Purpose and actuarial statement

Purposes of valuation

American Electric Power retained Towers Watson Delaware Inc. ("Willis Towers Watson"), to perform an actuarial valuation of its postretirement welfare programs for the purpose of determining the following:

- (1) The value of benefit obligations as of January 1, 2017, and American Electric Power's postretirement welfare cost for fiscal year ending December 31, 2017, in accordance with FASB Accounting Standards Codification Topic 715 (ASC 715-60). It is anticipated that a separate report will be prepared for year-end financial reporting and disclosure purposes.
- (2) Plan reporting information in accordance with FASB Accounting Standards Codification Topic 965 (ASC 965).
- (3) Expected contributions under the plan sponsor's funding policy for the 2017 plan year.
- (4) The estimated maximum tax-deductible contribution for the tax year in which the 2017 plan year ends as allowed by the Internal Revenue Code. The maximum tax-deductible contribution should be finalized in consultation with American Electric Power's tax advisor.

Limitations

This valuation has been conducted for the purposes described above and may not be suitable for any other purpose. In particular, please note the following:

1. There may be certain events that have occurred since the valuation date that are not reflected in the current valuation.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices.

Reliances

In preparing the results presented in this report, we have relied upon information regarding plan provisions, participants, claims data, contributions and assets (if any) provided by American Electric Power and other persons or organizations designated by American Electric Power. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. Based on discussions with and concurrence by the plan sponsor, assumptions or estimates may have been made if data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

We have relied on all the information provided as complete and accurate. The results presented in this report are dependent upon the accuracy and completeness of the underlying data and information. Any material inaccuracy in the data and information provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by American Electric Power, may produce materially different results that could require that a revised report be issued.

Assumptions and methods under the Internal Revenue Code for contribution limit purposes

The actuarial assumptions and methods employed in the development of the contribution limits have been selected by the plan sponsor, with the concurrence of Willis Towers Watson. The Internal Revenue Code requires the use of reasonable assumptions (taking into account the experience of the plan and reasonable expectations) which, in combination, offer the actuary's best estimate of anticipated experience under the plan. We believe that the assumptions used in our valuation are reasonable and appropriate for the purposes for which they have been used.

Assumptions and methods under ASC 715-60

The actuarial assumptions and methods employed in the development of the postretirement welfare cost have been selected by the plan sponsor with the concurrence of Willis Towers Watson, except for the expected rate of return on plan assets selected for fiscal 2017. Evaluation of the expected rate of return assumption was outside the scope of Willis Towers Watson's assignment and would have required substantial additional work that we were not engaged to perform. ASC 715-60 requires that each significant assumption "individually represent the best estimate of a particular future event".

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A. Note that any subsequent changes in methods or assumptions for the October 31, 2016 measurement date will change the results shown in this report.

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for deferred taxes. Any deferred tax effects in AOCI should be determined in consultation with American Electric Power's tax advisors and auditors.

Effects of Health Care Legislation

In March 2010, the Patient Protection and Affordable Care Act (PPACA) and Health Care and Education Reconciliation Act (HCERA) were enacted. The key aspects of the Acts affecting American Electric Power's benefit obligation and cost of providing retiree medical benefits are:

- Preventive care benefits covered at 100% beginning in 2011
- Mandatory coverage for adult children until age 26 beginning in 2011
- Loss of the tax free status of the Retiree Drug Subsidy (RDS) beginning in 2013
- Excise ("Cadillac") tax on high-cost plans beginning in 2020
- Elimination of lifetime maximums beginning in 2011

All subsequent measurements for tax purposes reflect the current law.

This valuation reflects our understanding of the relevant provisions of PPACA and HCERA. The IRS and HHS have yet to issue final guidance with respect to many aspects of this law. It is possible that future guidance may conflict with our understanding of these laws based on currently available guidance and could therefore affect the results shown in this report.

Nature of actuarial calculations

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated or selected by Willis Towers Watson, we consider reasonable and within the "best-estimate range" as described by the Actuarial Standards of Practice. Other actuarial assumptions could also be considered to be reasonable and within the best-estimate range. Thus, reasonable results differing from those presented in this report could have been developed by selecting different points within the best-estimate ranges for various assumptions.

The results shown in this report are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with certainty. The effects of certain plan provisions may be approximated, or determined to be insignificant and therefore not valued. Assumptions may be made, in consultation with American Electric Power, about participant data or other factors. Reasonable efforts were made in preparing this valuation to confirm that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and are not excluded or included inappropriately. The numbers shown in this report are not rounded. This is for convenience only and should not imply precision; by their nature, actuarial calculations are not precise.

If overall future plan experience produces higher benefit payments or lower investment returns than assumed, the relative level of plan costs or contribution requirements reported in this valuation will likely increase in future valuations (and vice versa). Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions; increases or reductions expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this valuation to analyze the potential range of future postretirement welfare contributions, but we can do so upon request.

See Basis for Valuation in Section 1 below for a discussion of any material events that have occurred after the valuation date that are not reflected in this valuation.

Limitations on use

This report is provided subject to the terms set out herein and in our master consulting services agreement dated July 29, 2004, and any accompanying or referenced terms and conditions.

The information contained in this report was prepared for the internal use of American Electric Power and its auditors in connection with our actuarial valuation of the postretirement welfare plan as described in Purposes of Valuation above. It is not intended for and may not be used for other purposes, and we accept no responsibility or liability in this regard. American Electric Power may distribute this actuarial valuation report to the appropriate authorities who have the legal right to require American Electric Power to provide them this report, in which case American Electric Power will use best efforts to notify Willis Towers Watson in advance of this distribution, and will include the non-reliance notice included at the end of this report. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson's prior written consent. In the absence of such consent and an express assumption of responsibility, we accept no responsibility whatsoever for any consequences arising from any third party relying on this report or any advice relating to its contents. There are no intended third-party beneficiaries of this report or the work underlying it.

Professional Qualifications

The undersigned consulting actuaries are members of the Society of Actuaries and meet the "Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to postretirement welfare plans. Our objectivity is not impaired by any relationship between American Electric Power and our employer, Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC ("Willis Towers Watson").

Martin P. Franzinger, ASA, MAAA
Consulting Actuary, Pricing Specialist

Chad M. Greenwalt, FSA, EA
Consulting Actuary, Valuation Actuary

Joseph A. Perko, FSA, EA, MAAA
Senior Consultant, Valuation Actuary

The Pricing Specialist is responsible for developing and/or determining the reasonableness of retiree welfare plan trend and participation assumptions as well as assumed per capita claims costs (including the aging/morbidity assumption, if applicable). The Valuation Actuary is responsible for other aspects of the valuation (e.g., developing and/or reviewing the reasonableness of other valuation assumptions and methods, ensuring that the valuation model reasonably reflects the substantive plan and actual plan operation, preparing demographic data, performing the valuation, implementing the correct accounting or funding calculations, etc.).

Towers Watson Delaware Inc.

May 2017

Section 1: Summary of key results

Benefit cost, assets & obligations

All monetary amounts shown in US Dollars			
Fiscal Year Beginning		January 1, 2017	January 1, 2016
Benefit Cost/ (Income)	Net Periodic Postretirement Benefit Cost/(Income)	(65,457,797)	(76,551,152)
Measurement Date		January 1, 2017	January 1, 2016
Plan Assets	Fair Value of Assets (FVA)	1,524,265,466	1,551,820,304
Benefit Obligations	Accumulated Postretirement Benefit Obligation (APBO)	1,407,167,860	1,373,723,945
Funded Status	Funded Status	117,097,606	178,096,359

	Year of Ultimate Trend Rate	2024	2024
Participant Data	Census Date	January 1, 2017	January 1, 2016
Plan reporting (ASC 965) for Plan Year Beginning		January 1, 2017	January 1, 2016
	Present value of accumulated benefits	1,407,496,076	1,374,114,001
	Market value of assets	1,524,265,466	1,551,820,304
	Plan reporting discount rate	4.10%	4.30%
Employer Contributions (net of Medicare subsidy)		Plan Year 2017	Plan Year 2016
Cash Flow	Funding Policy contributions	0	0
	Maximum Tax Deductible contributions	151,019,924 (est)	135,777,968
	Actual contributions	N/A	0
	Expected benefit payments and expenses, net of participant contributions	100,168,816	97,338,870

Employer Contributions

Employer contributions are the amounts paid by American Electric Power to provide for postretirement benefits, net of participant contributions and Medicare Part D payments. Most participants receiving benefits are required to contribute toward the cost of the plan.

¹ Rates are expressed on an annual basis where applicable.

American Electric Power's funding policy is to contribute an amount equal to the postretirement welfare cost plus retiree drug subsidy payments received (the sum of which can be no less than zero). American Electric Power maximizes its contribution to the 401(h) account and contributes the remainder to the various VEBAs. American Electric Power may deviate from this policy, as permitted by its terms, based on cash, tax or other considerations.

Postretirement welfare cost and funded position

The cost of the postretirement welfare plan is determined in accordance with generally accepted accounting principles in the U.S. ("U.S. GAAP"). The fiscal 2017 postretirement welfare benefit cost/(income) for the plan is \$(65,457,797). Under U.S. GAAP, the funded position (fair value of plan assets less the projected benefit obligation, or "APBO") of each postretirement welfare plan at the plan sponsor's fiscal year-end (measurement date) is required to be reported as a liability. The APBO is the actuarial present value of benefits attributed to service rendered prior to the measurement date, taking into consideration expected future pay increases for pay-related plans. The plan's overfunded (underfunded) APBO as of January 1, 2017 was \$117,097,606 based on the fair value of plan assets of \$1,524,265,466 and the APBO of \$1,407,167,860.

Fiscal year-end financial reporting information and disclosures are prepared before detailed participant data and full valuation results are available. Therefore, the postretirement benefit asset (liability) at December 31, 2016 was derived from a roll forward of the January 1, 2016 valuation results, adjusted for the year-end discount rate and asset values, as well as significant changes in plan provisions and participant population. The next fiscal year financial reporting information will be developed based on the results of the January 1, 2017 valuation, projected to the end of the year and similarly adjusted for the year-end discount rate and asset values, as well as significant changes in plan provisions and participant population.

Change in postretirement welfare cost and funded position

The postretirement welfare cost/(income) increased from \$(76,551,152) in fiscal 2016 to \$(65,457,797) in fiscal 2017 and the funded position decreased from \$178,096,359 on January 1, 2016 to \$117,097,606 on January 1, 2017, as set forth below:

All monetary amounts shown in millions of US Dollars	
(\$ in millions)	Postretirement Welfare Cost
Prior year	(76.6)
Change due to:	
■ Expected based on prior valuation and contributions during prior year	(1.1)
■ Unexpected noninvestment experience	3.5
■ Unexpected investment experience	5.2
■ Assumption changes	3.5
Current year	(65.5)

Significant reasons for these changes include the following:

- Per capita claims costs were updated but did not greatly affect the postretirement welfare cost.

All monetary amounts shown in US Dollars

	2017	2016
Medical (Overall Average)		
Under age 65		
■ HSA Basic	9,056	8,637
■ HSA Plus	10,007	9,529
■ HRA	11,098	10,578
Age 65 and older (before Part D offsets)		
■ COB	4,811	4,633
■ MOB	3,346	3,387
■ CSP	2,118	1,999
Medicare Part D offsets		
■ MOB/COB (EGWP)	(831)	(830)
■ CSP (RDS)	(241)	(274)

See Appendix A for additional details on per capita claims costs assumptions including assumed claims costs adjusted for age-related morbidity adjustments.

- The discount rate decreased 20 basis points since the prior year which increased the postretirement welfare cost.
- Actual asset returns during 2016 were lower than the assumed rate of 7.00% which increased the postretirement welfare cost.
- The expected return on assets assumption was reduced 25 basis points to 6.75% which increased the postretirement welfare cost.
- Demographic losses due to factors such as: (younger and) higher number of new retirees than expected; fewer terminations than expected; higher persistency than expected; and new data allowing for better identification of retiree contributions increased postretirement welfare benefit cost.

Basis for valuation

Appendix A summarizes the assumptions and methods used in the valuation. Appendix B summarizes our understanding of the principal provisions of the plan being valued.

Changes in Assumptions

- Per capita claims costs were updated to reflect 2015 retiree claims experience.
- Discount rate was changed from 4.30% to 4.10%.
- The expected return on assets assumption was reduced 25 basis points to 6.75%

Changes in Methods

None.

Changes in Benefits Valued

None.

Section 2: Actuarial exhibits

6 Census date	January 1, 2017	January 1, 2016

¹ Whether the amounts in this table that differ from those disclosed at year-end must be disclosed in subsequent interim financial statements should be determined.

² Amount shown is pre-tax and should be adjusted by plan sponsor for tax effects.

2.2 Summary and comparison of postretirement benefit cost and cash flows

All monetary amounts shown in US Dollars

Fiscal Year Ending	December 31, 2017	December 31, 2016
A Total Postretirement Benefit Cost		
1 Employer service cost	10,568,485	9,318,249
2 Interest cost	56,094,357	57,400,055
3 Expected return on assets	(99,562,423)	(105,278,181)
4 Subtotal	(32,899,581)	(38,559,877)
5 Net prior service cost/(credit) amortization	(68,626,236)	(68,626,236)
6 Net loss/(gain) amortization	36,068,020	30,634,961
7 Transition obligation/(asset) amortization	0	0
8 Amortization subtotal	(32,558,216)	(37,991,275)
9 Net periodic postretirement benefit cost/(income)	(65,457,797)	(76,551,152)
B Assumptions¹		
1 Discount rate	4.10%	4.30%
2 Long-term rate of return on assets	6.75%	7.00%
3 Rate of compensation/salary increase	Rates vary by age from 3.5% to 12.0%	Rates vary by age from 3.5% to 12.0%
4 Current health care cost trend rate	6.75%	7.00%
5 Ultimate health care cost trend rate	5.00%	5.00%
6 Year ultimate trend rate is expected	2024	2024
C Census Date	January 1, 2017	January 1, 2016
D Assets at Beginning of Year		
1 Fair market value	1,524,265,466	1,551,820,304
E Cash Flow	Expected	Actual
1 Employer contributions	0	0
2 Plan participants' contributions	38,748,503	37,843,136
3 Benefits paid from plan assets	138,964,202	126,000,432
4 Expected Medicare retiree drug subsidy on current year benefit payments	(46,888)	(527,582)

¹ These assumptions were used to calculate the Net Postretirement Benefit Cost/ (Income) as of the beginning of the year. Rates are expressed on an annual basis where applicable. For assumptions used for interim measurement periods, if any, refer to Appendix A.

2.3 Detailed results for postretirement welfare cost and funded position

All monetary amounts shown in US Dollars

Detailed results		January 1, 2017	January 1, 2016
A Service Cost

3	Other active participants	0	0
4	Total	15,019,735	14,846,418
D Total (ignoring Retiree Drug Subsidy)			
1	Current retirees	1,101,757,509	1,094,753,700
2	Active participants fully eligible for benefits	76,798,416	56,925,040
3	Other active participants	228,940,151	222,435,261
4	Total	1,407,496,076	1,374,114,001

Actuarial assumptions and methods

The key actuarial assumptions used for plan reporting calculations are the same as those used to determine the postretirement welfare cost and are shown in the Actuarial Assumptions and Methods section, except that the Retiree Drug Subsidy (RDS) associated with Medicare Part D is not reflected. For the prior valuation, a discount rate of 4.30% was used. The same plan provisions shown in Appendix B were used to determine the present value of accumulated benefits.

Reconciliation of Present Value of Benefits		Fiscal 2017	Fiscal 2016
A Medical (ignoring Retiree Drug Subsidy)			
1	Benefit obligation, beginning of year	1,004,230,487	970,907,664
2	Service cost	6,850,199	7,784,451
3	Interest cost	41,924,235	37,683,366
4	Participant contributions	31,239,526	28,014,393
5	Actuarial (gain)/loss	43,109,506	61,795,934
6	Plan amendments	0	0
7	Gross benefits paid	(104,204,427)	(101,955,321)

Appendix A: Statement of actuarial assumptions and methods

Actuarial Assumptions and Methods — Postretirement Welfare Cost and Funding/Tax Deductions Based on Plan Year beginning January 1, 2017

Economic Assumptions

	Postretirement Welfare Cost	Plan Reporting	Employer Contributions
Discount rate ¹	4.10%	4.10%	N/A
Rates of return on assets, pre-tax: ¹			
401(h) accounts	N/A	N/A	7.78%
Life insurance and union medical/dental	N/A	N/A	6.85%
Non-union medical/dental	N/A	N/A	6.89%
Aggregate	7.00%	N/A	N/A
Annual rates of compensation increase ¹			
Representative rates	Age	Rate	
	< 26	12.00%	
	26 – 30	8.50	
	31 – 35	7.00	
	36 – 40	6.00	
	41 – 45	5.00	
	46 – 50	4.00	
	> 50	3.50	
Weighted average		4.80%	
Medical cost trend rate ²	2017	6.75%	
	2018	6.50%	
	2019	6.25%	
	2020	6.00%	
	2021	5.75%	
	2022	5.50%	
	2023	5.25%	
	2024+	5.00%	
Dental cost trend rate ²	2017+	3.00%	

¹ Only discount rate and asset return assumptions vary between the reporting standards. All other assumptions are consistent throughout.

² 0% trend assumed for non-union VEBA account limit.

Medicare covered charges trend rate	Same as medical cost trend
Retiree contribution trend rate	Same as medical cost trend. For capped retirees, future retiree contributions are developed based on expected gross costs compared to the applicable cap.

Participation Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee is hired.	
New or rehired employees	It was assumed there will be no new or rehired employees.	
	<i>Current Retirees</i>	<i>Future Retirees</i>
Participation	Based on valuation census data.	85% in 2017 with the rate decreasing by 5% annually to an ultimate rate of 75% in 2019.
Persistency	Non-capped retirees will drop coverage at a rate of 2% annually and Capped retirees will drop coverage at a rate of 4% annually.	Same as current retirees
Percent married	Based on valuation census data.	69% for males, 50% for females.
Spouse age	Based on valuation census data.	Wife three years younger than husband.

Demographic Assumptions

Mortality	Based on modified versions of RP-2014 with long-term improvement rates of 0.75%.
-----------	--

Base mortality rates are derived from the RP-2014 mortality table with improvements factored to 2006 with no collar adjustments.

Mortality improvements are projected forward on a generational basis. Improvement rates grade linearly from the MP-2014 rate in 2007 to the ultimate rate in 2015:

Age	Ultimate Improvement rate per year	Age	Ultimate improvement rate per year
85 and younger	0.750%	91	0.300%
86	0.675%	92	0.225%
87	0.600%	93	0.150%
88	0.525%	94	0.075%
89	0.450%	95 and older	0.000%
90	0.375%		

Disabled mortality
(through age 65)

Rates vary by age and sex.

Representative rates:

Age	Males	Females
30	2.60%	2.60%
40	2.60	2.60
50	3.10	3.10
60	6.20	6.20

Disability

Rates apply to employees not eligible to retire and vary by age and sex.

Representative rates:

Percentage becoming disabled during the year		
Age	Males	Females
20	0.060%	0.090%
30	0.060	0.090
40	0.074	0.110
50	0.178	0.270
60	0.690	1.035

Termination
(not due to disability
or retirement)

Rates apply to employees not eligible to retire and vary by age and service.

Representative rates:

Percentage leaving during the year		
Attained Age	Less than five years of service	Five or more years of service
< 25	8.00%	7.30%
25 – 29	8.00%	5.00%
30 – 34	8.00%	4.20%
35 – 39	8.00%	3.40%
40 – 44	8.00%	2.50%
45 – 49	8.00%	1.90%
50 +	8.00%	1.70%

Retirement

Rates vary by age.

Representative rates:

Percentage retiring during the year	
Age	Rate
55 – 57	1.00%
58 – 60	6.00%
61 – 63	16.00%
64 – 69	13.00%
70 +	100.00%
Age	Rate

Additional Assumptions

Excise tax	To determine impact of the excise tax on the non-UMWA postretirement plan, we projected future gross plan costs using the valuation trend assumption and compared these on a year-by-year basis to the excise tax thresholds beginning in 2018 and projected to future years using CPI (CPI + 1% for 2019). The expected cost of each non-UMWA benefit combination, which were blended pre-65/post-65 based on headcounts, exceeded these thresholds at various points in time, but no earlier than 2040.
Timing of benefit payments	Benefit payments are assumed to be made uniformly throughout the year and on average at mid-year.

Methods

Census date	January 1, 2017
Measurement date	January 1, 2017
Service cost and APBO	Costs are determined using the Projected Unit Credit Cost Method. The annual service cost is equal to the present value of the portion of the projected benefit attributable to service during the upcoming year, and the Accumulated Postretirement Benefit Obligation (APBO) is equal to the present value of the portion of the projected benefit attributable to service before the valuation date. Service from hire date through the expected full eligibility date is counted in allocating costs.

Market-related value of assets	The fair value of assets on the measurement date.
Amortization of unamortized amounts:	
Prior service cost (credit)	Increase in APBO resulting from a plan amendment is amortized on a straight-line basis over the average expected remaining service of active participants expected to benefit under the plan. Amortization of net prior service cost/(credit) resulting from a plan change is included as a component of Net Periodic Postretirement Benefit Cost/(Income) in the year first recognized and every year thereafter until such time as it is fully amortized. The annual amortization payment is determined in the first year as the increase in APBO due to the plan change divided by the average remaining service period to full eligibility for participating employees expected to receive benefits under the Plan. Reductions in APBO first reduce any unrecognized prior service cost; any remaining amount is amortized on a straight-line basis as described above.
Net loss (gain)	Amortization of the net gain or loss resulting from experience different from that assumed and from changes in assumptions (excluding asset gains and losses not yet reflected in market-related value) is included as a component of Net Periodic Postretirement Benefit Cost/(Income) for a year. Net loss (gain) in excess of 10% of the greater of APBO or the market-related value of assets is amortized on a straight-line basis over the average expected remaining service of active participants expected to benefit under the plan.
ASC 965 (formerly SOP 92-6)	
Present value of benefits	Present value of benefits is equal to the present value of the portion of the projected benefit attributable to service before the valuation date. Service from hire date through the expected full eligibility date is counted in allocating costs.
Funding policy	AEP's funding policy is to contribute an amount equal to the postretirement welfare cost plus retiree drug subsidy payments received (the sum of which can be no less than zero). AEP maximizes its contribution to the 401(h) account and contributes the remainder to the VEBAs.
Benefits Not Valued	All benefits described in the Plan Provisions section of this report were valued. Life insurance benefits in excess of \$50,000 and health care benefits for key employees were not included in determining the maximum deductible contribution. Willis Towers Watson has reviewed the plan provisions with AEP and based on that review is not aware of any significant benefits required to be valued that were not included.
Change in Assumptions and Methods Since Prior Valuation	■ The discount rate for APBO was changed from 4.30% to 4.10%. ■ Per capita claims costs were updated to reflect 2015 claims experience. ■ The expected return on assets assumption was reduced 25 basis points to 6.75%

Data Sources

American Electric Power (AEP), through Mercer, its third party administrator, furnished active and inactive participant data as of January 1, 2017. AEP also provided the accrued postretirement benefit costs as of December 31, 2016. Health plan vendors furnished the claims cost data. AEP supplied 2016 EGWP payments and prescription rebates. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data was adjusted to reflect any significant events that occurred between the date the data was collected and the measurement date. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions – Funding and Accounting

Interest rate (funding)	The interest rate is the expected rate of return on plan assets, and represents an estimate of future experience for trust asset returns, reflecting the plan's current asset allocation, and current and expected future market conditions.
Rates of increase in:	
Plan administrative expenses	Administrative expenses are included in per capita claims costs and thus the medical plan trend rate is applied to these expenses.
Claims cost trend rates	Assumed increases were chosen by the plan sponsor and, as required by U.S. GAAP, they represent an estimate of future experience, informed by an analysis of recent plan experience, leading to select and ultimate assumed trend rates and reflecting the expected near-term effect of recently enacted plan changes. In setting near term trend rates, other pertinent statistics were considered, including surveys on general medical cost increases. In setting the ultimate trend rate, considerations included assumed GDP growth consistent with the assumed future economic conditions inherent in other economic assumptions chosen by the client at the measurement date. After examining historical variability in trend rates, we believe that the selected assumptions do not significantly conflict with what would be reasonable based on a combination of market conditions at the measurement date and future expectations consistent with other economic assumptions used, other than the discount rate. For the VEBA funding vehicle of the non-bargained group, no future increases in medical costs (and thus in the plan's per capita claims costs) have been assumed, in accordance with U.S. tax law.
Participant contribution trend rates	In accordance with the substantive plan communicated to participants, participant contributions for non-capped participants are intended to remain a fixed percentage of total plan costs, and thus the trend rates, and the description of the derivation of the trend rates, are the same as for claims costs as shown above.

Basis for Per Capita Claims Cost Assumptions

Pre-65 retiree medical rates

Aetna, Anthem, ESI and Magellan supplied data on retiree medical claims incurred in 2015 and paid through March 2016. AEP reported prescription rebates they received for 2015. Claim experience rates were calculated for medical plans by normalizing claims experience for benefit differences and combining, then dividing combined incurred claims, net of prescription rebates by covered lives and trending forward two years to 2017.

Adjustments for plan design and network changes were also made. Finally, administrative expense rates were added to claims cost rates. Claims cost models were developed by age-grading these claims rates over standard Willis Towers Watson morbidity curves for both medical and prescription drugs to develop the quinquennial claims cost models.

Post-65 retiree medical rates

2016 monthly medical claim rates were calculated separately for MOB, COB and CSP Medicare-eligible plans by dividing 2015 incurred claims paid through March 2016 by covered lives and trending forward two years to 2017. Prescription drug claim rates were then multiplied by pricing change factors representing the effect of any pricing and other program changes for 2016 and 2017. Finally, administrative expense rates were added to claims cost rates. Claims cost models were developed separately for medical and prescription drug by age-grading these rates over standard Willis Towers Watson morbidity curves for medical and prescription drugs to develop the quinquennial claims cost models.

Dental rates

Aetna supplied data on dental claims incurred in 2015 and paid through March 2016. Combined claims experience for all active and retired employees was analyzed to derive the dental claim rates.

Medicare Part D offsets

■ RDS

We calibrated our modelling tool to reflect the 2017 cost of the current prescription drug plans for AEP's CSP retirees. The tool employs a continuance table of annual retiree drug utilization levels, developed from analyzing the experience of several large companies, including 3.1 million Medicare-eligible members.

After the plan-specific benefit provisions have been calibrated to current costs, the Modeler trends costs forward to 2017. Actuarial equivalence was determined using the following two-prong approach outlined in the regulations for Medicare Part D:

Gross Value Test – The Modeler calculates the value of standard Medicare Part D coverage and compares it to AEP's plan costs. AEP's plans passed this test by being richer than the projected value of standard Medicare part D coverage for these groups.

Net Value Test – The net value prong of the test compares the value of Standard Part D coverage in 2017 minus the greater of \$427.56 per year (the national average Part D premium) and 25.5% of the gross value of Part D to the projected 2017 value of AEP coverage minus the average projected 2017 retiree contribution rate. For this purpose, retiree contributions were assumed to apply pro rata between the value of medical benefits and prescription drug benefits.

When the plans are deemed to be actuarially equivalent, the tool calculates the average expected value of the employer subsidy in 2017, using the continuance table calibrated to AEP's CSP plan costs. This produced a

2017 per person employer subsidy of \$241 for CSP, which was then converted to rates that varied by participant age band using Willis Towers Watson's prescription drug morbidity curve.

- **EGWP** Estimated plan cost offsets associated with the EGWP arrangement were developed using actual 2016 payment AEP received for direct payments, coverage gap discounts and reinsurance payments. An estimate of the change in direct monthly government payments under the EGWP from 2016 to 2017 was provided by Express Scripts based on average Part D plan payments risk-adjusted for AEP's post-65 retiree population. Express Scripts also provided an estimate of catastrophic reinsurance payments for 2015 and actual coverage gap discounts earned for 2015.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Disabled Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Termination	Termination rates are based on a recent demographic study and plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by termination patterns different than assumed.
Disability	Disability rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by disability patterns different than assumed.
Retirement	Retirement rates are based on a recent demographic study and plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.
Participation	
■ Participants/Spouses	The assumed coverage rates for participants and spouses reflect historical experience as well as anticipated future reductions in rates due to expected rates of increase in participant contributions and availability of coverage through public exchanges.
■ Covered dependents	The assumed dependent coverage is based on the dependent coverage observed among recent retirees and general population statistics on the marital status of individuals of retirement age.
■ Covered Spouse age	The assumed age difference for spouses is based on the age difference observed among recent retirees and general population statistics of the age difference for married individuals of retirement age.

Source of Prescribed Methods

Funding methods	The methods used for determining maximum deductible contributions to the 401(h) account and VEBA are chosen from acceptable methods prescribed by law.

Appendix B: Summary of substantive plan provisions

Health Care Benefits

Eligibility	Participants are eligible upon retirement after age 55 with ten years of service or upon attaining age 55 with ten years of service after becoming permanently disabled. If involuntary termination, then eligible after age 50 with ten years of service. Employees hired on or after January 1, 2014 are not eligible to participate in the plan.
Surviving spouse	After the death of a retiree or active employee eligible to retire, surviving spouses are eligible until death or remarriage. Surviving children are also eligible, subject to the limiting age provision outlined above.
Dependent	Eligible dependents are spouse, unmarried children under age 19 (age 25 if a full-time student) and unmarried disabled children of any age.
Benefits – Post-65	The AEP Post-65 Medical Plan provides broad medical coverage with a deductible of \$200, 80% coinsurance and a maximum annual out-of-pocket expense of \$2,000 per person.

Prescription drug benefits are provided under a separate design with the following copayments for those who do not enroll in a consumer driven health plan:

	<i>Generic</i>	<i>Brand Name Formulary</i>	<i>Brand Name Nonformulary</i>
30-day retail	\$10 copay	20% \$20 minimum \$100 maximum	35% \$35 minimum \$200 maximum
90-day retail	\$20 copay	20% \$50 minimum \$200 maximum	35% \$90 minimum \$300 maximum

Prescription drug benefits are also subject to a \$50 deductible and a \$1,000 out-of-pocket maximum per person.

Benefits after age 65 are coordinated with Medicare using the carve-out method (MOB benefits). Participants have the option to "buy up" to exclusion coordination of benefits coverage (COB benefits). Exclusion coordination is automatically provided to East retirees who attained age 65 prior to January 1, 2001.

Deductibles and out-of-pocket maximums are assumed to increase over time at approximately the same rate as benefit costs.

Benefits – Pre-65

Pre-65 retirees can elect coverage under the following plan options:

	HRA	HSA Plus	HSA Basic
Embedded Individual Amounts	None	Out-of-Pocket Maximum only	Deductible & Out-of-Pocket Maximum
Deductible			
■ Individual	\$1,500	\$2,000	\$2,700
■ Two Person	\$2,250	\$3,000	\$5,400
■ Family	\$3,000	\$4,000	\$8,100
AEP Account Seed			
■ Single	\$1,000	\$500	\$0
■ Two Person	\$1,500	\$750	\$0
■ Family	\$2,000	\$1,000	\$0
Coinsurance	85%	85%	90%
Out-of-Pocket Maximum			
■ Individual	\$4,000	\$4,000	\$4,000
■ Two Person	\$6,000	\$6,000	\$8,000
■ Family	\$8,000	\$8,000	\$12,000

Deductibles and out-of-pocket maximums are assumed to increase over time at approximately the same rate as benefit costs.

Postretirement contributions Participant contributions are determined as a percentage of plan costs and vary by points (age at retirement plus service) as follows:

<i>Points</i>	<i>Retiree Cost</i>
65-69	46%
70-74	42
75-79	36
80-84	32
85-89	26
90-94	22
95+	20
Grandfathered	20

For participants retiring on or after January 1, 2013, AEP's subsidy is capped at \$11,500 and \$3,800 times employer cost sharing percentage for pre-65 and post-65 participants, respectively.

For East participants who retired prior to January 1, 1989, and West participants who retired prior to January 1, 1993, no contributions are required.

For East participants who retired on or after January 1, 1989, and West participants who retired on or after January 1, 1993, the 20% "Grandfathered" contributions are in effect if they retired by December 31, 2000, or attained age 50 and had ten or more years of service with the company on that date. The percentages described above are applied to plan costs that differ from the per capita claims costs assumed in the valuation as follows:

The Medicare status of dependents is not used to determine whether "pre-65" or "post-65" rates apply. The pre-65 plan rates used to calculate participant contributions are a blend of pre-65 retiree costs and active employee costs for those participants retired prior to January 1, 2013, only.

For purposes of determining retiree contribution rates, AEP excludes the value of the government's monthly direct payment amount and its catastrophic reinsurance payments from offsetting the plan cost to which the contribution percentages are applied.

Disabled employee contributions

Disabled employees have a provision where active employee contribution rates are charged while an employee remains disabled and is receiving LTD benefits.

If an employee retires while disabled and became disabled before January 1, 2001, the waiver of premium provision continues for life as long as the retirement commenced on or before September 1, 2013. If an employee retires while disabled and became disabled after January 1, 2001, the employee will continue to accrue points as if actively-at-work until age 65 and be subject to the same contribution schedule as normal retirees.

Those participants retiring after January 1, 2013, pay a percentage of true pre-65 retiree costs.

Life Insurance Benefits

Grandfathered participants Participants over age 50 with ten years of service as of December 31, 2000.

Grandfathered benefits Grandfathered participants have the option of keeping current coverage. Active employee coverage for grandfathered East participants is one times final base pay at no cost with the option to buy up to two times base pay. The entire amount of coverage (basic plus supplemental) in force prior to retirement can be carried into retirement subject to reduction beginning at age 66. Current coverage for grandfathered West participants is one and one-half times final base pay prior to age 60, one times final base pay from age 60 to 64 and one-half times final base pay after age 65.

*Life Insurance Benefit Reduction Table
for Grandfathered East Participants*

<i>Years of Coverage</i>	<i>Age 66</i>	<i>Age 67</i>	<i>Age 68</i>	<i>Age 69</i>	<i>Age 70 or Over</i>
10 – 11	65%	55%	45%	35%	25%
11 – 12	70	60	50	40	30
12 – 13	75	65	55	45	35
13 – 14	80	70	60	50	40
14 – 15	85	75	65	55	45
15 or more	90	80	70	60	50

Grandfathered contributions Grandfathered East retirees must contribute \$0.60/\$1,000 of coverage (basic + supplemental) per month. West retirees are not required to contribute to the cost of coverage.

Nongrandfathered benefits \$30,000 for those hired before January 1, 2011. No benefit for those hired on or after January 1, 2011.

Dental Benefits

Eligibility	Participants, including retirees and surviving dependents, are eligible upon retirement after age 55 with ten years of service. There is a one-time election and if coverage terminates there is no opportunity to reenroll. Employees hired on or after January 1, 2014 are not eligible to participate in the plan.
Benefits	The AEP Dental Plan provides dental coverage with a deductible of \$50 single/\$150 family, 100% coinsurance for preventive care, 80% coinsurance for basic restorative care, 50% coinsurance for major restorative care and 50% coinsurance for orthodontia. Most retirees pay the full cost of dental coverage if they enroll. CSW employees who retire before January 1, 1993, contribute nothing to enroll for dental coverage. Former CSW employees retiring after January 1, 1993, who were either retired or had attained age 50 with ten years of service as of January 1, 2001, pay 40%.

Changes in Benefits Valued Since Prior Year

Benefits have been extended to Dolet Hills effective January 1, 2017.

Overview of Benefits Provided by Funding Vehicles

Funding vehicle	Provides for
Non-union postretirement medical/dental VEBAs	100% of medical benefits to non-union employees before 2018 and 26.5% of retiree medical benefits incurred thereafter. 100% of dental benefits to non-union employees.
Union postretirement medical/dental VEBAs	100% of medical/dental benefits to union employees.
Postretirement life insurance VEBA	Life insurance benefits for all retirees.
401(h) account	73.5% of retiree medical benefits incurred after 2017 for non-union retirees.

Appendix C: Results by business unit

Summary of key assumptions for Appendix C of 2017 NUMWA Postretirement Health Care Plan valuation report:

	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027
Discount Rate	4.10%	4.49%	4.65%	4.68%	4.61%	4.93%	5.24%	5.56%	6.87%	6.19%	6.41%

Initial Medical Trend	6.75%	6.50%	6.25%	6.00%	5.75%	5.50%	5.25%	5.00%	5.00%	5.00%	5.00%

Mortality table RP-2014, factored to 2006, no collar adjustment, headcount weighted

Mortality projection scale Rates grade linearly by year from MP-2014 in 2007 to 0.75% in 2015. Rates grade linearly by age to zero at age 95 from age 85.

Valuation and data January 1, 2017

Per capita claims cost 2017 cost models based on actual claims experience incurred through December 31, 2015

Non-UMWA PRW Plan participation assumption: 85% of future retirees will elect coverage in 2017, with rate decreasing by 5% annually to ultimate rate of 75% in 2019+.

Non-UMWA PRW Plan persistency assumption: Non-capped retirees will drop coverage at a rate of 2% annually; capped retirees will drop coverage at a rate of 4% annually.

Purposes of valuation

American Electric Power (AEP) retained Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC (“Willis Towers Watson”) to perform an actuarial valuation of its postemployment benefit plans, including income replacement, life insurance and health benefit continuation plans for employees receiving long-term disability (LTD) benefits and health benefit continuation plans for COBRA beneficiaries (the Plan).

As requested by the Company, this report provides information for year-end financial reporting purposes required by FASB Accounting Standards Codification Topic 712 (ASC 712-10) for your fiscal year ending December 31, 2016.

The exhibits present year-end financial reporting information in accordance with ASC 712-10 including net balance sheet position of the Plan, cash flow, plan asset information, participant information, the plan provisions on which the valuation is based, and the actuarial assumptions and methods used in the calculations.

Limitations

This valuation has been conducted for the purposes described above and may not be suitable for any other purpose. In particular, please note the following:

1. There may be certain events that have occurred since the valuation date that are not reflected in the current valuation.
2. This report does not provide information for plan reporting under ASC 965.
3. This report does not determine obligations on a plan termination basis, for which a separate extensive analysis would be required. No funded status measure included in this report is intended to assess, and none may be appropriate for assessing, the sufficiency of plan assets to cover the estimated cost of settling benefit obligations, as all such measures differ in some way from plan termination obligations.
4. The comparisons of accounting obligations to assets presented in this report cannot be relied upon to determine the need for nor the amount of required future plan contributions. Nevertheless, such comparisons may be useful to assess the need for future contributions because they reflect current interest rates at the measurement date in determining benefit obligations. However, asset gains and losses, demographic experience different from assumed, changes in interest rates, future benefit accruals, if any, and other factors will all affect the need for and amount of future contributions. In addition, if a plan is not required by law to be funded, benefit payments may also be paid directly by the plan sponsor as they come due.

Section 1 : Summary of key results

Benefit obligations & assets

All monetary amounts shown in US Dollars			
Measurement Date		December 31, 2016	December 31, 2015
Plan Assets	Fair Value of Assets (FVA)	387,434	3,057,650
Benefit Obligations	Postemployment Benefit Obligation	(80,103,618)	(82,805,732)
Funded Position	FVA minus Obligation	(79,716,184)	(79,748,082)
Funded Ratios	FVA to Obligation	0.5%	3.7%
Assumptions	Discount rate	2.15%	2.10%
	Current health care cost trend rate	6.75%	7.00%
	Ultimate health care cost trend rate	5.00%	5.00%
	Years to ultimate trend rate	7	8
Participant Data	Census Date	12/31/2016	12/31/2015

Comments on results

The funded position was essentially unchanged, decreasing from \$(79,748,082) to \$(79,716,184).

Effects of Health Care Legislation

In March 2010, the Patient Protection and Affordable Care Act (PPACA) and Health Care and Education Reconciliation Act (HCERA) were enacted. The Company does not expect these acts to have any material effect on the plan obligations.

This valuation reflects our understanding of the relevant provisions of PPACA and HCERA. The IRS has yet to issue final guidance with respect to many aspects of these laws. It is possible that future guidance may conflict with our understanding of these laws based on currently available guidance and could therefore affect the results shown in this report. The valuation does not anticipate the effects of any possible future changes to PPACA or HCERA.

Basis for valuation

Appendix A summarizes the assumptions and methods used in the valuation. Appendix B summarizes our understanding of the principal provisions of the plans being valued. Unless otherwise described below under Subsequent Events, assumptions were selected based on information known as of the measurement date.

Changes in assumptions

- Plan cost rates, employee contribution rates, and COBRA rates for 2017 have been used as a basis for this valuation.
- The discount rate has been updated to reflect Treasury Constant Maturities of as December 31, 2016, which increased the rate from 2.10% as of December 31, 2015, to 2.15% as of December 31, 2016.

Changes in methods or estimation techniques

None.

Changes in benefits valued

None.

Subsequent events

None.

Additional information

None.

Actuarial certification

This valuation has been conducted in accordance with generally accepted actuarial principles and practices.

Reliances

In preparing the results presented in this report, we have relied upon information provided to us regarding plan provisions, participants, monthly plan cost and contribution rates and plan assets (if any) provided by the Company and other persons or organizations designated by the Company. We have relied on all the data and information provided as complete and accurate. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. Based on discussions with and concurrence by the plan sponsor, assumptions or estimates may have been made if data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations. The accuracy of the results presented in this report is dependent upon the accuracy and completeness of the underlying information. Any material inaccuracy in the data, assets, plan provisions or other information provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by the Company, may produce materially different results that could require that a revised report be issued.

Measurement of benefit obligations, plan assets and balance sheet adjustments

Census date/measurement date

The measurement date is December 31, 2016. The benefit obligations were measured as of the Company's December 31, 2016 fiscal year end and are based on participant data as of the census date, which is displayed in Section 3.

Plan assets and balance sheet adjustments

Information about the fair value of plan assets was furnished to us by the Company. Willis Towers Watson used information supplied by the Company regarding postemployment benefit asset and postemployment benefit liability as of December 31, 2016. These data were reviewed for reasonableness and consistency, but no audit was performed.

Assumptions and methods under U.S. GAAP

As required by U.S. GAAP, the actuarial assumptions and methods employed in the development of the postemployment benefit liability have been selected by the Company. Willis Towers Watson has concurred with these assumptions and methods. U.S. GAAP requires that each significant assumption "individually represent the best estimate of a particular future event."

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A. Note that any subsequent changes in methods or assumptions for the December 31, 2016 measurement date will change the results shown in this report.

Nature of actuarial calculations

The results shown in this report are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with certainty. The effects of certain plan provisions may be approximated, or determined to be insignificant and therefore not valued. Assumptions may have been made, in consultation with AEP, about participant data or other factors. Reasonable efforts were made in preparing this valuation to confirm that items that are significant in the context of the actuarial liabilities are treated appropriately, and are not excluded or included inappropriately. Any rounding (or lack thereof) used for displaying numbers in this report is not intended to imply a degree of precision, which is not a characteristic of actuarial calculations.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions, changes in economic or demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for the measurements, and changes in plan provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of such future measurements. Postemployment group benefits models necessarily rely on the use of approximations and estimates, and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements.

Limitations on use

This report is provided subject to the terms set out herein and in our engagement letter dated July 29, 2004 and any accompanying or referenced terms and conditions.

The information contained in this report was prepared for the internal use of AEP and its auditors in connection with our actuarial valuation of the postemployment benefit plan. It is not intended for and may not be used for other purposes, and we accept no responsibility or liability in this regard. AEP may distribute this actuarial valuation report to the appropriate authorities who have the legal right to require AEP to provide them this report, in which case AEP will use best efforts to notify Willis Towers Watson in advance of this distribution. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson's prior written consent. Willis Towers Watson accepts no responsibility for any consequences arising from any other party relying on this report or any advice relating to its contents.

Professional qualifications

The undersigned consulting actuary is a member of the Society of Actuaries and meets their “Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States” relating to postemployment benefit plans. Our objectivity is not impaired by any relationship between the plan sponsor and our employer, Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC (“Willis Towers Watson”).

Section 2: Postemployment benefits obligation

This report summarizes the financial results for AEP's postemployment benefit plan, including the effect of the Medicare Part D subsidy, based upon an actuarial valuation of the income, life insurance and health care continuation benefits during long-term disability as of December 31, 2016. The accounting for the benefits not attributable to employee service income, life insurance and contributory health care continuation is subject to ASC 450-20 (formerly FAS 5) for benefits that do not accumulate.

Benefits That Do Not Vest or Accumulate (ASC 450: Formerly FAS 5)

December 31, 2016

December 31, 2015

Benefit Obligation and Funded Status

Health care and life insurance continuation benefits during LTD

■ Medical benefits	\$	37,462,641	\$	38,585,513
■ Basic life insurance		5,928,316		6,160,352
■ Supplemental life insurance		4,952,023		5,411,625
■ Dental benefits		<u>735,710</u>		<u>716,123</u>
Total benefit obligation	\$	49,078,690	\$	50,873,613
Plan assets		<u>0</u>		<u>0</u>
Unfunded liability	\$	49,078,690	\$	50,873,613

Income replacement (LTD) plan

Benefit obligation	\$	30,576,188	\$	31,658,127
Plan assets		<u>(387,434)</u>		<u>(3,057,650)</u>
Unfunded liability	\$	30,188,754	\$	28,600,477

COBRA

Benefit obligation	\$	448,740	\$	273,992
Plan assets		<u>0</u>		<u>0</u>
Unfunded liability	\$	448,740	\$	273,992

Total

Benefit obligation	\$	80,103,618	\$	82,805,732
Plan assets		<u>387,434</u>		<u>3,057,650</u>
Unfunded liability	\$	79,716,184	\$	79,748,082

Change in Unfunded Liabilities from Prior Year

In total, our calculations of FASB ASC 712 unfunded liability as of December 31, 2016, for the postemployment benefits that Willis Towers Watson values is \$79.7 million which was essentially unchanged from the total liability as of December 31, 2015.

Summary of Unfunded Liability Increase/(Decrease)

Non-UMWA	
■ Health Care and Life Insurance Continuation for LTD Claimants	\$ (1.8) million
■ LTD Income Replacement	1.6 million
■ COBRA	0.2 million
Total	\$ 0.0 million

The discount rate has increased from 2.10% to 2.15% and is determined based on a duration matching approach using a risk-free bond universe. The duration of AEP's postemployment benefit plan, excluding COBRA and severance benefits, is 4.05 years as of December 31, 2016. The changes in liabilities are analyzed below for each benefit.

Health Care and Life Insurance Continuation for LTD Claimants — Non-UMWA

During 2016, the liability estimate for these benefits decreased from \$50.9 million to \$49.1 million. This \$1.8 million decrease results from the following factors:

	Medical	Life Insurance	Dental	Total
December 31, 2015, Liability	38,585,513	11,571,977	716,123	50,873,613
Increase/(Decrease) due to:				
Normal operation of the plan	2,425,028	508,909	21,700	2,955,637
Claims experience	58,061	0	34,495	92,556
Demographic experience	(3,531,172)	(1,178,069)	(34,923)	(4,744,164)
Economic assumption changes	(74,789)	(22,478)	(1,685)	(98,952)
December 31, 2016, Liability	37,462,641	10,880,339	735,710	49,078,690

LTD Income Replacement

During 2016, the liability estimate (under ASC 712) decreased from \$31.7 million to \$30.6 million. This \$1.1 million decrease results from the following factors:

December 31, 2015, Liability	31,658,127
Increase/(Decrease) due to:	
Normal operation of the plan	4,094,311
Demographic experience	(5,114,062)
Economic assumption changes	(62,188)
December 31, 2016, Liability	30,576,188

This \$1.1 million liability decrease is offset by a \$2.7 million decrease in plan assets, leading to a \$1.6 million decrease in the plan's unfunded liability under ASC 712.

There is also a significant unfunded liability of \$34.1 million as of December 31, 2016, measured under Internal Revenue Code Section 419A. Therefore, all contributions AEP made to the LTD VEBA in 2016 are tax deductible in 2016 and none of the trust's 2016 investment income needs to be reported as Unrelated Business Income Tax (UBTI). The components of this calculation are:

Funded Status of LTD VEBA as of December 31, 2016

	<i>AEP East Disabled Before 1996</i>	<i>Post-3/31/1998 East and Post-12/31/2000 West Disabilities</i>			<i>AEP West Disabled Before 2001</i>	<i>Total</i>
		<i>Approved</i>	<i>IBNA¹</i>	<i>Subtotal</i>		
(1) Plan Assets						387,000
(2) Plan Liabilities						
(a) Claims Cost Liability	44,000	29,595,000	3,674,000	33,269,000	875,000	34,188,000
(b) DEFRA Limitations ²	0	0	2,826,000	2,826,000	0	2,826,000
(c) DEFRA-Limited Claims (a) - (b)	44,000	29,595,000	848,000	30,443,000	875,000	31,362,000
(d) Administrative Costs						3,111,000
(e) QAAL--Total Plan Liability (c) + (d)						34,473,000
(3) Surplus/(Unfunded Liability)						
(a) Based on Unlimited Liability (1) - (2a) - (2d)						(36,912,000)
(b) Based on QAAL (1) - (2e)						(34,086,000)
(4) Number of Approved Claimants	3	328		328	12	343

¹ Incurred but not approved.

² Exclusion of liability for projected benefit payments to claimants who have not been disabled for at least 5 months.

COBRA and Severance

The liabilities as of December 31, 2016, associated with COBRA continuation coverage for medical and dental benefits have been included for all AEP companies. Liabilities were calculated for participants and assigned to the company for which they last worked.

The liabilities were determined assuming that COBRA beneficiaries would incur claims costs equal to 154% of the per capita claims costs for active employees. No termination rates or increased claims cost morbidity was

assumed for former employees receiving severance benefits because their monthly contributions to continue AEP's coverage was equal to the contributions charged to active participants.

This liability increased by \$0.6M during 2016, primarily due to layoffs of some UMWA employees at Cook Coal.

Highlights

Actuarial and Economic Assumptions

The discount rates for determining the obligations reflect the time value of money as of the measurement date. This rate for ASC 450-20 (formerly FAS 5) obligations is based on Treasury bond yields and expected cash flows. The resulting discount rates are:

	December 31, 2016	December 31, 2015
ASC 710-10 (formerly FAS 43)	2.15%	2.10%
For tax-deductible funding limit	2.20%	2.10%

Health Care Cost Trend Rate Assumptions

Health care cost trend is the assumed rate of increase in per capita health care charges. It is disclosed in AEP's financial statements for ASC 715-60 (formerly FAS 106).

Year	Medical	Dental
2017	6.75%	3.00%
2018	6.50%	3.00%
2019	6.25%	3.00%
2020	6.00%	3.00%
2021	5.75%	3.00%
2022	5.50%	3.00%
2023	5.25%	3.00%
2024 and after	5.00%	3.00%

The Company uses consistent trend assumptions for postretirement health care and postemployment health care plan valuations.

Section 3 : Participant data

	December 31, 2016	December 31, 2015
Census Date	12/31/2016	12/31/2015
LTD Recipients		
Number		
▪ Medical continuation benefits	356	364
▪ Income replacement (LTD) plan	343	339
▪ COBRA	46	59
Average Age for LTD Medical Continuation Population	57.8	56.6

This page is intentionally blank

Appendix A: Statement of actuarial assumptions and methods

Discount rate

0% for COBRA continuation;
for all other benefits

- 2.15% for ASC 712-10 valuation
- 2.20% for tax-deductible funding limit valuation

Health care cost trend rate

(applies to plan costs and participant contributions)

Year	Medical	Dental
2017	6.75%	3.00%
2018	6.50%	3.00%
2019	6.25%	3.00%
2020	6.00%	3.00%
2021	5.75%	3.00%
2022	5.50%	3.00%
2023	5.25%	3.00%
2024 and after	5.00%	3.00%

Health Care Benefit Assumptions

Non-UMWA Plans

Average annual 2017 per capita medical claims cost for disabled employees and their dependents

Age	Employee or Spouse		
	HSA Basic	HSA Plus	HRA
≤ 50	\$ 5,331	\$ 5,891	\$ 6,534
50-54	6,546	7,234	8,022
55-59	7,860	8,686	9,633
60-64	9,727	10,749	11,920

For employees only, the costs shown above are increased by the following factors, based on duration of disability:

Years Disabled	Employee Medical Cost Multiplier
≤ 3	8.0
3 – 6	5.0
>6	2.0

80% of employees disabled more than 30 months are assumed to be approved for Medicare. Including the Retiree Drug Subsidy under Medicare Part D, the onset of Medicare benefits is assumed to reduce the cost of benefits by 76% for those approved for Medicare.

For employees covering children under the HSA Basic medical plan, \$5,239 is added to medical costs until the employee turns age 58. (\$5,855 for children under the HSA Plus medical plan and \$6,482 for children under the HRA medical plan).

Average annual 2017 per capita dental claims cost for disabled employees and their dependents

Employee only	\$352
Employee plus spouse	701
Employee plus child(ren)	941*
Full family	1,290*

*Children's portion of cost goes to zero at employee's age 58.

Administrative expenses

Included in per capita costs shown above.

COBRA morbidity

COBRA participants are assumed to incur average per capita claims costs equal to 154% of costs than active participants incur.

Demographic Assumptions

Mortality

Based on modified versions of RP-2014 with long-term improvement rates of 0.75%.

Base mortality rates are derived from the RP-2014 mortality table with improvements factored to 2006 with no collar adjustments.

Mortality improvements are projected forward on a generational basis. Improvement rates grade linearly from the MP-2014 rate in 2007 to the ultimate rate in 2015:

Age	Ultimate Improvement rate per year	Age	Ultimate improvement rate per year
85 and younger	0.750%	91	0.300%
86	0.675%	92	0.225%
87	0.600%	93	0.150%
88	0.525%	94	0.075%
89	0.450%	95 and older	0.000%
90	0.375%		

Long-term disability termination

1987 CGDT — termination rates adjusted by the following factors:

<i>Years of Disability</i>	<i>Percentage of Termination Rates</i>
<1	200%
1-2	150%
2+	100%

In addition to these factors, termination rates at all ages are reduced 5%, reflecting the recommended industry adjustment to the 1987 table.

COBRA continuation termination rates for beneficiaries not receiving severance benefits

<i>Months</i>	<i>18-Month Maximum</i>	<i>Probability of Terminating COBRA Coverage at End of Month</i>	
		<i>29- or 36-Month</i>	<i>Maximum</i>
1	.17		.05
2	.12		.05
3	.07		.04
4-6	.05		.03
7-12	.04		.03
13	.03		.03
14-24	.03		.02
25-35	N/A		.01
36	N/A		1.00
Average Duration	10.19 months		22.61 months

Social Security benefit entitlement for those not yet approved

Within 36 months of disability, 55% of disabled employees not yet approved for Social Security benefits will be approved for primary Social Security benefits and 20% will be approved for family Social Security benefits.

Actuarial Methods

Applicable accounting standards	All benefits have been valued under FASB ASC 450-20-25-2.
Postemployment benefit liability	FASB ASC 450-20-25-2 liabilities are equal to the actuarial present value of future benefit payments to current benefit recipients, with no allowance for incurred but unreported claims or claims administration expenses. Calculation of LTD Plan liabilities for disabled participants under IRC Section 419A funding limit valuation includes the following: - Benefits in payment status – The liability for disabled employees currently receiving benefits is the present value of future benefits expected to be paid. - Benefits pending or in the waiting period – An estimate is made of the present value of benefits for disabled employees not yet receiving benefit payments. - For purposes of determining the qualified asset account limit in accordance with Section 419A of the Internal Revenue Code, benefits to be paid to claimants whose disabilities have not lasted more than five months have been excluded from the liabilities described under a) and b) above. - Claims administrative expenses equal to 7.57% of expected benefit payments
Development of health care benefit claims cost	Cost per participant is based on age-related retired participant costs for AEP non-UMWA plans, adjusted to reflect higher anticipated health care utilization for disabled individuals and reduced for Medicare offsets.
Benefits not valued	Claims incurred but not reported (IBNR) have not been included in the FASB ASC 712-10 liabilities for any benefits.

Data Sources

American Electric Power (AEP), through its third-party administrator, furnished participant data as of January 1, 2017. Health plan vendors furnished the claims cost data. Data were reviewed for reasonableness and consistency, but no audit was performed. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale — Significant Economic Assumptions – Funding Limit and Accounting

Discount rate (accounting)	As required by U.S. GAAP, the discount rate was chosen by the plan sponsor based on matching projected plan cash flows (for all benefits except COBRA continuation) to U.S. Treasury Constant Maturity yield rates on the measurement date, with resulting discount rate rounded to the nearest 0.05%.
Discount rate (funding limits)	The discount rate was chosen by the plan sponsor based on matching projected LTD income benefit cash flows to the U.S. Treasury Constant Maturity yield rates on the measurement date, with resulting discount rate rounded to nearest 0.10%.
Claims cost trend rates	Assumed increases were chosen by the plan sponsor and, as required by U.S. GAAP, they represent an estimate of future experience, informed by an analysis of recent plan experience, leading to select and ultimate assumed trend rates and reflecting the expected near-term effect of recently enacted plan changes. In setting near-term trend rates, other pertinent statistics were considered, including surveys on general medical cost increases. In setting the ultimate trend rate, considerations included assumed GDP growth consistent with the assumed future economic

conditions inherent in other economic assumptions chosen by the client at the measurement date.

After examining historical variability in trend rates, we believe that the selected assumptions do not significantly conflict with what would be reasonable based on a combination of market conditions at the measurement date and future expectations consistent with other economic assumptions used, other than the discount rate.

Participant contribution trend rates

In accordance with the substantive plan communicated to participants, participant contributions are intended to remain a fixed percentage of total plan costs, and thus the trend rates, and the description of the derivation of the trend rates, are the same as for claims costs as shown above.

Medicare Part D subsidy trend rates

The assumed rates of increase in Medicare Part D subsidy are assumed to equal the plan's assumed trend rates.

Per capita claims costs

Aetna, Express Scripts, Anthem and Magellan supplied data on retiree medical claims incurred in 2015 and paid through March 2016. Claim experience rates are calculated for the plans by normalizing claims experience for benefit differences and combining. These normalized incurred claims were then reduced by prescription drug rebates, divided by covered lives and trended forward two years to 2017. Adjustments for plan provision and network changes were also made. Finally, administrative expense rates were added to claims costs.

Medical and prescription drug claims cost models are developed by age-grading these claim rates over standard Willis Towers Watson morbidity curves for both medical and prescription drugs to develop the quinquennial age-banded claims cost assumptions.

Aetna supplied data on dental claims incurred in 2015 and paid through March 2016. Combined claims experience for all active and retired employees was analyzed to derive the dental claim rates.

Medicare Part D subsidy value

We calibrated our modeling tool to reflect the 2017 cost of the current prescription drug plans for AEP's disabled employees. The tool employs a continuance table of annual retiree drug utilization levels, developed from analyzing the experience of several large companies, including 3.1 million Medicare-eligible participants.

After the plan-specific benefit provisions have been calibrated to current costs, the Modeler trends costs forward to 2017. Actuarial equivalence was determined using the following approach:

Gross Value Test — The Modeler calculates the value of standard Medicare Part D coverage and compares it to AEP's plan costs. AEP's plans passed this test by being richer than the projected value of standard Medicare part D coverage for these groups.

Net Value Test — The net value prong of the test compares the value of Standard Part D coverage in 2017 minus the greater of \$427.56 per year (the national average Part D premium) and 25.5% of the gross value of Part D to the projected 2016 value of AEP coverage minus the average projected 2017 retiree contribution rate. For this purpose, employee contributions were assumed to apply first to the value of medical benefits and then to prescription drug benefits.

When the plans are deemed to be actuarially equivalent, the tool calculates the average expected value of the employer subsidy in 2017, using the continuance table calibrated to AEP's plan costs.

Assumptions Rationale — Significant Demographic Assumptions

Healthy Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Disabled Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Rates of disability termination (recovery or death)	Termination rates reflecting both recovery and death were based on a published table for disabled participants believed to have similar characteristics to the plan population. Assumed termination rates differ by age, gender and duration because of differences in termination rates by gender and duration observed in studies of disability termination rates conducted by the Society of Actuaries.

Source of Prescribed Methods

Accounting methods	The methods used for accounting purposes as described in Appendix A are “prescribed methods set by another party,” as defined in the actuarial standards of practice (ASOPs). As required by U.S. GAAP, these methods were selected by the plan sponsor.
--------------------	--

Changes in Assumptions and Methods

Change in assumptions since prior valuation	Per capita claims costs were updated to reflect 2015 dental and retiree medical claims experience. Discount rate was changed from 2.10% to 2.15%.
Change in methods since prior valuation	None.

This page is intentionally blank

Appendix B: Summary of Substantive Plan Provisions Reflected in Valuation

Non-UMWA Plans

Long-Term Disability

Eligibility	Total disability following elimination period of 26 weeks.
Benefits	Following 26 weeks of total disability, benefits are payable. Benefit payments continue until the first to occur of the following: (i) The participant ceases to be totally disabled, or (ii) He reaches age 65 or if he becomes disabled after age 60, benefits can extend beyond age 65. Monthly benefits equal 60% (or 70% with employee buy-up) of base monthly salary reduced by: (a) Initial Social Security benefit (primary portion only for pre-2001 West disabilities) (b) Workers Compensation benefit (c) Jones Act (d) General Maritime Law (e) Settlements (f) Other plans.

Health Care Continuation to LTD Claimants

Eligibility	Participants are eligible for health care continuation upon approval for LTD benefits. Dependents of disabled employees are also eligible. Benefits continue until LTD benefits cease due to death, recovery or retirement.
Benefits	Eligible participants receive continued coverage under AEP's active employee medical and dental plans. Disabled participants who are eligible for Medicare have medical benefits provided secondary to Medicare.

Contributions (Annual) Effective January 1, 2017	HSA Basic	HSA Plus	HRA	Dental
Employee only	\$373	\$1,076	\$1,693	\$141
Employee plus spouse	804	2,382	3,776	281
Employee plus child(ren)	753	2,065	3,241	376
Full family	1,184	3,371	5,323	516

Life Insurance Continuation to LTD Claimants

Eligibility	Participants are eligible for life insurance continuation upon approval for LTD benefits.
-------------	---

Benefits	Eligible participants receive continued coverage under the active employee life insurance plans. Basic and supplemental amounts in force prior to approval for LTD benefits are continued. Dependent life is also continued.
Contributions	Same rates payable by active employees for supplemental coverage.
COBRA	When employees terminate, they are offered medical coverage for 18 months at COBRA rates (102% of average active/pre-65 retiree medical costs). Because anti-selection occurs, the average cost for participants who elect COBRA coverage is typically more than the COBRA rates they pay to enroll for coverage. Surviving spouses may continue coverage at COBRA rates for up to 36 months.

Changes in Benefits Valued Since Prior Year

None.

Purpose and actuarial statement

Purposes of valuation

American Electric Power retained Towers Watson Delaware Inc. ("Willis Towers Watson"), to perform an actuarial valuation of its postretirement welfare programs for the purpose of determining the following:

- (1) The value of benefit obligations as of January 1, 2018, and American Electric Power's postretirement welfare cost for fiscal year ending December 31, 2018, in accordance with FASB Accounting Standards Codification Topic 715 (ASC 715-60). It is anticipated that a separate report will be prepared for year-end financial reporting and disclosure purposes.
- (2) Plan reporting information in accordance with FASB Accounting Standards Codification Topic 965 (ASC 965).
- (3) Expected contributions under the plan sponsor's funding policy for the 2018 plan year.
- (4) The estimated maximum tax-deductible contribution for the tax year in which the 2018 plan year ends as allowed by the Internal Revenue Code. The maximum tax-deductible contribution should be finalized in consultation with American Electric Power's tax advisor.

Limitations

This valuation has been conducted for the purposes described above and may not be suitable for any other purpose. In particular, please note that there may be certain events that have occurred since the valuation date that are not reflected in the current valuation.

This valuation has been conducted in accordance with generally accepted actuarial principles and practices.

Reliances

In preparing the results presented in this report, we have relied upon information regarding plan provisions, participants, claims data, contributions and assets (if any) provided by American Electric Power and other persons or organizations designated by American Electric Power. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. Based on discussions with and concurrence by the plan sponsor, assumptions or estimates may have been made if data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

We have relied on all the information provided as complete and accurate. The results presented in this report are dependent upon the accuracy and completeness of the underlying data and information. Any material inaccuracy in the data and information provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by American Electric Power, may produce materially different results that could require that a revised report be issued.

Assumptions and methods under the Internal Revenue Code for contribution limit purposes

The actuarial assumptions and methods employed in the development of the contribution limits have been selected by the plan sponsor, with the concurrence of Willis Towers Watson. The Internal Revenue Code requires the use of reasonable assumptions (taking into account the experience of the plan and reasonable expectations) which, in combination, offer the actuary's best estimate of anticipated experience under the plan. We believe that the assumptions used in our valuation are reasonable and appropriate for the purposes for which they have been used.

Assumptions and methods under ASC 715-60

The actuarial assumptions and methods employed in the development of the postretirement welfare cost have been selected by the plan sponsor with the concurrence of Willis Towers Watson, except for the expected rate of return on plan assets selected for fiscal 2018. Evaluation of the expected rate of return assumption was outside the scope of Willis Towers Watson's assignment and would have required substantial additional work that we were not engaged to perform. ASC 715-60 requires that each significant assumption "individually represent the best estimate of a particular future event".

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A.

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for deferred taxes. Any deferred tax effects in AOCI should be determined in consultation with American Electric Power's tax advisors and auditors.

Effects of Health Care Legislation

In March 2010, the Patient Protection and Affordable Care Act (PPACA) and Health Care and Education Reconciliation Act (HCERA) were enacted. The key aspects of the Acts affecting American Electric Power's benefit obligation and cost of providing retiree medical benefits are:

- Preventive care benefits covered at 100% beginning in 2011
- Mandatory coverage for adult children until age 26 beginning in 2011
- Loss of the tax free status of the Retiree Drug Subsidy (RDS) beginning in 2013
- Excise ("Cadillac Plan") tax on high-cost plans beginning in 2020
- Elimination of lifetime maximums beginning in 2011

All subsequent measurements for tax purposes reflect the current law.

This valuation reflects our understanding of the relevant provisions of PPACA and HCERA. The IRS and HHS have yet to issue final guidance with respect to many aspects of this law. It is possible that future guidance may conflict with our understanding of these laws based on currently available guidance and could therefore affect the results shown in this report.

Nature of actuarial calculations

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated or selected by Willis Towers Watson, we consider reasonable and within the "best-estimate range" as described by the Actuarial Standards of Practice. Other actuarial assumptions could also be considered to be reasonable and within the best-estimate range. Thus, reasonable results differing from those presented in this report could have been developed by selecting different points within the best-estimate ranges for various assumptions.

The results shown in this report are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with certainty. The effects of certain plan provisions may be approximated, or determined to be insignificant and therefore not valued. Assumptions may be made, in consultation with American Electric Power, about participant data or other factors. Reasonable efforts were made in preparing this valuation to confirm that items that are significant in the context of the actuarial liabilities or costs are treated appropriately, and are not excluded or included inappropriately. The numbers shown in this report are not rounded. This is for convenience only and should not imply precision; by their nature, actuarial calculations are not precise.

If overall future plan experience produces higher benefit payments or lower investment returns than assumed, the relative level of plan costs or contribution requirements reported in this valuation will likely increase in future valuations (and vice versa). Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions; increases or reductions expected as part of the natural operation of the methodology used for the measurements (such as the end of an amortization period); and changes in plan provisions or applicable law. It is beyond the scope of this valuation to analyze the potential range of future postretirement welfare contributions, but we can do so upon request.

See Basis for Valuation in Section 1 below for a discussion of any material events that have occurred after the valuation date that are not reflected in this valuation.

Limitations on use

This report is provided subject to the terms set out herein and in our master consulting services agreement dated July 29, 2004, and any accompanying or referenced terms and conditions.

The information contained in this report was prepared for the internal use of American Electric Power and its auditors in connection with our actuarial valuation of the postretirement welfare plan as described in Purposes of Valuation above. It is not intended for and may not be used for other purposes, and we accept no responsibility or liability in this regard. American Electric Power may distribute this actuarial valuation report to the appropriate authorities who have the legal right to require American Electric Power to provide them this report, in which case American Electric Power will use best efforts to notify Willis Towers Watson in advance of this distribution, and will include the non-reliance notice included at the end of this report. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson's prior written consent. In the absence of such consent and an express assumption of responsibility, we accept no responsibility whatsoever for any consequences arising from any third party relying on this report or any advice relating to its contents. There are no intended third-party beneficiaries of this report or the work underlying it.

Professional Qualifications

The undersigned consulting actuaries are members of the Society of Actuaries and meet the "Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to postretirement welfare plans. Our objectivity is not impaired by any relationship between American Electric Power and our employer, Towers Watson Delaware Inc., a subsidiary of Willis Towers Watson PLC ("Willis Towers Watson").

Plan reporting (ASC 965) for Plan Year Beginning		January 1, 2018	January 1, 2017
	Present value of accumulated benefits	1,251,302,431	1,407,496,076
	Market value of assets	1,708,647,946	1,524,265,466
	Plan reporting discount rate	3.60%	4.10%
Employer Contributions (net of Medicare subsidy)		Plan Year 2018	Plan Year 2017
Cash Flow	Funding Policy contributions	0	0
	Maximum Tax Deductible contributions	61,303,851 (est)	86,142,744
	Actual contributions	N/A	N/A
	Expected benefit payments and expenses, net of participant contributions	88,345,027	100,168,816

Employer Contributions

Employer contributions are the amounts paid by American Electric Power to provide for postretirement benefits, net of participant contributions and Medicare Part D payments. Most participants receiving benefits are required to contribute toward the cost of the plan.

¹ Rates are expressed on an annual basis where applicable.

American Electric Power's funding policy is to contribute an amount equal to the postretirement welfare cost plus retiree drug subsidy payments received (the sum of which can be no less than zero). American Electric Power maximizes its contribution to the 401(h) account and contributes the remainder to the various VEBAs. American Electric Power may deviate from this policy, as permitted by its terms, based on cash, tax or other considerations.

Postretirement welfare cost and funded position

The cost of the postretirement welfare plan is determined in accordance with generally accepted accounting principles in the U.S. ("U.S. GAAP"). The fiscal 2018 postretirement welfare benefit cost/(income) for the plan is \$(104,871,882). Under U.S. GAAP, the funded position (fair value of plan assets less the projected benefit obligation, or "APBO") of each postretirement welfare plan at the plan sponsor's fiscal year-end (measurement date) is required to be reported as a liability. The APBO is the actuarial present value of benefits attributed to service rendered prior to the measurement date, taking into consideration expected future pay increases for pay-related plans. The plan's overfunded (underfunded) APBO as of January 1, 2018 was \$457,345,515 based on the fair value of plan assets of \$1,708,647,946 and the APBO of \$1,251,302,431.

Fiscal year-end financial reporting information and disclosures are prepared before detailed participant data and full valuation results are available. Therefore, the postretirement benefit asset (liability) at December 31, 2017 was derived from a roll forward of the January 1, 2017 valuation results, adjusted for the year-end discount rate and asset values, as well as significant changes in plan provisions and participant population. The next fiscal year financial reporting information will be developed based on the results of the January 1, 2018 valuation, projected to the end of the year and similarly adjusted for the year-end discount rate and asset values, as well as significant changes in plan provisions and participant population.

Change in postretirement welfare cost and funded position

The postretirement welfare cost/(income) decreased from \$(65,457,797) in fiscal 2017 to \$(104,871,882) in fiscal 2018 and the funded position increased from \$117,097,606 on January 1, 2017 to \$457,345,515 on January 1, 2018, as set forth below:

All monetary amounts shown in millions of US Dollars

(\$ in millions)	Postretirement Welfare Cost
Prior year	(65.5)
Change due to:	
■ Expected based on prior valuation and contributions during prior year	(3.8)
■ Unexpected noninvestment experience	0.7
■ Unexpected investment experience	(26.7)
■ Assumption changes	15.5
■ Medicare advantage arrangement	(25.1)
Current year	(104.9)

Significant reasons for these changes include the following:

- Per capita claims costs were updated which did not significantly affect the postretirement welfare cost.

All monetary amounts shown in US Dollars

	2018	2017
Medical (Overall Average)		
Under age 65 ¹		
■ HSA Basic	8,685	9,056
■ HSA Plus	9,575	10,007
■ HRA	10,581	11,098
Age 65 and older (before Part D offsets)		
■ Medicare Select/COB	3,936	4,811
■ Medicare Standard/MOB	2,790	3,346
■ CSP	2,149	2,118
Medicare Part D offsets		
■ Medicare Advantage/ MOB/COB (EGWP)	(861)	(831)
■ CSP (RDS)	(244)	(241)

See Appendix A for additional details on per capita claims costs assumptions including assumed claims costs adjusted for age-related morbidity adjustments.

- The discount rate decreased 50 basis points since the prior year which increased the postretirement welfare cost.
- Actual asset returns during 2017 were higher than the assumed rate of 6.75% which decreased the postretirement welfare cost.
- The expected return on assets assumption was reduced 75 basis points to 6.00% which increased the postretirement welfare cost.
- Demographic changes such as: fewer participants electing medical coverage than expected; more terminations than expected; higher persistency than expected. These offsetting gains/losses resulted in a net increase in postretirement welfare benefit cost.
- The mortality improvement projection was updated to the MP-2017 scale, adjusted to reflect 75% of the long-term improvement rates. This did not significantly affect postretirement welfare benefit cost.
- Child costs are now explicitly valued which increases the postretirement welfare cost.

¹ Pre-65 per capita claims costs do not include the 5% adjustment for potential dependent children covered under the plan.

Basis for valuation

Appendix A summarizes the assumptions and methods used in the valuation. Appendix B summarizes our understanding of the principal provisions of the plan being valued.

Changes in Assumptions

- Per capita claims costs were updated to reflect 2016 retiree claims experience and the adoption of Medicare Advantage plans for most post-65 retirees. An explicit child cost load was also added.
- Discount rate was changed from 4.10% to 3.60%.
- The expected return on assets assumption was reduced 75 basis points to 6.00%
- The mortality improvement projection was updated to the MP-2017 scale, adjusted to reflect 75% of the long-term improvement rates.
- In conjunction with the Medicare Advantage change, the participation assumption was changed to 85% in 2018 and 2019, reduced by 5% per year to 75% in 2021 and beyond.

Changes in Methods

None.

Changes in Benefits Valued

- Consistent with disclosure, this valuation reflects the move to Medicare Advantage coverage for the vast majority of the post-65 retirees and beneficiaries. For accounting purposes, this change is reflected as an actuarial gain.

Section 2: Actuarial exhibits

2.1 Balance sheet asset/(liability)

All monetary amounts shown in US Dollars

Measurement Date	January 1, 2018	January 1, 2017

4	Total	1,251,565,230	1,407,496,076

Actuarial assumptions and methods

The key actuarial assumptions used for plan reporting calculations are the same as those used to determine the postretirement welfare cost and are shown in the Actuarial Assumptions and Methods section, except that the Retiree Drug Subsidy (RDS) associated with Medicare Part D is not reflected. For the prior valuation, a discount rate of 4.10% was used. The same plan provisions shown in Appendix B were used to determine the present value of accumulated benefits.

Reconciliation of Present Value of Benefits		Plan Year 2017	Plan Year 2016
A Medical (ignoring Retiree Drug Subsidy)			
1	Benefit obligation, beginning of year	1,023,149,526	1,004,230,487

Appendix A: Statement of actuarial assumptions and methods

Actuarial Assumptions and Methods — Postretirement Welfare Cost and Funding/Tax Deductions Based on Plan Year beginning January 1, 2018

Economic Assumptions

	Postretirement Welfare Cost	Plan Reporting	Employer Contributions
Discount rate ¹	3.60%	3.60%	N/A
Rates of return on assets, pre-tax: ¹			
401(h) accounts	N/A	N/A	5.75%
Life insurance	N/A	N/A	8.25%
Union medical/dental	N/A	N/A	6.25%
Non-union medical/dental	N/A	N/A	5.36%
Aggregate	6.00%	N/A	N/A
Annual rates of compensation increase ¹			
Representative rates	Age	Rate	
	< 26	12.00%	
	26 – 30	8.50	
	31 – 35	7.00	
	36 – 40	6.00	
	41 – 45	5.00	
	46 – 50	4.00	
	> 50	3.50	
Weighted average		4.85%	
Medical cost trend rate ²	2018	6.50%	
	2019	6.25%	
	2020	6.00%	
	2021	5.75%	
	2022	5.50%	
	2023	5.25%	
	2024+	5.00%	
Dental cost trend rate ²	2018+	3.00%	

¹ Only discount rate and asset return assumptions vary between the reporting standards. All other assumptions are consistent throughout.

² 0% trend assumed for non-union VEBA account limit.

Medicare covered charges trend rate	Same as medical cost trend
Retiree contribution trend rate	Same as medical cost trend. For capped retirees, future retiree contributions are developed based on expected gross costs compared to the applicable cap.

Participation Assumptions

Inclusion Date	The valuation date coincident with or next following the date on which the employee is hired.	
New or rehired employees	It was assumed there will be no new or rehired employees.	
	<i>Current Retirees</i>	<i>Future Retirees</i>
Participation	Based on valuation census data.	85% in 2018 and 2019 with the rate decreasing by 5% annually to an ultimate rate of 75% in 2021.
Persistency	Non-capped retirees will drop coverage at a rate of 2% annually and Capped retirees will drop coverage at a rate of 4% annually.	Same as current retirees
Percentage of retiree with spousal coverage	Based on valuation census data.	72.6% for males, 52.6% for females.
Spouse age	Based on valuation census data.	Wife three years younger than husband.

Demographic Assumptions

Mortality	Base mortality rates are derived from the RP-2014 mortality table with improvements factored to 2006 and no collar adjustments. Mortality improvements are projected forward on a generational basis using an adjusted version of Scale MP-2017. The adjustment reflects 75% of the long-term improvement rates.
-----------	---

Disabled mortality
(through age 65)

Rates vary by age and sex.

Representative rates:

Age	Males	Females
30	2.60%	2.60%
40	2.60	2.60
50	3.10	3.10
60	6.20	6.20

Disability

Rates apply to employees not eligible to retire and vary by age and sex.

Representative rates:

Percentage becoming disabled during the year		
Age	Males	Females
20	0.060%	0.090%
30	0.060	0.090
40	0.074	0.110
50	0.178	0.270
60	0.690	1.035

Termination
(not due to disability
or retirement)

Rates apply to employees not eligible to retire and vary by age and service.

Representative rates:

Percentage leaving during the year		
Attained Age	Less than five years of service	Five or more years of service
< 25	8.00%	7.30%
25 – 29	8.00%	5.00%
30 – 34	8.00%	4.20%
35 – 39	8.00%	3.40%
40 – 44	8.00%	2.50%
45 – 49	8.00%	1.90%
50 +	8.00%	1.70%

Retirement

Rates vary by age.

Representative rates:

Percentage retiring during the year	
Age	Rate
55 – 57	1.00%
58 – 60	6.00%
61 – 63	16.00%
64 – 69	13.00%
70 +	100.00%

2018 Per Capita Claims Costs

Medical

Prior to age 65¹

Age	HSA Basic	HSA Plus	HRA

90 – 94	(337)	(395)
≥ 95	(271)	(317)
Average	(397)	(465)

¹ Pre-65 per capita claims costs do not include the 5% adjustment for potential dependent children covered under the plan.

Dental	\$357
Administrative expenses	Included in claims costs shown above.

Additional Assumptions

Excise tax	To determine impact of the excise tax on the non-UMWA postretirement plan, we projected future gross plan costs using the valuation trend assumption and compared these on a year-by-year basis to the excise tax thresholds beginning in 2018 and projected to future years using CPI (CPI + 1% for 2019). The expected cost of each non-UMWA benefit combination, which were blended pre-65/post-65 based on headcounts, exceeded these thresholds at various points in time, but no earlier than 2040.
Timing of benefit payments	Benefit payments are assumed to be made uniformly throughout the year and on average at mid-year.

Methods

Census date	January 1, 2018
Measurement date	January 1, 2018
Service cost and APBO	Costs are determined using the Projected Unit Credit Cost Method. The annual service cost is equal to the present value of the portion of the projected benefit attributable to service during the upcoming year, and the Accumulated Postretirement Benefit Obligation (APBO) is equal to the present value of the portion of the projected benefit attributable to service before the valuation date. Service from hire date through the expected full eligibility date is counted in allocating costs.
Market-related value of assets	The fair value of assets on the measurement date.

Amortization of unamortized amounts:

Prior service cost (credit)	Increase in APBO resulting from a plan amendment is amortized on a straight-line basis over the average expected remaining service of active participants expected to benefit under the plan. Amortization of net prior service cost/(credit) resulting from a plan change is included as a component of Net Periodic Postretirement Benefit Cost/(Income) in the year first recognized and every year thereafter until such time as it is fully amortized. The annual amortization payment is determined in the first year as the increase in APBO due to the plan change divided by the average remaining service period to full eligibility for participating employees expected to receive benefits under the Plan. Reductions in APBO first reduce any unrecognized prior service cost; any remaining amount is amortized on a straight-line basis as described above.
-----------------------------	---

Net loss (gain)	Amortization of the net gain or loss resulting from experience different from that assumed and from changes in assumptions (excluding asset gains and losses not yet reflected in market-related value) is included as a component of Net Periodic Postretirement Benefit Cost/(Income) for a year. Net loss (gain) in excess of 10% of the greater of APBO or the market-related value of assets is amortized on a straight-line basis over the average expected remaining service of active participants expected to benefit under the plan.
ASC 965 (formerly SOP 92-6)	
Present value of benefits	Present value of benefits is equal to the present value of the portion of the projected benefit attributable to service before the valuation date. Service from hire date through the expected full eligibility date is counted in allocating costs.
Funding policy	AEP's funding policy is to contribute an amount equal to the postretirement welfare cost plus retiree drug subsidy payments received (the sum of which can be no less than zero). AEP maximizes its contribution to the 401(h) account and contributes the remainder to the VEBAs.
Benefits Not Valued	All benefits described in the Plan Provisions section of this report were valued. Life insurance benefits in excess of \$50,000 and health care benefits for key employees were not included in determining the maximum deductible contribution. Willis Towers Watson has reviewed the plan provisions with AEP and based on that review is not aware of any significant benefits required to be valued that were not included.
Change in Assumptions and Methods Since Prior Valuation	■ The discount rate for APBO was changed from 4.10% to 3.60%. ■ Per capita claims costs were updated to reflect 2016 claims experience and the adoption of Medicare Advantage plans for most post-65 retirees. An explicit child cost load was added. ■ The expected return on assets assumption was reduced 75 basis points to 6.00% ■ The mortality improvement projection was updated to the MP-2017 scale, adjusted to reflect 75% of the long-term improvement rates. ■ In conjunction with the Medicare Advantage change, the participation assumption was changed to 85% in 2018 and 2019, reduced by 5% per year to 75% in 2021 and beyond.

Data Sources

American Electric Power (AEP), through Mercer, its third party administrator, furnished active and inactive participant data as of January 1, 2018. AEP also provided the accrued postretirement benefit costs as of December 31, 2017. Health plan vendors furnished the claims cost data. AEP supplied 2017 EGWP payments and prescription drug rebates. Data were reviewed for reasonableness and consistency, but no audit was performed. Based on discussions with the plan sponsor, assumptions or estimates were made when data were not available, and the data were adjusted to reflect any significant events that occurred between the date the data were collected and the measurement date. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale - Significant Economic Assumptions – Funding and Accounting

Interest rate (funding)	The interest rate is the expected rate of return on plan assets, and represents an estimate of future experience for trust asset returns, reflecting the plan's current asset allocation, and current and expected future market conditions.
Rates of increase in:	
Plan administrative expenses	Administrative expenses are included in per capita claims costs and thus the medical plan trend rate is applied to these expenses.
Claims cost trend rates	Assumed increases were chosen by the plan sponsor and, as required by U.S. GAAP, they represent an estimate of future experience, informed by an analysis of recent plan experience, leading to select and ultimate assumed trend rates and reflecting the expected near-term effect of recently enacted plan changes. In setting near term trend rates, other pertinent statistics were considered, including surveys on general medical cost increases. In setting the ultimate trend rate, considerations included assumed GDP growth consistent with the assumed future economic conditions inherent in other economic assumptions chosen by the client at the measurement date. After examining historical variability in trend rates, we believe that the selected assumptions do not significantly conflict with what would be reasonable based on a combination of market conditions at the measurement date and future expectations consistent with other economic assumptions used, other than the discount rate. For the medical VEBA funding limit of the non-bargained group, no future increases in medical costs have been assumed, in accordance with U.S. tax law.
Participant contribution trend rates	In accordance with the substantive plan communicated to participants, participant contributions for non-capped participants are intended to remain a fixed percentage of total plan costs, and thus the trend rates, and the description of the derivation of the trend rates, are the same as for claims costs as shown above.
Basis for Per Capita Claims Cost Assumptions	
Pre-65 retiree medical rates	Aetna, Anthem, ESI and Magellan supplied data on retiree medical claims incurred in 2016 and paid through March 2017. AEP reported prescription rebates they received for 2016. Claim experience rates were calculated for medical plans by normalizing claims experience for benefit differences and combining, then dividing combined incurred claims, net of prescription rebates by covered lives and trending forward two years to 2018. Adjustments for plan design and network changes were also made. Finally, administrative expense rates were added to claims cost rates. Claims cost models were developed by age-grading these claims rates over standard Willis Towers Watson morbidity curves for both medical and prescription drugs to develop the quinquennial claims cost models.

Post-65 retiree medical rates	2018 monthly claim rates were calculated separately for MOB, COB and CSP Medicare-eligible plans by dividing 2016 incurred claims (Rx only, except for CSP) paid through March 2017 by covered lives and trending forward two years to 2018. Prescription drug claim rates were then multiplied by pricing change factors representing the effect of any pricing and other program changes for 2017 and 2018. Next, 2018 premium rates for new Medicare Advantage plans were added. Finally, administrative expense rates were added to claims cost rates. Claims cost models were developed separately for medical and prescription drug by age-grading these rates over standard Willis Towers Watson morbidity curves for medical and prescription drugs to develop quinquennial age-banded claims cost models.
Dental rates	Aetna supplied data on dental claims incurred in 2016 and paid through March 2017. Combined claims experience for all active and retired employees was analyzed to derive the 2016 dental claim rates. The single coverage rate was trended to 2018 and administrative costs were added to derive the per capita claims cost assumptions.
Medicare Part D offsets	
■ RDS	We calibrated our modelling tool to reflect the 2018 cost of the current prescription drug plans for AEP's CSP retirees. The tool employs a continuance table of annual retiree drug utilization levels, developed from analyzing the experience of many large companies, reflecting \$2.4 million Medicare-eligible members' experience from 2014. After the plan-specific benefit provisions have been calibrated to current costs, the Modeler trends costs forward to 2018. Actuarial equivalence was determined using the following two-prong approach outlined in the regulations for Medicare Part D: <i>Gross Value Test</i>— The Modeler calculates the value of standard Medicare Part D coverage and compares it to AEP's plan costs. AEP's plans passed this test by being richer than the projected value of standard Medicare part D coverage for these groups.
	<i>Net Value Test</i> – The net value prong of the test compares the value of Standard Part D coverage in 2018 minus the greater of \$695.16 per year (the national average Part D premium) and 25.5% of the gross value of Part D to the projected 2018 value of AEP coverage minus the average projected 2018 retiree contribution rate. For this purpose, retiree contributions were assumed to apply pro rata between the value of medical benefits and prescription drug benefits. When the plans are deemed to be actuarially equivalent, the tool calculates the average expected value of the employer subsidy in 2018, using the continuance table calibrated to AEP's CSP plan costs. This produced a 2018 per person employer subsidy of \$244 for CSP, which was then converted to rates that varied by participant age band using Willis Towers Watson's prescription drug morbidity factors.
■ EGWP	Estimated plan cost offsets associated with the EGWP arrangement were developed using actual 2017 payments AEP received for direct payments, coverage gap discounts and reinsurance payments. An estimate of the change in direct monthly government payments under the EGWP from 2017 to 2018 was provided by Express Scripts based on average Part D plan payments risk-adjusted for AEP's post-65 retiree population. Express Scripts also provided an estimate of catastrophic reinsurance payments for

2016 and actual coverage gap discounts earned for 2016. These amounts were trended to 2018, then converted to rates varying by quinquennial age band using Willis Towers Watson's standard prescription drug morbidity factors.

Assumptions Rationale - Significant Demographic Assumptions

Healthy Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Disabled Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Termination	Termination rates are based on a recent demographic study and plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by termination patterns different than assumed.
Disability	Disability rates are based on plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by disability patterns different than assumed.
Retirement	Retirement rates are based on a recent demographic study and plan sponsor expectations for the future with periodic monitoring of observed gains and losses caused by retirement patterns different than assumed.
Participation	
■ Participants/ Spouses	The assumed coverage rates for participants and spouses reflect historical experience as well as anticipated future reductions in rates due to expected rates of increase in participant contributions and availability of coverage through public exchanges.
■ Covered dependents	The assumed dependent coverage is based on the dependent coverage observed among recent retirees and general population statistics on the marital status of individuals of retirement age.
■ Covered Spouse age	The assumed age difference for spouses is based on the age difference observed among recent retirees and general population statistics of the age difference for married individuals of retirement age.

Source of Prescribed Methods

Funding methods	The methods used for determining maximum deductible contributions to the 401(h) account and VEBA are chosen from acceptable methods prescribed by law.
-----------------	--

This page is intentionally blank

Appendix B: Summary of substantive plan provisions

Health Care Benefits

Eligibility	Participants are eligible upon retirement after age 55 with ten years of service or upon attaining age 55 with ten years of service after becoming permanently disabled. If involuntary termination, then eligible after age 50 with ten years of service. Employees hired on or after January 1, 2014 are not eligible to participate in the plan.
Surviving spouse	After the death of a retiree or active employee eligible to retire, surviving spouses are eligible until death or remarriage. Surviving children are also eligible, subject to the limiting age provision outlined above.
Dependent	Eligible dependents are spouse, unmarried children under age 19 (age 25 if a full-time student) and unmarried disabled children of any age.
Benefits – Post-65	The AEP Post-65 Medical Plan provides broad medical coverage through two Medicare Advantage plans with \$2,000 annual out-of-pocket maximums. Key differences between the two options offered to retirees are:

	<i>Medicare Select</i>	<i>Medicare Standard</i>
Deductible	\$0	\$200
Coinsurance	5%	20%
In-patient copay	\$250 per stay	\$200 per day (1-5)

Prescription drug benefits are provided under a separate design with the following copayments for those who do not enroll in a consumer driven health plan:

	<i>Generic</i>	<i>Brand Name Formulary</i>	<i>Brand Name Nonformulary</i>
30-day retail	\$10 copay	20% \$20 minimum \$100 maximum	35% \$35 minimum \$200 maximum
90-day retail	\$20 copay	20% \$50 minimum \$200 maximum	35% \$90 minimum \$300 maximum

Prescription drug benefits are also subject to a \$50 deductible and a \$1,000 out-of-pocket maximum per person.

Deductibles and out-of-pocket maximums are assumed to increase over time at approximately the same rate as benefit costs.

Benefits – Pre-65

Pre-65 retirees can elect coverage under the following plan options:

	HRA	HSA Plus	HSA Basic
Embedded Individual Amounts	None	Out-of-Pocket Maximum only	Deductible & Out-of-Pocket Maximum
Deductible			
■ Individual	\$1,500	\$2,000	\$2,700
■ Two Person	\$2,250	\$3,000	\$5,400
■ Family	\$3,000	\$4,000	\$8,100
AEP Account Seed			
■ Single	\$1,000	\$500	\$0
■ Two Person	\$1,500	\$750	\$0
■ Family	\$2,000	\$1,000	\$0
Coinsurance	85%	85%	90%
Out-of-Pocket Maximum			
■ Individual	\$4,000	\$4,000	\$4,000
■ Two Person	\$6,000	\$6,000	\$8,000
■ Family	\$8,000	\$8,000	\$12,000

Deductibles and out-of-pocket maximums are assumed to increase over time at approximately the same rate as benefit costs.

Postretirement contributions

Participant contributions are determined as a percentage of plan costs and vary by points (age at retirement plus service) as follows:

<i>Points</i>	<i>Retiree Cost</i>
65-69	46%
70-74	42
75-79	36
80-84	32
85-89	26
90-94	22
95+	20
Grandfathered	20

For participants retiring on or after January 1, 2013, AEP's subsidy is capped at \$11,500 and \$3,800 times employer cost sharing percentage for pre-65 and post-65 participants, respectively.

For East participants who retired prior to January 1, 1989, and West participants who retired prior to January 1, 1993, no contributions are required.

For East participants who retired on or after January 1, 1989, and West participants who retired on or after January 1, 1993, the 20% "Grandfathered" contributions are in effect if they retired by December 31, 2000, or attained age 50 and had ten or more years of service with the company on that date. The percentages described above are applied to plan costs that differ from the per capita claims costs assumed in the valuation as follows:

The Medicare status of dependents is not used to determine whether "pre-65" or "post-65" rates apply. The pre-65 plan rates used to calculate participant contributions are a blend of pre-65 retiree costs and active employee costs for those participants retired prior to January 1, 2013, only.

For purposes of determining retiree contribution rates, AEP excludes the value of the government's monthly direct payment amount and its catastrophic reinsurance payments from offsetting the plan cost to which the contribution percentages are applied.

Disabled employee contributions

Disabled employees have a provision where active employee contribution rates are charged while an employee remains disabled and is receiving LTD benefits.

If an employee retires while disabled and became disabled before January 1, 2001, a waiver of premium provision continues for life as long as the retirement commenced on or before September 1, 2013. If an employee retires while disabled and became disabled after January 1, 2001, the employee will continue to accrue points as if actively-at-work until age 65 and be subject to the same contribution schedule as normal retirees.

Those participants retiring after January 1, 2013, pay a percentage of true pre-65 retiree costs.

Life Insurance Benefits

Grandfathered participants Participants over age 50 with ten years of service as of December 31, 2000.

Grandfathered benefits Grandfathered participants have the option of keeping current coverage. Active employee coverage for grandfathered East participants is one times final base pay at no cost with the option to buy up to two times base pay. The entire amount of coverage (basic plus supplemental) in force prior to retirement can be carried into retirement subject to reduction beginning at age 66. Current coverage for grandfathered West participants is one and one-half times final base pay prior to age 60, one times final base pay from age 60 to 64 and one-half times final base pay after age 65.

*Life Insurance Benefit Reduction Table
for Grandfathered East Participants*

<i>Years of Coverage</i>	<i>Age 66</i>	<i>Age 67</i>	<i>Age 68</i>	<i>Age 69</i>	<i>Age 70 or Over</i>
10 – 11	65%	55%	45%	35%	25%
11 – 12	70	60	50	40	30
12 – 13	75	65	55	45	35
13 – 14	80	70	60	50	40
14 – 15	85	75	65	55	45
15 or more	90	80	70	60	50

Grandfathered contributions Grandfathered East retirees must contribute \$0.60/\$1,000 of coverage (basic + supplemental) per month. West retirees are not required to contribute to the cost of coverage.

Nongrandfathered benefits \$30,000 for those hired before January 1, 2011. No benefit for those hired on or after January 1, 2011.

Dental Benefits

Eligibility	Participants, including retirees and surviving dependents, are eligible upon retirement after age 55 with ten years of service. There is a one-time election and if coverage terminates there is no opportunity to reenroll. Employees hired on or after January 1, 2014 are not eligible to participate in the plan.
Benefits	The AEP Dental Plan provides dental coverage with a deductible of \$50 single/\$150 family, 100% coinsurance for preventive care, 80% coinsurance for basic restorative care, 50% coinsurance for major restorative care and 50% coinsurance for orthodontia. Most retirees pay the full cost of dental coverage if they enroll. CSW employees who retire before January 1, 1993, contribute nothing to enroll for dental coverage. Former CSW employees retiring after January 1, 1993, who were either retired or had attained age 50 with ten years of service as of January 1, 2001, pay 40%.

Changes in Benefits Valued Since Prior Year

Consistent with disclosure, this valuation reflects the move to Medicare Advantage coverage for the vast majority of the post-65 retirees and beneficiaries. For accounting purposes, this change is reflected as an actuarial gain.

Overview of Benefits Provided by Funding Vehicles

Funding vehicle	Provides for
Non-union postretirement medical/dental VEBAs	100% of medical benefits to non-union employees before 2018 and 9.5% of retiree medical benefits incurred thereafter.
	100% of dental benefits to non-union employees.
Union postretirement medical/dental VEBAs	100% of medical/dental benefits to union employees.
Postretirement life insurance VEBA	Life insurance benefits for all retirees.
401(h) account	90.5% of retiree medical benefits incurred after 2018 for non-union retirees.

Appendix C: Results by business unit

Summary of key assumptions for Appendix C of 2018 NUMWA Postretirement Health Care Plan valuation report:

	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
Discount Rate	3.60%	3.68%	3.73%	3.76%	3.79%	3.81%	3.83%	3.85%	3.87%	3.90%	3.90%

Purposes of valuation

American Electric Power (AEP) retained Towers Watson Delaware Inc. (“Willis Towers Watson”) to perform an actuarial valuation of some of its postemployment benefit programs, including Long-Term Disability (income replacement), life insurance and health benefit continuation plans for employees receiving Long-Term Disability (LTD) benefits and health benefit continuation plans for COBRA beneficiaries (the Plan).

As requested by the Company, this report provides information for year-end financial reporting purposes required by FASB Accounting Standards Codification Topic 712 (ASC 712-10) for your fiscal year ending December 31, 2017.

The exhibits present year-end financial reporting information in accordance with ASC 712-10 including net balance sheet position of the Plan, current year expected cash flow, plan asset information, participant information, the plan provisions on which the valuation is based, and the actuarial assumptions and methods used in the calculations.

Limitations

This valuation has been conducted for the purposes described above and may not be suitable for any other purpose. In particular, please note the following:

1. There may be certain events that have occurred since the valuation date that are not reflected in the current valuation.
2. This report does not provide information for plan reporting under ASC 965.
3. This report does not determine obligations on a plan termination basis, for which a separate extensive analysis would be required. No funded status measure included in this report is intended to assess, and none may be appropriate for assessing, the sufficiency of plan assets to cover the estimated cost of settling benefit obligations, as all such measures differ in some way from plan termination obligations.
4. The comparisons of accounting obligations to assets presented in this report cannot be relied upon to determine the need for nor the amount of required future plan contributions. Nevertheless, such comparisons may be useful to assess the need for future contributions because they reflect current interest rates at the measurement date in determining benefit obligations. However, asset gains and losses, demographic experience different from assumed, changes in interest rates, future benefit accruals, if any, and other factors will all affect the need for and amount of future contributions. In addition, if a plan is not required by law to be funded, benefit payments may also be paid directly by the plan sponsor as they come due.

Section 1 : Summary of key results

Benefit obligations & assets

All monetary amounts shown in US Dollars

Measurement Date		December 31, 2017	December 31, 2016
Plan Assets	Fair Value of Assets (FVA)	1,167,586	387,434
Benefit Obligations	Postemployment Benefit Obligation	(73,052,594)	(80,103,618)
Funded Position	FVA minus Obligation	(71,885,008)	(79,716,184)
Funded Ratios	FVA to Obligation	1.6%	0.5%
Assumptions	Discount rate	2.25%	2.15%
	Current health care cost trend rate	6.50%	6.75%
	Ultimate health care cost trend rate	5.00%	5.00%
	Years to ultimate trend rate	6	7
Participant Data	Census Date	12/31/2017	12/31/2016

Comments on results

The funded position decreased from \$(79,716,184) to \$(71,885,008). Significant reasons for the changes in benefit obligation since the prior year include the following:

- Plan costs and contribution rates increased by less than was expected, which decreased the benefit obligations.
- The disability termination assumptions, which projects the rate at which disabled participants leave disability (either due to recovery or death) was updated from a table based on a 1987 study to a table reflecting experience published in 2012, adjusted for results from a study published in 2016. The updated recovery component resulted in a decreased benefit obligation, but for the life insurance benefits, this was more than offset by an increase in the benefit obligation due to the updated mortality component.
- The discount rate, based on U.S. Treasury constant maturity yields, increased from 2.15% to 2.25%, resulting in a decrease to benefit obligations.

Basis for valuation

Appendix A summarizes the assumptions and methods used in the valuation. Appendix B summarizes our understanding of the principal provisions of the plans being valued. Unless otherwise described below under Subsequent Events, assumptions were selected based on information known as of the measurement date.

Changes in assumptions

- Plan cost rates, employee contribution rates, and COBRA rates for 2018 have been used as a basis for this valuation.
- The discount rate has been updated to reflect Treasury Constant Maturities of as December 31, 2017, which increased the rate from 2.15% as of December 31, 2016, to 2.25% as of December 31, 2017.
- The disability termination assumption has been updated from the 1987 CGDT to the 2012 GLTD reflecting improvements from the 2016 GLTD experience study.

Changes in methods or estimation techniques

None.

Changes in benefits valued

None.

Subsequent events

None.

Additional information

None.

Actuarial certification

This valuation has been conducted in accordance with generally accepted actuarial principles and practices.

Reliances

In preparing the results presented in this report, we have relied upon information provided to us regarding plan provisions, participants, claims data, monthly contribution rates and plan assets (if any) provided by the Company and other persons or organizations designated by the Company. We have relied on all the data and information provided as complete and accurate. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. Based on discussions with and concurrence by the plan sponsor, assumptions or estimates may have been made if data were not available. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

We have relied on all the information provided as complete and accurate. The accuracy of the results presented in this report is dependent upon the accuracy and completeness of the underlying information. Any material inaccuracy in the data, assets, plan provisions or other information provided to us may have produced results that are not suitable for the purposes of this report and such inaccuracies, as corrected by the Company, may produce materially different results that could require that a revised report be issued.

Measurement of benefit obligations, plan assets and balance sheet adjustments

Census date/measurement date

The measurement date is December 31, 2017. The benefit obligations were measured as of the Company's December 31, 2017, fiscal year end and are based on participant data as of the census date, which is displayed in Section 3.

Plan assets and balance sheet adjustments

Information about the fair value of plan assets was furnished to us by the Company. Willis Towers Watson used information supplied by the Company regarding postemployment benefit asset and postemployment benefit liability as of December 31, 2017. These data were reviewed for reasonableness and consistency, but no audit was performed.

Assumptions and methods under U.S. GAAP

As required by U.S. GAAP, the actuarial assumptions and methods employed in the development of the postemployment benefit liability have been selected by the Company. Willis Towers Watson has concurred with these assumptions and methods. U.S. GAAP requires that each significant assumption "individually represent the best estimate of a particular future event."

The results shown in this report have been developed based on actuarial assumptions that, to the extent evaluated by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

A summary of the assumptions and methods used is provided in Appendix A. Note that any subsequent changes in methods or assumptions for the December 31, 2017 measurement date will change the results shown in this report.

Nature of actuarial calculations

The results shown in this report are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with certainty. The effects of certain plan provisions may be approximated, or determined to be insignificant and therefore not valued. Assumptions may have been made, in consultation with AEP, about participant data or other factors. Reasonable efforts were made in preparing this valuation to confirm that items that are significant in the context of the actuarial liabilities are treated appropriately, and are not excluded or included inappropriately. Any rounding (or lack thereof) used for displaying numbers in this report is not intended to imply a degree of precision; by their nature, actuarial calculations are not precise.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to many factors, including: plan experience differing from that anticipated by the economic or demographic assumptions, changes in economic or demographic assumptions, increases or decreases expected as part of the natural operation of the methodology used for the measurements, and changes in plan provisions or applicable law. It is beyond the scope of this valuation to analyze the potential range of future postretirement welfare contributions, but we can do so upon request. Postemployment group benefits models necessarily rely on the use of approximations and estimates, and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements.

Limitations on use

This report is provided subject to the terms set out herein and in our master consulting services agreement dated July 29, 2004, and any accompanying or referenced terms and conditions.

The information contained in this report was prepared for the internal use of AEP and its auditors in connection with our actuarial valuation of the postemployment benefit plan as described in Purposes of Valuation above. It is not intended for and may not be used for other purposes, and we accept no responsibility or liability in this regard. AEP may distribute this actuarial valuation report to the appropriate authorities who have the legal right to require AEP to provide them this report, in which case AEP will use best efforts to notify Willis Towers Watson in advance of this distribution. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson's prior written

consent. Willis Towers Watson accepts no responsibility for any consequences arising from any other party relying on this report or any advice relating to its contents.

Professional qualifications

The undersigned consulting actuaries are members of the Society of Actuaries and meets their “Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States” relating to postemployment benefit plans. Our objectivity is not impaired by any relationship between the plan sponsor and our employer, Towers Watson Delaware Inc.

Section 2: Postemployment benefits obligation

This report summarizes the financial results for AEP's postemployment benefit plan, including the effect of the Medicare Part D subsidy, based upon an actuarial valuation of the income, life insurance and health care continuation benefits during long-term disability and COBRA as of December 31, 2017. The accounting for the benefits not attributable to employee service income, life insurance and contributory health care continuation is subject to ASC 450-20 (formerly FAS 5) for benefits that do not accumulate.

Benefits That Do Not Vest or Accumulate (ASC 450: Formerly FAS 5)		December 31, 2017	December 31, 2016
Benefit Obligation and Funded Status			
Health care and life insurance continuation benefits during LTD			
■ Medical benefits	\$	30,326,825	\$ 37,462,641
■ Basic life insurance		7,739,050	5,928,316
■ Supplemental life insurance		7,335,696	4,952,023
■ Dental benefits		<u>631,414</u>	<u>735,710</u>
Total benefit obligation	\$	46,032,985	\$ 49,078,690
Plan assets		<u>0</u>	<u>0</u>
Unfunded liability	\$	46,032,985	\$ 49,078,690
Income replacement (LTD) plan			
Benefit obligation	\$	26,766,228	\$ 30,576,188
Plan assets		<u>(1,167,586)</u>	<u>(387,434)</u>
Unfunded liability	\$	25,598,642	\$ 30,188,754
COBRA			
Benefit obligation	\$	253,381	\$ 448,740
Plan assets		<u>0</u>	<u>0</u>
Unfunded liability	\$	253,381	\$ 448,740
Total			
Benefit obligation	\$	73,052,594	\$ 80,103,618
Plan assets		<u>(1,167,586)</u>	<u>(387,434)</u>
Unfunded liability	\$	71,885,008	\$ 79,716,184

Change in Unfunded Liabilities from Prior Year

In total, our calculations of FASB ASC 712 unfunded liability as of December 31, 2017, for the postemployment benefits that Willis Towers Watson values is \$71.9 million which was a slight decrease from the total liability as of December 31, 2016.

Summary of Unfunded Liability Increase/(Decrease)

Non-UMWA

■ Health Care and Life Insurance Continuation for LTD Claimants	\$ (3.0) million
■ LTD Income Replacement	(4.6) million
■ COBRA	(0.2) million
Total	\$ (7.8) million

The discount rate has increased from 2.15% to 2.25% and is determined based on a duration matching approach using a risk-free bond universe. The duration of AEP's postemployment benefit plan, excluding COBRA and severance benefits, is 3.67 years as of December 31, 2017. The changes in liabilities are analyzed below for each benefit.

Health Care and Life Insurance Continuation for LTD Claimants

During 2017, the liability estimate for these benefits decreased from \$49.1 million to \$46.0 million. This \$3.1 million decrease results from the following factors:

	Medical	Life Insurance	Dental	Total
December 31, 2016, Liability	37,462,641	10,880,339	735,710	49,078,690
Increase/(Decrease) due to:				
Normal operation of the plan	3,120,565	570,445	25,925	3,716,935
Claims experience	(3,518,420)	64,791	(11,711)	(3,465,340)
Demographic experience	(4,089,540)	(1,152,934)	(51,575)	(5,294,049)
Termination rate assumption changes	(2,539,867)	4,765,351	(64,177)	2,161,307
Economic assumption changes	(108,554)	(53,246)	(2,758)	(164,558)
December 31, 2017, Liability	30,326,825	15,074,746	631,414	46,032,985

LTD Income Replacement

During 2017, the liability estimate (under ASC 712) decreased from \$30.6 million to \$26.8 million. This \$3.8 million decrease results from the following factors:

December 31, 2016, Liability 30,576,188

Increase/(Decrease) due to:

Normal operation of the plan	3,736,682
Demographic experience	(4,725,813)
Termination rate assumption changes	(2,717,161)
Economic assumption changes	(103,668)

December 31, 2017, Liability 26,766,228

In addition to the \$3.8 million liability decrease, there was a by a \$0.8 million increase in plan assets, leading to a \$4.6 million decrease in the LTD plan's unfunded liability under ASC 712.

There is also a significant unfunded liability of \$29.7 million as of December 31, 2017, measured under Internal Revenue Code Section 419A. Therefore, all contributions AEP made to the LTD VEBA in 2017 are tax deductible in 2017 and none of the trust's 2017 investment income needs to be reported as Unrelated Business Income Tax (UBTI). The components of this calculation are:

Funded Status of LTD VEBA as of December 31, 2017

	<i>AEP East Disabled Before 1996</i>	<i>Post-3/31/1998 East and Post-12/31/2000 West Disabilities</i>			<i>AEP West Disabled Before 2001</i>	<i>Total</i>
		<i>Approved</i>	<i>IBNA¹</i>	<i>Subtotal</i>		
(1) Plan Assets						1,168,000
(2) Plan Liabilities						
(a) Claims Cost Liability	56,000	25,932,000	3,963,000	29,895,000	727,000	30,678,000
(b) DEFRA Limitations ²	0	0	3,048,000	3,048,000	0	3,048,000
(c) DEFRA-Limited Claims (a) - (b)	56,000	25,932,000	915,000	26,847,000	727,000	27,630,000

(e) QAAL--Total Plan Liability (c) + (d)						30,858,000
(3) Surplus/(Unfunded Liability)						
(a) Based on Unlimited Liability (1) - (2a) - (2d)						(32,738,000)
(b) Based on QAAL (1) - (2e)						(29,690,000)
(4) Number of Approved Claimants	2	327		327	11	340

¹ Incurred but not approved.

² Exclusion of liability for projected benefit payments to claimants who have not been disabled for at least 5 months.

COBRA and Severance

The liabilities as of December 31, 2017, associated with COBRA continuation coverage for medical and dental benefits have been included for all AEP companies. Liabilities were calculated for participants and assigned to the company for which they last worked.

The liabilities were determined assuming that COBRA beneficiaries would incur claims costs equal to 154% of the per capita claims costs for active employees. No termination rates or increased claims cost morbidity was assumed for former employees receiving severance benefits because their monthly contributions to continue AEP's coverage was equal to the contributions charged to active participants.

This liability decreased by \$0.2M during 2017, primarily due to a decrease in COBRA enrolment, and the expiration of UMWA severance benefits for a group of layoffs at Cook Coal.

Highlights

Actuarial and Economic Assumptions

The discount rates for determining the obligations reflect the time value of money as of the measurement date. This rate for ASC 450-20 (formerly FAS 5) obligations is based on Treasury bond yields and expected cash flows. The resulting discount rates are:

	December 31, 2017	December 31, 2016
ASC 710-10 (formerly FAS 43)	2.25%	2.15%
For tax-deductible funding limit	2.30%	2.20%

Health Care Cost Trend Rate Assumptions

Health care cost trend is the assumed rate of increase in per capita health care charges. It is disclosed in AEP's financial statements for ASC 715-60 as of December 1, 2018.

Year	Medical	Dental
2018	6.50%	3.00%
2019	6.25%	3.00%
2020	6.00%	3.00%
2021	5.75%	3.00%
2022	5.50%	3.00%
2023	5.25%	3.00%
2024 and after	5.00%	3.00%

The Company uses consistent trend assumptions for postretirement health care and postemployment benefit plan valuations.

Section 3: Participant data

	December 31, 2017	December 31, 2016
Census Date	12/31/2017	12/31/2016
Number		
▪ Health care & life insurance continuation benefits for LTD claimants	353	356
▪ Income replacement (LTD) plan	340	343
▪ COBRA	38	46
Average Age for LTD Medical Continuation Population	57.9	57.8

This page is intentionally blank

Appendix A: Statement of actuarial assumptions and methods

Discount rate

0% for COBRA continuation; for all other benefits:

- 2.25% for ASC 712-10 valuation
- 2.30% for tax-deductible funding limit valuation

Health care cost trend rate

(applies to plan costs and participant contributions)

Year	Medical	Dental
2018	6.50%	3.00%
2019	6.25%	3.00%
2020	6.00%	3.00%
2021	5.75%	3.00%
2022	5.50%	3.00%
2023	5.25%	3.00%
2024 and after	5.00%	3.00%

Health Care Benefit Assumptions

Non-UMWA Plans

Average annual 2018 per capita medical claims cost for disabled employees and their dependents

Age	Employee or Spouse		
	HSA Basic	HSA Plus	HRA
≤ 50	\$ 5,107	\$ 5,631	\$ 6,223
50-54	6,271	6,914	7,641
55-59	7,530	8,302	9,174
60-64	9,318	10,273	11,353

Employee age	Children		
	HSA Basic	HSA Plus	HRA
<58	\$ 5,193	\$ 5,804	\$ 6,420
≥58	0	0	0

For employees only, the costs shown above are increased by the following factors, based on duration of disability:

Years Disabled	Employee Medical Cost Multiplier
≤ 3	8.0
3 – 6	5.0
>6	2.0

80% of employees disabled more than 30 months are assumed to be approved for Medicare. Including the Retiree Drug Subsidy under Medicare Part D, the onset of Medicare benefits is assumed to reduce the cost of benefits by 75% for those approved for Medicare.

Average annual 2018 per capita dental claims cost for disabled employees and their dependents

Employee only	\$357
Employee plus spouse	710
Employee plus child(ren)	952*
Full family	1,305*

*Children's portion of cost goes to zero at employee's age 58.

Administrative expenses

Included in per capita costs shown above.

COBRA morbidity

COBRA participants are assumed to incur average per capita claims costs equal to 154% of costs than active participants incur.

Demographic Assumptions

Healthy Mortality

Based on modified versions of RP-2014 with long-term improvement rates of 0.75%.

Base mortality rates are derived from the RP-2014 mortality table with improvements factored to 2006 with no collar adjustments.

Mortality improvements are projected forward on a generational basis using an adjusted version of Scale MP-2017. The adjustment reflects 75% of the long-term improvement rates.

Long-term disability termination

2012 GLTD table reflecting 6-month elimination period, with margin removed, with the following duration-based adjustments to recovery rates to reflect findings from the 2016 GLTD Experience Study:

- +15% for the first four years of disability
- -10% for later durations

COBRA continuation termination rates
for beneficiaries not receiving severance
benefits

Months	Probability of Terminating COBRA Coverage at End of Month	
	18-Month Maximum	29- or 36-Month Maximum
1	.17	.05
2	.12	.05
3	.07	.04
4-6	.05	.03
7-12	.04	.03
13	.03	.03
14-24	.03	.02
25-35	N/A	.01
36	N/A	1.00
Average Duration	10.19 months	22.61 months

Social Security benefit entitlement for
those not yet approved

Within 36 months of disability, 55% of disabled employees not yet approved for Social Security benefits will be approved for primary Social Security benefits and 20% will be approved for family Social Security benefits.

Actuarial Methods

Applicable accounting standards	All benefits have been valued under FASB ASC 450-20-25-2.
Postemployment benefit liability	FASB ASC 450-20-25-2 liabilities are equal to the actuarial present value of future benefit payments to current benefit recipients, with no allowance for incurred but unreported claims or claims administration expenses. Calculation of LTD Plan liabilities for disabled participants under IRC Section 419A funding limit valuation includes the following: - Benefits in payment status – The liability for disabled employees currently receiving benefits is the present value of future benefits expected to be paid. - Benefits pending or in the waiting period – An estimate is made of the present value of benefits for disabled employees not yet receiving benefit payments. - For purposes of determining the qualified asset account limit in accordance with Section 419A of the Internal Revenue Code, benefits to be paid to claimants whose disabilities have not lasted more than five months have been excluded from the liabilities described under a) and b) above. - Claims administrative expenses equal to 11.68% of expected benefit payments
Development of health care benefit claims cost	Cost per participant is based on age-related retired participant costs for AEP non-UMWA plans, adjusted to reflect higher anticipated health care utilization for disabled individuals and reduced for Medicare offsets.
Benefits not valued	Claims incurred but not reported (IBNR) have not been included in the FASB ASC 712-10 liabilities for any benefits.

Data Sources

American Electric Power (AEP), through its third-party administrator, furnished participant data as of January 1, 2018. Health plan vendors furnished the claims cost data. Data were reviewed for reasonableness and consistency, but no audit was performed. We are not aware of any errors or omissions in the data that would have a significant effect on the results of our calculations.

Assumptions Rationale — Significant Economic Assumptions – Funding Limit and Accounting

Discount rate (accounting)	As required by U.S. GAAP, the discount rate was chosen by the plan sponsor based on matching projected plan cash flows (for all benefits except COBRA continuation) to U.S. Treasury Constant Maturity yield rates on the measurement date, with resulting discount rate rounded to the nearest 0.05%.
Discount rate (funding limits)	The discount rate was chosen by the plan sponsor based on matching projected LTD income benefit cash flows to the U.S. Treasury Constant Maturity yield rates on the measurement date, with resulting discount rate rounded to nearest 0.10%.
Claims cost trend rates	Assumed increases were chosen by the plan sponsor and, as required by U.S. GAAP, they represent an estimate of future experience, informed by an analysis of recent plan experience, leading to select and ultimate assumed trend rates and reflecting the expected near-term effect of recently enacted plan changes. In setting near-term trend rates, other pertinent statistics were considered, including surveys on general medical cost increases. In setting the ultimate trend rate, considerations included assumed GDP growth consistent with the assumed future economic

conditions inherent in other economic assumptions chosen by the client at the measurement date.

After examining historical variability in trend rates, we believe that the selected assumptions do not significantly conflict with what would be reasonable based on a combination of market conditions at the measurement date and future expectations consistent with other economic assumptions used, other than the discount rate.

Participant contribution trend rates

In accordance with the substantive plan communicated to participants, participant contributions are intended to remain a fixed percentage of total plan costs, and thus the trend rates, and the description of the derivation of the trend rates, are the same as for claims costs as shown above.

Medicare Part D subsidy trend rates

The assumed rates of increase in Medicare Part D subsidy are assumed to equal the plan's assumed trend rates.

Per capita claims costs

Aetna, Express Scripts, Anthem and Magellan supplied data on retiree medical claims incurred in 2016 and paid through March 2017. Claim experience rates are calculated for the plans by normalizing claims experience for benefit differences and combining. These normalized incurred claims were then reduced by prescription drug rebates, divided by covered lives and trended forward two years to 2018. Adjustments for plan provision and network changes were also made. Finally, administrative expense rates were added to claims costs.

Medical and prescription drug claims cost models are developed by age-grading these claim rates over standard Willis Towers Watson morbidity curves for both medical and prescription drugs to develop the quinquennial age-banded claims cost assumptions.

Aetna supplied data on dental claims incurred in 2016 and paid through March 2017. Combined claims experience for all active and retired employees was analyzed to derive the dental claim rates.

Medicare Part D subsidy value

We calibrated our modeling tool to reflect the 2018 cost of the current prescription drug plans for AEP's disabled employees. The tool employs a continuance table of annual retiree drug utilization levels, developed from analyzing the experience of several large companies, including 2.4 million Medicare-eligible participants.

After the plan-specific benefit provisions have been calibrated to current costs, the Modeler trends costs forward to 2018. Actuarial equivalence was determined using the following approach:

Gross Value Test — The Modeler calculates the value of standard Medicare Part D coverage and compares it to AEP's plan costs. AEP's plans passed this test by being richer than the projected value of standard Medicare part D coverage for these groups.

Net Value Test — The net value prong of the test compares the value of Standard Part D coverage in 2018 minus the greater of \$420.24 per year (the national average Part D premium) and 25.5% of the gross value of Part D to the projected 2017 value of AEP coverage minus the average projected 2018 retiree contribution rate. For this purpose, employee contributions were assumed to apply first to the value of medical benefits and then to prescription drug benefits.

When the plans are deemed to be actuarially equivalent, the tool calculates the average expected value of the employer subsidy in 2018, using the continuance table calibrated to AEP's plan costs.

Assumptions Rationale — Significant Demographic Assumptions

Healthy Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Disabled Mortality	Assumptions were selected by the plan sponsor and, as required by U.S. GAAP, represent a best estimate of future experience.
Rates of disability termination (recovery or death)	Termination rates reflecting both recovery and death were based on a published table for disabled participants believed to have similar characteristics to the plan population—the 2012 Group Long-Term Disability (GLTD) table, reflecting experience from the 2016 GLTD Experience Study. Assumed termination rates differ by age, gender and duration because of differences in termination rates by gender and duration observed in studies of disability termination rates conducted by the Society of Actuaries.

Source of Prescribed Methods

Accounting methods	The methods used for accounting purposes as described in Appendix A are “prescribed methods set by another party,” as defined in the actuarial standards of practice (ASOPs). As required by U.S. GAAP, these methods were selected by the plan sponsor.
--------------------	--

Changes in Assumptions and Methods

Change in assumptions since prior valuation	Per capita claims costs were updated to reflect 2016 dental and retiree medical claims experience. Discount rate was changed from 2.15% to 2.25%. Rates of disability termination were updated to use the 2012 GLTD table, reflecting experience from the 2016 GLTD Experience Study.
Change in methods since prior valuation	None.

This page is intentionally blank

Appendix B: Summary of Substantive Plan Provisions Reflected in Valuation

Non-UMWA Plans

Long-Term Disability

Eligibility	Total disability following elimination period of 26 weeks.
Benefits	Following 26 weeks of total disability, benefits are payable. Benefit payments continue until the first to occur of the following: (i) The participant ceases to be totally disabled, or (ii) He reaches age 65 or if he becomes disabled after age 60, benefits can extend beyond age 65. Monthly benefits equal 60% (or 70% with employee buy-up) of base monthly salary reduced by: (a) Initial Social Security benefit (primary portion only for pre-2001 West disabilities) (b) Workers Compensation benefit (c) Jones Act (d) General Maritime Law (e) Settlements (f) Other plans.

Health Care Continuation to LTD Claimants

Eligibility	Participants are eligible for health care continuation upon approval for LTD benefits. Dependents of disabled employees are also eligible. Benefits continue until LTD benefits cease due to death, recovery or retirement.
Benefits	Eligible participants receive continued coverage under AEP's active employee medical and dental plans. Disabled participants who are eligible for Medicare have medical benefits provided secondary to Medicare.

Contributions (Annual) Effective January 1, 2018	HSA Basic	HSA Plus	HRA	Dental
Employee only	\$373	\$1,076	\$1,703	\$143
Employee plus spouse	804	2,382	3,776	284
Employee plus child(ren)	753	2,065	3,241	381
Full family	1,184	3,371	5,313	522

Life Insurance Continuation to LTD Claimants

Eligibility	Participants are eligible for life insurance continuation upon approval for LTD benefits.
-------------	---

Benefits	Eligible participants receive continued coverage under the active employee life insurance plans. Basic and supplemental amounts in force prior to approval for LTD benefits are continued. Dependent life is also continued.
Contributions	Same rates payable by active employees for supplemental coverage.
COBRA	When employees terminate, they are offered medical coverage for 18 months at COBRA rates (102% of average active/pre-65 retiree medical costs). Because anti-selection occurs, the average cost for participants who elect COBRA coverage is typically more than the COBRA rates they pay to enroll for coverage. Surviving spouses may continue coverage at COBRA rates for up to 36 months.

Changes in Benefits Valued Since Prior Year

None.

Assets for projection	Initial assets for projection purposes are the unaudited assets as of December 31, 2018.
Mortality table	RP-2014, factored to 2006, collar adjustments as appropriate.
Mortality projection scale	Generational MP-2018 projection adjusted to reflect 75% of the long-term improvement rates.
Lump sum mortality	PPA 2019 optional combined mortality with static projection to commencement using MP-2018.
Retirement rates	Age-graded rates based on AEP experience during 2009-2013, average retirement age of 64.
Termination rates	Age and service based rates based on AEP experience during 2009-2013.
Salary increases	Age-graded rates based on AEP experience during 2011-2013, with average annual increase of 4.85%.
Valuation and data	January 1, 2018.
Trend rates	Initial trend rate of 6.25% in 2019, grading down to an ultimate rate of 5.00% over a five-year period.
Per capita claims costs	2019 Non-UMWA cost models based on actual claims experience incurred in calendar year 2017 and paid through March 31, 2018. 2019 UMWA cost models based on 48 months of paid claims through September 30, 2018.
Non-UMWA PRW Plan participation assumption	Initial participation of 85% until 2019 grading down to 75% in 2021
Non-UMWA PRW Plan persistency assumption	Non-capped retirees will drop coverage at a rate of 2% annually; Capped retirees will drop coverage at a rate of 4% annually.
Pension plan active population	Constant active population with new hires assumed to have same profile as prior year new hires.

¹ Funding policy for the qualified pension plan is the greater of the ASC 715 Service Cost or the minimum required contribution.

² Amounts for Nonqualified Pension Plan represent expected benefit payments.

³ Funding policy for Non-UMWA Postretirement Welfare Plan is to fund ASC 715 cost (not less than \$0). Amounts shown represents estimated company cash payments for key retirees not payable from trusts.

⁴ Funding policy UMWA Postretirement Welfare Plan is to fund Cook Coal ASC 715 cost (not less than \$0). Amount shown also includes expected benefit payments for all other locations.

⁵ Reflects provisions of the Bipartisan Budget Act of 2015.

⁶ Reflects the divestiture of the Cardinal Operating Company to Buckeye Power as of January 1, 2019.

⁷ Actual asset returns are adjusted per AEP's request based on movements to the fixed income portion of plan investments to account for anticipated changes in future discount rate.

Key Assumptions as of December 31, 2018

Discount rate	2.65%
Initial health care trend in 2019	6.25%
Ultimate health care trend	5.00%
Years to ultimate	5
Disability mortality	2012 GLTD
Disability recovery	2012 GLTD, reflecting improvements from the 2016 GLTD experience study
2019 per capita claims cost assumptions	
All other demographic assumptions match those in the 2018 valuation
