benefit administration services for the plan, in connection with our actuarial valuation of the pension plan as described in Purposes of Valuation above. It is not intended for and may not be used for other purposes, and we accept no responsibility or liability in this regard. American Electric Power Co. may distribute this actuarial valuation report to the appropriate authorities who have the legal right to require American Electric Power Co. to provide them this report, in which case American Electric Power Co. will use best efforts to notify Willis Towers Watson in advance of this distribution. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson's prior written consent. Willis Towers Watson accepts no responsibility for any consequences arising from any other party relying on this report or any advice relating to its contents.

Professional qualifications

The undersigned consulting actuaries are members of the Society of Actuaries and meet the "Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to pension plans. Our objectivity is not impaired by any relationship between American Electric Power Co. and our employer, Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC ("Willis Towers Watson").

Section 2: Actuarial exhibits

2.1 Summary of liabilities for minimum funding purposes

All monetary amounts shown in US Dollars

Plan Year Beginning	01/01/2017	01/01/2016
A Funding Target (Disregarding At-risk Assumptions)		
1 Funding target	4,106,845,705	4,032,865,265
2 Target normal cost ¹	88,460,077	79,939,884
B Funding Target (At-risk Assumptions)		
1 Funding target	N/A	N/A
2 Target normal cost	N/A	N/A
C Funding Target		
1 Number of consecutive years at-risk	0	0
2 Funding target		
a Active employees – non-vested benefits ²	13,140,143	10,757,492
b Active employees – vested benefits ²	1,664,687,839	1,615,270,507
c Participants with deferred benefits	215,748,048	225,404,031
d Participants receiving benefits	2,213,269,675	2,181,433,235
e Total funding target	4,106,845,705	4,032,865,265
3 Target normal cost ¹	88,460,077	79,939,884

¹ Includes administrative expenses

² See section 2.8 for definition of vested benefits.

2.2 Change in plan assets during plan year

All monetary amounts shown in US Dollars

Plan Year Beginning		January 1, 2016
A Reconciliation of Market Value of Assets		
1	Market value of assets at January 1, 2016 (including discounted contributions receivable)	4,764,796,511
2	Discounted contributions receivable at January 1, 2016	0
3	Market value of assets at January 1, 2016 (excluding contributions receivable)	4,764,796,511
4	Employer contributions	
a	For prior plan year	85,953,000
b	For current plan year	85,953,000
c	IRC §436 contributions for current plan year	0
d	Total	85,953,000
5	Employee contributions	0
6	Benefit payments	(340,613,741)
7	Administrative expenses paid by plan	(5,468,137)
8	Transfers from/(to) other plans	0
9	Investment return	
a	Interest and dividends	0
b	Investment expenses	0
c	Realized gains/(losses)	0
d	Change in unrealized appreciation	327,215,527
e	Total	327,215,527
10	Market value of assets at January 1, 2017 (excluding contributions receivable)	4,831,883,160
11	Discounted contributions receivable at January 1, 2017	0
12	Market value of assets at January 1, 2017 (including discounted contributions receivable)	4,831,883,160
B Rate of Return on Invested Assets (i.e., for crediting unused funding balances)		
1	Weighted invested assets	4,636,641,947
2	Rate of return	7.06%

2.3 Development of actuarial value of assets

AEP elected a smoothing method that uses seven monthly data points to calculate the AVA.

All monetary amounts shown in US Dollars

Plan Year Beginning				January 1, 2017
Development of AVA				
Month	Expenses	Benefit Payments	Contributions	Fair Value at Beginning of Month
July 2016	20,167	29,041,366	0	4,984,082,181
August 2016	12,342	27,298,558	0	5,074,092,011
September 2016	291,633	27,899,323	0	5,068,650,285
October 2016	2,625,244	25,715,448	0	5,037,768,482
November 2016	391,259	24,726,559	0	4,944,553,704
December 2016	173,199	22,553,323	0	4,813,825,429
AVA with receivables				
A Preliminary Actuarial Value of Assets before Corridor as of January 1, 2017				
1 Monthly asset values adjusted for expenses and benefit payments rolled forward to January 1, 2017				
Month	Asset value			
a July 2016	4,968,202,891			
b August 2016	5,063,155,439			
c September 2016	5,060,459,151			
d October 2016	5,033,233,614			
e November 2016	4,943,975,884			
f December 2016	4,814,419,825			
g January 2017	4,831,883,160			
h Average of monthly asset values	4,959,332,851			
2 Preliminary Actuarial Value of Assets and before application of corridor				4,959,332,851
B Lower Bound of Corridor (90% of A12 from prior page)				4,348,694,844
C Upper Bound of Corridor (110% of A12 from prior page)				5,315,071,476
Actuarial Value of Assets as of January 1, 2017				
D (A2 but not smaller than B nor larger than C)				4,959,332,851

2.4 Calculation of minimum required contribution

All monetary amounts shown in US Dollars

Reconciliation of Funding Balances as of January 1, 2017			
	Funding Standard Carryover Balance	Prefunding Balance	Total
A Determination of Funding Balances			
1 Funding balance as of January 1, 2016	161,239,527	571,474,177	732,713,704
2 Amount used to offset prior year minimum required contribution ¹	0	0	0
3 Adjustment for investment experience	11,383,511	40,346,077	51,729,588
4 Amount of additional prefunding balance created by election	N/A	0	0
5 Amount of funding balance reduction for current year by election or deemed election	20,416,223	0	20,416,223
6 Funding balance as of January 1, 2017	152,206,815	611,820,254	764,027,069

Plan Year Beginning	January 1, 2017
B Calculation of Minimum Required Contribution	
1 Target normal cost	88,460,077
2 Funding surplus	(88,460,077)
3 Net shortfall amortization installment (see section 2.5)	0
4 Waiver amortization installment	0
5 Minimum required contribution	0
6 Funding balance available	764,027,069
7 Remaining cash requirement (assuming sponsor elects full use of the available funding balances)	0

The minimum required contribution is determined as of the plan's valuation date. Any payment made on a date other than the valuation date must be adjusted for interest using the plan's effective interest rate of 5.80%.

Additional details regarding the calculation of the minimum required contribution may be obtained from the Form 5500 Schedule SB forms and attachments.

¹ Net of revoked excess application of funding balance, if any.

2.5 Schedule of minimum funding amortization bases

All monetary amounts shown in US Dollars

Type of Base	Date Established	Remaining Amortization Period (Years)	Outstanding Balance	Amortization Payment
Total			0	0

2.6 Calculation of estimated maximum deductible contribution

All monetary amounts shown in US Dollars

Based on Plan Year		2017
A Basic Maximum		
1	Funding target	4,106,845,705
2	Target normal cost	88,460,077
3	Actuarial value of assets	4,959,332,851
4	50% of funding target	2,053,422,853
5	Additional funding target for future compensation or benefit increases	110,465,790
6	Basic maximum deductible contribution	1,399,861,574
B At-risk Maximum¹		
1	Funding target (at-risk assumptions)	N/A
2	Target normal cost (at-risk assumptions)	N/A
3	Actuarial value of assets	N/A
4	At-risk maximum deductible contribution	N/A
C Minimum Required Contribution		0
D Estimated Maximum Deductible Contribution		1,399,861,574

The estimated maximum deductible contribution applies to the tax year in which the plan year ends, and is based on our understanding of IRC §404(a)(1). Regulatory guidance from the IRS/Treasury is pending. Allocations of costs to inventory have not been considered, and amounts deductible for state income tax purposes may differ. Deductibility can be influenced by timing of contributions, differences between fiscal year and plan year, and differences (if any) between the years to which prior contributions were assigned for minimum funding purposes and the years in which they were deducted. Our results have not been adjusted for non-deducted contributions included in the valuation assets, nor is it clear that such adjustment is appropriate post-PPA. We recommend the plan sponsor review with tax counsel the tax-deductibility of all contributions as Willis Towers Watson does not provide legal or tax advice.

The calculation above reflects stabilized interest rates (including their effect on at-risk status), which is not required in determining the maximum deductible contribution. Not reflecting such corridors would likely result in a higher maximum deductible amount, but would require substantial additional work that may not be of value to the Company. We can discuss not reflecting the corridors if the Company wishes to consider contributions in excess of the estimated maximum amount above.

In addition, the actuarial value of assets shown is the same as used for determining the minimum required contribution. Thus contributions receivable (if any) are discounted at stabilized rates, and the limit on the expected return on assets reflected in asset smoothing (if applicable) is the 3rd segment

¹ At-risk maximum applies only for plans not in at-risk status for purposes of determining maximum deductible contributions for the plan year.

rate, reflecting stabilized rates as expressly allowed by IRS Notice 2012-61 when the stabilized 3rd segment rate is higher than the rate ignoring the corridors.

This limit has been determined without regard to the special rule of IRC §404(o)(2)(B) providing a potentially higher maximum deduction based on at-risk assumptions, which is available for plans that are not at risk.

2.7 Calculation of PBGC variable rate premium

All monetary amounts shown in US Dollars

Premium Payment Year		2017
A Assumptions and Methods Used to Determine Premium Funding Target		
1	Premium funding target method	Standard
2	Premium funding target method election date	January 1, 2014
3	UVB valuation date	January 1, 2017
4	Discount rates	
a	First segment rate	2.04%
b	Second segment rate	4.03%
c	Third segment rate	4.82%
B Premium Funding Target		
1	Attributable to active participants	1,935,600,590
2	Attributable to terminated vested participants	252,646,801
3	Attributable to retirees and beneficiaries receiving payment	2,527,144,110
4	Total premium funding target ¹	4,715,391,501
C Market Value of Assets		
		4,831,883,160
D Unfunded Vested Benefits		
		0
E Uncapped Variable Rate Premium²		
		0
F Maximum VRP³		
		18,467,757
G Variable Rate Premium		
		0

¹ Reflects at-risk status, if applicable.

² Using variable rate premium of \$34 per \$1,000 of unfunded vested benefits.

³ Using maximum per-participant premium of \$517.

2.8 ASC 960 (plan accounting) information

All monetary amounts shown in US Dollars

Plan Year Beginning		January 1, 2017
A Present Value of Accumulated Benefits		
1 Vested accumulated benefits		
a Active employees		1,582,261,707
b Participants with deferred benefits		216,401,523
c Participants receiving benefits		2,203,681,034
d Total vested accumulated benefits		4,002,344,264
2 Non-vested accumulated benefits		11,260,440
3 Total accumulated benefits		4,013,604,704
4 Market value of assets ¹		4,831,883,160
B Reconciliation of Present Value of Accumulated Benefits		
1 Present value of accumulated benefits as of December 31, 2015		4,062,659,954
2 Changes during the year due to:		
a Benefits accumulated		68,557,617
b Actuarial (gains)/losses		(1,519,982)
c Decrease in the discount period		234,157,855
d Actual benefits paid		(340,613,741)
e Assumption changes		(9,636,999)
f Plan amendments		0
g Net increase/(decrease)		(49,055,250)
3 Present value of accumulated benefits as of December 31, 2016		4,013,604,704

Actuarial Assumptions and Methods

The present value of accumulated benefits was developed using the actuarial assumptions described in Appendix A, except a discount rate of 6.00% was used.

The discount rate used is the same as the expected rate of return on plan assets for the plan year under ASC 715-30-35 and, as required by that standard and further discussed in the Actuarial Certification of this report, was selected by the plan sponsor without using the work of Willis Towers Watson. Evaluation of this assumption was outside the scope of Willis Towers Watson's assignment and would have required substantial additional work that we were not engaged to perform. We understand that the expected return on assets assumption reflects the plan sponsor's estimate of future experience for trust asset returns, reflecting the plan's current asset allocation and any expected changes during the current plan year, current market conditions and the plan sponsor's expectations for future market conditions.

¹ Assets include accrued contributions for the 2016 plan year of \$0 not yet deposited at January 1, 2017.

For the prior valuation, a discount rate of 6.00% was used.

Plan Provisions

Plan provisions reflected in these calculations are described in Appendix B.

Accumulated and Vested Benefits

Accumulated benefits include benefits earned under the plan's benefit formula based on service rendered and compensation earned before the measurement date.

Benefits included in vested benefits are the same as described above for accrued benefits, except the following benefits are excluded:

- For participants who are not disabled on the measurement date, disability benefits in excess of the value of standard termination benefits (retirement benefits for those eligible).
- For participants who have not yet satisfied the eligibility requirements for these benefits, early retirement benefits and supplements in excess of standard termination benefits.
- Death benefits in excess of the plan's QPSA.
- All benefits for participants who are not yet vested in their accrued benefits or eligible for other benefits.

2.9 Pension obligations and funded position under U.S. GAAP (ASC 715)

All monetary amounts shown in US Dollars

Measurement Date	01/01/2017	01/01/2016
A Obligations		
1 Accumulated Benefit Obligation (ABO)		
a. Active participants	2,012,775,103	1,970,101,788
b. Participants with deferred benefits	262,417,046	272,272,257
c. Participants receiving benefits	2,577,390,313	2,545,649,263
d. Total	4,852,582,462	4,788,023,308
2 Future salary increases	173,973,390	148,545,829
3 Projected benefit obligation (PBO)	5,026,555,852	4,936,569,137
B Assets		
1 Fair value [FV] ¹	4,831,883,160	4,764,796,511
2 Investment losses/(gains) not yet in market-related value	41,353,578	31,960,120
3 Market-related value	4,873,236,738	4,796,756,631
C Funded Position		
1 Overfunded/(underfunded) PBO	(194,672,692)	(171,772,626)
2 PBO funded percentage	96.1%	96.5%
D Amounts in Accumulated Other Comprehensive Income		
1 Prior service cost/(credit)	1,018,565	3,176,136
2 Net actuarial loss/(gain)	1,548,886,948	1,536,370,582
3 Total	1,549,905,513	1,539,546,718
E Key Assumptions		
1 Discount rate	4.05%	4.30%
2 Rate of compensation increase	Rates vary by age from 3.5% to 12.0%	Rates vary by age from 3.5% to 12.0%
F Census Date	01/01/2017	01/01/2016

The results above may differ from the amounts reported in AEP's December 31, 2016 financial statements because year-end financial reporting is prepared before the corresponding valuation results are available.

¹ Excludes receivable contributions.

2.10 Changes in benefit obligations and assets

All monetary amounts shown in US Dollars

Period Beginning	01/01/2017	01/01/2016
A Change in Projected Benefit Obligation (PBO)		
1 PBO at beginning of prior fiscal year	4,936,569,137	5,121,214,558
2 Employer service cost	85,952,960	92,514,545
3 Interest cost	208,678,856	202,041,675
4 Actuarial loss/(gain)	135,968,640	(154,412,612)
5 Plan participants' contributions	0	0
6 Benefits paid from plan assets	(340,613,741)	(324,789,029)
7 Administrative expenses paid ¹	0	0
8 Plan change	0	0
9 Acquisitions/divestitures	0	0
10 Curtailments	0	0
11 Settlements	0	0
12 Special/contractual termination benefits	0	0
13 PBO at beginning of current fiscal year	5,026,555,852	4,936,569,137
B Change in Plan Assets		
1 Fair value of assets at beginning of prior fiscal year	4,764,796,511	4,975,864,249
2 Actual return on assets	327,215,527	26,433,234
3 Employer contributions	85,953,000	92,514,000
4 Plan participants' contributions	0	0
5 Benefits paid	(340,613,741)	(324,789,029)
6 Administrative expenses paid	(5,468,137)	(5,225,943)
7 Acquisitions/divestitures	0	0
8 Settlements	0	0
9 Fair value of assets at beginning of current fiscal year	4,831,883,160	4,764,796,511

¹ Only if future expenses are accrued in PBO through a load on service cost.

2.11 Pension cost under U.S. GAAP (ASC 715)

All monetary amounts shown in US Dollars

Fiscal Year Ending	12/31/2017	12/31/2016
A Pension Cost		
1 Service cost	96,356,122	85,952,960
2 Interest cost	200,421,010	208,678,856
3 Expected return on assets	(284,837,083)	(280,216,445)
4 Net prior service cost/(credit) amortization	1,008,874	2,157,571
5 Net loss/(gain) amortization/recognition	80,802,185	81,921,329
6 Net periodic pension cost/(income)	93,751,108	98,494,271
7 Curtailments	0	0
8 Settlements	0	0
9 Special/contractual termination benefits	0	0
10 Total pension cost	93,751,108	98,494,271
B Key Assumptions¹		
1 Discount rate	4.05%	4.30%
2 Rate of return on assets	6.00%	6.00%
3 Rate of compensation increase	Rates vary by age from 3.5% to 12.0%	Rates vary by age from 3.5% to 12.0%
C Census Date	01/01/2017	01/01/2016

¹ These assumptions were used to calculate Net Periodic Pension Cost/(Income) as of the beginning of the year. For other assumptions used, as well as assumptions used for interim remeasurements, if any, refer to Appendix A.

2.12 Development of market-related value of assets under U.S. GAAP (ASC 715)

All monetary amounts shown in US Dollars

Fiscal Year Ending		12/31/2017	
Market-Related Value of Assets as of January 1, 2017			
1	Fair value of assets as of January 1, 2017		4,831,883,160
2	Deferred investment (gains)/losses for prior periods		
Fiscal Year	(Gain)/Loss	Percent Deferred	Deferred Amount
a 2017	(43,253,828)	80%	(34,603,063)
b 2016	270,591,925	60%	162,355,155
c 2015	(190,546,751)	40%	(76,218,700)
d 2014	(50,899,071)	20%	(10,179,814)
e Total			41,353,578
3	Market-Related Value of Assets		4,873,236,738

2.13 Summary of net prior service cost/(credit) balances

All monetary amounts shown in US Dollars

Base Number	Net Amount at prior financial year end	Remaining Amortization Period	Amortization Amount	Effect of Curtailments	Other Events
1	890,806	1.01100	(881,115)	0	0
2	127,759	0.12100	(127,759)	0	0
Total	1,018,565		(1,008,874)	0	0

Summary of Net Loss/(Gain)¹

	Net Amount at 01/01/2017	Amortization Amount in 2017	Effect of Curtailments	Effect of Settlements	Other Events
	1,548,886,948	80,802,185	0	0	0

Appendix A – Statement of actuarial assumptions and methods

1. Assumptions and methods for contribution purposes

Actuarial Assumptions and Methods — Contributions

Economic Assumptions

Interest rate basis:

- Applicable month (published) October 2016
- Yield curve basis Segment rates

Funding interest rates:

	Reflecting Corridors	Not Reflecting Corridors
■ First segment rate	4.16%	1.52%
■ Second segment rate	5.72%	3.78%
■ Third segment rate	6.48%	4.76%
■ Effective interest rate	5.80%	3.94%

Annual rates of increase

■ Compensation:		
— Representative rates	<i>Age</i>	<i>Rate</i>
	< 26	12.00%
	26 – 30	8.50%
	31 – 35	7.00%
	36 – 40	6.00%
	41 – 45	5.00%
	46 – 50	4.00%
	> 50	3.50%
— Weighted average		4.80%

- Cash balance crediting rate 4.00%
- Lump sum/annuity conversion rate October 2016 segment rates
- Future Social Security wage bases 4.00%
- Statutory limits on compensation N/A
- Expected rate of return on assets for prior year 6.00% but not greater than the third segment rate

Demographic Assumptions

Inclusion Date The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees It was assumed there will be no new or rehired employees.

Mortality

- **Healthy** Separate rates for non-annuitants (based on RP-2000 “Employees” table without collar or amount adjustments, projected to 2032 using Scale AA and annuitants (based on RP-2000 “Healthy Annuitants” table without collar or amount adjustments, projected to 2024 using Scale AA.
- **Disabled** Post-1994 current liability disabled
- **Lump sum/annuity conversion** Applicable 417(e) IRS Mortality Table

Termination Rates varying by age and service:

Percentage leaving during the year		
Attained Age	Less than five years of service	Five or more years of service
< 25	8.00%	7.30%
25 – 29	8.00%	5.00%
30 – 34	8.00%	4.20%
35 – 39	8.00%	3.40%
40 – 44	8.00%	2.50%
45 – 49	8.00%	1.90%
50 +	8.00%	1.70%

Disability Rates apply to employees not eligible to retire and vary by age and sex as indicated by the following sample values:

Percentage becoming disabled during the year		
Age	Male	Female
20	0.060%	0.090%
30	0.060%	0.090%
40	0.074%	0.110%
50	0.178%	0.267%
60	0.690%	1.035%

Retirement Rates varying by age; average retirement age 64:

Percentage retiring during the year	
Age	Rate
55 – 57	1.00%
58 – 60	6.00%
61 – 63	16.00%
64 – 69	13.00%
70 +	100.00%

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55.
- Deferred vested benefit (active participants) The later of age 55 or termination of employment.
- Deferred vested benefit (current deferred vested) The later of age 65 or current age
- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment 40% lump sum; 60% annuity for retirement eligible East grandfathered participants and 75% lump sum; 25% annuity for all other participants. Married participants are assumed to elect the 50% joint and survivor annuity and unmarried participants are assumed to elect the single life annuity. No other optional form of payment election is assumed.

Percent married 80% of male participants; 70% of female participants.

Spouse ages Wives are assumed to be three years younger than husbands.

Valuation pay 2017 base salary pay (Grandfathered) – not estimated due to freeze of final average pay accruals at December 31, 2010.

2017 expanded pay (Cash Balance) – sum of the following updated one year according to the salary increase assumption:

- (i) 2017 base salary
- (ii) a 15% increase for overtime eligible employees and a target bonus percent increase for incentive-eligible employees

At-risk assumptions If at-risk calculations are required, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually a joint and survivor form of payment.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date	First day of plan year.
Funding target	Present value of accrued benefits.
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from the trust (based on actual trust expenses paid in previous year, adjusted by the difference between the prior and expected current year PBGC premiums).
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the six immediately preceding months, adjusted for contributions, benefit/expense payments and expected investment returns. The average asset value must be within 10% of fair value, including contributing receivable. The method of computing the actuarial value of assets complies with rules governing the calculation of such values under PPA. These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.
Benefits Not Valued	All benefits were valued except: – Any liabilities that may be reinstated in the event of reemployment – The alternate benefit formula for members who did not elect to withdraw their employee contributions – Any liabilities relating to members' unwithdrawn employee contributions – Liabilities related to special benefits as a result of termination due to downsizing and restructuring

Data Sources

Willis Towers Watson used participant and asset data as of January 1, 2017, supplied by Mercer, the third party administrator for AEP. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. To the extent that data were not provided, estimates were made based on prior year information.

The Company also provided the amounts recognized in accumulated other comprehensive income as of the end of the December 31, 2016 fiscal year and amounts recognized in other comprehensive income in the December 31, 2016 fiscal year.

2. Assumptions and methods for pension cost purposes

Actuarial Assumptions and Methods — Pension Cost

Demographic Assumptions

Discount rate 4.05%

Return on assets* 6.00%

Annual rates of increase

■ Compensation:

	<i>Age</i>	<i>Rate</i>
— Representative rates		
	< 26	12.00%
	26 – 30	8.50%
	31 – 35	7.00%
	36 – 40	6.00%
	41 – 45	5.00%
	46 – 50	4.00%
	> 50	3.50%
— Weighted average		4.80%

■ Cash balance crediting rate 4.00%

■ Lump sum/annuity conversion rate 4.20%

■ Future Social Security wage bases 4.00%

■ Statutory limits on compensation 3.00%

The return on assets shown above is net of investment expenses and administrative expenses assumed to be paid from the trust.

* Also used as discount rate for plan accounting (ASC 960) purposes.

Demographic Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	It was assumed there will be no new or rehired employees.
Mortality	Based on modified versions of RP-2014 with long-term improvement rates of 0.75%. Base mortality rates are derived from the RP-2014 mortality table with improvements factored to 2006 with no collar adjustments. Mortality improvements are projected forward on a generational basis. Improvement rates grade linearly from the MP-2016 rate in 2007 to the ultimate rate in 2015:

Age	Ultimate Improvement rate per year	Age	Ultimate improvement rate per year
85 and younger	0.750%	91	0.300%
86	0.675%	92	0.225%
87	0.600%	93	0.150%
88	0.525%	94	0.075%
89	0.450%	95 and older	0.000%
90	0.375%		

Lump sum/annuity conversion Applicable 417(e) IRS Mortality Table

Termination Rates varying by age and service

Percentage leaving during the year		
Attained Age	Less than five years of service	Five or more years of service
< 25	8.00%	7.30%
25 – 29	8.00%	5.00%
30 – 34	8.00%	4.20%
35 – 39	8.00%	3.40%
40 – 44	8.00%	2.50%
45 – 49	8.00%	1.90%
50 +	8.00%	1.70%

Disability Rates apply to employees not eligible to retire and vary by age and sex as indicated by the following sample values:

Percentage becoming disabled during the year		
Age	Male	Female
20	0.060%	0.090%
30	0.060%	0.090%
40	0.074%	0.110%
50	0.178%	0.267%
60	0.690%	1.035%

Retirement

Rates varying by age; average retirement age 64:

Percentage retiring during the year	
Age	Rate
55-57	1.00%
58-60	6.00%
61-63	16.00%
64-69	13.00%
70+	100.00%

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55.
- Deferred vested benefit (active participants) The later of age 55 or termination of employment.
- Deferred vested benefit (current deferred vested) The later of age 65 or current age
- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment 40% lump sum; 60% annuity for retirement eligible East grandfathered participants and 75% lump sum; 25% annuity for all other participants. Married participants are assumed to elect the 50% joint and survivor annuity and unmarried participants are assumed to elect the single life annuity. No other optional form of payment election is assumed.

Percent married 80% of male participants; 70% of female participants.

Spouse ages Wives are assumed to be three years younger than husbands.

Valuation pay 2017 base salary pay (Grandfathered) – not estimated due to freeze of final average pay accruals at December 31, 2010.

2017 expanded pay (Cash Balance) – sum of the following updated one year according to the salary increase assumption:

- (i) 2017 base salary
- (ii) a 15% increase for overtime eligible employees and a target bonus percent increase for incentive-eligible employees

Administrative expenses Discount rate is net of expenses paid by the trust.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Service cost and projected benefit obligation	Projected unit credit
Market-related value of assets	The market value on the valuation date less the following percentages of prior years' investment gains and losses: ■ 80% of the prior year ■ 60% of the second prior year ■ 40% of the third prior year ■ 20% of the fourth prior year The investment gain or loss is calculated each year by: ■ Rolling forward the prior year's fair value of assets with actual contributions, benefit payments and expected return on investments using the long-term yield assumption ■ Comparing the actual fair value of assets to the expected value calculated above.
Benefits not valued	All benefits were valued except: ■ Any liabilities that may be reinstated in the event of reemployment ■ The alternate benefit formula for members who did not elect to withdraw their employee contributions ■ Any liabilities relating to members' unwithdrawn employee contributions ■ Liabilities related to special benefits as a result of termination due to restructuring or downsizing

Data Sources

Willis Towers Watson used participant and asset data as of January 1, 2017, supplied by Mercer, the third party administrator for AEP. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. To the extent that data were not provided, estimates were made based on prior year information.

The Company also provided the amounts recognized in accumulated other comprehensive income as of the end of the December 31, 2016 fiscal year and amounts recognized in other comprehensive income in the December 31, 2016 fiscal year.

Assumptions Rationale - Significant Economic Assumptions for Contributions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate for the September of the preceding year with a minimum rate of 4.00%. The assumption is based on the plan sponsor's long-term expectations of yields on U.S. Treasuries. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.
Lump sum conversion rate	As required by IRC 430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate.
Rates of increase in:	
■ Compensation	Rates of increase in compensation were based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
■ National average wages (NAW) (e.g., Social Security wage bases)	The assumed NAW is based on assumed CPI as shown below, plus assumed increases in real wages (the portion of GDP increases that becomes part of wages). Such assumed future increases in real wages are based on a combination of historical averages and an expectation that the future rates will be lower (higher) than historical averages.
■ Increases in statutory limits (CPI)	The assumed CPI is based on a combination of historical average CPI, current conditions and an assumed progression from recently experienced CPI to the long-term expected level. The final assumption represents a composite of current rates and long term expected rates.

Assumptions Rationale - Significant Economic Assumptions for Accounting

Discount rate	As required by U.S. GAAP, the discount rate was chosen by the plan sponsor based on market information on the measurement date.
Expected return on plan assets	We understand that the expected return on assets assumption reflects the plan sponsor's estimate of future experience for trust asset returns, reflecting the plan's current asset allocation and any expected changes during the current plan year, current market conditions and the plan sponsor's expectations for future market conditions.
Cash balance interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate for the September of the preceding year with a minimum rate of 4.00%. The assumption is based on

the plan sponsor's long-term expectations of yields on U.S. Treasuries. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.

Conversion rate for lump sums and annuities

The plan uses IRC 417(e)(3) as its basis to convert between lump sums and annuities. Because the 417(e)(3) interest rates are based on corporate bond yields, the assumption is based on the plan sponsor's long-term expectations of yields on high-quality corporate bonds. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.

Rate of increase in compensation

Rates of increase in compensation were based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumptions Rationale - Significant Demographic Assumptions

Mortality

Assumptions used for accounting purposes were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience. Assumptions used for contribution purposes are as prescribed by IRC §430(h).

Termination

Termination rates are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumed termination rates differ by service because of observed differences in termination rates between employees who have attained at least five years of service and those with less than five years of service.

Retirement

Retirement rates are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Form of payment

Rates at which retirees elect lump sums versus annuities are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.
Accounting methods	The methods used for accounting purposes as described in Appendix A, including the method of determining the market-related value of plan assets, are “prescribed methods set by another party”, as defined in the actuarial standards of practice (ASOPs). As required by U.S. GAAP, these methods were selected by the plan sponsor.

Changes in Assumptions and Methods

Change in assumptions since prior valuation	The interest rates used to calculate the funding target, target normal cost and to convert 417(e) based forms of payments were updated from the segment rates as of October 2015 to the segment rates as of October 2016. The required mortality table used to value the funding target and target normal cost was updated to include one additional year of projected mortality improvements. Assumed plan-related expenses of \$5,590,870 were added to the target normal cost. The discount rate decreased from 4.30% to 4.05%. The lump sum conversion rate decreased from 4.50% to 4.20% for accounting purposes. The mortality used to convert to 417(e) based forms of payment was updated for an additional year of mortality improvements.
Change in methods since prior valuation	None.

This page is intentionally blank

Appendix B1: Summary of plan provisions covered by the former East Retirement Plan

Plan Provisions

Effective Date	May 1, 1955. Restated effective January 1, 2017.
Recent Amendments	Plan was amended and restated effective January 1, 2017.
Covered Employees	Employees become Members of the Plan on the first day of the month following completion of one year of service.
Participation Date	Date of becoming a covered employee.

Definitions

Grandfathered employee	If, on December 31, 2000, either: – Participating in AEP System Retirement Plan, or – In one-year waiting period for AEP System Retirement Plan participation.
Vesting service	A period of time from employment date to termination date and, in general, includes periods of severance that are not in the excess of 12 months.
Accredited service	Elapsed time from date of hire (from benefit service start date).
Cash balance pay	Pay received during the year, including base pay, overtime, shift differential/Sunday premium pay and incentive pay, subject to IRS limits.
Covered compensation amount	The average of the Social Security taxable wage based during the 35-year period including the year in which the participant retires, dies, becomes disabled or otherwise terminates employment. This monthly average is calculated to the next lower or equal whole dollar amount and is then rounded to nearest \$50.
Final average pay	Average of the highest 36-consecutive months of base pay out of the last 120 months of employment, subject to IRS limits.
Normal retirement date (NRD)	The first day of the calendar month whose first day is nearest the later of the member's 65 th birthday or the completion of five years of Vesting Service.

Cash balance account	Recordkeeping account to which annual Interest Credits and annual Company Credits are credited. The cash balance account is updated at the end of each plan year and is equal to: $ \begin{array}{r} \text{Cash Balance Account as of the} \\ \text{end of the prior plan year} \\ + \\ \text{Interest Credits} \\ + \\ \text{Company Credits} \end{array} $
Cash balance benefit	Cash Balance Account converted to a monthly annuity
Opening balance	For those participating in or eligible for the AEP System Retirement Plan on December 31, 2000, opening balance is calculated as follows: ■ Present value of monthly normal retirement benefit determined as of December 31, 2000, and payable at age 65 (or current age if older) — Present value determined based on 5.78% interest and IRS regulated mortality (GAM83 Unisex) data for lump sums (postretirement only) Plus ■ Credit for early retirement subsidy for monthly payments beginning at age 62 (or current age if older) Plus ■ Transition credit based on age, service and pay received in 2000 (see "Company Credits" for credit percentages) — Age and service based on completed whole years as of December 31, 2000. For employees hired on or after January 1, 2001, opening balance is \$0.
Interest credits	Interest credits are applied to beginning of year account balance on December 31 each year. Based on the average 30-year Treasury Bond rate for November of the previous year. Minimum of 4%.
Company credits	Applied to account balance on December 31 or termination date if earlier. Amount is a percentage of eligible pay received during the year, based on age plus years of Vesting Service (age and service in completed whole years as of December 31).

	<i>Age Plus Years of Service</i>	<i>Annual Company Credit</i>
	Less than 30	3.0%
	30 – 39	3.5%
	40 – 49	4.5%
	50 – 59	5.5%
	60 – 69	7.0%
	70+	8.5%
Monthly Grandfathered Benefit	Sum of (1), (2) and (3):	
	(1) 1.10% of Final Average Pay x Accredited Service up to 35 years	
	(2) 0.50% of Final Average Pay Less Covered Compensation x Accredited Service up to 35 years	
	(3) 1.33% of Final Average Pay x Accredited Service between 35 and 45 years	
	Accruals for the grandfathered benefit ceased on December 31, 2010.	
Long-term disability and paid leaves	Participants do not receive company credits while on long-term disability. Vesting service continues.	
Unpaid leave	No compensation for annual Company Credit. Vesting service continues.	

Eligibility for Benefits

Normal retirement	All members at or after their Normal Retirement Date.
Early retirement	Any time after attainment of age 55 and completion of five years of vesting. Applicable only to grandfathered benefits.
Postponed retirement	Retirement after Normal Retirement Date.
Vested termination	All members who terminate employment after completion of three years of Vesting Service, or upon death.
Disability	All members who are unable to work at own occupation solely because of sickness or injury for the first 24 months of disability. After 24 months of disability, the participant is eligible if unable to work at any gainful occupation for which the participant may be able, or may reasonably become qualified by education, training or experience, to perform.
Surviving spouse	The surviving spouse of a Grandfathered Member who retired or is eligible to retire on Normal or Early Retirement and who was married to that spouse for the year preceding commencement and whose grandfathered benefit exceeds his or her Cash Balance Benefit.
Preretirement death	Beneficiary of deceased member.

Benefits Paid Upon the Following Events

Normal retirement	For Grandfathered Employees, the better of the monthly grandfathered benefit or the Cash Balance Benefit determined as of Normal Retirement Date. For all other employees, the Cash Balance Benefit determined as of Normal Retirement Date.
Early retirement	For Grandfathered Employees, the better of: (1) The monthly grandfathered retirement benefit reduced by 3% per year for each year commencement precedes age 62, and (2) The Cash Balance Benefit determined as of the Early Retirement Date. For all other employees, the Cash Balance Benefit determined as of the Early Retirement Date.
Deferred vested retirement	The accrued Normal Retirement Benefit (better of Cash Balance and Grandfathered Benefits, if eligible), payable at Normal Retirement Date or actuarially reduced and payable at any age.
Disability	The greater of (1) or (2): (1) Accrued Grandfathered Retirement Benefit reduced as in the Early Retirement Benefit. If retirement occurs prior to age 55, the benefit is further reduced actuarially from age 55. The Disability Retirement Benefit will reflect Accredited Service that accrued (at most recent rate of base earnings) to a member while receiving benefits under the Company's LTD plan. (2) The Cash Balance Benefit with continued Company Credits while disabled. Benefit (1) applies for Grandfathered Employees only.
Preretirement death	Better of (1) or (2): (1) The grandfathered monthly benefit as if the employee commenced a 60% qualified joint and survivor benefit at his earliest retirement date (2) Annuity equivalent of Cash Balance account or the cash balance account. Benefit (1) applies for a Grandfathered Employee whose beneficiary is his or her spouse.
Surviving spouse benefits	A benefit payable for life equal to 30% of the single life annuity payable to the grandfathered member. The spouse's benefit is actuarially reduced for each year by which the spouse is more than ten years younger than the member. Payable to Grandfathered Employees only.

Other Plan Provisions

Forms of payment

- Grandfathered employees

The following are available for Grandfathered Employees for both the Grandfathered Benefit and the Cash Balance Benefit:

 - Full lump sum payment.
 - Combination of partial lump sum (25%, 50% or 75% of full lump sum) with remainder paid as a monthly benefit (see below).
 - Monthly payment:
 - Single life annuity.
 - Optional joint annuities (spouse or other beneficiary).
 - Available in 40%, 50%, 60%, 75%, 100%.
 - Can elect pop-up and/or level income options.
 - Automatic company-paid 30% surviving spouse annuity included in Grandfathered Benefit annuity if terminate on or after age 55 and married at least one year. Cash Balance Benefit is actuarially reduced for this feature.

A one-time option to elect a lump sum of the accrued benefit for terminated vested participants whose benefit was determined in no way by reference to either the AEP or CSW cash balance formulas was offered during the period from May 1, 2012 through June 30, 2012. Participants eligible for the window were also permitted to elect any of the other optional forms of payment generally applicable to such a participant under the normal terms of the plan document. Any participant who elected to commence benefits under this window, regardless of lump sum or annuity election, had a benefit commencement date of August 1, 2012.
- Employees hired on or after January 1, 2001

The following are available for those hired on or after January 1, 2001:

 - Full lump sum payment.
 - Combination of partial lump sum (25%, 50% or 75% of full lump sum) with remainder paid as a monthly benefit (see below).
 - Monthly payment:
 - Single life annuity.
 - Joint annuities (spouse or other beneficiary).
 - Available in 50%, 75%, 100%.

Form of payment conversion for non-417(e) covered conversions

- Cash balance 7.50% interest and the applicable 417(e) Mortality Table.
- Grandfathered benefit 7.50% interest and the 1974 George B. Buck Mortality Table.

Pension Increases None.

Plan Participants' Contributions Prior to January 1, 1978, employee contributions were required as a condition of Membership. In May and June of 1981, Members were permitted an election to withdraw those contributions. Those who did not elect to withdraw have retirement benefits based on a formula that differs from the formulas previously described in this section. However, the number of nonelecting Members is so small that special plan provisions for that group have not been included in this summary.

Maximum on benefits and pay All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Benefits not valued A small portion of the population made employee contributions to the plan. Because the amount of these contributions is not material to the plan, they are not part of the valuation.

Participants who were employees of Columbus Southern Power (CSP) at the time AEP acquired that company have a frozen benefit under the CSP benefit formula at December 31, 1986. Benefits for these participants are the greater of an all-service AEP benefit and a two-part benefit consisting of the frozen CSP benefit plus an AEP benefit accrued from January 1, 1987. Because this applies to a small portion of the population and the CSP frozen benefit is not often the greater benefit for these participants, this benefit is not valued.

Plan status Ongoing.

Future Plan Changes

Willis Towers Watson is not aware of any future plan changes that are required to be reflected.

Changes in Benefits Valued Since Prior Year

None.

Appendix B2: Summary of plan provisions covered by the former West Retirement Plan

Plan Provisions

Effective Date	January 1940. Restated effective January 1, 1997.
Recent Amendments	Plan was merged with and into the American Electric Power System Retirement Plan, which was most recently amended and restated effective January 1, 2017.
Covered Employees	All full-time employees of a Participating Company employed by CSW before January 1, 2001, and not covered by a union (that has not bargained for coverage) or another pension plan provided by AEP. Part-time employees of the Company had to work more than 1,000 hours in the first anniversary year or subsequent calendar years.
Participation Date	Date of becoming a covered employee

Definitions

Grandfathered employee	Employees who were at least age 50 with ten years of vesting service of July 1, 1997.
Vesting service	All service from date of hire in completed years.
Credited service	The aggregate of: For the period prior to January 1, 1976: (1) The number of full years in the last continuous period that employee was a participant after June 30, 1970, plus (2) Credited service under any prior plan if service extended to July 1, 1970. For the period beginning on or after January 1, 1976, the number of full years of service.
Cash balance pay	Pay received during the year, including base pay, overtime, shift differential/Sunday premium pay and incentive pay, subject to IRS limits
Final average pay	Highest average annual earnings (base pay only) during any 36 consecutive months in the 120 months before retirement. Any changes in earnings within the last three months before retirement will not be taken into account.
Normal retirement date (NRD)	The first day of the calendar month on or following the member's 65 th birthday.

Cash balance account Recordkeeping account to which annual interest credits and annual company credits are credited. The cash balance account is updated at the end of each plan year and is equal to:

$$\begin{array}{r}
 \text{Cash Balance Account as of the} \\
 \text{end of the prior plan year} \\
 + \\
 \text{Interest Credits} \\
 + \\
 \text{Company Credits}
 \end{array}$$

Cash balance benefit Cash Balance Account converted to a monthly annuity

Interest credits Interest credits are applied to beginning of year account balance on December 31 each year.

Based on the average 30-year Treasury Bond rate for November of the previous year.

Minimum of 4%.

Company credits Applied to account balance on December 31 or termination date if earlier.

Amount is a percentage of eligible pay received during the year, based on age plus years of Vesting Service (age and service in completed whole years as of December 31).

<i>Age Plus Years of Service</i>	<i>Annual Company Credit</i>
Less than 30	3.0%
30 – 39	3.5%
40 – 49	4.5%
50 – 59	5.5%
60 – 69	7.0%
70+	8.5%

Monthly Grandfathered Benefit Greater of (1) or (2) below with automatic cost of living adjustments upon retirement:

(1) Basic benefit — An annual amount equal to:

The aggregate of a participant's (a) earned benefit (if any) under any prior plan or acquired Company pension plan under which no election was made to receive a paid-up annuity; and (b) participant contributions without interest for the period commencing on or after July 1, 1970. For the period after September 1, 1980, participants will be deemed to have made contributions at the rate of 2% annually of the participant's annual rate of earnings as of January 1.

(2) Minimum benefit:

1-2/3% of final average annual earnings less 50% of participant's annual primary Social Security benefit times years of credited service up to 30 years.

Minimum benefits	The benefit payable will never be less than the frozen accrued benefit as of July 1, 1997, under the prior plan.
Primary Social Security benefit	The annual amount payable under the Social Security Act as amended in effect at the employee's date of retirement. The date as of which the amount is to be determined is: (1) In the case of an employee (including deferred vested employees) retiring on or after normal retirement date, normal retirement date. (2) In the case of an employee retiring prior to normal retirement date, the later of employee's 62nd birthday or actual retirement date. Early retirees and deferred vested employees are assumed to have no earnings after termination in determining the amount of this benefit.
Long-term disability and paid leaves	Participants do not receive company credits while on long-term disability. For the grandfathered formula, the final average pay will be determined as of the date on which the participant became disabled. Vesting service continues.
Unpaid leave	No compensation for annual compensation credit. Vesting service continues.

Eligibility for Benefits

Normal retirement	All members at or after their Normal Retirement Date
Early retirement	Any time after attainment of age 55 and completion of five years of vesting
Postponed retirement	Retirement after NRD.
Vested	The participant's cash balance account is 100% vested when any one of the following applies: (1) Three years of vesting service (2) Attainment of age 55 while an employee (3) Death prior to termination (4) Upon disability.
Disability	All participants who become permanently and totally disabled. Permanent and total disability is determined by reference to the LTD plan covering that participant.
Surviving spouse	The surviving spouse of a participant who retired or is eligible to retire on normal or early retirement.
Preretirement death	Beneficiary of participant who dies after becoming vested.

Benefits Paid Upon the Following Events

Normal retirement	Grandfathered employees must elect either the cash balance or the grandfathered formula. For purposes of this valuation, the employee is assumed to elect the formula with the higher present value. Employees with a prior plan frozen benefit get the better of the cash balance benefit and the prior plan frozen benefit. For all other employees, the Cash Balance Benefit is determined as of Normal Retirement Date.																						
Early retirement	Greater of (1) if applicable or (2): (1) The grandfathered accrued benefit and the prior plan frozen are payable subject to reduction according to the following schedule if payments commence prior to the normal retirement date. <table> <tr> <th><i>Age at Retirement</i></th><th><i>Percent of Benefit Payable</i></th></tr> <tr><td>64</td><td>100%</td></tr> <tr><td>63</td><td>100%</td></tr> <tr><td>62</td><td>100%</td></tr> <tr><td>61</td><td>95%</td></tr> <tr><td>60</td><td>90%</td></tr> <tr><td>59</td><td>84%</td></tr> <tr><td>58</td><td>78%</td></tr> <tr><td>57</td><td>72%</td></tr> <tr><td>56</td><td>66%</td></tr> <tr><td>55</td><td>60%</td></tr> </table> (2) The Cash Balance Benefit determined as of the Early Retirement Date.	<i>Age at Retirement</i>	<i>Percent of Benefit Payable</i>	64	100%	63	100%	62	100%	61	95%	60	90%	59	84%	58	78%	57	72%	56	66%	55	60%
<i>Age at Retirement</i>	<i>Percent of Benefit Payable</i>																						
64	100%																						
63	100%																						
62	100%																						
61	95%																						
60	90%																						
59	84%																						
58	78%																						
57	72%																						
56	66%																						
55	60%																						
Deferred vested retirement	Greater of (1) if applicable or (2): (1) Grandfathered accrued benefit payable at age 65, or if earlier reduced 5% per year from age 65, 6% per year from age 60 and 7.5% per year compounded from age 55. (2) Vested cash balance account.																						
Disability retirement	The greatest of grandfathered accrued benefit, if eligible, based on projected service and frozen pay deferred to age 65, prior plan frozen benefit if eligible and cash balance account with continued pay credits.																						
Preretirement death	If the beneficiary is the spouse and the participant is a grandfathered/protected plan participant, then: (1) For an active participant who dies on or after 55th birthday but before retirement, a monthly benefit equal to 50% of the benefit accrued to the date of death without reduction for early retirement is payable immediately as a life annuity to a qualifying spouse. (2) For an active participant who dies after completing five or more years of vesting service but before age 55, a deferred monthly benefit equal to 50% of the benefit accrued to the date of death reduced as for early retirement is payable as a life annuity to a																						

qualifying spouse. Benefit commencement is deferred to when the deceased participant would have attained age 55.

- (3) For a deferred vested participant who dies before benefits commence, a monthly benefit equal to 50% of the deferred vested benefit reduced for early commencement (as for deferred vesteds) is payable as a life annuity to a qualifying spouse. If death occurs before age 55, the benefit to the spouse is deferred to when the deceased participant would have attained age 55.

The spouse's benefit is actuarially reduced for each year by which the spouse is more than five years younger than the participant.

For all employees, the minimum benefit is the cash balance account immediate annuity, which is also payable if the beneficiary is not the participant's spouse.

Other Plan Provisions

Form of payment

The following are available for those participants who did not work an hour of service on or after January 1, 2003:

- Full lump sum payment.
- Monthly payment:
 - Single life annuity.
 - 50% joint annuity (spouse or other beneficiary).

A one-time option to elect a lump sum of the accrued benefit for terminated vested participants whose benefit was determined in no way by reference to either the AEP or CSW cash balance formulas was offered during the period from May 1, 2012 through June 30, 2012. Participants eligible for the window were also permitted to elect any of the other optional forms of payment generally applicable to such a participant under the normal terms of the plan document. Any participant who elected to commence benefits under this window, regardless of lump sum or annuity election, had a benefit commencement date of August 1, 2012.

The following are available for those participants who work an hour of service on or after January 1, 2003:

- Full lump sum payment.
- Combination of partial lump sum (25%, 50% or 75% of full lump sum) with remainder paid as a monthly benefit (see below).
- Monthly payment:
 - Single life annuity.
 - Joint annuities (spouse or other beneficiary).
 - Available in 50%, 75%, 100%.

Form of payment conversion for
non-417(e) covered conversions

■ Cash balance	7.50% interest and the applicable 417(e) Mortality Table
■ Grandfathered benefit	Factors as specified in Tables I, II, III and IV of Exhibit A to the American Electric Power System Retirement Plan document. 7.50% interest and the 1951 Group Annuity male mortality table to the extent not covered by Tables I, II, III and IV.
Pension Increases	None.
Member Contributions	None.
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.
Plan status	Continuing accruals. All new entrants to plan are covered under former East plan provision.

Future Plan Changes

Willis Towers Watson is not aware of any future plan changes that are required to be reflected.

Changes in Benefits Valued Since Prior Year

None.

Appendix C – Adjusted Funding Target Attainment Percentage (AFTAP)

American Electric Power Co. (“AEP”) retained Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC (“Willis Towers Watson”) to perform a valuation of its pension plan for the purpose of measuring the plan’s AFTAP for the plan year beginning January 1, 2017 in accordance with ERISA and the Internal Revenue Code. This valuation has been conducted in accordance with generally accepted actuarial principles and practices.

The enrolled actuaries making this certification are members of the Society of Actuaries and other professional actuarial organizations and meet their “Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States.”

We hereby certify that the plan’s AFTAP for the plan year beginning January 1, 2017 is 120.75%. This percentage is based on the assumptions, participant data, and plan provisions we relied upon to prepare the results shown in this report, reflects the valuation limitations discussed in this report and is also based on the following additional information:

Annuity Purchases

AEP’s representation that there were no annuity purchases made on behalf of non-highly compensated employees by the plan in the plan years beginning in 2015 and 2016.

Funding Balances

Our understanding is that AEP has elected to reduce the plan’s funding balances as of the first day of the 2017 plan year by \$20,416,223 as follows:

Date	Amount
January 1, 2017	\$20,416,223
Total	\$20,416,223

Our understanding is that the plan is not subject to a deemed election to reduce the funding balances in 2017.

Our understanding is that American Electric Power has not elected to apply any of the plan’s funding balances to the 2017 minimum required contribution.

Our understanding is that American Electric Power has not elected to increase the prefunding balance as of the first day of the 2017 plan year.

Contributions

Our understanding is that American Electric Power Co. has not made any employer contributions after December 31, 2016 and before May 5, 2017 for the 2016 plan year.

Subsequent Events

There were no plan amendments that took effect in the current plan year that were taken into account for the current plan year's AFTAP certification.

There were no unpredictable contingent event benefits (UCEBs) that took effect in the current plan year that were taken into account for the current plan year's AFTAP certification.

There were no previously suspended accruals restored during the current plan year that were taken into account for the current plan year's AFTAP certification.

Elections

Our understanding of sponsor elections required under the Pension Protection Act of 2006 (PPA) , with respect to interest rates, Actuarial Value of Assets and other methods and/or assumptions, as confirmed in the Sponsor's letter dated May 2, 2017.

In making this certification, we relied on asset, contribution, funding balance election, and annuity purchase information provided by the Company, including dates and amounts of contributions made to the plan through the date of this certification, dates and amounts of funding balance elections by the Company through the date of this certification, and amounts of annuity purchases in the past two years, as shown above. We have reviewed this information for overall reasonableness and consistency but, consistent with the scope of our engagement, have neither audited nor independently verified this information. We do not certify to the accuracy or completeness of asset, contribution, funding balance election and annuity purchase information, and this certification relies on and is contingent on the accuracy and completeness of this information.

The development of the AFTAP is shown below:

All monetary amounts shown in US Dollars	
Plan Year Beginning	01/01/2017
Actuarial value of assets as of January 1, 2017 ¹	4,959,332,851
Funding standard carryover balance at January 1, 2017 ²	152,206,815
Prefunding balance at January 1, 2017 ²	611,820,254
Funding target (disregarding at-risk assumptions)	4,106,845,705
AVA/funding target (disregarding at-risk assumptions)	120.75%
Assets for AFTAP calculation ³	4,959,332,851
Annuity purchases for NHCEs during 2015 and 2016	0
Reflection of Post-Valuation Date Events not Previously Reflected	
Increase in funding target (disregarding at-risk assumptions) for 2017 amendments/UCERs/restored accruals ⁴	0
IRC §436 contributions made to enable plan amendments/UCERs/restored accruals to take effect ⁵	0
Adjusted funding target, disregarding at-risk assumptions, (includes NHCE annuity purchases and amendments)	0
Adjusted assets (includes NHCE annuity purchases and IRC §436 contributions)	0
Specific AFTAP	
Adjusted Funding Target Attainment Percentage (AFTAP)	120.75%

¹ Reflects discounted contributions made for the 2016 plan year only if paid on or before the certification date. Includes security posted by the beginning of the plan year in the form of a bond or cash held in escrow.

² Reflects elections made to-date (other than elections to apply the funding balances to 2017 MRC).

³ AVA if AVA/Funding Target (disregarding at-risk assumptions) $\geq 100\%$; otherwise (AVA-funding balances).

⁴ If amendments/UCERs/restored accruals (i) went into effect before this specific certification, (ii) were not reflected in the funding valuation and (iii) require AFTAP recertification, or if AFTAP recertification is not required but the plan sponsor decides to reflect the amendment/UCERs/restored accruals in the specific AFTAP certification.

⁵ Discounted to January 1, 2017 using the 2017 plan year effective interest rate.

Immediate Implications of AFTAP Certification

We believe that the certified AFTAP of 120.75% for the 2017 plan year has the following implications for benefit limitations described in IRC §436. American Electric Power Co. should review these conclusions with ERISA counsel:

Benefit accruals called for under the plan without regard to IRC §436 must continue.

Accelerated distributions called for under the plan without regard to IRC §436 must continue in full.

Amendments that increase benefits must be evaluated at the time they would take effect to determine if they are permissible.

Plant shutdown and other UCEBs must be evaluated at the time they would take effect to determine if they are permissible.

Implications of 2017 AFTAP for Presumptions in Next Plan Year

Because the AFTAP for the 2017 plan year is least 90%, the presumed AFTAP for 2018 will remain equal to the 2017 certified AFTAP, and changes in benefit restrictions will not occur, before the 2018 AFTAP is certified, provided that the 2018 AFTAP is certified before the first day of the tenth month of the plan year.

Note, however, that adoption of plan amendments and/or payment of UCEBs may change this result.

Appendix E – Descriptions of funded status measures

Calculations for Funding Ratios Chart in Section 1: Summary of Results

Prior Year Ratios

<i>Purpose of Ratio</i>	<i>Asset Measure</i>	<i>Obligation Measure</i>
1 Test ability to apply funding balances to current year MRC	AVA - PFB	FTO
2 Quarterly contribution exemption test for current year	AVA – FSCB - PFB	FT
3 At-risk Prong 1 Test for current year	AVA – FSCB - PFB	FTO
4 At-risk Prong 2 Test for current year	AVA – FSCB - PFB	FTAR, but without loads

Current Year Ratios

<i>Purpose of Ratio</i>	<i>Asset Measure</i>	<i>Obligation Measure</i>
1 Test ability to apply funding balances to next year's MRC	Same as for analogous Prior Year Ratio	
2 Quarterly contribution exemption test for next year		
3 At-risk Prong 1 Test for next year		
4 At-risk Prong 2 Test for next year		
5 PBGC 4010 filing gateway test (PBGC FTAP) (to determine whether a filing is required next year for the current plan year)	AVA – FSCB - PFB	FTO ignoring interest rate stabilization
6 Exemption from establishing SAB in current year:		
- If PFB applied to current year MRC	AVA - PFB	FT
- If PFB not applied to current year MRC	AVA	FT
7 Eliminate SABs in current year	AVA – FSCB – PFB	FT

Benefit Restriction Ratios

<i>Purpose of Ratio for Plan Year</i>	<i>Assets</i>	<i>Obligations</i>	<i>Year Ratio is Determined</i>
Adjusted Funding Target Attainment Percentage (AFTAP) – Application of Benefit Restrictions under IRC 436	[AVA if AVA/FTO >= 100%; AVA – FSCB – PFB otherwise] + annuity purchases for NHCEs in previous 2 years	FTO + annuity purchases for NHCEs in previous 2 years	Current

Definitions of terms

Term	Short for	Definition
FTAP	Funding target attainment percentage	$(AVA - FSCB - PFB) / FTO$
PBGC FTAP	FTAP for exemption from ERISA 4010	$(AVA - FSCB - PFB) / (FTO \text{ ignoring interest rate stabilization})$
FSCB	Funding standard carryover balance	Accumulated contributions in excess of those required in pre-PPA plan years, less amounts applied to MRC or forfeited
PFB	Prefunding balance	Accumulated contributions in excess of those required since PPA applied to the plan, to the extent the plan sponsor elected to create PFB, less amounts subsequently applied to MRC or forfeited
Funding balance	FSCB + PFB	
FTO	Ongoing funding target	Funding target as described in IRC 430, ignoring at-risk assumptions; equals FT for a plan that is not at-risk.
FTO ignoring stabilization	FTO calculated ignoring interest rate stabilization	Same as FTO if the full yield curve is used, or stabilized segment rates fall within the corridors
FTAR	At-risk funding target	Funding target reflecting at-risk assumptions and any applicable loads, as described in IRC 430(i), with no phase-in
FT	Funding target	Funding target used to calculate MRC. Equals: ■ FTO if the plan is not at-risk. ■ FTAR if the plan has been at risk for at least 5 consecutive plan years. ■ Otherwise, $FTO + 20\% * (\# \text{ of consecutive years at-risk}) * (\text{the excess, if any, of FTAR over FTO})$.
FS	Funding shortfall (surplus)	$FT - (AVA - \text{funding balances})$
PBGC 4010 FS	Funding shortfall for determining whether a controlled group is exempt from an ERISA 4010 filing	FT (ignoring interest rate stabilization) - AVA See PBGC reporting requirements section of the report for more information.
SAB	Shortfall amortization base	An SAB is established each year equal to the FS less the present value of the SAs related to SABs established in earlier years. A plan may be exempt from establishing an SAB for a plan year in accordance with the test in the Funding Ratios chart in section 1.

Term	Short for	Definition
TNC	Target normal cost	Present value of benefits expected to accrue, and expenses expected to be paid from plan assets, for the year. Reflects at-risk assumptions if the plan is at-risk (phased-in if plan has been at-risk for fewer than 5 consecutive years as described above)
SAI	Shortfall amortization installment	Amortization for an SAB established in a particular year. SAIs are eliminated if FS is less than or equal to \$0.
MRC	Minimum required contribution	TNC plus SAIs as of the valuation date (assumes no funding waivers and plan is not fully funded). See section 2.4 for more details on this calculation.
AVA	Actuarial value of assets	“Plan assets” under PPA, including discounted receivables and reflecting any smoothing. See section 2.3 for more details.

Purposes of valuation

American Electric Power Co. engaged Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC (“Willis Towers Watson”) to value the Company’s pension plan.

As requested by American Electric Power Co. (the Company or AEP), this report documents the results of an actuarial valuation of the American Electric Power Excess Benefit Plan (the Plan) as of January 1, 2017.

The primary purpose of this valuation is to determine the Net Periodic Benefit Cost/(Income) (Benefit Cost), in accordance with FASB Accounting Standards Codification Topic 715 (ASC 715) for the fiscal year beginning January 1, 2017. It is anticipated that a separate report will be prepared for year-end financial reporting purposes.

Limitations

This valuation has been conducted for the purposes described above and may not be suitable for any other purpose. In particular, please note the following:

1. There may be certain events that have occurred since the valuation date that are not reflected in the current valuation. See Subsequent Events in the Basis for Valuation section below for more information.

This page is intentionally blank

Section 1: Summary of key results

Benefit cost, assets & obligations

All monetary amounts shown in US Dollars

Fiscal Year Beginning		01/01/2017	01/01/2016
Benefit Cost/ (Income)	Net Periodic Benefit Cost/(Income)	5,930,849	5,798,047
	Immediate Recognition of Benefit Cost/(Income) due to Special Events	0	0
	Total Benefit Cost/(Income)	5,930,849	5,798,047
Measurement Date		01/01/2017	01/01/2016
Plan Assets	Fair Value of Assets (FVA)	0	0
	Market Related Value of Assets (MRVA)	N/A	N/A
	Return on Fair Value Assets during Prior Year	N/A	N/A
Benefit Obligations	Accumulated Benefit Obligation (ABO)	(71,606,711)	(71,109,773)
	Projected Benefit Obligation (PBO)	(75,671,372)	(74,644,813)
Funded Ratios	Fair Value of Assets to ABO	0.0%	0.0%
	Fair Value of Assets to PBO	0.0%	0.0%
Accumulated Other Comprehensive (Income)/Loss	Net Prior Service Cost/(Credit)	15,251	85,473
	Net Loss/(Gain)	32,719,678	30,862,752
	Total Accumulated Other Comprehensive (Income)/Loss	32,734,929	30,948,225
Assumptions	Discount Rate	3.85%	4.05%
	Expected Long-term Rate of Return on Plan Assets	N/A	N/A
	Rate of Compensation Increase	Rates vary by age from 3.5% to 12.0%	Rates vary by age from 3.5% to 12.0%
Participant Data	Census Date	01/01/2017	01/01/2016

Comments on results

The actuarial gains/(losses) due to demographic experience, including any assumption changes, and investment return different from assumed during the prior year were \$(3,744,278) and \$0 respectively.

Change in net periodic cost and funded position

The net periodic cost increased from \$5,798,047 in fiscal 2016 to \$5,930,849 in fiscal 2017 and the funded position declined from \$(74,644,813) to \$(75,671,372). A reconciliation of net periodic cost from fiscal 2016 to fiscal 2017 is shown below.

All monetary amounts shown in US Dollars

	Net Periodic Cost
Prior year	5.8
Change due to:	
■ Expected based on prior valuation and contributions during prior year	(0.2)
■ Unexpected noninvestment experience	0.3
■ Unexpected investment experience	0
■ Assumption changes	0
■ Plan amendments	0
■ Settlements, curtailments, termination benefits	0
■ Acquisitions	0
■ Method changes	0
■ Changes in estimation techniques	
Current year	5.9

Significant reasons for these changes include the following:

- Demographic experience was less favorable than expected, which increased the pension cost and caused the funded position to deteriorate.
- The discount rate declined 20 basis points compared to the prior year, which slightly increased the pension cost and caused the funded position to deteriorate.
- The lump sum conversion rate was changed from 4.50% to 4.20%, which slightly reduced the pension cost and caused the funded position to deteriorate.

Basis for valuation

Appendix A summarizes the assumptions and methods used in the valuation. Appendix B summarizes our understanding of the principal provisions of the plan being valued. Unless otherwise described below under Subsequent Events, assumptions were selected based on information known as of the measurement date.

Changes in assumptions

The discount rate decreased from 4.05% to 3.85%.

The lump sum conversion rate was changed from 4.50% to 4.20%.

The mortality used to convert to 417(e) based forms of payment was updated for an additional year of mortality improvements.

Changes in methods or estimation techniques

None.

Changes in benefits valued

None.

Subsequent events

None.

Actuarial certification

This valuation has been conducted in accordance with generally accepted actuarial principles and practices. However, please note the information discussed below regarding this valuation.

Reliances

In preparing the results presented in this report, we have relied upon information regarding plan provisions, participants, assets, and sponsor accounting policies and methods provided by the Company and other persons or organizations designated by the Company. We have relied on all the data and information provided as complete and accurate. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. Based on discussions with and concurrence by the plan sponsor, assumptions or estimates may have been made if data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations. The results presented in this report are directly dependent upon the accuracy and completeness of the underlying data and information. Any material inaccuracy in the data, assets, plan provisions or other information provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by the Company, may produce materially different results that could require that a revised report be issued.

Measurement of benefit obligations, plan assets and balance sheet adjustments

Census date/measurement date

The measurement date is January 1, 2017. The benefit obligations were measured as of January 1, 2017 and are based on participant data as of the census date, January 1, 2017.

Plan assets and balance sheet adjustments

Willis Towers Watson used information supplied by the Company regarding amounts recognized in accumulated other comprehensive income as of December 31, 2016. This data was reviewed for reasonableness and consistency, but no audit was performed.

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for tax effects. Any tax effects in AOCI should be determined in consultation with the Company's tax advisors and auditors.

Assumptions and methods under U.S. GAAP

As required by U.S. GAAP, the actuarial assumptions and methods employed in the development of the pension cost and other financial reporting have been selected by the Company. Willis Towers Watson has concurred with these assumptions and methods. U.S. GAAP requires that each significant assumption “individually represent the best estimate of a particular future event.”

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A. Note that any subsequent changes in methods or assumptions for the January 1, 2017 measurement date will change the results shown in this report.

Nature of actuarial calculations

The results shown in this report are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with any certainty. The effects of certain plan provisions may be approximated, or determined to be insignificant and therefore not valued. Reasonable efforts were made in preparing this valuation to confirm that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and are not excluded or included inappropriately. Any rounding (or lack thereof) used for displaying numbers in this report is not intended to imply a degree of precision, which is not a characteristic of actuarial calculations.

If overall future plan experience produces higher benefit payments or lower investment returns than assumed, the relative level of plan costs reported in this valuation will likely increase in future valuations (and vice versa). Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions, changes in economic or demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period), and changes in plan provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of such future measurements.

See Basis for Valuation in Section 1 above for a discussion of any material events that have occurred after the valuation date that are not reflected in this valuation.

Limitations on use

This report is provided subject to the terms set out herein and in our master consulting services agreement letter dated July 29, 2004 and any accompanying or referenced terms and conditions.

The information contained in this report was prepared for the internal use of the Company and its auditors in connection with our actuarial valuation of the pension plan as described in Purposes of Valuation above. It is not intended for and may not be used for other purposes, and we accept no responsibility or liability in this regard. The Company may distribute this actuarial valuation report to the appropriate authorities who have the legal right to require the Company to provide them this report, in which case the Company will use best efforts to notify Willis Towers Watson in advance of this distribution. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson's prior written consent. Willis Towers Watson accepts no responsibility for any consequences arising from any other party relying on this report or any advice relating to its contents.

Professional qualifications

The undersigned are members of the Society of Actuaries and meet the "Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to pension plans. Our objectivity is not impaired by any relationship between the plan sponsor and our employer, Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC ("Willis Towers Watson").

Section 2: Accounting exhibits

2.1 Balance sheet asset/(liability)

All monetary amounts shown in US Dollars

Measurement Date	01/01/2017	01/01/2016
A Development of Balance Sheet Asset/(Liability)¹		
1 Projected benefit obligation (PBO) ²	(75,671,372)	(74,644,813)
2 Fair value of assets (FVA)	0	0
3 Net balance sheet asset/(liability)	(75,671,372)	(74,644,813)
B Current and Noncurrent Allocation³		
1 Noncurrent asset	0	0
2 Current liability	(7,829,009)	(6,651,343)
3 Noncurrent liability	(67,842,363)	(67,993,470)
4 Net balance sheet asset/(liability)	(75,671,372)	(74,644,813)
C Accumulated Benefit Obligation (ABO)	(71,606,711)	(71,109,773)
D Accumulated Other Comprehensive (Income)/Loss		
1 Net prior service cost/(credit)	15,251	85,473
2 Net loss/(gain)	32,719,678	30,862,752
3 Accumulated other comprehensive (income)/loss ⁴	32,734,929	30,948,225
E Assumptions and Dates		
1 Discount rate	3.85%	4.05%
2 Rate of compensation increase	Rates vary by age from 3.5% to 12.0%	Rates vary by age from 3.5% to 12.0%
3 Census date	01/01/2017	01/01/2016

¹ Whether the amounts in this table that differ from those disclosed at year-end must be disclosed in subsequent interim financial statements should be determined.

² East PBO = \$40,803,873, West PBO = \$34,867,499

³ The current liability (for each underfunded plan) was measured as the discounted value of benefits expected to be paid over the next 12 months in excess of the fair value of the plan's assets at the measurement date.

⁴ Amount shown is pre-tax and should be adjusted by plan sponsor for tax effects.

2.2 Changes in liabilities and assets

All monetary amounts shown in US Dollars

Fiscal Year Beginning	01/01/2017	01/01/2016
A Change in Projected Benefit Obligation (PBO)		
1 PBO at beginning of prior fiscal year	74,644,813	84,042,744
2 Employer service cost	913,710	939,097
3 Interest cost	2,926,767	3,200,406
4 Actuarial loss/(gain)	3,744,278	(8,160,237)
5 Plan participants' contributions	0	0
6 Benefits paid from plan assets	(6,558,196)	(5,377,197)
7 Benefits paid from the Company	0	0
8 Administrative expenses paid ¹	0	0
9 Plan change	0	0
10 Acquisitions/(divestitures)	0	0
11 Curtailments	0	0
12 Settlements	0	0
13 Special/contractual termination benefits	0	0
14 PBO at beginning of current fiscal year	75,671,372	74,644,813

¹ Only if future expenses are accrued in PBO through a load on service cost.

2.3 Summary of net balances

All monetary amounts shown in US Dollars

A Summary of Net Prior Service Cost/(Credit)

Base Number	Net Amount at 01/01/2017	Remaining Amortization Period	Amortization Amount in 2017	Effect of Curtailments	Other Events
1	14,637	1.01110	(14,478)	0	0

■ Future Social Security wage bases		4.00%
■ Statutory limits on compensation		3.00%

Demographic Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	It was assumed there will be no new or rehired employees.
Mortality	Based on modified versions of RP-2014 with long-term improvement rates of 0.75% Base mortality rates are derived from the RP-2014 mortality table with improvements factored to 2006 with white collar adjustment. Mortality improvements are projected forward on a generational basis. Improvement rates grade linearly from the MP-2014 rate in 2007 to the ultimate rate in 2015:

Age	Ultimate Improvement rate per year	Age	Ultimate improvement rate per year
85 and younger	0.750%	91	0.300%
86	0.675%	92	0.225%
87	0.600%	93	0.150%
88	0.525%	94	0.075%
89	0.450%	95 and older	0.000%
90	0.375%		

Lump sum/annuity conversion Applicable 417(e) IRS Mortality Table

Termination

Rates varying by age and service

Percentage leaving during the year		
Attained Age	Less than five years of service	Five or more years of service
< 25	8.00%	7.30%
25 – 29	8.00%	5.00%
30 – 34	8.00%	4.20%
35 – 39	8.00%	3.40%
40 – 44	8.00%	2.50%
45 – 49	8.00%	1.90%
50 +	8.00%	1.70%

Disability Rates apply to employees not eligible to retire and vary by age and sex as indicated by the following sample values:

Percentage becoming disabled during the year		
Age	Male	Female
20	0.060%	0.090%
30	0.060%	0.090%
40	0.074%	0.110%
50	0.178%	0.267%
60	0.690%	1.035%

Retirement

Rates varying by age; average retirement age 64:

Percentage retiring during the year	
Age	Rate
55-57	1.00%
58-60	6.00%
61-63	16.00%
64-69	13.00%
70+	100.00%

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55.
- Deferred vested benefit The later of age 55 or termination of employment.
- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment 100% lump sum for all retirement eligible participants. Married and unmarried participants are both assumed to elect a lump sum.

Percent married 80% of male participants; 70% of female participants.

Spouse ages Wives are assumed to be three years younger than husbands.

Valuation pay

2017 base salary pay (Grandfathered) – not estimated due to freeze of final average pay accruals at December 31, 2010.

2017 expanded pay (Cash Balance) – sum of the following updated one year according to the salary increase assumption:

- (i) 2017 base salary
- (ii) a 15% increase for overtime eligible employees and a target bonus percent increase for incentive-eligible employees

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods – Pension Cost and Funded Position

Service cost and projected benefit obligation

Projected unit credit

Benefits not valued

All benefits described in the Plan Provisions sections of this report were valued. Willis Towers Watson has reviewed the plan provisions with AEP and is not aware of any significant benefits required to be valued that were not.

Data Sources

Willis Towers Watson used participant and asset data as of January 1, 2017, supplied by Mercer, the third party administrator for AEP. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. In consultation with the Company, the following assumptions were made for missing or apparently inconsistent data elements: To the extent that data was not provided, estimates were made based on prior year information.

The Company also provided the amounts recognized in accumulated other comprehensive income as of the end of the December 31, 2016 fiscal year and amounts recognized in other comprehensive income in the December 31, 2016 fiscal year.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	As required by U.S. GAAP, the discount rate was chosen by the plan sponsor based on market information on the measurement date.
Cash balance interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate for the September of the preceding year with a minimum rate of 4.00%. The assumption is based on the plan sponsor's long-term expectations of yields on U.S. Treasuries. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.
Conversion rate for lump sums and annuities	The plan uses IRC 417(e)(3) as its basis to convert between lump sums and annuities. Because the 417(e)(3) interest rates are based on corporate bond yields, the assumption is based on the plan sponsor's long-term expectations of yields on high-quality corporate bonds. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.
Rates of increase in compensation	Rates of increase in compensation were based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Termination	Termination rates are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed termination rates differ by service because of observed differences in termination rates between employees who have attained at least five years of service and those with less than five years of service.
Retirement	Retirement rates are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Form of payment	Rates at which retirees elect lump sums versus annuities are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Source of Prescribed Methods

Accounting methods	The methods used for accounting purposes as described in Appendix A, are “prescribed methods set by another party”, as defined in the actuarial standards of practice (ASOPs). As required by U.S. GAAP, these methods were selected by the plan sponsor.
--------------------	---

Changes in Assumptions and Methods

Change in assumptions since prior valuation	The discount rate decreased from 4.05% to 3.85%. The lump sum conversion rate decreased from 4.50% to 4.20%. The mortality used to convert to 417(e) based forms of payment was updated for an additional year of mortality improvements.
Change in methods since prior valuation	None.

Appendix B – Summary of principal pension plan provisions

The Excess Benefit Plan provides a benefit determined in accordance with the provisions of the American Electric Power System's Retirement Plan (a qualified defined benefit plan), without recognition of the statutory maximums on benefits and pay, less the benefit payable from the qualified plan. MICP awards are also included in the definition of pay for the former East Plan grandfathered benefit for executives with base pay in excess of the IRS limit. Certain executives have contracts providing additional benefits. Certain former Central and South West company executives are eligible for a final average pay cash balance benefit (pension equity – type formula) if it produces a larger benefit. The schedule of contribution percentages for this formula is identical to the cash balance formula.

Prior to 2004, all executives had their cash balance pay limited to \$1,000,000. In addition, pay was limited for executives in an uncapped incentive plan to two times base pay for both the final average pay formula and the cash balance formula. Base pay rate is determined at the earlier of year-end or date of termination.

Effective January 1, 2004, pay for all executives is limited to the greater of two times base pay or \$1 million for the cash balance formula only. The executives in the uncapped incentive plan continue to have two times pay limit apply to the former East Plan final average pay formula.

Effective December 31, 2010, accruals under the east grandfathered final average pay formula were discontinued.

Effective December 31, 2013, accruals for participates in long-term disability were discontinued.

Future Plan Changes

Willis Towers Watson is not aware of any future plan changes that are required to be reflected.

Changes in Benefits Valued Since Prior Year

None.

This page is intentionally blank

Appendix C – Results by business unit

Summary of key assumptions for Appendix C of 2017 Excess Benefit Plan Valuation Report

	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027
Discount rate	3.85%	4.24%	4.40%	4.43%	4.36%	4.68%	4.99%	5.31%	5.62%	5.94%	6.16%
Cash balance crediting rate	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%	4.36%	4.57%	4.89%	5.11%
Lump sum conversion rate	4.20%	4.59%	4.75%	4.78%	4.71%	5.03%	5.34%	5.66%	5.97%	6.29%	6.51%

Mortality table	RP-2014, factored to 2006, collar adjustments as appropriate.
Mortality projection scale	Beginning in 2018, new proposed IRS mortality tables assumed for purposes of calculating lump sum amounts and converting cash balances to annuity benefits. Rates grade linearly by year from MP-2014 in 2007 to 0.75% in 2015. Rates grade linearly by age to zero at age 95 from age 85.
Retirement rates	Age-graded rates based on AEP experience during 2009-2013, average retirement age of 64.
Termination rates	Age and service based rates based on AEP experience during 2009-2013.
Salary increases	Age-graded rates based on AEP experience during 2011-2013, with average annual increase of 4.80%.
Valuation and data	January 1, 2017

Purposes of valuation

American Electric Power Co. (AEP or the Company) retained Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC (“Willis Towers Watson”), to perform an actuarial valuation of the American Electric Power System Retirement Plan for the purpose of determining the following:

1. The minimum required contribution in accordance with ERISA and the Internal Revenue Code (IRC) for the plan year beginning January 1, 2018.
2. The estimated maximum tax-deductible contribution for the tax year in which the 2018 plan year ends in accordance with ERISA as allowed by the IRC. The maximum tax-deductible contribution should be finalized in consultation with the Company’s tax advisor.
3. Plan accounting information in accordance with FASB Accounting Standards Codification Topic 960 (ASC 960).
4. An assessment of ERISA §4010 reporting requirements for the plan for 2018.
5. Determination of the Funding Target Attainment Percentage (FTAP) under IRC §430(d)(2), as reported in the Annual Funding Notice required under ERISA §101(f).
6. The value of benefit obligations as of January 1, 2018 and American Electric Power Co.’s pension cost for fiscal year ending December 31, 2018 in accordance with FASB Accounting Standards Codification Topic 715 (ASC 715-30).
7. As requested by American Electric Power Co., a “specific certification” of the Adjusted Funding Target Attainment Percentage (AFTAP) for the American Electric Power System Retirement Plan under IRC §436 for the plan year beginning January 1, 2018. Please see Appendix C for additional information. Note that the AFTAP certification included herein may be superseded by a subsequent AFTAP certification for the American Electric Power System Retirement Plan for the plan year beginning January 1, 2018.

Limitations

This valuation has been conducted for the purposes described above and may not be suitable for any other purpose. In particular, please note the following:

1. This report does not determine the plan’s liquidity shortfall requirements (if any) under IRC §430(j)(4). If applicable, we will determine such requirements separately as requested by the Company.
2. This report does not determine liabilities on a plan termination basis, for which a separate extensive analysis would be required. No funded status measure included in this report is intended to assess, and none may be appropriate for assessing, the sufficiency of plan assets to

cover the estimated cost of settling the plan's benefit obligations, as all such measures differ in some way from plan termination obligations. For example, measures shown in this report may reflect smoothed assets or interest rates, rather than current values, in accordance with funding and accounting rules. In addition, funded status measures shown in this report do not reflect the current costs of settling the plan obligations by offering immediate lump sum payments to participants and/or purchasing annuity contracts for the remaining participants (e.g., insurer profit, insurer pricing of contingent benefits and/or provision for anti-selection in the choice of a lump sum vs. an annuity).

3. The cost method for the minimum required contribution is established under IRC §430 and may not in all circumstances produce adequate assets to pay benefits under all optional forms of payment available under the plan when benefit payments are due.
4. The comparison of the plan's funding target to its actuarial value of assets (the funding shortfall (surplus) shown in Section 1) is used in determining required contributions for the coming year, and a contribution made on the valuation date equal to the shortfall would be considered to "fully fund" the plan for benefits accrued as of the valuation date under the funding rules, and thus is useful for assessing the need for and amount of future contributions. However, the funding shortfall (surplus) cannot be relied upon to determine either the need for or the amount of future contributions. The funding shortfall (surplus) is based on the interest rates elected to be used for funding purposes, which may be smoothed rates not reflecting current market conditions and will in any event change over time. It is also based on the actuarial value of assets, so if an asset smoothing method is used, it would be different than if based on market value of assets. In addition, asset gains and losses, demographic experience different from assumed, and future benefit accruals (if any) will all affect the need for and amount of future contributions.
5. There may be certain events that occurred since the valuation date that are not reflected in this valuation. See Subsequent Events (under the "Basis for valuation" portion of Section 1 below) for more information.
6. This valuation reflects our understanding of the relevant provisions of the Pension Protection Act of 2006 (PPA); the Worker, Retiree and Employer Recovery Act of 2008 (WRERA); the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010 (PRA); the Moving Ahead for Progress in the 21st Century Act (MAP-21); the Highway and Transportation Funding Act of 2014 (HATFA); and the Bipartisan Budget Act of 2015. The IRS has yet to issue final guidance with respect to certain aspects of these laws. It is possible that future guidance may conflict with our understanding of these laws based on currently available guidance and could therefore affect results shown in this report.

Section 1: Summary of results

Summary of valuation results

All monetary amounts shown in US Dollars

Plan Year Beginning	01/01/2018	01/01/2017
Funding		
Market value of assets with discounted receivable contributions	5,183,145,851	4,831,883,160
Actuarial value of assets	5,129,602,801	4,959,332,851
Funding balances	908,746,010	764,027,069
Funding target	4,128,670,979	4,106,845,705
Target normal cost	92,185,812	88,460,077
Funding shortfall (surplus)	(92,185,812)	(88,460,077)
Funding target attainment percentage (FTAP)	102.23%	102.15%
Minimum required contribution		
Prior to application of funding balances	0	0
Net of available funding balances	0	0
Effective interest rate	5.59%	5.80%
U.S. GAAP Accounting (ASC 715) as of Measurement Date	01/01/2018	01/01/2017
Projected benefit obligation (PBO)	5,158,705,604	5,026,555,852
Fair value of assets (without receivable contributions)	5,183,145,851	4,831,883,160
Funded status	24,440,247	(194,672,692)
Pension cost (excluding effects of settlements, curtailments and termination benefits) for fiscal year	75,547,803	93,751,108
Immediate recognition of benefit cost/(income) due to special events	0	0
Total benefit cost/(income)	75,547,803	93,751,108
Discount rate	3.65%	4.05%
Participants as of Census Date	01/01/2018	01/01/2017
Active employees	16,796	16,899
Participants with deferred benefits	3,596	3,643
Participants receiving benefits	15,255	15,460
Total	35,647	36,002
Plan Accounting (ASC 960)	01/01/2018	01/01/2017
Present value of accumulated benefits	3,970,740,002	4,013,604,704
Market value of assets with receivable contributions	5,183,145,851	4,831,883,160
Plan accounting discount rate	6.00%	6.00%

Minimum required contribution and funding policy

All monetary amounts shown in US Dollars

Plan Year Beginning	01/01/2018	01/01/2017
Minimum Required Contribution (MRC)		
Prior to application of funding balances	0	0
Net of available funding balances	0	0
 Sponsor's Funding Policy Contribution	 97,644,000	 94,327,000

The plan sponsor's funding policy generally has been to contribute the greater of the ASC 715 service cost or the minimum required contribution. We understand the sponsor may deviate from this policy based on cash, tax, or other considerations.

The minimum required contribution includes a contribution to cover the benefits expected to accrue in the coming year (if any) plus any expenses expected to be paid from the trust in the coming year (target normal cost), as well as a 7-year amortization (with a somewhat longer amortization period for shortfall amortization bases established in any year for which funding relief was elected) of any funding shortfall (amortization installments) (See Section 2.4 for a break-down of the minimum required contribution into target normal cost and amortization installments, and see Section 2.5 for a schedule of amortization installments for future years.) Thus, assuming that all actuarial assumptions are realized and do not change and the plan sponsor contributes the minimum required contribution each year (target normal cost plus amortization installments), the plan would generally be expected to be fully funded in 7 years, and the minimum required contribution would be expected to drop to target normal cost. During the 7 year period, there will be some variability in minimum required contributions due to amortization installments from prior years dropping out as the 7-year amortization period ends (and for deferred asset gains or losses becoming reflected in assets if an asset smoothing method is used for the actuarial value of assets). In reality, gains and losses will occur, and the plan sponsor may fail to contribute the minimum required contribution (or may contribute more than the minimum required contribution in accordance with the funding policy described above), which may cause the plan to take more or less than 7 years to become fully funded. Note that being fully funded under the funding rules is not the same as being fully funded on a plan termination basis, as different assumptions apply (e.g., the cost of annuity contracts or lump sums to participants) on plan termination.

Target normal cost for individual participants accruing benefits will grow from year to year as participants age (and as their salaries increase, if benefit accruals are pay related), but the changes in total target normal cost will depend on the numbers of participants earning benefits and their ages. Because the number and ages of active participants covered by the plan are not expected to change significantly from year to year, target normal cost is expected to increase as salaries increase. Of course, changes in discount rates and other assumptions in future years will also influence the pattern of future required contributions.

The minimum required contribution for the 2018 plan year must be satisfied by September 15, 2019. This requirement may be satisfied through contributions and/or an election to apply the available funding balances. No quarterly installments are required. The minimum required contribution is determined assuming it is paid as of the valuation date for the plan year. Contributions made on a date other than the valuation date must be adjusted for interest at the plan's effective interest rate. The minimum funding schedule, before reflecting any funding balance elections or amounts already contributed for the 2018 plan year prior to the issuance of this report, is shown below.

All monetary amounts shown in US Dollars

Date	Funding Balance Applied	Current Plan Year Contributions	Discounted Value of Contributions as of Valuation Date	Sum of Funding Balance Elections and Discounted Contributions
April 15, 2018	0	0	0	0
July 15, 2018	0	0	0	0
October 15, 2018	0	0	0	0
January 15, 2019	0	0	0	0
September 15, 2019	0	0	0	0
Total				0

Because the plan does not have a funding shortfall, no quarterly contributions will be required for the 2019 plan year based on this year's valuation results.

Change in minimum funding requirement and funding shortfall (surplus)

The minimum funding requirement is unchanged from \$0 for the 2017 plan year to \$0 for the 2018 plan year, and the funding shortfall (surplus) increased from \$(88,460,077) on January 1, 2017 to \$(92,185,812) on January 1, 2018.

Significant reasons for these changes include the following:

- The plan's effective interest rate decreased 21 basis points compared to the prior year, which decreased the funding surplus.
- Investment experience was more favorable than expected, which increased the funding surplus.
- Demographic experience was less favorable than expected which decreased the funding surplus.

Funding ratios

The Pension Protection Act of 2006 (PPA) defines several Funding Ratios. All of these ratios are based on a ratio of plan assets to plan liabilities, but the assets and liabilities are defined differently for different purposes. Depending on the purpose, the assets may be market value or, if different, a smoothed actuarial value of assets, and may be reduced by the prefunding balance or all funding balances. The liabilities may be based on the funding target, funding target disregarding at-risk assumptions, or the funding target calculated using at-risk assumptions (see the At-Risk status section below), and may or may not reflect stabilized interest rates.

Following are the key funding ratios and their implications for the 2018 or 2019 plan years. See Appendix D for details on how each ratio is calculated.

January 1, 2017 Funding ratios

Ratio Test Implications	Threshold	Ratio Value
1 Funding balances can be used to satisfy the 2018 Minimum Required Contribution (MRC) if threshold met	80%	105.86%
2 Quarterly contribution exemption applies in 2018 if threshold met	100%	102.15%
3 Plan is not at-risk for 2018 if the threshold for either the Prong 1 or Prong 2 test is met		
- Prong 1 Test	80%	102.15%
- Prong 2 Test	70%	N/A

January 1, 2018 Funding ratios

Ratio Test Implications	Threshold	Ratio Value
1 Funding balances can be used to satisfy the 2019 MRC if threshold met	80%	106.39%
2 Quarterly contribution exemption applies in 2019 if threshold met	100%	102.23%
3 Plan is not at-risk for 2019 if the threshold for either the Prong 1 or Prong 2 test is met		
- Prong 1 Test	80%	102.23%
- Prong 2 Test	70%	N/A
4 PBGC 4010 filing may be required in 2019 if threshold is not met by every plan in the controlled group	80%	88.49%
5 Plan is exempt from creating a new Shortfall Amortization Base (SAB) for 2018 when prefunding balance <u>is</u> applied to the 2018 MRC if threshold met	100%	106.39%
6 Plan is exempt from creating a new SAB for 2018 when prefunding balance <u>is not</u> applied to the 2018 MRC if threshold met	100%	124.24%
7 Previously established SABs are eliminated for 2018 if threshold met	100%	102.23%

Benefit limitations

The Adjusted Funding Target Attainment Percentage (AFTAP) for the plan year beginning January 1, 2018 is 124.24%. This AFTAP may be changed by subsequent events.

Under the PPA, a plan may become subject to various benefit limitations if its AFTAP falls below certain thresholds.

If the AFTAP is below 60% (100% if the plan sponsor is in bankruptcy, calculated ignoring stabilized interest rates), plans are prohibited from paying lump sums or other accelerated forms of distribution (such as Social Security level payment options). If the AFTAP is at least 60% but less than 80%, the amounts that can be paid are limited. In addition, lump sums to the 25 highest paid employees may be restricted if a plan's AFTAP is below 110%. These limitations do not apply to mandatory lump sum cash-outs of \$5,000 or less. In addition, plans that were completely frozen before September 2005 are exempt from the restrictions on lump sums and other accelerated forms of distribution.

If the AFTAP is below 60%, benefit accruals must cease, amendments to improve benefits cannot take effect, and plant shutdown benefits and other Unpredictable Contingent Event Benefits (UCEBs) cannot be paid without being fully paid for. In addition, if the AFTAP would be below 80% reflecting a proposed amendment, the plan amendment cannot take effect unless actions are taken to increase plan assets.

To avoid these benefit limitations, a plan sponsor may take a variety of steps, including reducing the funding balances, contributing additional amounts to the plan for the prior plan year, contributing special "designated IRC §436 contributions" for the current plan year, or providing security outside the plan. Not all of these approaches are available for all of the restrictions discussed above. For example, restrictions on accelerated distributions cannot be avoided by making designated IRC §436 contributions.

As requested by AEP in your letter dated May 9, 2018, this report is intended to constitute a "specific certification" of the AFTAP, effective as of May 11, 2018, for the plan year beginning January 1, 2018 for the purpose of determining benefit restrictions under IRC §436 for the American Electric Power System Retirement Plan. This AFTAP certification is based on the data, methods, assumptions, plan provisions, annuity purchase information, and other information provided in this report. Please see the Appendices for additional information. Note that the AFTAP certification provided herein may be superseded by a subsequent AFTAP certification for the plan year beginning January 1, 2018. Please see Appendix C for a discussion of the implications of this certified AFTAP.

PBGC reporting requirements

Certain financial and actuarial information (i.e., a “4010 filing”) must be provided to the PBGC if the PBGC Funding Target Attainment Percentage (PBGC FTAP) is less than 80% for any plan in the contributing sponsor’s controlled group. However, this reporting requirement may be waived for controlled groups with no more than \$15 million in aggregate funding shortfall (PBGC 4010 FS), or with fewer than 500 participants in all defined benefit plans. Note that interest rate stabilization does not apply for purposes of determining the PBGC FTAP or the PBGC 4010 FS.

The 2018 PBGC FTAP is 88.49%. In addition, we understand that all other pension plans within the Company’s controlled group also have PBGC FTAPs of at least 80%. As a result, no 4010 filing is expected to be required for 2018 as a result of the plans’ funded status. However, the only plans we have considered in this analysis are the American Electric Power System Retirement Plan; if there are other plans within the controlled group, a filing may be required. A filing may also be required if there are outstanding funding waivers or missed contributions within the controlled group.

At-Risk status for determining minimum required contributions

The plan is not in at-risk status, as defined in the PPA, for the 2018 plan year, because the plan’s FTAP for the 2017 plan year was at least 80%, and/or the plan’s FTAP measured using “at-risk assumptions” was at least 70%.

The plan will not be in at-risk status, as defined in the PPA, for the 2019 plan year, because the plan’s FTAP for the 2018 plan year is at least 80%, and/or the plan’s FTAP measured using “at-risk assumptions” is at least 70%.

When a plan is in at-risk status as defined in the PPA:

The plan is subject to potentially higher minimum contribution requirements. The funding target and target normal cost for purposes of determining the minimum required contribution must be measured reflecting certain mandated assumptions (“at-risk assumptions”). Specifically, participants eligible to retire within the next 11 years must be assumed to retire immediately when first eligible (but not before the end of the current year, except in accordance with the regular valuation assumptions), and all participants must be assumed to elect the most valuable form of payment available when they begin receiving benefits. In addition, plans that have been at-risk in past years may also be required to increase the funding target and target normal cost for prescribed assumed expenses. The net effect of these assumptions and expense adjustments in most cases is to increase required contributions and PBGC variable premiums.

The plan sponsor must indicate in the annual funding notice for the plan that the plan is at-risk and disclose additional at-risk funding targets.

Immediate taxation of non-qualified pension or deferred compensation for certain employees may occur if the plan sponsor is a public company. This may result when non-qualified pension or deferred compensation for such employees is funded during a period when a plan sponsored by the plan sponsor or another member of the plan sponsor's controlled group is in at-risk status.

Pension cost and funded position

The cost of the pension plan is determined in accordance with ASC 715. The Fiscal 2018 pension cost for the plan is \$75,547,803.

Under ASC 715, the funded position (fair value of plan assets less the projected benefit obligation, or "PBO") of each pension plan at the plan sponsor's fiscal year-end (measurement date) is required to be reported as an asset (for overfunded plans) or a liability (for underfunded plans). The PBO is the actuarial present value of benefits attributed to service rendered prior to the measurement date, taking into consideration expected future pay increases for pay-related plans. The plan's overfunded/(underfunded) PBO as of January 1, 2018 was \$24,440,247, based on the fair value of plan assets of \$5,183,145,851 and the PBO of \$5,158,705,604.

Fiscal year-end financial reporting information and disclosures are prepared before detailed participant data and full valuation results are available. Therefore, the funded position at December 31, 2017 was derived from a roll forward of the January 1, 2017 valuation results, adjusted for the year-end discount rate, changes in other key assumptions and asset values, as well as significant changes in plan provisions and participant population. The fiscal year-end December 31, 2018 financial reporting information will be developed based on the results of the January 1, 2018 valuation, projected to the end of 2018 and similarly adjusted for the year-end discount rate and asset values, as well as significant changes in plan provisions and participant population.

The actuarial gains/(losses) due to demographic experience, including any assumption changes, and investment return different from assumed during the prior year were \$(181,860,317) and \$325,941,715 respectively.

Change in pension cost and funded position

The pension cost declined from \$93,751,108 in fiscal 2017 to \$75,547,803 in fiscal 2018 and the funded position improved from \$(194,672,692) to \$24,440,247, as set forth below:

All monetary amounts shown in US Dollars

	Net Periodic Cost	Funded Position
Prior year	93.8	(194.7)
Change due to:		
▶ Expected based on prior valuation and contributions during prior year	(7.7)	79.8
▶ Unexpected noninvestment experience	3.4	(12.0)
▶ Unexpected investment experience	(9.5)	326.7
▶ Assumption changes	(4.5)	(175.3)
▶ Plan amendments	0	0
▶ Settlements, curtailments, certain termination benefits	0	0
▶ Acquisitions	0	0
▶ Method changes	0	
▶ Changes in estimation techniques		
Current year	75.5	24.4

Significant reasons for these changes include the following:

- The return on the fair value of plan assets since the prior measurement date was greater than expected, which decreased the pension cost and improved the funded position.
- The discount rate decreased 40 basis points compared to the prior year which increased the pension cost and caused the funded position to deteriorate.
- The lump sum conversion rate decreased from 4.20% to 3.40%, which decreased the pension cost and improved the funded position.
- Demographic experience was less favorable than expected, which increased the pension cost and caused the funded position to deteriorate.
- The mortality used to convert 417(e) based forms of payment was updated, which decreased the pension cost and improved the funded position.
- The mortality improvement projection was updated, which increased the pension cost and caused the funded position to deteriorate.

Basis for valuation

Appendix A summarizes the assumptions and methods used in the valuation. Appendix B summarizes the principal provisions of the plan being valued. Both of these appendices include a summary of any changes since the prior valuation. Unless otherwise described below under Subsequent Events, assumptions were selected based on information known as of the measurement date.

Changes in assumptions

The discount rate decreased from 4.05% to 3.65%.

The lump sum conversion rate for accounting purposes decreased from 4.20% to 3.40%.

The mortality improvement projection for accounting purposes was updated to MP-2017, adjusted to reflect 75% of the long-term improvement rates.

The mortality used to convert 417(e) based forms of payment reflects the updated mortality tables provided in final regulations under IRC §430 issued in October 2017 for funding and accounting purposes. For accounting purposes there is static projection to commencement using MP-2017.

Changes in methods

None.

Changes in estimation techniques

None.

Changes in benefits valued

None.

Subsequent events

None.

Additional information

The valuation does not reflect the updated mortality tables provided in final regulations under IRC §430 issued in October 2017 for determining minimum required funding. These tables will first be reflected in the 2019 valuation, and will increase required contributions and the funding shortfall. The plan sponsor has advised us that use of the updated mortality tables for the 2018 plan year would be administratively impracticable or would result in an adverse business impact that is greater than de minimis, which permits a one-year delay in application of the tables under the final regulations.

This page is intentionally blank

Actuarial certification

This valuation has been conducted in accordance with generally accepted actuarial principles and practices. However, please note the information discussed below regarding this valuation.

Reliances

In preparing the results presented in this report, we have relied upon information regarding plan provisions, participants, assets and sponsor elections provided by AEP and other persons or organizations designated by AEP. See the Sources of Data and Other Information section in Appendix A for further information. In addition, the results in this report are dependent on contributions reported for the prior plan year and maintenance of funding balance elections after the valuation date.

We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. Based on discussions with and concurrence by the plan sponsor, assumptions or estimates may have been made if data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

We have relied on all the information provided as complete and accurate. The results presented in this report are directly dependent upon the accuracy and completeness of the underlying data and information. Any material inaccuracy in the data, assets, plan provisions or information regarding contributions or funding balance elections provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by AEP, may produce materially different results that could require that a revised report be issued.

Assumptions and methods under ERISA and the Internal Revenue Code for funding purposes

The plan sponsor selected, as prescribed by regulation, key assumptions and funding methods (including the mortality assumption, asset valuation method and the choice among prescribed interest rates) employed in the development of the contribution amounts and communicated them to us in the letter dated May 9, 2018.

To the extent not prescribed by ERISA, the Internal Revenue Code and regulatory guidance from the Treasury and the IRS, or selected by the sponsor, the actuarial assumptions and methods employed in the development of the contribution amounts have been selected by Willis Towers Watson, with the concurrence of the plan sponsor. It is beyond the scope of this actuarial valuation to analyze the reasonableness and appropriateness of prescribed methods and assumptions, or to analyze other sponsor elections from among the alternatives available for prescribed methods and assumptions.

Other than prescribed assumptions, ERISA and the Internal Revenue Code require the use of assumptions each of which is “reasonable (taking into account the experience of the plan and reasonable expectations), and which, in combination, offer the actuary’s best estimate of anticipated experience under the plan.” The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated or selected by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A. Note that any subsequent changes in methods or assumptions for the 2018 plan year will change the results shown in this report and could result in plan qualification issues under IRC §436 if the application of benefit restrictions is affected by the change.

Assumptions and methods under U.S. GAAP

As required by U.S. GAAP, the actuarial assumptions and methods employed in the development of the pension cost have been selected by the plan sponsor. Willis Towers Watson has concurred with these assumptions and methods, except for the expected rate of return on plan assets selected as of January 1, 2018. Evaluation of the expected return assumption was outside the scope of Willis Towers Watson’s assignment and would have required substantial additional work that we were not engaged to perform. U.S. GAAP requires that each significant assumption “individually represent the best estimate of a particular future event.”

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A. Note that any subsequent changes in methods or assumptions for the January 1, 2018 measurement date will change the results shown in this report.

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for tax effects. Any tax effects in AOCI should be determined in consultation with American Electric Power Co.’s tax advisors and auditors.

Nature of actuarial calculations

The results shown in this report are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with any certainty. The effects of certain plan provisions may be approximated, or determined to be insignificant and therefore not valued. Reasonable efforts were made in preparing this valuation to confirm that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and are not excluded or included inappropriately. Any rounding (or lack thereof) used for displaying numbers in this report is not intended to imply a degree of precision, which is not a characteristic of actuarial calculations.

If overall future plan experience produces higher benefit payments or lower investment returns than assumed, the relative level of plan costs or contribution requirements reported in this valuation will likely increase in future valuations (and vice versa). Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period) or additional contribution requirements based on the plan's funded status; and changes in plan provisions or applicable law. It is beyond the scope of this valuation to analyze the potential range of future pension contributions, but we can do so upon request.

See Basis for Valuation in Section 1 above for a discussion of any material events that have occurred after the valuation date that are not reflected in this valuation.

Limitations on use

This report is provided subject to the terms set out herein and in our Masters Consulting Services agreement dated July 29, 2004 and any accompanying or referenced terms and conditions.

The information contained in this report was prepared for the internal use of American Electric Power Co. and its auditors and any organization that provides benefit administration services for the plan, in connection with our actuarial valuation of the pension plan as described in Purposes of Valuation above. It is not intended for and may not be used for other purposes, and we accept no responsibility or liability in this regard. American Electric Power Co. may distribute this actuarial valuation report to the appropriate authorities who have the legal right to require American Electric Power Co. to provide them this report, in which case American Electric Power Co. will use best efforts to notify Willis Towers Watson in advance of this distribution. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson's prior written consent. Willis Towers Watson accepts no responsibility for any consequences arising from any other party relying on this report or any advice relating to its contents.

Professional qualifications

The undersigned actuaries are members of the Society of Actuaries and meet the “Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States” relating to pension plans. Our objectivity is not impaired by any relationship between American Electric Power Co. and our employer, Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC.

2.2 Change in plan assets during plan year

All monetary amounts shown in US Dollars

Plan Year Beginning		January 1, 2017
A Reconciliation of Market Value of Assets		
1	Market value of assets at January 1, 2017 (including discounted contributions receivable)	4,831,883,160
2	Discounted contributions receivable at January 1, 2017	0
3	Market value of assets at January 1, 2017 (excluding contributions receivable)	4,831,883,160
4	Employer contributions	
a	For prior plan year	0
b	For current plan year	94,327,000
c	IRC §436 contributions for current plan year	0
d	Total	94,327,000
5	Employee contributions	0
6	Benefit payments	(346,437,286)
7	Administrative expenses paid by plan	(7,405,821)
8	Transfers from/(to) other plans	0
9	Investment return	
a	Interest and dividends	0
b	Investment expenses	0
c	Realized gains/(losses)	0
d	Change in unrealized appreciation	610,778,798
e	Total	610,778,798
10	Market value of assets at January 1, 2018 (excluding contributions receivable)	5,183,145,851
11	Discounted contributions receivable at January 1, 2018	0
12	Market value of assets at January 1, 2018 (including discounted contributions receivable)	5,183,145,851
B Rate of Return on Invested Assets (i.e., for crediting unused funding balances)		
1	Weighted invested assets	4,704,483,281
2	Rate of return	12.98%

2.3 Development of actuarial value of assets

AEP elected a smoothing method that uses seven monthly data points to calculate the AVA.

All monetary amounts shown in US Dollars

Plan Year Beginning				January 1, 2018
Development of AVA				
Month	Expenses	Benefit Payments	Contributions	Fair Value at Beginning of Month
July 2017	187,035	28,968,792	0	5,091,197,858
August 2017	253,123	29,591,347	0	5,118,701,788
September 2017	254,963	26,366,212	0	5,138,388,294
October 2017	2,995,107	23,764,817	0	5,130,273,205
November 2017	411,708	26,005,453	0	5,130,498,766
December 2017	36,882	23,468,590	0	5,141,979,926
AVA with receivables				
A Preliminary Actuarial Value of Assets before Corridor as of January 1, 2018				
1 Monthly asset values adjusted for expenses and benefit payments rolled forward to January 1, 2018				
Month	Asset value			
a July 2017	5,077,786,048			
b August 2017	5,109,806,058			
c September 2017	5,134,566,763			
d October 2017	5,128,191,064			
e November 2017	5,130,334,939			
f December 2017	5,143,388,886			
g January 2018	5,183,145,851			
h Average of monthly asset values	5,129,602,801			
2 Preliminary Actuarial Value of Assets and before application of corridor				5,129,602,801
B Lower Bound of Corridor (90% of A12 from prior page)				4,664,831,266
C Upper Bound of Corridor (110% of A12 from prior page)				5,701,460,435
Actuarial Value of Assets as of January 1, 2018				
D (A2 but not smaller than B nor larger than C)				5,129,602,801

2.4 Calculation of minimum required contribution

All monetary amounts shown in US Dollars

Reconciliation of Funding Balances as of January 1, 2018			
	Funding Standard Carryover Balance	Prefunding Balance	Total
A Determination of Funding Balances			
1 Funding balance as of January 1, 2017	152,206,815	611,820,254	764,027,069
2 Amount used to offset prior year minimum required contribution ¹	0	0	0
3 Adjustment for investment experience	19,756,445	79,414,269	99,170,714
4 Amount of additional prefunding balance created by election	N/A	45,548,227	45,548,227
5 Amount of funding balance reduction for current year by election or deemed election	0	0	0
6 Funding balance as of January 1, 2018	171,963,260	736,782,750	908,746,010

Plan Year Beginning	January 1, 2018
B Calculation of Minimum Required Contribution	
1 Target normal cost	92,185,812
2 Funding surplus	(92,185,812)
3 Net shortfall amortization installment (see section 2.5)	0
4 Waiver amortization installment	0
5 Minimum required contribution	0
6 Funding balance available	908,746,010
7 Remaining cash requirement (assuming sponsor elects full use of the available funding balances)	0

The minimum required contribution is determined as of the plan's valuation date. Any payment made on a date other than the valuation date must be adjusted for interest using the plan's effective interest rate of 5.59%.

Additional details regarding the calculation of the minimum required contribution may be obtained from the Form 5500 Schedule SB forms and attachments.

¹ Net of revoked excess application of funding balance, if any.

2.5 Schedule of minimum funding amortization bases

All monetary amounts shown in US Dollars

Type of Base	Date Established	Remaining Amortization Period (Years)	Outstanding Balance	Amortization Payment
Total			0	0

2.6 Calculation of estimated maximum deductible contribution

All monetary amounts shown in US Dollars

Based on Plan Year		2018
A Basic Maximum		
1	Funding target	4,128,670,979
2	Target normal cost	92,185,812
3	Actuarial value of assets	5,129,602,801
4	50% of funding target	2,064,335,490
5	Additional funding target for future compensation or benefit increases	119,538,205
6	Basic maximum deductible contribution	1,275,127,685
B At-risk Maximum¹		
1	Funding target (at-risk assumptions)	N/A
2	Target normal cost (at-risk assumptions)	N/A
3	Actuarial value of assets	N/A
4	At-risk maximum deductible contribution	N/A
C Minimum Required Contribution		0
D Estimated Maximum Deductible Contribution		1,275,127,685

The estimated maximum deductible contribution applies to the tax year in which the plan year ends, and is based on our understanding of IRC §404(a)(1). Regulatory guidance from the IRS/Treasury is pending. Allocations of costs to inventory have not been considered, and amounts deductible for state income tax purposes may differ. Deductibility can be influenced by timing of contributions, differences between fiscal year and plan year, and differences (if any) between the years to which prior contributions were assigned for minimum funding purposes and the years in which they were deducted. Our results have not been adjusted for non-deducted contributions included in the valuation assets, nor is it clear that such adjustment is appropriate post-PPA. We recommend the plan sponsor review with tax counsel the tax-deductibility of all contributions as Willis Towers Watson does not provide legal or tax advice.

The calculation above reflects stabilized interest rates (including their effect on at-risk status), which is not required in determining the maximum deductible contribution. Not reflecting such corridors would likely result in a higher maximum deductible amount, but would require substantial additional work that may not be of value to the Company. We can discuss not reflecting the corridors if the Company wishes to consider contributions in excess of the estimated maximum amount above.

In addition, the actuarial value of assets shown is the same as used for determining the minimum required contribution. Thus contributions receivable (if any) are discounted at stabilized rates, and the limit on the expected return on assets reflected in asset smoothing (if applicable) is the 3rd segment

¹ At-risk maximum applies only for plans not in at-risk status for purposes of determining maximum deductible contributions for the plan year.

rate, reflecting stabilized rates as expressly allowed by IRS Notice 2012-61 when the stabilized 3rd segment rate is higher than the rate ignoring the corridors.

This limit has been determined without regard to the special rule of IRC §404(o)(2)(B) providing a potentially higher maximum deduction based on at-risk assumptions, which is available for plans that are not at risk.

2.7 Calculation of PBGC variable rate premium

All monetary amounts shown in US Dollars

Premium Payment Year	2018
A Assumptions and Methods Used to Determine Premium Funding Target	
1 Premium funding target method	Standard
2 Premium funding target method election date	January 1, 2014
3 UVB valuation date	January 1, 2018
4 Discount rates	
a First segment rate [10-year rate]	2.33%
b Second segment rate [20-year rate]	3.55%
c Third segment rate [30-year rate]	4.11%
B Premium Funding Target	
1 Attributable to active participants	1,973,617,797
2 Attributable to terminated vested participants	269,891,453
3 Attributable to retirees and beneficiaries receiving payment	2,590,617,540
4 Total premium funding target ¹	4,834,126,790
C Market Value of Assets	
	5,183,145,851
D Unfunded Vested Benefits	
	0
E Uncapped Variable Rate Premium²	
	0
F Maximum VRP³	
	18,497,464
G Variable Rate Premium	
	0

¹ Reflects at-risk status, if applicable.

² Using variable rate premium of \$38 per \$1,000 of unfunded vested benefits.

³ Using maximum per-participant premium of \$523.

2.8 ASC 960 (plan accounting) information

All monetary amounts shown in US Dollars

Plan Year Beginning		January 1, 2018
A Present Value of Accumulated Benefits		
1 Vested accumulated benefits		
a Active employees		1,539,580,610
b Participants with deferred benefits		219,719,823
c Participants receiving benefits		2,193,094,529
d Total vested accumulated benefits		3,952,394,962
2 Non-vested accumulated benefits		18,345,040
3 Total accumulated benefits		3,970,740,002
4 Market value of assets ¹		5,183,145,851
B Reconciliation of Present Value of Accumulated Benefits		
1 Present value of accumulated benefits as of December 31, 2016		4,013,604,704
2 Changes during the year due to:		
a Benefits accumulated		69,080,997
b Actuarial (gains)/losses		18,060,921
c Decrease in the discount period		234,719,412
d Actual benefits paid		(346,437,286)
e Assumption changes		(18,288,746)
f Plan amendments		0
g Net increase/(decrease)		(42,864,702)
3 Present value of accumulated benefits as of December 31, 2017		3,970,740,002

Actuarial Assumptions and Methods

The assumptions used to develop the present value of accumulated benefits, including any changes from the prior year, are described in Appendix A, except a discount rate of 6.00% was used. For the prior valuation, a discount rate of 6.00% was used.

The discount rate used is the same as the expected rate of return on plan assets for the plan year under ASC 715-30-35 and, as required by that standard and further discussed in the Actuarial Certification of this report, was selected by the plan sponsor without using the work of Willis Towers Watson. Evaluation of this assumption was outside the scope of Willis Towers Watson's assignment and would have required substantial additional work that we were not engaged to perform. We understand that the expected return on assets assumption reflects the plan sponsor's estimate of future experience for trust asset returns, reflecting the plan's current asset allocation and any

¹ Assets include accrued contributions for the 2017 plan year of \$0 not yet deposited at January 1, 2018.

expected changes during the current plan year, current market conditions and the plan sponsor's expectations for future market conditions.

Plan Provisions

Plan provisions reflected in these calculations, including any changes during the prior year, are described in Appendix B.

Accumulated and Vested Benefits

Accumulated benefits include benefits earned under the plan's benefit formula based on service rendered and compensation earned before the measurement date.

Benefits included in vested benefits are the same as described above for accrued benefits, except the following benefits are excluded:

- For participants who are not disabled on the measurement date, disability benefits in excess of the value of standard termination benefits (retirement benefits for those eligible).
- For participants who have not yet satisfied the eligibility requirements for these benefits, early retirement benefits and supplements in excess of standard termination benefits.
- Death benefits in excess of the plan's QPSA.
- All benefits for participants who are not yet vested in their accrued benefits or eligible for other benefits.

2.9 Pension obligations and funded position under U.S. GAAP (ASC 715)

All monetary amounts shown in US Dollars

Measurement Date	01/01/2018	01/01/2017
A Obligations		
1 Accumulated Benefit Obligation (ABO)		
a. Active participants	2,031,202,993	2,012,775,103

Appendix A – Statement of actuarial assumptions, methods and data sources

1. Assumptions and methods for contribution purposes

Actuarial Assumptions and Methods — Contributions

Economic Assumptions

Interest rate basis:

- Applicable month (published) October 2017
- Yield curve basis Segment rates

Funding interest rates:

	Reflecting Corridors	Not Reflecting Corridors
■ First segment rate	3.92%	1.76%
■ Second segment rate	5.52%	3.74%
■ Third segment rate	6.29%	4.63%
■ Effective interest rate	5.59%	3.90%

Annual rates of increase

■ Compensation:		
— Representative rates	Age	Rate
	< 26	12.00%
	26 – 30	8.50%
	31 – 35	7.00%
	36 – 40	6.00%
	41 – 45	5.00%
	46 – 50	4.00%
	> 50	3.50%
— Weighted average		4.85%

- Cash balance crediting rate 4.00%
- Lump sum/annuity conversion rate October 2017 segment rates
- Future Social Security wage bases 4.00%
- Statutory limits on compensation N/A
- Expected rate of return on assets for prior year 6.00% but not greater than the third segment rate

Demographic Assumptions

Inclusion Date The valuation date coincident with or next following the date on which the employee becomes a participant.

New or rehired employees It was assumed there will be no new or rehired employees.

Mortality

- **Healthy** Separate rates for non-annuitants (based on RP-2000 “Employees” table without collar or amount adjustments, projected to 2033 using Scale AA and annuitants (based on RP-2000 “Healthy Annuitants” table without collar or amount adjustments), projected to 2025 using Scale AA.
- **Disabled** Post-1994 current liability disabled
- **Lump sum/annuity conversion** Applicable 417(e) IRS Mortality Table

Termination Rates varying by age and service:

Percentage leaving during the year		
Attained Age	Less than five years of service	Five or more years of service
< 25	8.00%	7.30%
25 – 29	8.00%	5.00%
30 – 34	8.00%	4.20%
35 – 39	8.00%	3.40%
40 – 44	8.00%	2.50%
45 – 49	8.00%	1.90%
50 +	8.00%	1.70%

Disability Rates apply to employees not eligible to retire and vary by age and sex as indicated by the following sample values:

Percentage becoming disabled during the year		
Age	Male	Female
20	0.060%	0.090%
30	0.060%	0.090%
40	0.074%	0.110%
50	0.178%	0.267%
60	0.690%	1.035%

Retirement Rates varying by age; average retirement age 64:

Percentage retiring during the year	
Age	Rate
55 – 57	1.00%
58 – 60	6.00%
61 – 63	16.00%
64 – 69	13.00%
70 +	100.00%

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55.
- Deferred vested benefit (active participants) The later of age 55 or termination of employment.
- Deferred vested benefit (current deferred vested) The later of age 65 or current age
- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment 40% lump sum; 60% annuity for retirement eligible East grandfathered participants and 75% lump sum; 25% annuity for all other participants. Married participants are assumed to elect the 50% joint and survivor annuity and unmarried participants are assumed to elect the single life annuity. No other optional form of payment election is assumed.

For current deferred vested participants with a cash balance type benefit, 100% lump sum is assumed. For all other current deferred vested participants 100% annuity is assumed.

Percent married 80% of male participants; 70% of female participants.

Spouse ages Wives are assumed to be three years younger than husbands.

Valuation pay 2018 base salary pay (Grandfathered) – not estimated due to freeze of final average pay accruals at December 31, 2010.

2018 expanded pay (Cash Balance) – sum of the following updated one year according to the salary increase assumption:

- (i) 2018 base salary
- (ii) a 15% increase for overtime eligible employees and a target bonus percent increase for incentive-eligible employees

At-risk assumptions If at-risk calculations are required, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually a joint and survivor form of payment.

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date	First day of plan year.
Funding target	Present value of accrued benefits.
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from the trust (based on actual trust expenses paid in previous year, adjusted by the difference between the prior and expected current year PBGC premiums).
Actuarial value of assets	Average of the fair market value of assets on the valuation date and the six immediately preceding months, adjusted for contributions, benefit/expense payments and expected investment returns. The average asset value must be within 10% of fair value, including contributing receivable. The method of computing the actuarial value of assets complies with rules governing the calculation of such values under PPA. These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a bias to produce an actuarial value of assets that is below the market value of assets.
Benefits Not Valued	All benefits were valued except: – Any liabilities that may be reinstated in the event of reemployment – The alternate benefit formula for members who did not elect to withdraw their employee contributions – Any liabilities relating to members' unwithdrawn employee contributions – Liabilities related to special benefits as a result of termination due to downsizing and restructuring

Data Sources

Willis Towers Watson used participant and asset data as of January 1, 2018, supplied by Mercer, the third party administrator for AEP. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. To the extent that data were not provided, estimates were made based on prior year information.

The Company also provided the amounts recognized in accumulated other comprehensive income as of the end of the December 31, 2017 fiscal year and amounts recognized in other comprehensive income in the December 31, 2017 fiscal year.

2. Assumptions and methods for pension cost purposes

Actuarial Assumptions and Methods — Pension Cost

Demographic Assumptions

Discount rate 3.65%

Return on assets* 6.00%

Annual rates of increase

■ Compensation:

	<i>Age</i>	<i>Rate</i>
— Representative rates	< 26	12.00%
	26 – 30	8.50%
	31 – 35	7.00%
	36 – 40	6.00%
	41 – 45	5.00%
	46 – 50	4.00%
	> 50	3.50%

— Weighted average 4.85%

- Cash balance crediting rate 4.00%
- Lump sum/annuity conversion rate 3.40%
- Future Social Security wage bases 4.00%
- Statutory limits on compensation 3.00%

The return on assets shown above is net of investment expenses and administrative expenses assumed to be paid from the trust.

* Also used as discount rate for plan accounting (ASC 960) purposes.

Demographic Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	It was assumed there will be no new or rehired employees.
Mortality	Base mortality rates are derived from the RP-2014 mortality table with improvements factored to 2006 and no collar adjustments. Mortality improvements are projected forward on a generational basis using an adjusted version of Scale MP-2017. The adjustment reflects 75% of the long-term improvement rates.

Lump sum/annuity conversion	PPA 2019 optional combined mortality with static projection to commencement using MP-2017.
-----------------------------	--

Termination	Rates varying by age and service
-------------	----------------------------------

Percentage leaving during the year		
Attained Age	Less than five years of service	Five or more years of service
< 25	8.00%	7.30%
25 – 29	8.00%	5.00%
30 – 34	8.00%	4.20%
35 – 39	8.00%	3.40%
40 – 44	8.00%	2.50%
45 – 49	8.00%	1.90%
50 +	8.00%	1.70%

Disability	Rates apply to employees not eligible to retire and vary by age and sex as indicated by the following sample values:
------------	--

Percentage becoming disabled during the year		
Age	Male	Female
20	0.060%	0.090%
30	0.060%	0.090%
40	0.074%	0.110%
50	0.178%	0.267%
60	0.690%	1.035%

Retirement

Rates varying by age; average retirement age 64:

Percentage retiring during the year	
Age	Rate
55-57	1.00%
58-60	6.00%
61-63	16.00%
64-69	13.00%
70+	100.00%

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55.
- Deferred vested benefit (active participants) The later of age 55 or termination of employment.
- Deferred vested benefit (current deferred vested) The later of age 65 or current age
- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment

40% lump sum; 60% annuity for retirement eligible East grandfathered participants and 75% lump sum; 25% annuity for all other participants. Married participants are assumed to elect the 50% joint and survivor annuity and unmarried participants are assumed to elect the single life annuity. No other optional form of payment election is assumed.

For current deferred vested participants with a cash balance type benefit, 100% lump sum is assumed. For all other current deferred vested participants 100% annuity is assumed.

Percent married

80% of male participants; 70% of female participants.

Spouse ages

Wives are assumed to be three years younger than husbands.

Valuation pay

2018 base salary pay (Grandfathered) – not estimated due to freeze of final average pay accruals at December 31, 2010.

2018 expanded pay (Cash Balance) – sum of the following updated one year according to the salary increase assumption:

- (i) 2018 base salary
- (ii) a 15% increase for overtime eligible employees and a target bonus percent increase for incentive-eligible employees

Administrative expenses

Discount rate is net of expenses paid by the trust.

Timing of benefit
payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Service cost and projected benefit obligation	Projected unit credit
Market-related value of assets	The market value on the valuation date less the following percentages of prior years' investment gains and losses: ■ 80% of the prior year ■ 60% of the second prior year ■ 40% of the third prior year ■ 20% of the fourth prior year The investment gain or loss is calculated each year by: ■ Rolling forward the prior year's fair value of assets with actual contributions, benefit payments and expected return on investments using the long-term yield assumption ■ Comparing the actual fair value of assets to the expected value calculated above.
Benefits not valued	All benefits were valued except: ■ Any liabilities that may be reinstated in the event of reemployment ■ The alternate benefit formula for members who did not elect to withdraw their employee contributions ■ Any liabilities relating to members' unwithdrawn employee contributions ■ Liabilities related to special benefits as a result of termination due to restructuring or downsizing

Data Sources

Willis Towers Watson used participant and asset data as of January 1, 2018, supplied by Mercer, the third party administrator for AEP. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. To the extent that data were not provided, estimates were made based on prior year information.

The Company also provided the amounts recognized in accumulated other comprehensive income as of the end of the December 31, 2017 fiscal year and amounts recognized in other comprehensive income in the December 31, 2017 fiscal year.

Assumptions Rationale - Significant Economic Assumptions for Contributions

Discount rate	The basis chosen was selected by the plan sponsor from among choices prescribed by law, all of which are based on observed market data over certain periods of time.
Cash Balance Interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate for the September of the preceding year with a minimum rate of 4.00%. The assumption is based on the plan sponsor's long-term expectations of yields on U.S. Treasuries. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.
Lump sum conversion rate	As required by IRC 430, lump sum benefits are valued using "annuity substitution", so that the interest rates assumed are effectively the same as described above for the discount rate.
Rates of increase in:	
■ Compensation	Rates of increase in compensation were based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
■ National average wages (NAW) (e.g., Social Security wage bases)	The assumed NAW is based on assumed CPI as shown below, plus assumed increases in real wages (the portion of GDP increases that becomes part of wages). Such assumed future increases in real wages are based on a combination of historical averages and an expectation that the future rates will be lower (higher) than historical averages.
■ Increases in statutory limits (CPI)	The assumed CPI is based on a combination of historical average CPI, current conditions and an assumed progression from recently experienced CPI to the long-term expected level. The final assumption represents a composite of current rates and long term expected rates.

Assumptions Rationale - Significant Economic Assumptions for Accounting

Discount rate	As required by U.S. GAAP, the discount rate was chosen by the plan sponsor based on market information on the measurement date.
Expected return on plan assets	We understand that the expected return on assets assumption reflects the plan sponsor's estimate of future experience for trust asset returns, reflecting the plan's current asset allocation and any expected changes during the current plan year, current market conditions and the plan sponsor's expectations for future market conditions.
Cash balance interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate for the September of the preceding year with a minimum rate of 4.00%. The assumption is based on

the plan sponsor's long-term expectations of yields on U.S. Treasuries. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.

Conversion rate for lump sums and annuities

The plan uses IRC 417(e)(3) as its basis to convert between lump sums and annuities. Because the 417(e)(3) interest rates are based on corporate bond yields, the assumption is based on the plan sponsor's long-term expectations of yields on high-quality corporate bonds. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.

Rate of increase in compensation

Rates of increase in compensation were based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumptions Rationale - Significant Demographic Assumptions

Mortality

Assumptions used for accounting purposes were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience. Assumptions used for contribution purposes are as prescribed by IRC §430(h). Note that the plan sponsor has decided, as allowed by regulation §1.430(h)(3)-1, to delay until the 2019 plan year updating the required mortality table to reflect the RP-2014 study and subsequent Society of Actuaries studies.

Termination

Termination rates are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumed termination rates differ by service because of observed differences in termination rates between employees who have attained at least five years of service and those with less than five years of service.

Retirement

Retirement rates are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Form of payment

Rates at which retirees elect lump sums versus annuities are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Source of Prescribed Methods

Funding methods	The methods used for funding purposes as described in Appendix A, including the method of determining plan assets, are “prescribed methods set by law”, as defined in the actuarial standards of practice (ASOPs). These methods are required by IRC §430, or were selected by the plan sponsor from a range of methods permitted by IRC §430.
Accounting methods	The methods used for accounting purposes as described in Appendix A, including the method of determining the market-related value of plan assets, are “prescribed methods set by another party”, as defined in the actuarial standards of practice (ASOPs). As required by U.S. GAAP, these methods were selected by the plan sponsor.

Changes in Assumptions and Methods

Change in assumptions since prior valuation	The interest rates used to calculate the funding target, target normal cost and to convert 417(e) based forms of payments were updated from the segment rates as of October 2016 to the segment rates as of October 2017. The required mortality table used to value the funding target and target normal cost was updated to include one additional year of projected mortality improvements. Assumed plan-related expenses of \$7,558,304 were added to the target normal cost. The discount rate decreased from 4.05% to 3.65%. The lump sum conversion rate decreased from 4.20% to 3.40% for accounting purposes. The mortality improvement projection was updated to MP-2017, adjusted to reflect 75% of the long-term improvement rates. The mortality used to convert to 417(e) based forms of payment was updated to PPA 2019 optional combined mortality with static projection to commencement using MP-2017.
Change in methods since prior valuation	None.

Appendix B1 – Summary of plan provisions covered by the former East Retirement Plan

Plan Provisions

Effective Date	May 1, 1955. Restated effective January 1, 2017.
Recent Amendments	Plan was amended and restated effective January 1, 2017.
Covered Employees	Employees become Members of the Plan on the first day of the month following completion of one year of service.
Participation Date	Date of becoming a covered employee.

Definitions

Grandfathered employee	If, on December 31, 2000, either: – Participating in AEP System Retirement Plan, or – In one-year waiting period for AEP System Retirement Plan participation.
Vesting service	A period of time from employment date to termination date and, in general, includes periods of severance that are not in the excess of 12 months.
Accredited service	Elapsed time from date of hire (from benefit service start date).
Cash balance pay	Pay received during the year, including base pay, overtime, shift differential/Sunday premium pay and incentive pay, subject to IRS limits.
Covered compensation amount	The average of the Social Security taxable wage based during the 35-year period including the year in which the participant retires, dies, becomes disabled or otherwise terminates employment. This monthly average is calculated to the next lower or equal whole dollar amount and is then rounded to nearest \$50.
Final average pay	Average of the highest 36-consecutive months of base pay out of the last 120 months of employment, subject to IRS limits.
Normal retirement date (NRD)	The first day of the calendar month whose first day is nearest the later of the member's 65 th birthday or the completion of five years of Vesting Service.

Cash balance account Recordkeeping account to which annual Interest Credits and annual Company Credits are credited. The cash balance account is updated at the end of each plan year and is equal to:

$$\begin{array}{r}
 \text{Cash Balance Account as of the} \\
 \text{end of the prior plan year} \\
 + \\
 \text{Interest Credits} \\
 + \\
 \text{Company Credits}
 \end{array}$$

Cash balance benefit Cash Balance Account converted to a monthly annuity

Opening balance For those participating in or eligible for the AEP System Retirement Plan on December 31, 2000, opening balance is calculated as follows:

- Present value of monthly normal retirement benefit determined as of December 31, 2000, and payable at age 65 (or current age if older)
 - Present value determined based on 5.78% interest and IRS regulated mortality (GAM83 Unisex) data for lump sums (postretirement only)

Plus

- Credit for early retirement subsidy for monthly payments beginning at age 62 (or current age if older)

Plus

- Transition credit based on age, service and pay received in 2000 (see "Company Credits" for credit percentages)
 - Age and service based on completed whole years as of December 31, 2000.

For employees hired on or after January 1, 2001, opening balance is \$0.

Interest credits Interest credits are applied to beginning of year account balance on December 31 each year.

Based on the average 30-year Treasury Bond rate for November of the previous year.

Minimum of 4%.

Company credits Applied to account balance on December 31 or termination date if earlier.

Amount is a percentage of eligible pay received during the year, based on age plus years of Vesting Service (age and service in completed whole years as of December 31).

	<i>Age Plus Years of Service</i>	<i>Annual Company Credit</i>
	Less than 30	3.0%
	30 – 39	3.5%
	40 – 49	4.5%
	50 – 59	5.5%
	60 – 69	7.0%
	70+	8.5%
Monthly Grandfathered Benefit	Sum of (1), (2) and (3):	
	(1) 1.10% of Final Average Pay x Accredited Service up to 35 years	
	(2) 0.50% of Final Average Pay Less Covered Compensation x Accredited Service up to 35 years	
	(3) 1.33% of Final Average Pay x Accredited Service between 35 and 45 years	
	Accruals for the grandfathered benefit ceased on December 31, 2010.	
Long-term disability and paid leaves	Participants do not receive company credits while on long-term disability. Vesting service continues.	
Unpaid leave	No compensation for annual Company Credit. Vesting service continues.	

Eligibility for Benefits

Normal retirement	All members at or after their Normal Retirement Date.
Early retirement	Any time after attainment of age 55 and completion of five years of vesting. Applicable only to grandfathered benefits.
Postponed retirement	Retirement after Normal Retirement Date.
Vested termination	All members who terminate employment after completion of three years of Vesting Service, or upon death.
Disability	All members who are unable to work at own occupation solely because of sickness or injury for the first 24 months of disability. After 24 months of disability, the participant is eligible if unable to work at any gainful occupation for which the participant may be able, or may reasonably become qualified by education, training or experience, to perform.
Surviving spouse	The surviving spouse of a Grandfathered Member who retired or is eligible to retire on Normal or Early Retirement and who was married to that spouse for the year preceding commencement and whose grandfathered benefit exceeds his or her Cash Balance Benefit.
Preretirement death	Beneficiary of deceased member.

Benefits Paid Upon the Following Events

Normal retirement	For Grandfathered Employees, the better of the monthly grandfathered benefit or the Cash Balance Benefit determined as of Normal Retirement Date. For all other employees, the Cash Balance Benefit determined as of Normal Retirement Date.
Early retirement	For Grandfathered Employees, the better of: (1) The monthly grandfathered retirement benefit reduced by 3% per year for each year commencement precedes age 62, and (2) The Cash Balance Benefit determined as of the Early Retirement Date. For all other employees, the Cash Balance Benefit determined as of the Early Retirement Date.
Deferred vested retirement	The accrued Normal Retirement Benefit (better of Cash Balance and Grandfathered Benefits, if eligible), payable at Normal Retirement Date or actuarially reduced and payable at any age.
Disability	The greater of (1) or (2): (1) Accrued Grandfathered Retirement Benefit reduced as in the Early Retirement Benefit. If retirement occurs prior to age 55, the benefit is further reduced actuarially from age 55. The Disability Retirement Benefit will reflect Accredited Service that accrued (at most recent rate of base earnings) to a member while receiving benefits under the Company's LTD plan. (2) The Cash Balance Benefit with continued Company Credits while disabled. Benefit (1) applies for Grandfathered Employees only.
Preretirement death	Better of (1) or (2): (1) The grandfathered monthly benefit as if the employee commenced a 60% qualified joint and survivor benefit at his earliest retirement date (2) Annuity equivalent of Cash Balance account or the cash balance account. Benefit (1) applies for a Grandfathered Employee whose beneficiary is his or her spouse.
Surviving spouse benefits	A benefit payable for life equal to 30% of the single life annuity payable to the grandfathered member. The spouse's benefit is actuarially reduced for each year by which the spouse is more than ten years younger than the member. Payable to Grandfathered Employees only.

Other Plan Provisions

Forms of payment

- **Grandfathered employees** The following are available for Grandfathered Employees for both the Grandfathered Benefit and the Cash Balance Benefit:
 - Full lump sum payment.
 - Combination of partial lump sum (25%, 50% or 75% of full lump sum) with remainder paid as a monthly benefit (see below).
 - Monthly payment:
 - Single life annuity.
 - Optional joint annuities (spouse or other beneficiary).
 - Available in 40%, 50%, 60%, 75%, 100%.
 - Can elect pop-up and/or level income options.
 - Automatic company-paid 30% surviving spouse annuity included in Grandfathered Benefit annuity if terminate on or after age 55 and married at least one year. Cash Balance Benefit is actuarially reduced for this feature.

A one-time option to elect a lump sum of the accrued benefit for terminated vested participants whose benefit was determined in no way by reference to either the AEP or CSW cash balance formulas was offered during the period from May 1, 2012 through June 30, 2012. Participants eligible for the window were also permitted to elect any of the other optional forms of payment generally applicable to such a participant under the normal terms of the plan document. Any participant who elected to commence benefits under this window, regardless of lump sum or annuity election, had a benefit commencement date of August 1, 2012.

- **Employees hired on or after January 1, 2001** The following are available for those hired on or after January 1, 2001:
 - Full lump sum payment.
 - Combination of partial lump sum (25%, 50% or 75% of full lump sum) with remainder paid as a monthly benefit (see below).
 - Monthly payment:
 - Single life annuity.
 - Joint annuities (spouse or other beneficiary).
 - Available in 50%, 75%, 100%.

Form of payment conversion for
non-417(e) covered conversions

- Cash balance 7.50% interest and the applicable 417(e) Mortality Table.
- Grandfathered benefit 7.50% interest and the 1974 George B. Buck Mortality Table.

Pension Increases None.

Plan Participants' Contributions Prior to January 1, 1978, employee contributions were required as a condition of Membership. In May and June of 1981, Members were permitted an election to withdraw those contributions. Those who did not elect to withdraw have retirement benefits based on a formula that differs from the formulas previously described in this section. However, the number of nonelecting Members is so small that special plan provisions for that group have not been included in this summary.

Maximum on benefits and pay All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Benefits not valued A small portion of the population made employee contributions to the plan. Because the amount of these contributions is not material to the plan, they are not part of the valuation.

Participants who were employees of Columbus Southern Power (CSP) at the time AEP acquired that company have a frozen benefit under the CSP benefit formula at December 31, 1986. Benefits for these participants are the greater of an all-service AEP benefit and a two-part benefit consisting of the frozen CSP benefit plus an AEP benefit accrued from January 1, 1987. Because this applies to a small portion of the population and the CSP frozen benefit is not often the greater benefit for these participants, this benefit is not valued.

Plan status Ongoing.

Future Plan Changes

Willis Towers Watson is not aware of any future plan changes that are required to be reflected.

Changes in Benefits Valued Since Prior Year

None.

Appendix B2 – Summary of plan provisions covered by the former West Retirement Plan

Plan Provisions

Effective Date	January 1940. Restated effective January 1, 1997.
Recent Amendments	Plan was merged with and into the American Electric Power System Retirement Plan, which was most recently amended and restated effective January 1, 2017.
Covered Employees	All full-time employees of a Participating Company employed by CSW before January 1, 2001, and not covered by a union (that has not bargained for coverage) or another pension plan provided by AEP. Part-time employees of the Company had to work more than 1,000 hours in the first anniversary year or subsequent calendar years.
Participation Date	Date of becoming a covered employee

Definitions

Grandfathered employee	Employees who were at least age 50 with ten years of vesting service of July 1, 1997.
Vesting service	All service from date of hire in completed years.
Credited service	The aggregate of: For the period prior to January 1, 1976: (1) The number of full years in the last continuous period that employee was a participant after June 30, 1970, plus (2) Credited service under any prior plan if service extended to July 1, 1970. For the period beginning on or after January 1, 1976, the number of full years of service.
Cash balance pay	Pay received during the year, including base pay, overtime, shift differential/Sunday premium pay and incentive pay, subject to IRS limits
Final average pay	Highest average annual earnings (base pay only) during any 36 consecutive months in the 120 months before retirement. Any changes in earnings within the last three months before retirement will not be taken into account.
Normal retirement date (NRD)	The first day of the calendar month on or following the member's 65 th birthday.

Cash balance account Recordkeeping account to which annual interest credits and annual company credits are credited. The cash balance account is updated at the end of each plan year and is equal to:

$$\begin{array}{r}
 \text{Cash Balance Account as of the} \\
 \text{end of the prior plan year} \\
 + \\
 \text{Interest Credits} \\
 + \\
 \text{Company Credits}
 \end{array}$$

Cash balance benefit Cash Balance Account converted to a monthly annuity

Interest credits Interest credits are applied to beginning of year account balance on December 31 each year.

Based on the average 30-year Treasury Bond rate for November of the previous year.

Minimum of 4%.

Company credits Applied to account balance on December 31 or termination date if earlier.

Amount is a percentage of eligible pay received during the year, based on age plus years of Vesting Service (age and service in completed whole years as of December 31).

<i>Age Plus Years of Service</i>	<i>Annual Company Credit</i>
Less than 30	3.0%
30 – 39	3.5%
40 – 49	4.5%
50 – 59	5.5%
60 – 69	7.0%
70+	8.5%

Monthly Grandfathered Benefit Greater of (1) or (2) below with automatic cost of living adjustments upon retirement:

(1) Basic benefit — An annual amount equal to:

The aggregate of a participant's (a) earned benefit (if any) under any prior plan or acquired Company pension plan under which no election was made to receive a paid-up annuity; and (b) participant contributions without interest for the period commencing on or after July 1, 1970. For the period after September 1, 1980, participants will be deemed to have made contributions at the rate of 2% annually of the participant's annual rate of earnings as of January 1.

(2) Minimum benefit:

1-2/3% of final average annual earnings less 50% of participant's annual primary Social Security benefit times years of credited service up to 30 years.

Minimum benefits	The benefit payable will never be less than the frozen accrued benefit as of July 1, 1997, under the prior plan.
Primary Social Security benefit	The annual amount payable under the Social Security Act as amended in effect at the employee's date of retirement. The date as of which the amount is to be determined is: (1) In the case of an employee (including deferred vested employees) retiring on or after normal retirement date, normal retirement date. (2) In the case of an employee retiring prior to normal retirement date, the later of employee's 62nd birthday or actual retirement date. Early retirees and deferred vested employees are assumed to have no earnings after termination in determining the amount of this benefit.
Long-term disability and paid leaves	Participants do not receive company credits while on long-term disability. For the grandfathered formula, the final average pay will be determined as of the date on which the participant became disabled. Vesting service continues.
Unpaid leave	No compensation for annual compensation credit. Vesting service continues.

Eligibility for Benefits

Normal retirement	All members at or after their Normal Retirement Date
Early retirement	Any time after attainment of age 55 and completion of five years of vesting
Postponed retirement	Retirement after NRD.
Vested	The participant's cash balance account is 100% vested when any one of the following applies: (1) Three years of vesting service (2) Attainment of age 55 while an employee (3) Death prior to termination (4) Upon disability.
Disability	All participants who become permanently and totally disabled. Permanent and total disability is determined by reference to the LTD plan covering that participant.
Surviving spouse	The surviving spouse of a participant who retired or is eligible to retire on normal or early retirement.
Preretirement death	Beneficiary of participant who dies after becoming vested.

Benefits Paid Upon the Following Events

Normal retirement Grandfathered employees must elect either the cash balance or the grandfathered formula. For purposes of this valuation, the employee is assumed to elect the formula with the higher present value. Employees with a prior plan frozen benefit get the better of the cash balance benefit and the prior plan frozen benefit. For all other employees, the Cash Balance Benefit is determined as of Normal Retirement Date.

Early retirement Greater of (1) if applicable or (2):

(1) The grandfathered accrued benefit and the prior plan frozen are payable subject to reduction according to the following schedule if payments commence prior to the normal retirement date.

<i>Age at Retirement</i>	<i>Percent of Benefit Payable</i>
64	100%
63	100%
62	100%
61	95%
60	90%
59	84%
58	78%
57	72%
56	66%
55	60%

(2) The Cash Balance Benefit determined as of the Early Retirement Date.

Deferred vested retirement Greater of (1) if applicable or (2):

(1) Grandfathered accrued benefit payable at age 65, or if earlier reduced 5% per year from age 65, 6% per year from age 60 and 7.5% per year compounded from age 55.

(2) Vested cash balance account.

Disability retirement The greatest of grandfathered accrued benefit, if eligible, based on projected service and frozen pay deferred to age 65, prior plan frozen benefit if eligible and cash balance account with continued pay credits.

Preretirement death If the beneficiary is the spouse and the participant is a grandfathered/protected plan participant, then:

(1) For an active participant who dies on or after 55th birthday but before retirement, a monthly benefit equal to 50% of the benefit accrued to the date of death without reduction for early retirement is payable immediately as a life annuity to a qualifying spouse.

(2) For an active participant who dies after completing five or more years of vesting service but before age 55, a deferred monthly benefit equal to 50% of the benefit accrued to the date of death reduced as for early retirement is payable as a life annuity to a

qualifying spouse. Benefit commencement is deferred to when the deceased participant would have attained age 55.

- (3) For a deferred vested participant who dies before benefits commence, a monthly benefit equal to 50% of the deferred vested benefit reduced for early commencement (as for deferred vesteds) is payable as a life annuity to a qualifying spouse. If death occurs before age 55, the benefit to the spouse is deferred to when the deceased participant would have attained age 55.

The spouse's benefit is actuarially reduced for each year by which the spouse is more than five years younger than the participant.

For all employees, the minimum benefit is the cash balance account immediate annuity, which is also payable if the beneficiary is not the participant's spouse.

Other Plan Provisions

Form of payment

The following are available for those participants who did not work an hour of service on or after January 1, 2003:

- Full lump sum payment.
- Monthly payment:
 - Single life annuity.
 - 50% joint annuity (spouse or other beneficiary).

A one-time option to elect a lump sum of the accrued benefit for terminated vested participants whose benefit was determined in no way by reference to either the AEP or CSW cash balance formulas was offered during the period from May 1, 2012 through June 30, 2012. Participants eligible for the window were also permitted to elect any of the other optional forms of payment generally applicable to such a participant under the normal terms of the plan document. Any participant who elected to commence benefits under this window, regardless of lump sum or annuity election, had a benefit commencement date of August 1, 2012.

The following are available for those participants who work an hour of service on or after January 1, 2003:

- Full lump sum payment.
- Combination of partial lump sum (25%, 50% or 75% of full lump sum) with remainder paid as a monthly benefit (see below).
- Monthly payment:
 - Single life annuity.
 - Joint annuities (spouse or other beneficiary).
 - Available in 50%, 75%, 100%.

Form of payment conversion for
non-417(e) covered conversions

■ Cash balance	7.50% interest and the applicable 417(e) Mortality Table
■ Grandfathered benefit	Factors as specified in Tables I, II, III and IV of Exhibit A to the American Electric Power System Retirement Plan document. 7.50% interest and the 1951 Group Annuity male mortality table to the extent not covered by Tables I, II, III and IV.
Pension Increases	None.
Member Contributions	None.
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.
Plan status	Continuing accruals. All new entrants to plan are covered under former East plan provision.

Future Plan Changes

Willis Towers Watson is not aware of any future plan changes that are required to be reflected.

Changes in Benefits Valued Since Prior Year

None.

Appendix C – Adjusted Funding Target Attainment Percentage (AFTAP)

American Electric Power Co. (“AEP”) retained Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC (“Willis Towers Watson”) to perform a valuation of its pension plan for the purpose of measuring the plan’s AFTAP for the plan year beginning January 1, 2018 in accordance with ERISA and the Internal Revenue Code. This valuation has been conducted in accordance with generally accepted actuarial principles and practices.

The enrolled actuaries making this certification are members of the Society of Actuaries and other professional actuarial organizations and meet their “Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States.”

We hereby certify that the plan’s AFTAP for the plan year beginning January 1, 2018 is 124.24%. This percentage is based on the assumptions, participant data, and plan provisions we relied upon to prepare the results shown in this report, reflects the valuation limitations discussed in this report and is also based on the following additional information:

Annuity Purchases

AEP’s representation that there were no annuity purchases made on behalf of non-highly compensated employees by the plan in the plan years beginning in 2016 and 2017.

Funding Balances

Our understanding is that American Electric Power Co. has not elected to reduce the plan’s funding balance as of the first day of the 2018 plan year.

Our understanding is that the plan is not subject to a deemed election to reduce the funding balances in 2018.

Our understanding is that American Electric Power Co. has not elected to apply any of the plan’s funding balances to the 2018 minimum required contribution.

Our understanding is that American Electric Power Co. has elected to increase the prefunding balance as of the first day of the 2018 plan year as follows:

Date	Amount
January 1, 2018	\$45,548,227
Total	\$45,548,227

Contributions

Our understanding is that American Electric Power Co. has not made any employer contributions after December 31, 2017 and before May 11, 2018 for the 2017 plan year.

Subsequent Events

There were no plan amendments that took effect in the current plan year that were taken into account for the current plan year's AFTAP certification.

There were no unpredictable contingent event benefits (UCEBs) that took effect in the current plan year that were taken into account for the current plan year's AFTAP certification.

There were no previously suspended accruals restored during the current plan year that were taken into account for the current plan year's AFTAP certification.

The AFTAP certification also does not reflect the updated mortality tables provided in final regulations under IRC §430 issued in October 2017. These tables will first be reflected in the 2019 AFTAP, and will reduce the AFTAP.

Elections

Our understanding of sponsor elections required under the Pension Protection Act of 2006 (PPA) , with respect to interest rates, Actuarial Value of Assets and other methods and/or assumptions, as confirmed in the Sponsor's letter dated May 9, 2018 .

In making this certification, we relied on asset, contribution, funding balance election, and annuity purchase information provided by the Company, including dates and amounts of contributions made to the plan through the date of this certification, dates and amounts of funding balance elections by the Company through the date of this certification, and amounts of annuity purchases in the past two years, as shown above. We have reviewed this information for overall reasonableness and consistency but, consistent with the scope of our engagement, have neither audited nor independently verified this information. We do not certify to the accuracy or completeness of asset, contribution, funding balance election and annuity purchase information, and this certification relies on and is contingent on the accuracy and completeness of this information.

The development of the AFTAP is shown below:

All monetary amounts shown in US Dollars

Plan Year Beginning	01/01/2018
Actuarial value of assets as of January 1, 2018 ¹	5,129,602,801
Funding standard carryover balance at January 1, 2018 ²	171,963,260
Prefunding balance at January 1, 2018 ²	736,782,750
Funding target (disregarding at-risk assumptions)	4,128,670,979
AVA/funding target (disregarding at-risk assumptions)	124.24%
Assets for AFTAP calculation ³	5,129,602,801
Annuity purchases for NHCEs during 2016 and 2017	0
Reflection of Post-Valuation Date Events not Previously Reflected	
Increase in funding target (disregarding at-risk assumptions) for 2018 amendments/UCERs/restored accruals ⁴	0
IRC §436 contributions made to enable plan amendments/UCERs/restored accruals to take effect ⁵	0
Adjusted funding target, disregarding at-risk assumptions, (includes NHCE annuity purchases and amendments)	0
Adjusted assets (includes NHCE annuity purchases and IRC §436 contributions)	0
Specific AFTAP	
Adjusted Funding Target Attainment Percentage (AFTAP)	124.24%

¹ Reflects discounted contributions made for the 2017 plan year only if paid on or before the certification date. Includes security posted by the beginning of the plan year in the form of a bond or cash held in escrow.

² Reflects elections made to-date (other than elections to apply the funding balances to 2018 MRC).

³ AVA if AVA/Funding Target (disregarding at-risk assumptions) $\geq 100\%$; otherwise (AVA-funding balances).

⁴ If amendments/UCERs/restored accruals (i) went into effect before this specific certification, (ii) were not reflected in the funding valuation and (iii) require AFTAP recertification, or if AFTAP recertification is not required but the plan sponsor decides to reflect the amendment/UCERs/restored accruals in the specific AFTAP certification.

⁵ Discounted to January 1, 2018 using the 2018 plan year effective interest rate.

Immediate Implications of AFTAP Certification

We believe that the certified AFTAP of 124.24% for the 2018 plan year has the following implications for benefit limitations described in IRC §436. American Electric Power Co. should review these conclusions with ERISA counsel:

Benefit accruals called for under the plan without regard to IRC §436 must continue.

Accelerated distributions called for under the plan without regard to IRC §436 must continue in full.

Amendments that increase benefits must be evaluated at the time they would take effect to determine if they are permissible.

Plant shutdown and other UCEBs must be evaluated at the time they would take effect to determine if they are permissible.

Implications of 2018 AFTAP for Presumptions in Next Plan Year

Because the AFTAP for the 2018 plan year is at least 90%, the presumed AFTAP for 2019 will remain equal to the 2018 certified AFTAP, and changes in benefit restrictions will not occur, before the 2019 AFTAP is certified, provided that the 2019 AFTAP is certified before the first day of the tenth month of the plan year.

Note, however, that adoption of plan amendments and/or payment of UCEBs may change this result.

Appendix E – Descriptions of funded status measures

Calculations for Funding Ratios Chart in Section 1: Summary of Results

Prior Year Ratios

<i>Purpose of Ratio</i>	<i>Asset Measure</i>	<i>Obligation Measure</i>
1 Test ability to apply funding balances to current year MRC	AVA - PFB	FTO
2 Quarterly contribution exemption test for current year	AVA – FSCB - PFB	FT
3 At-risk Prong 1 Test for current year	AVA – FSCB - PFB	FTO
4 At-risk Prong 2 Test for current year	AVA – FSCB - PFB	FTAR, but without loads

Current Year Ratios

<i>Purpose of Ratio</i>	<i>Asset Measure</i>	<i>Obligation Measure</i>
1 Test ability to apply funding balances to next year's MRC	Same as for analogous Prior Year Ratio	
2 Quarterly contribution exemption test for next year		
3 At-risk Prong 1 Test for next year		
4 At-risk Prong 2 Test for next year		
5 PBGC 4010 filing gateway test (PBGC FTAP) (to determine whether a filing is required next year for the current plan year)	AVA – FSCB - PFB	FTO ignoring interest rate stabilization
6 Exemption from establishing SAB in current year:		
- If PFB applied to current year MRC	AVA - PFB	FT
- If PFB not applied to current year MRC	AVA	FT
7 Eliminate SABs in current year	AVA – FSCB – PFB	FT

Benefit Restriction Ratios

<i>Purpose of Ratio for Plan Year</i>	<i>Assets</i>	<i>Obligations</i>	<i>Year Ratio is Determined</i>
Adjusted Funding Target Attainment Percentage (AFTAP) – Application of Benefit Restrictions under IRC 436	[AVA if AVA/FTO >= 100%; AVA – FSCB – PFB otherwise] + annuity purchases for NHCEs in previous 2 years	FTO + annuity purchases for NHCEs in previous 2 years	Current

Definitions of terms

Term	Short for	Definition
FTAP	Funding target attainment percentage	$(AVA - FSCB - PFB) / FTO$
PBGC FTAP	FTAP for exemption from ERISA 4010	$(AVA - FSCB - PFB) / (FTO \text{ ignoring interest rate stabilization})$
FSCB	Funding standard carryover balance	Accumulated contributions in excess of those required in pre-PPA plan years, less amounts applied to MRC or forfeited
PFB	Prefunding balance	Accumulated contributions in excess of those required since PPA applied to the plan, to the extent the plan sponsor elected to create PFB, less amounts subsequently applied to MRC or forfeited
Funding balance	FSCB + PFB	
FTO	Ongoing funding target	Funding target as described in IRC 430, ignoring at-risk assumptions; equals FT for a plan that is not at-risk.
FTO ignoring stabilization	FTO calculated ignoring interest rate stabilization	Same as FTO if the full yield curve is used, or stabilized segment rates fall within the corridors
FTAR	At-risk funding target	Funding target reflecting at-risk assumptions and any applicable loads, as described in IRC 430(i), with no phase-in
FT	Funding target	Funding target used to calculate MRC. Equals: ■ FTO if the plan is not at-risk. ■ FTAR if the plan has been at risk for at least 5 consecutive plan years. ■ Otherwise, $FTO + 20\% * (\# \text{ of consecutive years at-risk}) * (\text{the excess, if any, of FTAR over FTO})$.
FS	Funding shortfall (surplus)	$FT - (AVA - \text{funding balances})$
PBGC 4010 FS	Funding shortfall for determining whether a controlled group is exempt from an ERISA 4010 filing	FT (ignoring interest rate stabilization) - AVA See PBGC reporting requirements section of the report for more information.
SAB	Shortfall amortization base	An SAB is established each year equal to the FS less the present value of the SAs related to SABs established in earlier years. A plan may be exempt from establishing an SAB for a plan year in accordance with the test in the Funding Ratios chart in section 1.

Term	Short for	Definition
TNC	Target normal cost	Present value of benefits expected to accrue, and expenses expected to be paid from plan assets, for the year. Reflects at-risk assumptions if the plan is at-risk (phased-in if plan has been at-risk for fewer than 5 consecutive years as described above)
SAI	Shortfall amortization installment	Amortization for an SAB established in a particular year. SAls are eliminated if FS is less than or equal to \$0.
MRC	Minimum required contribution	TNC plus SAls as of the valuation date (assumes no funding waivers and plan is not fully funded). See section 2.4 for more details on this calculation.
AVA	Actuarial value of assets	“Plan assets” under PPA, including discounted receivables and reflecting any smoothing. See section 2.3 for more details.

Purposes of valuation

American Electric Power Co. engaged Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC (“Willis Towers Watson”) to value the Company’s pension plan.

As requested by American Electric Power Co. (the Company or AEP), this report documents the results of an actuarial valuation of the American Electric Power Excess Benefit Plan (the Plan) as of January 1, 2018.

The primary purpose of this valuation is to determine the Net Periodic Benefit Cost/(Income) (Benefit Cost), in accordance with FASB Accounting Standards Codification Topic 715 (ASC 715) for the fiscal year beginning January 1, 2018. It is anticipated that a separate report will be prepared for year-end financial reporting purposes.

Limitations

This valuation has been conducted for the purposes described above and may not be suitable for any other purpose. In particular, please note the following:

1. There may be certain events that have occurred since the valuation date that are not reflected in the current valuation. See Subsequent Events in the Basis for Valuation section below for more information.

This Page is intentionally blank

Section 1: Summary of key results

Benefit cost, assets & obligations

All monetary amounts shown in US Dollars

Fiscal Year Beginning		01/01/2018	01/01/2017
Benefit Cost/ (Income)	Net Periodic Benefit Cost/(Income)	6,096,964	5,930,849
	Immediate Recognition of Benefit Cost/(Income) due to Special Events	0	0
	Total Benefit Cost/(Income)	6,096,964	5,930,849
Measurement Date		01/01/2018	01/01/2017
Plan Assets	Fair Value of Plan Assets (FVA)	0	0
	Market Related Value of Assets (MRVA)	N/A	N/A
	Actual Return on Fair Value Assets during Prior Year	N/A	N/A
Benefit Obligations	Accumulated Benefit Obligation (ABO)	(74,091,217)	(71,606,711)
	Projected Benefit Obligation (PBO)	(79,011,173)	(75,671,372)
Funded Ratios	Fair Value of Assets to ABO	0.0%	0.0%
	Fair Value of Assets to PBO	0.0%	0.0%
Accumulated Other Comprehensive (Income)/Loss	Net Prior Service Cost/(Credit)	160	15,251
	Net Loss/(Gain)	35,720,739	32,719,678
	Total Accumulated Other Comprehensive (Income)/Loss	35,720,899	32,734,929
Assumptions	Discount rate	3.45%	3.85%
	Expected Long-Term Return on Plan Assets	N/A	N/A
	Rate of Compensation Increase	Rates vary by age from 3.5% to 12.0%	Rates vary by age from 3.5% to 12.0%
Participant Data	Census Date	01/01/2018	01/01/2017

Comments on results

The actuarial gains/(losses) due to demographic experience, including any assumption changes, and investment return different from assumed during the prior year were \$(5,013,979) and \$0 respectively.

Change in net periodic cost and funded position

The net periodic cost increased from \$5,930,849 in fiscal 2017 to \$6,096,964 in fiscal 2018 and the funded position declined from \$(75,671,372) to \$(79,011,173).

All monetary amounts shown in US Dollars

	Net Periodic Cost
Prior year	5.9
Change due to:	
■ Expected based on prior valuation and contributions during prior year	(0.1)
■ Unexpected noninvestment experience	0.2
■ Unexpected investment experience	0
■ Assumption changes	0.1
■ Plan amendments	0
■ Settlements, curtailments, certain termination benefits	0
■ Acquisitions	0
■ Method changes	0
■ Changes in estimation techniques	0
Current year	6.1

Significant reasons for these changes include the following:

- The discount rate decreased 40 basis points compared to the prior year which increased the pension cost and caused the funded position to deteriorate.
- The lump sum conversion rate was changed from 4.20% to 3.40%, which increased the pension cost and caused the funded position to deteriorate.
- The mortality used to convert 417(e) based forms of payment was updated, which increased the pension cost and improved the funded position.
- The mortality improvement projection was updated, which increased the pension cost and caused the funded position to deteriorate.

Basis for valuation

Appendix A summarizes the assumptions and methods used in the valuation. Appendix B summarizes our understanding of the principal provisions of the plan being valued. Unless otherwise described below under Subsequent Events, assumptions were selected based on information known as of the measurement date.

Changes in assumptions

The discount rate decreased from 3.85% to 3.45%.

The mortality used to convert 417(e) based forms of payment reflects the updated mortality tables provided in final regulations under IRC §430 issued in October 2017 with static projection to commencement using MP-2017.

The lump sum conversion rate was changed from 4.20% to 3.40%.

The mortality improvement projection was updated to MP-2017, adjusted to reflect 75% of the long-term improvement rates.

Changes in methods

None.

Changes in estimation techniques

None.

Changes in benefits valued

None.

Subsequent events

None.

Additional information

None.

Actuarial certification

This valuation has been conducted in accordance with generally accepted actuarial principles and practices. However, please note the information discussed below regarding this valuation.

Reliances

In preparing the results presented in this report, we have relied upon information regarding plan provisions, participants, assets and sponsor accounting policies and methods provided by AEP and other persons or organizations designated by AEP. See the Sources of Data and Other Information section in Appendix A for further details.

We have relied on all the data and information provided as complete and accurate. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. Based on discussions with and concurrence by the plan sponsor, assumptions or estimates may have been made if data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

The results presented in this report are directly dependent upon the accuracy and completeness of the underlying data and information. Any material inaccuracy in the data, assets, plan provisions or information regarding contributions or funding balance elections provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by AEP, may produce materially different results that could require that a revised report be issued.

Measurement of benefit obligations, plan assets and balance sheet adjustments

Census date/measurement date

The measurement date is January 1, 2018. The benefit obligations were measured as of January 1, 2018 and are based on participant data as of the census date, January 1, 2018.

Plan assets and balance sheet adjustments

Willis Towers Watson used information supplied by the Company regarding amounts recognized in accumulated other comprehensive income as of December 31, 2017. This data was reviewed for reasonableness and consistency, but no audit was performed.

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for tax effects. Any tax effects in AOCI should be determined in consultation with the Company's tax advisors and auditors.

Assumptions and methods under U.S. GAAP

As required by U.S. GAAP, the actuarial assumptions and methods employed in the development of the pension cost and other financial reporting have been selected by the Company. Willis Towers Watson has concurred with these assumptions and methods. U.S. GAAP requires that each significant assumption “individually represent the best estimate of a particular future event.”

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A. Note that any subsequent changes in methods or assumptions for the January 1, 2018 measurement date will change the results shown in this report.

Nature of actuarial calculations

The results shown in this report are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with any certainty. The effects of certain plan provisions may be approximated, or determined to be insignificant and therefore not valued. Reasonable efforts were made in preparing this valuation to confirm that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and are not excluded or included inappropriately. Any rounding (or lack thereof) used for displaying numbers in this report is not intended to imply a degree of precision, which is not a characteristic of actuarial calculations.

If overall future plan experience produces higher benefit payments or lower investment returns than assumed, the relative level of plan costs reported in this valuation will likely increase in future valuations (and vice versa). Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions, changes in economic or demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period), and changes in plan provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of such future measurements.

See Basis for Valuation in Section 1 above for a discussion of any material events that have occurred after the valuation date that are not reflected in this valuation.

Limitations on use

This report is provided subject to the terms set out herein and in our master consulting services agreement letter dated July 29, 2004 and any accompanying or referenced terms and conditions.

The information contained in this report was prepared for the internal use of the Company and its auditors in connection with our actuarial valuation of the pension plan as described in Purposes of Valuation above. It is not intended for and may not be used for other purposes, and we accept no responsibility or liability in this regard. The Company may distribute this actuarial valuation report to the appropriate authorities who have the legal right to require the Company to provide them this report, in which case the Company will use best efforts to notify Willis Towers Watson in advance of this distribution. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson's prior written consent. Willis Towers Watson accepts no responsibility for any consequences arising from any other party relying on this report or any advice relating to its contents.

Professional qualifications

The undersigned are members of the Society of Actuaries and meet the "Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to pension plans. Our objectivity is not impaired by any relationship between the plan sponsor and our employer, Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC ("Willis Towers Watson").

Section 2: Accounting exhibits

2.1 Balance sheet asset/(liability)

All monetary amounts shown in US Dollars

Measurement Date	01/01/2018	01/01/2017
A Development of Balance Sheet Asset/(Liability)¹		
1 Projected benefit obligation (PBO) ²	(79,011,173)	(75,671,372)
2 Fair value of assets (FVA)	0	0
3 Net balance sheet asset/(liability)	(79,011,173)	(75,671,372)
B Current and Noncurrent Allocation³		
1 Noncurrent asset	0	0
2 Current liability	(8,651,113)	(7,829,009)
3 Noncurrent liability	(70,360,060)	(67,842,363)
4 Net balance sheet asset/(liability)	(79,011,173)	(75,671,372)
C Accumulated Benefit Obligation (ABO)	(74,091,217)	(71,606,711)
D Accumulated Other Comprehensive (Income)/Loss		
1 Net prior service cost/(credit)	160	15,251
2 Net loss/(gain)	35,720,739	32,719,678
3 Accumulated other comprehensive (income)/loss ⁴	35,720,899	32,734,929
E Assumptions and Dates		
1 Discount rate	3.45%	3.85%
2 Rate of compensation increase	Rates vary by age from 3.5% to 12.0%	Rates vary by age from 3.5% to 12.0%
3 Census date	01/01/2018	01/01/2017

¹ Whether the amounts in this table that differ from those disclosed at year-end must be disclosed in subsequent interim financial statements should be determined.

² East PBO = \$42,330,532, West PBO = \$36,680,641

³ The current liability (for each underfunded plan) was measured as the discounted value of benefits expected to be paid over the next 12 months in excess of the fair value of the plan's assets at the measurement date.

⁴ Amount shown is pre-tax and should be adjusted by plan sponsor for tax effects.

2.2 Changes in liabilities and assets

All monetary amounts shown in US Dollars

Period Beginning	01/01/2018	01/01/2017
A Change in Projected Benefit Obligation (PBO)		
1 PBO at beginning of prior fiscal year	75,671,372	74,644,813
2 Employer service cost	1,096,557	913,710
3 Interest cost	2,806,280	2,926,767
4 Actuarial loss/(gain)	5,013,979	3,744,278
5 Plan participants' contributions	0	0
6 Benefits paid from plan assets	(5,577,015)	(6,558,196)
7 Benefits paid from the Company	0	0
8 Administrative expenses paid ¹	0	0
9 Plan amendments	0	0
10 Acquisitions/(divestitures)	0	0
11 Curtailments	0	0
12 Settlements	0	0
13 Special/contractual termination benefits	0	0
14 PBO at beginning of current fiscal year	79,011,173	75,671,372

¹ Only if future expenses are accrued in PBO through a load on service cost.

2.3 Summary of net balances

All monetary amounts shown in US Dollars

A Summary of Net Prior Service Cost/(Credit)

Measurement Date Established	Net Amount at 01/01/2018	Remaining Amortization Period	Amortization Amount in 2018	Effect of Curtailments	Other Events
01/01/2008	160	0.01110	(160)	0	0
Total	160		(160)	0	0

All monetary amounts shown in US Dollars

B Summary of Net Loss/(Gain)¹

	Net Amount at 01/01/2018 ²	Amortization Amount in 2018	Effect of Curtailments	Effect of Settlements	Other Events
	35,720,739	(2,213,679)	0	0	0

¹ See Appendix A for description of amortization method.

² Before any immediate recognition on the same date.

2.4 Summary and comparison of benefit cost and cash flows

All monetary amounts shown in US Dollars

Fiscal Year Ending	12/31/2018	12/31/2017
A Total Benefit Cost		
1 Employer service cost	1,261,678	1,096,557
2 Interest cost	2,621,447	2,806,280
3 Expected return on plan assets	0	0
4 Subtotal	3,883,125	3,902,837
5 Net prior service cost/(credit) amortization	160	15,092
6 Net loss/(gain) amortization	2,213,679	2,012,920
7 Subtotal	2,213,839	2,028,012
8 Net periodic benefit cost/(income)	6,096,964	5,930,849
9 Curtailments	0	0
10 Settlements	0	0
11 Special/contractual termination benefits	0	0
12 Total benefit cost	6,096,964	5,930,849
B Assumptions ¹		
1 Discount rate	3.45%	3.85%
2 Expected long-term rate of return on plan assets	Rates vary by age from 3.5% to 12.0%	Rates vary by age from 3.5% to 12.0%
3 Census date	01/01/2018	01/01/2017
C Fair Market Value of Assets at Beginning of Year	0	0
D Cash Flows	Expected	Actual
1 Employer contributions	0	0
2 Plan participants' contributions ²	0	0
3 Benefits paid from the Company	8,651,113	5,577,015
4 Benefits paid from plan assets	0	0

¹ These assumptions were used to calculate Net Periodic Benefit Cost/(Income) as of the beginning of the year. Rates are expressed on an annual basis where applicable. For assumptions used for interim measurement periods, if any, refer to Appendix A.

² Over the fiscal year.

Section 3: Data exhibits

3.1 Plan participant data

All monetary amounts shown in US Dollars

Census Date	01/01/2018	01/01/2017
A Participating Employees		
1 Number	16,796	16,899
2 Expected plan compensation for year beginning on the valuation date	1,770,440,445	1,723,502,524
3 Average expected plan compensation	105,408	101,988
4 Average age	47.8	48.0
5 Average credited service	17.8	18.2
6 Average future working life	12.567	12.496
B Participants with Deferred Benefits		
1 Number (non-cash balance)	2	3
2 Total annual pension (non-cash balance)	85,126	105,931
3 Average annual pension (non-cash balance)	42,563	35,310
4 Number of cash balance	10	7
5 Total cash balance	2,918,421	1,989,350
6 Average cash balance	291,842	284,193
7 Average age	58.7	60.7
C Participants Receiving Benefits		
1 Number	76	75
2 Total annual pension	4,626,124	4,517,826
3 Average annual pension	60,870	60,238
4 Average age	76.7	76.9

Appendix A: Statement of actuarial assumptions, methods and data sources

Plan Sponsor

American Electric Power Co.

Statement of Assumptions

The assumptions disclosed in this Appendix are for the fiscal year 2018 benefit cost.

Assumptions and methods for pension cost purposes

Actuarial Assumptions and Methods – Pension Cost

Economic Assumptions

Discount rate 3.45%

Annual rates of increase

■ Compensation:

Representative rates

Age

Rate

< 26	12.00%
26 – 30	8.50%
31 – 35	7.00%
36 – 40	6.00%
41 – 45	5.00%
46 – 50	4.00%
> 50	3.50%

Weighted average

4.85%

■ Cash balance crediting rate	4.00%
■ Lump sum/annuity conversion rate	3.40%
■ Future Social Security wage bases	4.00%
■ Statutory limits on compensation	3.00%

Demographic Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee becomes a participant.
New or rehired employees	It was assumed there will be no new or rehired employees.
Mortality	Base mortality rates are derived from the RP-2014 mortality table with improvements factored to 2006 with white collar adjustment. Mortality improvements are projected forward on a generational basis, using an adjusted version of Scale MP-2017. The adjustment reflects 75% of the long-term improvement rate.

Lump sum/annuity conversion	PPA 2019 optional combined mortality with static projection to commencement using MP-2017.
-----------------------------	--

Termination	Rates varying by age and service		
	Percentage leaving during the year		
	Attained Age	Less than five years of service	Five or more years of service
	< 25	8.00%	7.30%
	25 – 29	8.00%	5.00%
	30 – 34	8.00%	4.20%
	35 – 39	8.00%	3.40%
	40 – 44	8.00%	2.50%
	45 – 49	8.00%	1.90%
	50 +	8.00%	1.70%

Disability	Rates apply to employees not eligible to retire and vary by age and sex as indicated by the following sample values:		
	Percentage becoming disabled during the year		
	Age	Male	Female
	20	0.060%	0.090%
	30	0.060%	0.090%
	40	0.074%	0.110%
	50	0.178%	0.267%
	60	0.690%	1.035%

Retirement	Rates varying by age; average retirement age 64:
------------	--

Percentage retiring during the year	
Age	Rate
55-57	1.00%
58-60	6.00%
61-63	16.00%
64-69	13.00%
70+	100.00%

Benefit commencement date:

- Preretirement death benefit The later of the death of the active participant or the date the participant would have attained age 55.
- Deferred vested benefit The later of age 55 or termination of employment.
- Disability benefit Upon disablement.
- Retirement benefit Upon termination of employment.

Form of payment 100% lump sum for all retirement eligible participants. Married and unmarried participants are both assumed to elect a lump sum.

Percent married 80% of male participants; 70% of female participants.

Spouse ages Wives are assumed to be three years younger than husbands.

Valuation pay 2018 base salary pay (Grandfathered) – not estimated due to freeze of final average pay accruals at December 31, 2010.

2018 expanded pay (Cash Balance) – sum of the following updated one year according to the salary increase assumption:

- (i) 2018 base salary
- (ii) a 15% increase for overtime eligible employees and a target bonus percent increase for incentive-eligible employees

Timing of benefit payments Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods – Pension Cost and Funded Position

Service cost and projected benefit obligation

Projected unit credit

Benefits not valued

All benefits described in the Plan Provisions sections of this report were valued. Willis Towers Watson has reviewed the plan provisions with AEP and is not aware of any significant benefits required to be valued that were not.

Sources of Data and Other Information

Willis Towers Watson used participant and asset data as of January 1, 2018, supplied by Mercer, the third party administrator for AEP. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. To the extent that data was not provided, estimates were made based on prior year information.

The Company also provided the amounts recognized in accumulated other comprehensive income as of the end of the December 31, 2017 fiscal year and amounts recognized in other comprehensive income in the December 31, 2017 fiscal year.

Assumptions Rationale - Significant Economic Assumptions

Discount rate	As required by U.S. GAAP, the discount rate was chosen by the plan sponsor based on market information on the measurement date.
Cash balance interest crediting rate	The plan credits interest to cash balance accounts using the 30-year Treasury rate for the September of the preceding year with a minimum rate of 4.00%. The assumption is based on the plan sponsor's long-term expectations of yields on U.S. Treasuries. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.
Conversion rate for lump sums and annuities	The plan uses IRC 417(e)(3) as its basis to convert between lump sums and annuities. Because the 417(e)(3) interest rates are based on corporate bond yields, the assumption is based on the plan sponsor's long-term expectations of yields on high-quality corporate bonds. We believe that the selected assumption does not significantly conflict with what would be reasonable based on market conditions at the measurement date.
Rates of increase in compensation	Rates of increase in compensation were based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Assumptions Rationale - Significant Demographic Assumptions

Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Termination	Termination rates are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future. Assumed termination rates differ by service because of observed differences in termination rates between employees who have attained at least five years of service and those with less than five years of service.
Retirement	Retirement rates are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.
Form of payment	Rates at which retirees elect lump sums versus annuities are based on an experience study conducted in 2014, with annual consideration of whether any conditions have changed that would be expected to produce different results in the future.

Source of Prescribed Methods

Accounting methods	The methods used for accounting purposes as described in Appendix A, are “prescribed methods set by another party”, as defined in the actuarial standards of practice (ASOPs). As required by U.S. GAAP, these methods were selected by the plan sponsor.
--------------------	---

Changes in Assumptions and Methods

Change in assumptions since prior valuation	The discount rate decreased from 3.85% to 3.45%. The mortality used to convert 417(e) based forms of payment reflects the updated mortality tables provided in final regulations under IRC §430 issued in October 2017. The lump sum conversion rate was changed from 4.20% to 3.40%. The mortality improvement projection was updated to MP-2017, adjusted to reflect 75% of the long-term improvement rates.
Change in methods since prior valuation	None.

Appendix B: Summary of principal plan provisions

The Excess Benefit Plan provides a benefit determined in accordance with the provisions of the American Electric Power System's Retirement Plan (a qualified defined benefit plan), without recognition of the statutory maximums on benefits and pay, less the benefit payable from the qualified plan. MICP awards are also included in the definition of pay for the former East Plan grandfathered benefit for executives with base pay in excess of the IRS limit. Certain executives have contracts providing additional benefits. Certain former Central and South West company executives are eligible for a final average pay cash balance benefit (pension equity – type formula) if it produces a larger benefit. The schedule of contribution percentages for this formula is identical to the cash balance formula.

Prior to 2004, all executives had their cash balance pay limited to \$1,000,000. In addition, pay was limited for executives in an uncapped incentive plan to two times base pay for both the final average pay formula and the cash balance formula. Base pay rate is determined at the earlier of year-end or date of termination.

Effective January 1, 2004, pay for all executives is limited to the greater of two times base pay or \$1 million for the cash balance formula only. The executives in the uncapped incentive plan continue to have two times pay limit apply to the former East Plan final average pay formula.

Effective December 31, 2010, accruals under the east grandfathered final average pay formula were discontinued.

Effective December 31, 2013, accruals for participates in long-term disability were discontinued.

Future Plan Changes

Willis Towers Watson is not aware of any future plan changes that are required to be reflected.

Changes in Benefits Valued Since Prior Year

None.

This page is intentionally blank

Appendix C: Results by business unit

Summary of Key assumptions for Appendix C of 2018 AEP Excess Benefit Plan valuation report:

	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
Discount rate	3.45%	3.53%	3.58%	3.61%	3.64%	3.66%	3.68%	3.70%	3.72%	3.75%	3.75%
Cash balance crediting rate	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%	4.00%
Lump sum conversion rate	3.40%	3.48%	3.53%	3.56%	3.59%	3.61%	3.63%	3.65%	3.67%	3.70%	3.70%

Mortality table	RP-2014, factored to 2006, white collar adjustment.
Mortality projection scale	Generational MP-2017 projection adjusted to reflect 75% of the long-term improvement rates.
Lump sum mortality	PPA 2019 optional combined mortality with static projection to commencement using MP-2017.
Retirement rates	Age-graded rates based on AEP experience during 2009-2013, average retirement age of 64.
Termination rates	Age and service based rates based on AEP experience during 2009-2013.
Salary increases	Age-graded rates based on AEP experience during 2011-2013, with average annual increase of 4.85%.
Valuation and data	January 1, 2018.
Pension plan active population	Constant active population with new hires assumed to have same profile as prior year new hires.

Assets for projection	Initial assets for projection purposes are the unaudited assets as of December 31, 2018.
Mortality table	RP-2014, factored to 2006, collar adjustments as appropriate.
Mortality projection scale	Generational MP-2018 projection adjusted to reflect 75% of the long-term improvement rates.
Lump sum mortality	PPA 2019 optional combined mortality with static projection to commencement using MP-2018.
Retirement rates	Age-graded rates based on AEP experience during 2009-2013, average retirement age of 64.
Termination rates	Age and service based rates based on AEP experience during 2009-2013.
Salary increases	Age-graded rates based on AEP experience during 2011-2013, with average annual increase of 4.85%.
Valuation and data	January 1, 2018.
Trend rates	Initial trend rate of 6.25% in 2019, grading down to an ultimate rate of 5.00% over a five-year period.
Per capita claims costs	2019 Non-UMWA cost models based on actual claims experience incurred in calendar year 2017 and paid through March 31, 2018. 2019 UMWA cost models based on 48 months of paid claims through September 30, 2018.
Non-UMWA PRW Plan participation assumption	Initial participation of 85% until 2019 grading down to 75% in 2021
Non-UMWA PRW Plan persistency assumption	Non-capped retirees will drop coverage at a rate of 2% annually; Capped retirees will drop coverage at a rate of 4% annually.
Pension plan active population	Constant active population with new hires assumed to have same profile as prior year new hires.

¹ Funding policy for the qualified pension plan is the greater of the ASC 715 Service Cost or the minimum required contribution.

² Amounts for Nonqualified Pension Plan represent expected benefit payments.

³ Funding policy for Non-UMWA Postretirement Welfare Plan is to fund ASC 715 cost (not less than \$0). Amounts shown represents estimated company cash payments for key retirees not payable from trusts.

⁴ Funding policy UMWA Postretirement Welfare Plan is to fund Cook Coal ASC 715 cost (not less than \$0). Amount shown also includes expected benefit payments for all other locations.

⁵ Reflects provisions of the Bipartisan Budget Act of 2015.

⁶ Reflects the divestiture of the Cardinal Operating Company to Buckeye Power as of January 1, 2019.

⁷ Actual asset returns are adjusted per AEP's request based on movements to the fixed income portion of plan investments to account for anticipated changes in future discount rate.
