

BEFORE THE MISSISSIPPI PUBLIC SERVICE COMMISSION

ENTERGY MISSISSIPPI, LLC

IN RE: ENTERGY MISSISSIPPI, LLC'S 2026
FORMULA RATE PLAN FILING

EC-123-0082-00

2025-UN-112

FILED
FEB 27 2026
MISS. PUBLIC SERVICE
COMMISSION

EVALUATION REPORT FILING UNDER FORMULA RATE PLAN
RIDER SCHEDULE FRP-7 (THIRD REVISED) FOR CALENDAR YEAR 2026

Entergy Mississippi, LLC ("Entergy Mississippi," "EML," or the "Company"), pursuant to Section 77-3-2(3), Mississippi Code of 1972 (Supp. 2025), as well as other applicable provisions of the Mississippi Public Utilities Act of 1956, as amended, files with the Mississippi Public Service Commission (the "Commission") the Company's Evaluation Report under Formula Rate Plan Rider Schedule FRP-7 (Third Revised) ("Schedule FRP-7," "FRP-7," "FRP," or "Formula Rate Plan") for the twelve-month period ending December 31, 2026 ("2026 Evaluation Report"), along with the Company's look-back for the twelve-month period ended December 31, 2025 ("2025 Look-back"), and in support shows as follows:

Building on a History of Reliability Improvements for Customers

1. As discussed in the Direct Testimony of Kamisha Quates, in 2014, Entergy Mississippi proposed its Bright Future plan to the Commission, a time when the Company was both facing major changes in the industry and could point to specific ways in which EML had prepared to meet those challenges. EML was facing a period of rapid industry transition and modernization. The Company was also managing storm restoration costs, new environmental regulations, and mandatory NERC reliability standards. To meet these challenges, the Company had, among other efforts, acquired two, natural gas-fired generators (Attala and Hinds), completed

upgrades at Grand Gulf Nuclear Station, acquired additional Grand Gulf capacity from Entergy Arkansas, LLC, and successfully joined MISO.

2. EML also proposed to modernize its rates and rate structure to timely reflect both the costs and benefits of the developments it outlined so that the Company would have the capital to support necessary investment in utility infrastructure, remain a strong partner in Mississippi's economic development efforts, and respond to the transformative challenges facing the industry. EML was also transparent with the Commission, noting that the steps the Company took to meet the ever-growing challenge of providing an ample supply of affordable, reliable electricity to customers then and into the future, brought a rate increase initially, but would result in substantial, long-term benefits and savings to customers in the coming years.

3. As further discussed by Ms. Quates, for over a decade, EML has upheld its promises to customers, making capital improvements driven by aging infrastructure, evolving customer expectations, and economic development opportunities. In addition to Attala and Hinds, mentioned above, Entergy Mississippi acquired the Choctaw unit, to add to its modern, efficient, and cleaner combined cycle generating resources, and to address capacity and energy needs for customers. These units, combined, now account for approximately 1,720 MW of Entergy Mississippi's generating capacity and provide important base-load and load-following capabilities to meet customers' needs. In 2025, the Commission approved EML acquiring an additional approximate 209 MW of Grand Gulf capacity, and related energy, from Entergy Louisiana, LLC. *See* Docket 2024-UN-112. EML's investment in its approximate 3,042 line miles of transmission reflect measurable reliability progress, and support for economic development, with fewer customer outages and faster restoration times for outages that occur on EML's transmission lines, as further described in the Company's November Transmission and Distribution ("T&D") Plan

filings.

4. The Company's plant in service growth from 2015 to 2025 demonstrates the Company's commitment to capital improvements for the benefit of customers, growing over \$4 billion over the past ten years. Ms. Quates also testifies that, as EML looks forward to 2026, the Company expects to make in excess of \$400 million in infrastructure improvements, a significant portion of which are from distribution capital additions, and the Company will make these improvements without increasing its 2026 Annual Rate Adjustments.

Superpower Mississippi Reliability Strategy

5. Ms. Quates discusses EML's September 2025 announcement of a new, multi-year reliability strategy, included in its "Superpower Mississippi" strategy. The goals of the reliability strategy are to reduce customer interruptions ("CIs") by 50%, improve day-to-day service delivery, optimize work management, and remain focused on continuous improvement.

6. As further discussed by Ms. Quates, the Superpower Mississippi reliability strategy involves the development of prioritized reliability work plans for the Company's recurring distribution programs to address the two leading CI causes, vegetation and equipment failures, to improve overall distribution performance. The reliability strategy uses new technology to analyze equipment performance data, customer outage and survey data, and vegetation data, including satellite imagery, to produce targeted, efficient reliability work plans that use the tools EML has used successfully to mitigate specific outage causes. The reliability strategy indicates an initial prioritization from 2026 to 2028 of work in the Jackson, Clinton, and Brookhaven networks ("JCB Networks"). The reliability strategy, however, also targets work throughout other portions of EML's distribution system. For example, in 2026, EML expects to target 18 geospatial sections in the JCB Networks and 9 geospatial sections in the other networks. After 2028, EML expects

an increase in work in its non-JCB networks, while continuing to work throughout its distribution system.

7. As described by Ms. Quates, EML's Superpower Mississippi reliability strategy represents a major change to how the Company plans its Distribution Reliability program, which targets work based on specific outage drivers, and Distribution Infrastructure program, which replaces aging and failing equipment before the equipment causes an outage. The strategy employs a new planning approach based on geospatial technology and data so that EML can target and group infrastructure improvements and vegetation management solutions to produce the most reliability benefit for customers. 2026 will be a transition year to this new reliability strategy. EML plans to complete previously planned reliability projects early in 2026 and transition to projects using the new geospatial approach during the second quarter of 2026.

8. Ms. Quates also testifies about EML's 2026 planned distribution storm capital additions, which are in an amount consistent with EML's experience with increasing storm activity. EML is not seeking specific recovery in the 2026 Evaluation Report for the severe winter storms that began in January 2026, but EML will update the Commission on its plan(s) for proposed recovery.

9. Finally, Ms. Quates discusses specific EML distribution improvements, including, but not limited to:

- a. EML's Failure/Emergency Recurring program, which targets the replacement of failed or damaged equipment not associated with storms. These capital additions continue to be primarily driven by trees falling from outside the right-of-way and overhanging limbs following the severe drought of 2023 (along with the pine beetle infestation). In 2024, EML saw a significant increase in

customer interruptions caused by dead trees. In 2025, EML increased spending on vegetation management to address the significant increase in the number of customer interruptions caused by dead trees, and EML's current, 2026 planned spending level for failure/emergency recurring programs is even greater, consistent with the new reliability strategy discussed above. For example, the company increased efforts in spring 2025 in areas of Hinds County that were particularly impacted by the drought. In these areas, the vegetation outages were approximately 40% lower per month over the last 4 months of the year compared to the first 8 months.

- b. EML's Distribution Infrastructure program, which seeks to reasonably minimize the failure of aging equipment and facilities by maintaining or replacing the equipment and facilities before failure. This program's objective is to reduce the potential for customer interruptions. Accordingly, the spending target for these programs is based not only on historical trends but also on data and engineering analysis. EML's Wood Pole Inspection Program continues to be a large component of the Distribution Infrastructure program.
- c. EML's Distribution Reliability Program, which captures a group of programs that target specific outage drivers to obtain the greatest performance improvement, while managing customer costs. The FOCUS Program is the largest of the distribution reliability programs. FOCUS stands for Find, Observe, Collect, Understand, and Succeed. The program identifies circuits or devices for improvement through an algorithmic approach. EML's STAR program, which stands for Strategically Target and Apply, focuses on

improving system reliability by identifying devices with one or more controllable outages. Ms. Quates describes the FOCUS and STAR programs in more detail, including how they relate. Although the type of work performed under the programs is similar, the programs are separate so that the Company can measure program effectiveness of each program individually, due to the differences in objectives. Finally, Ms. Quates testifies that the Company has recently integrated its Vegetation Management program with its FOCUS and STAR programs. In addition to inspecting facilities for areas to upgrade, the Company also performs vegetation inspections to identify areas that require trimming or hazard tree removal to provide a more holistic reliability solution.

Customer Programs and Customer Growth

10. EML is committed to supporting all of its customers, and Ms. Quates testifies about customer-facing programs that positively impacted customers in 2025.

11. Among these customer-facing programs are EML's Power to Power to Care program, which helps older adults and people with disabilities keep their power on when they are facing a financial difficulty. EML collects shareholder, customer, and employee donations and then partners with local nonprofit agencies throughout our service territory to distribute these funds to qualifying customers. All donations go directly to paying our customers' electric bills. In 2025, the Power to Care program provided direct customer assistance by paying 2,584 EML customer bills totaling \$605,457 of assistance in Mississippi.

12. EML also participated in Low Income Home Energy Assistance Program ("LIHEAP") Action Day in Washington D.C., advocating for continued federal financial assistance dollars to support low-income customers. EML's presence helped to raise awareness

of funding assistance available to some of EML's most vulnerable customers. EML also supported the need for increased support of and funding for the LIHEAP program. LIHEAP received over \$4 billion in funding, as part of an appropriations bill signed into law in early February 2026.

13. EML also continues to offer a Super Tax Day program, where the company provides free tax preparation and support for qualified Entergy Mississippi customers. EML helps customers who qualify for the federal Earned Income Tax Credit ("EITC") receive assistance in claiming these funds. EML also partners with community advocates to support free IRS-certified Volunteer Income Tax Assistance ("VITA") tax preparation services for qualifying customers. In 2025, EML volunteers and nonprofit partners processed 10,050 federal tax returns, resulting in a total of \$13,736,287 in IRS refunds directly to EML customers. In addition, 2,176 families were identified as qualifying for the EITC, ensuring they receive an additional credit for low to moderate income customers resulting in \$4.9 million total, or on average \$2,296 per qualifying customer.

14. EML continues to offer Entergy Mississippi Smart Services, an energy efficiency portfolio that is designed to help households and businesses lower their energy use, reduce bills, and improve comfort by offering rebates, no-cost in-home audits, direct-install efficiency upgrades, HVAC tune-ups, and demand-response opportunities. Across the above-referenced programs, customers receive support such as discounted efficient products, no-cost energy-saving installations, and incentives for high-efficiency heating and cooling equipment, all of which reduce energy waste and improve system performance.

15. Ms. Quates further testifies that EML continues to be committed to economic development, supporting new and existing customers as they grow their businesses. Specifically, she testifies that, in 2025, EML supported ten commercial customers that had over \$600 million in new investment announcements. These investments are anticipated to lead to the creation of

more than 1,200 new jobs.

16. Mr. Gibbs testifies about the positive impact of EML's new, large customers on EML's 2026 Evaluation Report. Mr. Gibbs testifies that EML's 2026 Evaluation Report as filed would have produced a rate increase for customers, but for the inclusion of the known and measurable revenue change attributable to the expected revenue of new, large customers.

17. As further described below and in the Direct Testimonies of Chris Barrilleaux and David Gibbs, there will be no change in rates from Annual Rate Adjustments to EML's 2026 FRP-7 submittal. Mr. Gibbs testifies that, assuming the Commission approves EML's 2026 Evaluation Report and 2025 Look-back, as filed, a residential customer using 1,000 kWh per month would see a net decrease of \$0.03 in their July 2026 bills (as compared to their June 2026 bills) from the FRP Annual and Interim Rate Adjustments, when including the temporary effects of the percentage of base rate schedules (e.g., Schedules MSE, PMR, UPC, MISO), resulting in a total residential monthly bill of \$165.10 per 1,000 kWh beginning July 2026, which remains below the national, residential average.

Nuclear PTCs

18. Mr. Gibbs also provides testimony to support Entergy Mississippi's request for an order from the Commission regarding the treatment of nuclear production tax credits ("PTCs").

19. Mr. Gibbs describes why EML customers are entitled to the economic benefits of nuclear PTCs and EML's strategy to monetize the nuclear PTCs to benefit customers. Specifically, he highlights a transaction for past nuclear PTCs (2024) and potential, future transactions.

20. In his testimony, Mr. Gibbs details the basic terms of the 2024 transaction, as approved by FERC, which resulted in EML receiving \$71.2 million related to EML's entitlement to the 2024 production of the Grand Gulf Nuclear Station.

21. Importantly, Mr. Gibbs's testimony highlights the reasons why the Company believes that the best option for customers was, and will continue to be, sales to third-parties.

22. Mr. Gibbs requests consistent regulatory treatment for all nuclear PTCs, as EML believes that its proposed regulatory treatment produces the greatest benefits for customers. Specifically, EML is seeking an order from the Commission regarding the treatment of the benefit of nuclear PTCs whereby EML, rather than customers, will bear the risks of indemnification described by Mr. Gibbs in his testimony. While EML bears this risk, the Company proposes that it will wait to provide the benefits of the nuclear PTCs to customers until after the IRS makes a final determination on the recognition of the nuclear PTCs that Entergy claimed with respect to Grand Gulf. If the IRS does not allow any value for the nuclear PTCs, customers will not receive any benefits. However, customers will also not be responsible for any of the resulting indemnification costs.

23. Mr. Gibbs also testifies about the Company's proposed accounting treatment for nuclear PTCs and a proposed timeline for flowing back benefits to customers. At the earliest, EML is proposing providing the benefits of nuclear PTCs to customers after a favorable IRS determination.

24. If and when the IRS allows recognition of all or a portion of the nuclear PTCs, EML and the Commission, in consultation with the Staff, will mutually agree upon a ratemaking treatment and timeline for flowing back the benefits of these nuclear PTCs to customers.

Entergy Mississippi's Financial Health Benefits Customers

25. As the Company has discussed in prior FRP filings, EML must have access to the capital it will need in the future to support necessary investment in utility infrastructure, remain a strong partner in Mississippi's economic development efforts, and respond to the transformative

challenges facing the industry. As the State of Mississippi continues to see unprecedented opportunities for economic development, leading to opportunities to invest in a more reliable grid for customers, while maintaining reasonable rates. EML continues to acknowledge that these successes and opportunities are the result of effective management by the Company, effective regulation by the Commission, and the support of the Company's key stakeholders.

26. Formula rate plans have been a major component of the Commission's effective regulation of EML for over thirty years. The Legislature has authorized the Commission to "adopt a formula type rate of return evaluation rate." *Rankin Co. v. Miss. Pub. Serv. Com.*, 393 So. 3d 1031, 1033 (2024) (citing Miss. Code Ann. § 77-3-2(3)(a)(i)). EML's FRP provides clarity on future cost recovery including certain operating costs, helps to reduce regulatory lag, and increases the predictability of future cash flows and financial metrics.

27. On June 30, 2025, Moody's Investor Service ("Moody's") issued its credit opinion for EML, affirming its Baa1 long-term credit rating, and noting:

Entergy Mississippi, LLC's (EML, Baa1 stable) credit profile is supported by strong political and regulatory support evidenced by its formula rate plan (FRP) and 2024 legislation to help develop a \$10 billion industrial park in Madison County for Amazon.com, Inc.

EML's stable outlook reflects our expectation that the utility's relationship with its regulatory commission and formula rate plan filings will continue to be supportive of its operations and cost recovery, resulting in consistent CFO pre-WC to debt ratios in the 18-20% range.

EML's FRP provides clarity on future cost recovery including certain operating costs, helps to reduce regulatory lag, and increases the predictability of future cash flows and financial metrics. For example, the inclusion of several cost recovery mechanisms (e.g., fuel adjustment clause, storm recovery and escrow, purchased power, etc.) enables EML to produce consistent margins, while the

true-up of known and measurable costs (incurred subsequent to EML's historic test year filing), allow some forward-looking adjustments that provide incremental cash flow.

The streamlined and well-tested nature of the FRP proceedings, and stakeholder support, provides an important underpinning to the company's credit quality.

(Emphasis added).

28. EML's activities are subject to thorough oversight provided by the Commission and Staff as they review, critique and approve, often with modification, EML's annual transmission and distribution planning and projects, annual energy efficiency plans, annual formula rate plans, and annual fuel audits. This level of continuous oversight, driven in large part by the annual review of EML's costs through the FRP, ensures that EML is undertaking improvements and operating our system in a transparent manner that benefits customers, provides reliable service, and keeps rates reasonable. In order for EML to continue with plans to meet customers' needs over the next several years, Entergy Mississippi needs timely recovery of the investments already made for our customers, along with assurance it will receive timely recovery of the infrastructure improvements planned for this year.

29. EML's financial health is and should be of great importance to all stakeholders, including the Commission, investors, and customers. Sound financial health means that, when necessary, the Company is able to access capital, both debt and equity, at a reasonable cost. This includes instances when planned service improvements require capital, as well as unpredictable events that cause a need for capital – unexpected maintenance or reliability work, or emergency storm restoration.

EML's Formula Rate Plan Results

30. Entergy Mississippi's current formula rate plan is Schedule FRP-7 (Third Revised), which the Commission ordered into effect through its May 28, 2024, Compliance Order in Docket 2023-UN-142. Schedule FRP-7 conforms to Mississippi statutes and to the Commission's Public Utilities Rules of Practice and Procedure (the "Procedural Rules").

2025 Look-back

31. Under Schedule FRP-7, by March of each year, the Company makes a look-back submittal containing accounting and operational data based on actual results, as adjusted pursuant to provisions of FRP-7, for the calendar year preceding the filing of the submittal (the "Look-back Evaluation Period"). This annual look-back provides information sufficient for the Staff to conduct a review of the Company's expenses, capital accounts (rate base), revenues, and operational performance, and in so doing, the filing indicates whether and how much of an interim rate adjustment is necessary based on actual performance. The Company's 2025 Look-back is attached hereto as ATTACHMENT A.

32. Company witness Chris Barrilleaux testifies that the Company's Look-back Benchmark Rate of Return on Rate Base of 7.69%, which was the Benchmark Rate of Return on Rate Base reflected in the Joint Stipulation approved by the Commission's June 17, 2025 Order, establishes a Bandwidth from 7.19% to 8.19%. As shown in the graph below, the Company's Look-back Earned Rate of Return on Rate Base is 8.05% and falls within the Bandwidth. Because the Look-back Earned Rate of Return on Rate Base of 8.05% is within the Bandwidth, there is no Change in Rider FRP Revenues from the Bandwidth calculation.

Illustration of 2025 Look-back Evaluation Results

In the 2025 Look-back, EML proposes to set its Interim Rate Adjustments to reduce rates by \$292,918. This amount reflects a change in one outside-the-bandwidth item. As discussed in Mr. Barrilleaux's testimony, Attachment K to the FRP provides that the DSM True-up, which occurs every year, shall be recovered outside of the bandwidth calculation. The 2025 DSM True-up is an over-recovery that reduces rates by \$292,918.

2026 Evaluation Report

33. Also, under Schedule FRP-7, by March of each year the Company makes an Evaluation Report submittal containing accounting and operational data based on actual results for the calendar year preceding the filing of the submittal, as adjusted for the current year expected results pursuant to provisions of the Formula Rate Plan. This Evaluation Report provides information sufficient for the Staff to conduct a review of the Company's expenses, capital accounts (rate base), revenues, and operational performance for the current calendar year, and in so doing the filing indicates whether and how much of a rate adjustment is appropriate. The Company's 2026 Evaluation Report is attached hereto as ATTACHMENT B.

34. The Company's Benchmark Rate of Return on Rate Base is 7.80%, which establishes a Bandwidth from 7.30% to 8.30%. As shown in the graph below, the Company's Earned Rate of Return on Rate Base is 7.64%, which is within the Bandwidth. Accordingly, Schedule FRP-7 provides that the Bandwidth Calculation produces no change in the Annual Rate Adjustments.

Illustration of 2026 Evaluation Results

35. As described in Section III. D (2) of FRP-7, the revenue requirement associated with Section 22 facilities is recovered through Interim Facilities Rate (“IFR”) Adjustments. EML filed a true-up to its 2025 IFR Adjustments in a separate docket (Docket 2023-UN-142); that change is reflected in the Net Rate Adjustments in Attachment A to FRP-7. However, as is also described in Section III. D (2) of FRP-7, at the conclusion of a prudence review of a Section 22 project and such project being placed in-service throughout a full calendar year, the Company realigns the Section 22 Facilities Revenue Requirement for the project from the Interim Facilities Rate Adjustment to the Annual Rate Adjustment. On December 13, 2024, the first phase of a three-phase transmission project went into service. The first phase of the project consisted of

upgrading EML's existing Catlett Substation and constructing the new Virililia Substation (the "Virililia/Catlett project"). In Docket 2024-UA-101, the Company requested that the Commission conduct a prudence review of the Virililia/Catlett project costs as of the in-service date. The Commission's review concluded on May 1, 2025, with a finding that these costs were prudently incurred.¹ As such, it is now appropriate for the Company to realign the Section 22 Facilities Revenue Requirement for the Virililia/Catlett project. Other than the realignment of the costs associated with the Virililia/Catlett project, all other capital additions and expenses associated with Section 22 facilities have been removed in the 2025 Look-back and the 2026 Evaluation Report.

Filing Requirements

36. The 2026 Evaluation Report and supporting workpapers² include the following data and information pursuant to the filing requirements for a rate adjustment under Schedule FRP-7, which requirements are set out in Attachment H to FRP-7:

Item

1. *All direct testimony to be relied upon, including a statement of the proposed changes and the reasons for the changes.* See the Direct Testimonies of Ms. Kamisha Quates, Mr. David Gibbs, and Mr. Chris E. Barrilleaux, Attachments C through E, along with exhibits to these attachments, hereto. Although this item is only required for rate changes in excess of two percent (2%), Entergy Mississippi is providing testimony to support its filing.
2. *Schedule of present rates, fare, tolls, charges or rentals in effect and the changes proposed to be made.* See Attachment A to the annual Evaluation Report.
3. *Sample tariffs implementing the changes.* Not applicable.
4. *Balance-sheet for the most recent month available which shall be not later than nine months prior to the filing date.* Not applicable pursuant to FRP-7; only required for rate changes in excess of two percent (2%).
5. *Operating statement of revenues and expenses for twelve months ending as of the date of*

¹ See Order, dated May 1, 2025, Docket No. 2024-UA-101.

² Pursuant to FRP-7, the FRP workpapers will be provided to the Staff within 15 days of this filing.

the balance sheet. Not applicable; only required for rate changes in excess of two percent (2%).

6. *Proforma operating statement in the same form as the actual operating statement beginning with the effective date of the proposed changes (a) without giving effect to changed rates and (b) giving effect to changed rates.* Not applicable to the annual Evaluation Report.
7. *Proforma operating statement in the same form as the actual operating statement for the same period giving effect to the proposed changes in rates and adjusted for known changes in the cost of operations.* Not applicable to the annual Evaluation Report.
8. *Statement showing (a) number of current customers by classes affected by the proposed changes (b) the actual revenue under the old rates arising from each class and (c) the annual amount of the proposed increase or decrease applicable to each class.* Not applicable pursuant to FRP-7; only required for rate changes in excess of two percent (2%).
9. *Statement showing the utility's calculation of jurisdictional rate base including, if applicable, gross plant, accumulated depreciation, working capital, material and supplies, other properties and assets, accumulated deferred income taxes, customer deposits and investment tax credits.* See ATTACHMENT F (Attachment B to the annual Evaluation Report).
10. *Statement showing utility's calculation of return on rate base with and without the proposed increase.* See ATTACHMENT G (Attachments B and G to the annual Evaluation Report).
11. *Federal Income tax returns and State Income tax returns, with all required attachments and schedules, for prior three years. If a consolidated return, the portion applicable to Mississippi.* Not applicable to the annual Evaluation Report.
12. *Copy of notice to customers sent pursuant to RP 9.* See ATTACHMENT H (Notice to customers will appear on customer bills during the March 2026 billing cycle. EML will supplement the filing with copies of the notice when available.)
13. *Copy of the charter or articles of incorporation.* See ATTACHMENT I (Incorporated by reference).
14. *The amount and kinds of stock authorized, issued and outstanding.* Not applicable pursuant to FRP-7; only required for rate changes in excess of two percent (2%).
15. *The number and amount of bonds authorized and the number and amount issued.* Not applicable pursuant to FRP-7; only required for rate changes in excess of two percent (2%).
16. *The rate and amount of dividends paid during the five previous fiscal years and the amount of capital stock on which dividends were paid each year.* Not applicable pursuant to FRP-7; only required for rate changes in excess of two percent (2%).
17. *An analysis of the surplus covering the period from the close of the last calendar year for which an annual report has been filed with the Commission to the date of the balance sheet attached to the notice.* Not applicable to the annual Evaluation Report.

18. *Guidelines or directives to the public utility's presentation provided by a controlling affiliate, parent or holding company.* Not applicable to the annual Evaluation Report.
19. *Marginal cost data.* Not applicable to the annual Evaluation Report.
20. *Alternative rate design.* Not applicable to the annual Evaluation Report.
21. *Conservation effectiveness.* Not applicable to the annual Evaluation Report.
22. *A properly prepared, complete, detailed lead/lag study for the test year for the total company, Mississippi retail, other jurisdictions, and Federal Energy Regulatory Commission wholesale rates (if applicable) in support of the public utility's total working capital requirements contained therein, including all working papers in support thereof.* Not applicable to the annual Evaluation Report.
23. *An exhibit listing the names and addresses of all interested persons as defined in Rule 2.115 of the Commission's Rules of Practice and Procedure together with a certificate that the filing utility has served a notice of the filing upon each.* Not applicable to the annual Evaluation Report.
24. *The year of the last authorized major rate increase, amount of the increase and the docket number of the proceeding.* Not applicable to the annual Evaluation Report.

37. Entergy Mississippi is an electric public utility as defined in Section 77-3-3(d)(i) of the Mississippi Code, as amended, and is engaged in the business of generating, transmitting, and distributing electric power to and for the public for compensation in forty-five (45) counties in western Mississippi, having its principal place of business in Jackson, Mississippi. Entergy Mississippi's mailing address is Post Office Box 1640, Jackson, Mississippi, 39215-1640. Entergy Mississippi is a Texas limited liability company registered to do business in Mississippi.

38. Entergy Mississippi is the holder of Certificates of Public Convenience and Necessity issued in Commission Docket No. U-44 and other Dockets, by orders of the Commission beginning December 3, 1958, as supplemented from time to time, authorizing the Company's utility operations in western Mississippi.

39. Entergy Mississippi expressly reserves all of its rights insofar as any order of the Commission or any court may result in confiscatory rates that constitute deprivation of property

without due process of law and insofar as matters in this proceeding are within the exclusive jurisdiction of the Federal Energy Regulatory Commission (“FERC”), the Securities and Exchange Commission (“SEC”), or any other agency having jurisdiction over Entergy Mississippi. Entergy Mississippi’s reservation of rights is based on all applicable constitutional provisions, statutes and rules of law, including, but not limited to, the following:

- (1) The supremacy clause of the United States Constitution, Article VI, Clause 2;
- (2) The preemption doctrine;
- (3) The commerce clause of the United States Constitution, Article 1, Section 8, Clause 3;
- (4) The due process and equal protection clauses of the United States Constitution, Amendment XIV, Section 1;
- (5) The due process clause of the Mississippi Constitution, Article 3, Section 14;
- (6) The Public Utilities Holding Company Act of 1935, 15 U.S.C. Section 79 et seq., as it existed prior to its being superseded by the 2005 Energy Policy Act, and related statutes and regulations adopted by the SEC;
- (7) The Federal Power Act and statutes relating thereto, 16 U.S.C. Section 791(a), et seq., and 42 U.S.C. Section 7171, et seq., and regulations adopted by the FERC;
- (8) The Atomic Energy Act of 1954, 42 U.S.C. Section 2011, et seq., and regulations adopted by the Nuclear Regulatory Commission;
- (9) The Energy Independence and Security Act of 2007, 121 Stat. 1607 (December 19, 2007);
- (10) Other applicable federal law;
- (11) The Mississippi Public Utilities Act, Section 77-3-1, et seq., of the Mississippi Code of 1972, as amended;

(12) Article 2 of Chapter 3, Title 77, Section 77-3-101, et seq., of the Mississippi Code of 1972; and,

(13) Other applicable constitutional provisions, statutes and rules of law.

WHEREFORE, PREMISES CONSIDERED, Entergy Mississippi files the Company's Evaluation Report under Formula Rate Plan Rider Schedule FRP-7 (Third Revised) for the twelve-month period ending December 31, 2026, along with the Company's Look-back for the twelve-month period ended December 31, 2025, fully reserving EML's rights as set out herein. Entergy Mississippi prays that the Commission issue an order confirming that the Schedule FRP-7 Net Rate Adjustments set out in Attachment A to the 2026 Evaluation Report are approved as set out herein and to grant other relief consistent with this pleading and its attachments. To the extent that this filing does not meet all the technical requirements of the Commission's rules, the Company hereby respectfully moves and requests, pursuant to RP 1.102, that the noncompliance be waived by the Commission. Entergy Mississippi further prays for such other and general relief as may be required, beneficial, or needed.

This the 27th day of February 2026.

Respectfully submitted,

ENTERGY MISSISSIPPI, LLC

ATTORNEYS FOR ENTERGY MISSISSIPPI, LLC

STATE OF MISSISSIPPI

COUNTY OF HINDS

Personally appeared before me, the undersigned authority in and for the jurisdiction aforesaid, TIANNA H. RABY, who after being by me first duly sworn states that she is Vice President, Regulatory Affairs of Entergy Mississippi, LLC, and that as such is fully authorized to make this affidavit; and further states that the matters and things contained in the foregoing are true, accurate, and correct as therein set forth to the best of her knowledge, information, and belief.

TIANNA H. RABY
VICE PRESIDENT, REGULATORY AFFAIRS
ENTERGY MISSISSIPPI, LLC

SWORN TO AND SUBSCRIBED before me, this the 27th day of February 2026.

NOTARY PUBLIC

My Commission Expires:

3/2/2028

RP 6.111 CERTIFICATE OF SERVICE

I, ALICIA S. HALL, Assistant General Counsel for Entergy Mississippi, LLC, hereby
certify that on this day I have caused to be filed the foregoing with:

Katherine Collier
Executive Secretary
Mississippi Public Service Commission
Katherine.Collier@psc.ms.gov

and that on this day I have caused to be delivered a copy of the foregoing to:

Jim Beckett
Executive Director
Mississippi Public Utilities Staff
Jim.Beckett@mpus.ms.gov

Stephanie Taylor
General Counsel
Mississippi Public Service Commission
Stephanie.Taylor@psc.ms.gov

Emily Kruger
General Counsel
Mississippi Public Utilities Staff
Emily.Kruger@mpus.ms.gov

and that, in the filing of the foregoing, I have complied with RP 6 of the Commission's Public
Utilities Rules of Practice and Procedure, in accordance with the Commission's March 12, 2020
Order Temporarily Suspending Rules and Encouraging Use of the Commission's Electronic Filing
Systems.

This the 27th day of February 2026.

ALICIA S. HALL

RATE ADJUSTMENTS

The following Net Rate Adjustments will be added to the Net Monthly Rates or Net Seasonal Rates set forth in Entergy Mississippi, LLC ("EML") currently effective rate schedules identified below, or such superseding rate schedules as may be ordered by the Commission, or such other rate schedules of EML subject to the Schedule FRP that may become effective, whether or not such schedules supersede any of the rate schedules below, but not including special contracts entered into pursuant to Miss. Code Ann. Sec. 77-3-35(1) that do not specifically and explicitly incorporate this Schedule into the contract. The Net Rate Adjustments shall be effective for bills rendered on and after the first billing cycle of April 2026:

Rate Class	Rate Schedules	(A) Annual Rate Adjustments	(B) Interim Rate Adjustments	(C) Interim Capacity & Facilities Rate Adjustments	(A) + (B) + (C) Net Rate Adjustments
Residential	RS-40C, RS-40W, Other Residential Rates	\$0.03274/kWh	-\$0.00001/kWh	\$0.00892/kWh	\$0.04165/kWh
General Service	GS-301, SWH-20, IPS-26, IP-33, MP-23, Other General Service Rates	\$0.03659/kWh	-\$0.00001/kWh	\$0.00987/kWh	\$0.04645/kWh
Intermediate Gen. Svc.	B-34, CG-29	\$0.03104/kWh	-\$0.00001/kWh	\$0.00827/kWh	\$0.03930/kWh

(1) Column A1 reflects the Annual Rate Adjustments in effect March 2026.

(2) Column A2 reflects no initial 2% Change in FRP Rider Revenues resulting from the 2026 Evaluation Report.

(3) Column A3 reflects the realignment from the Interim Facilities Rate Adjustments to the Annual Rate Adjustments of assets being in-service through a full calendar year.

(4) Column B1 reflects the Interim Rate Adjustments in effect March 2026. Includes 2024 Look-back DSM True-up and RCR True-up to be returned July 2025 through June 2026.

(5) Column C1 reflects the Interim Capacity & Facilities Rate Adjustments in effect March 2026. Includes revenue requirement for the 2024 Section 22 True-up recovered April 2025 through March 2026 and 2026 Section 22 effective January 2026 and allocated over twelve months.

(6) Column C2 reflects the expiration of the 2024 Section 22 True-up recovered over the period April 2025 through March 2026.

(7) Column C3 reflects the realignment from the Interim Facilities Rate Adjustments to the Annual Rate Adjustments of assets being in-service through a full calendar year.

(8) Column C4 reflects the 2025 Section 22 True-up to be recovered over the period April 2026 through March 2027.

(9) Column A reflects the proposed Annual Rate Adjustments that will become effective April 2026.

(10) Column B reflects the approved Interim Rate Adjustments that will be in effect April 2026.

(11) Column C reflects the Interim Capacity & Facilities Rate Adjustments that will become effective April 2026.

(12) Column D reflects the proposed Net Rate Adjustments that will become effective April 2026.

Rider Schedule FRP-7 (Third Revised)
Attachment A
July 2026

RATE ADJUSTMENTS

The following Net Rate Adjustments will be added to the Net Monthly Rates or Net Seasonal Rates set forth in Entergy Mississippi, LLC ("EML") currently effective rate schedules identified below, or such superseding rate schedules as may be ordered by the Commission, or such other rate schedules of EML subject to the Schedule FRP that may become effective, whether or not such schedules supersede any of the rate schedules below, but not including special contracts entered into pursuant to Miss. Code Ann. Sec. 77-3-35(1) that do not specifically and explicitly incorporate this Schedule into the contract. The Net Rate Adjustments shall be effective for bills rendered on and after the first billing cycle of July 2026:

Rate Class	Rate Schedules	(A) Annual Rate Adjustments	(B) Interim Rate Adjustments	(C) Interim Capacity & Facilities Rate Adjustments	(A) + (B) + (C) Net Rate Adjustments

(1) Column A1 reflects the Annual Rate Adjustments in effect April 2026.

(2) Column A2 reflects cessation of the maximum initial 2% Change in FRP Rider Revenues resulting from the 2026 Evaluation Report pursuant to Section III.B.1.

(3) Column A3 reflects no change in the Annual Rate Adjustments from the 2026 Evaluation Report.

(4) Column B1 reflects the Interim Rate Adjustments in effect April 2026. Includes 2024 Look-back DSM True-up and RCR True-Up in effect July 2025 through June 2026.

(5) Column B2 reflects the expiration of the Interim Rate Adjustments resulting from the 2024 Look-back DSM True-up and RCR True-Up in effect July 2025 through June 2026.

(6) Column B3 reflects the proposed Interim Rate Adjustments resulting from the 2025 Look-back DSM True-up in effect July 2026 through June 2027.

(7) Column C1 reflects the Interim Capacity & Facilities Rate Adjustments in effect April 2026. Includes revenue requirement for 2026 Section 22 recovered January 2026 through December 2026 and 2025 Section 22 True-up to be recovered April 2026 through March 2027.

(8) Column A reflects the proposed Annual Rate Adjustments that will become effective July 2026.

(9) Column B reflects the proposed Interim Rate Adjustments that will become effective July 2026.

(10) Column C reflects the Interim Capacity & Facilities Rate Adjustments that will become effective July 2026.

(11) Column D reflects the proposed Net Rate Adjustments that will become effective July 2026.

2	Benchmark Rate of Return on Rate Base (BRORB)	Attachment D			7.69%
3	Equity Ratio Adjustment (ERADJ)	Attachment D (0.50% x (Ln 5 / Ln 8 from Att D))			0.25%
4	Performance Adjustment (PADJ)	Attachment F (Ln 6 / 10)			3.52
5	If Line 2 + 0.5% < Line 1	8.19%	FALSE	GO TO Section 2 Ln 8	
6	If Line 2 - 0.5% > Line 1	7.19%	FALSE	GO TO Section 2 Ln 9	
7	Otherwise			No Rate Change Under Section 2	
SECTION 2					
POINT OF ADJUSTMENT					
LINE NO	DESCRIPTION				
8	Point of Adjustment (POA) - Upper Band If PADJ < 2, then POA = BRORB or If 2 ≤ PADJ < 5, then POA = BRORB + (0.5% - ERADJ) - (((5 - PADJ) / 3) x (0.5% - ERADJ)) or If 5 ≤ PADJ < 9, then POA = BRORB + 0.5% - (((9 - PADJ) / 4) x ERADJ) or If PADJ ≥ 9, then POA = BRORB + 0.5%				
9	Point of Adjustment (POA) - Lower Band If PADJ < 2, then POA = BRORB - 0.5% or If 2 ≤ PADJ < 5, then POA = BRORB - ERADJ - (((5 - PADJ) / 3) x (0.5% - ERADJ)) or If 5 ≤ PADJ < 9, then POA = BRORB - (((9 - PADJ) / 4) x ERADJ) or If PADJ ≥ 9, then POA = BRORB				
SECTION 3					
RATE ADJUSTMENT					
LINE NO	DESCRIPTION	REFERENCE			
10	Difference in POA and ERORB	(Line 8 or Line 9) - Line 1			
11	Adjusted Rate Base	Attachment B, Pg 2		\$	
12	Change in Return on Rate Base	Line 10 * Line 11		\$	
13	Revenue Conversion Factor	[See Note 1 Below]			1.3548
14	Change in Retail Revenues	Line 12 * Line 13		\$	
15	Evaluation Period Retail Revenues	Attachment B, Pg. 3, Ln 1, Col. 3		\$	
16	Maximum change in Retail Revenues	Line 15 * 4.0%		\$	
17	Interim Capacity and Facilities Rate Adjustment Revenues	[See Note 2 Below]			0
18	DSM True-up	[See Note 3 Below]			(292,918)
19	Change in Rider FRP Revenues	Line 18 + (Lesser of Line 14 or Line 16) [See Note 4 Below]			(292,918)

NOTES:

- (1) The Revenue Conversion Factor = $1 / [(1 - \text{State Tax Rate})(1 - \text{Federal Tax Rate})(1 - \text{Bad Debt Tax Rate} - \text{City Tax Rate})]$.
- (2) This line shall reflect the realignment of the revenues associated with the Interim Capacity and Facilities Rate Adjustments into the Annual Rate Adjustments pursuant to Section III.D, and such realignment shall occur even if no revenue change would occur under Sections 1 and 2 above. Such realignment is revenue neutral. This line is not included in the calculation of line 19, Change in Rider FRP Revenues.
- (3) Paragraph 5 of Attachment K provides for the Demand Side Management ("DSM") true-up to be recovered from or returned to customers outside of the bandwidth formula in Sections 1 and 2 above.
- (4) Any Change in Rider FRP Revenues that is a decrease shall not be a greater decrease than the Maximum Change in Retail Revenues when taken as a negative value.

$$\text{Equity Ratio Adjustment (ER}_{ADJ}) = 0.50\% \times (\text{Common Equity} / \text{Total Capital})$$

RATE ADJUSTMENTS

The following Net Rate Adjustments will be added to the Net Monthly Rates or Net Seasonal Rates set forth in Entergy Mississippi, LLC ("EML") currently effective rate schedules identified below, or such superseding rate schedules as may be ordered by the Commission, or such other rate schedules of EML subject to the Schedule FRP that may become effective, whether or not such schedules supersede any of the rate schedules below, but not including special contracts entered into pursuant to Miss. Code Ann. Sec. 77-3-35(1) that do not specifically and explicitly incorporate this Schedule into the contract. The Net Rate Adjustments shall be effective for bills rendered on and after the first billing cycle of April 2026:

Rate Class	Rate Schedules	(A) Annual Rate Adjustments	(B) Interim Rate Adjustments	(C) Interim Capacity & Facilities Rate Adjustments	(A) + (B) + (C) Net Rate Adjustments

(1) Column A1 reflects the Annual Rate Adjustments in effect March 2026.

(2) Column A2 reflects no initial 2% Change in FRP Rider Revenues resulting from the 2026 Evaluation Report.

(3) Column A3 reflects the realignment from the Interim Facilities Rate Adjustments to the Annual Rate Adjustments of assets being in-service through a full calendar year.

(4) Column B1 reflects the Interim Rate Adjustments in effect March 2026. Includes 2024 Look-back DSM True-up and RCR True-up to be returned July 2025 through June 2026.

(5) Column C1 reflects the Interim Capacity & Facilities Rate Adjustments in effect March 2026. Includes revenue requirement for the 2024 Section 22 True-up recovered April 2025 through March 2026 and 2026 Section 22 effective January 2026 and allocated over twelve months.

(6) Column C2 reflects the expiration of the 2024 Section 22 True-up recovered over the period April 2025 through March 2026.

(7) Column C3 reflects the realignment from the Interim Facilities Rate Adjustments to the Annual Rate Adjustments of assets being in-service through a full calendar year.

(8) Column C4 reflects the 2025 Section 22 True-up to be recovered over the period April 2026 through March 2027.

(9) Column A reflects the proposed Annual Rate Adjustments that will become effective April 2026.

(10) Column B reflects the approved Interim Rate Adjustments that will be in effect April 2026.

(11) Column C reflects the Interim Capacity & Facilities Rate Adjustments that will become effective April 2026.

(12) Column D reflects the proposed Net Rate Adjustments that will become effective April 2026.

Rider Schedule FRP-7 (Third Revised)
Attachment A
July 2026

RATE ADJUSTMENTS

The following Net Rate Adjustments will be added to the Net Monthly Rates or Net Seasonal Rates set forth in Entergy Mississippi, LLC ("EML") currently effective rate schedules identified below, or such superseding rate schedules as may be ordered by the Commission, or such other rate schedules of EML subject to the Schedule FRP that may become effective, whether or not such schedules supersede any of the rate schedules below, but not including special contracts entered into pursuant to Miss. Code Ann. Sec. 77-3-35(1) that do not specifically and explicitly incorporate this Schedule into the contract. The Net Rate Adjustments shall be effective for bills rendered on and after the first billing cycle of July 2026:

Rate Class	Rate Schedules	(A) Annual Rate Adjustments	(B) Interim Rate Adjustments	(C) Interim Capacity & Facilities Rate Adjustments	(A) + (B) + (C) Net Rate Adjustments
Residential	RS-40C, RS-40W, Other Residential Rates	\$0.03274/kWh	-\$0.00002/kWh	\$0.00892/kWh	\$0.04164/kWh
General Service	GS-301, SWH-20, IPS-26, IP-33, MP-23, Other General Service Rates	\$0.03659/kWh	-\$0.00003/kWh	\$0.00987/kWh	\$0.04643/kWh
Intermediate Gen. Svc.	B-34, CG-29	\$0.03104/kWh	-\$0.00002/kWh	\$0.00827/kWh	\$0.03929/kWh
High Load Factor Svc.	HLF-7	\$0.02500/kWh	-\$0.00002/kWh	\$0.00671/kWh	\$0.03169/kWh
Large General Service	C-29, OM-31, SE-29	\$0.02602/kWh	-\$0.00002/kWh	\$0.00699/kWh	\$0.03299/kWh

- (1) Column A1 reflects the Annual Rate Adjustments in effect April 2026.
- (2) Column A2 reflects cessation of the maximum initial 2% Change in FRP Rider Revenues resulting from the 2026 Evaluation Report pursuant to Section III.B.1.
- (3) Column A3 reflects no change in the Annual Rate Adjustments from the 2026 Evaluation Report.
- (4) Column B1 reflects the Interim Rate Adjustments in effect April 2026. Includes 2024 Look-back DSM True-up and RCR True-Up in effect July 2025 through June 2026.
- (5) Column B2 reflects the expiration of the Interim Rate Adjustments resulting from the 2024 Look-back DSM True-up and RCR True-Up in effect July 2025 through June 2026.
- (6) Column B3 reflects the proposed Interim Rate Adjustments resulting from the 2025 Look-back DSM True-up in effect July 2026 through June 2027.
- (7) Column C1 reflects the Interim Capacity & Facilities Rate Adjustments in effect April 2026. Includes revenue requirement for 2026 Section 22 recovered January 2026 through December 2026 and 2025 Section 22 True-up to be recovered April 2026 through March 2027.
- (8) Column A reflects the proposed Annual Rate Adjustments that will become effective July 2026.
- (9) Column B reflects the proposed Interim Rate Adjustments that will become effective July 2026.
- (10) Column C reflects the Interim Capacity & Facilities Rate Adjustments that will become effective July 2026.
- (11) Column D reflects the proposed Net Rate Adjustments that will become effective July 2026.

ENTERGY MISSISSIPPI, LLC
RATE ADJUSTMENT REDETERMINATION FORMULA
FOR THE RATE EFFECTIVE YEAR ENDING DECEMBER 31, 2026

SECTION 1							
RETURN RANGE CHECK FOR RATE SCHEDULE FRP							
LINE NO	DESCRIPTION	REFERENCE					
1	Earned Rate of Return on Rate Base (ERORB)	Attachment B, Pg 1, Ln 3	7.64%				
2	Benchmark Rate of Return on Rate Base (BRORB)	Attachment D	7.80%				
3	Equity Ratio Adjustment (ERADJ)	Attachment D (0.50% x (Ln 5 / Ln 8 from Att D))	0.25%				
4	Performance Adjustment (PADJ)	Attachment F (Ln 6 / 10)	3.869				
5	If Line 2 + 0.5% < Line 1	8.30% FALSE		GO TO Section 2 Ln 8			
6	If Line 2 - 0.5% > Line 1	7.30% FALSE		GO TO Section 2 Ln 9			
7	Otherwise			No Rate Change Under Section 2			

SECTION 2							
POINT OF ADJUSTMENT							
LINE NO	DESCRIPTION						
8	Point of Adjustment (POA) - Upper Band If PADJ < 2, then POA = BRORB or If 2 ≤ PADJ < 5, then POA = BRORB + (0.5% - ERADJ) - (((5 - PADJ) / 3) x (0.5% - ERADJ)) or If 5 ≤ PADJ < 9, then POA = BRORB + 0.5% - (((9 - PADJ) / 4) x ERADJ) or If PADJ ≥ 9, then POA = BRORB + 0.5%						
9	Point of Adjustment (POA) - Lower Band If PADJ < 2, then POA = BRORB - 0.5% or If 2 ≤ PADJ < 5, then POA = BRORB - ERADJ - (((5 - PADJ) / 3) x (0.5% - ERADJ)) or If 5 ≤ PADJ < 9, then POA = BRORB - (((9 - PADJ) / 4) x ERADJ) or If PADJ ≥ 9, then POA = BRORB						

SECTION 3							
RATE ADJUSTMENT							
LINE NO	DESCRIPTION	REFERENCE					
10	Difference in POA and ERORB	(Line 8 or Line 9) - Line 1					
11	Adjusted Rate Base	Attachment B, Pg 2	\$				
12	Change in Return on Rate Base	Line 10 * Line 11	\$				
13	Revenue Conversion Factor	[See Note 1 Below]		1.3548			
14	Change in Retail Revenues	Line 12 * Line 13	\$				
15	Evaluation Period Retail Revenues	Attachment B, Pg. 3, Ln 1, Col. 3	\$				
16	Maximum change in Retail Revenues	Line 15 * 4.0%	\$				
17	Interim Capacity and Facilities Rate Adjustments Revenues	[See Note 2 Below]		7,076,814			
18	DSM True-up	[See Note 3 Below]					
19	Change in Rider FRP Revenues	Line 18 + (Lesser of Line 14 or Line 16) [See Note 4 Below]	\$				

NOTES:

- (1) The Revenue Conversion Factor = $1 / [(1 - \text{State Tax Rate})(1 - \text{Federal Tax Rate})(1 - \text{Bad Debt Tax Rate} - \text{City Tax Rate})]$.
- (2) This line shall reflect the realignment of the revenues associated with the Interim Capacity and Facilities Rate Adjustments into the Annual Rate Adjustments pursuant to Section III.D, and such realignment shall occur even if no revenue change would occur under Sections 1 and 2 above. Such realignment is revenue neutral. This line is not included in the calculation of line 19, Change in Rider FRP Revenues.
- (3) This line is not applicable to the 2026 Evaluation Report.
- (4) Any Change in Rider FRP Revenues that is a decrease shall not be a greater decrease than the Maximum Change in Retail Revenues when taken as a negative value.

Equity Ratio Adjustment (ER_{ADJ}) = $0.50\% \times (\text{Common Equity} / \text{Total Capital})$

BEFORE THE MISSISSIPPI PUBLIC SERVICE COMMISSION

ENTERGY MISSISSIPPI, LLC IN RE: ENTERGY MISSISSIPPI, LLC'S 2026
EC123-0082-00 FORMULA RATE PLAN FILING

2025-UN-112

DIRECT TESTIMONY

OF

KAMISHA M. QUATES

VICE PRESIDENT, RELIABILITY

ENTERGY MISSISSIPPI, LLC

FEBRUARY 2026

TABLE OF CONTENTS

I.	INTRODUCTION AND BACKGROUND	1
II.	OVERVIEW OF THE FRP SUBMITTAL	5
III.	BUILDING ON RELIABILITY THROUGH EML’S FRP	6
IV.	EML’S 2026 PLANNED CAPITAL ADDITIONS	10
V.	CUSTOMER PROGRAMS.....	20

I. INTRODUCTION AND BACKGROUND

Q1. PLEASE STATE YOUR NAME, EMPLOYER, CURRENT JOB TITLE,
AND BUSINESS ADDRESS.

A. My name is Kamisha M. Quates. I am employed by Entergy Mississippi, LLC ("Entergy Mississippi," "EML," or the "Company") as Vice President, Reliability. My business address is 308 East Pearl Street, Jackson, Mississippi 39201.

Q2. PLEASE DESCRIBE YOUR EDUCATIONAL AND PROFESSIONAL
BACKGROUND.

A. I earned a Bachelor of Science degree in Materials Engineering and a Master of Business Administration from the University of Alabama at Birmingham. My career and professional experience span more than twenty years in the electric utility industry from 2002 to present. I was employed at Southern Company, a vertically integrated electric utility with responsibility for all aspects of generation, distribution, and transmission, in addition to natural gas distribution and other services. During my time at Southern Company, my responsibilities included leading a team responsible for providing asset valuation economic studies, system planning support, and production cost analyses of existing units to support the development of a long-term generation strategy and asset retirement decisions. Prior roles included managing the renewable generation development and asset implementation team with responsibility to develop business case justification, conducting life-cycle cost analyses, and leading project development, governance, and implementation of the renewable generation portfolio and power purchase agreements ("PPAs").

1 In February 2022, I joined ESL as the Director, Regulatory and Strategic Initiatives
2 within SPO. This position focused on several key initiatives related to membership in the
3 Midcontinent Independent System Operator, Inc. ("MISO") Regional Transmission
4 Organization ("RTO"). My team ensured ETI's MISO settlements were accurate,
5 coordinated settlements with MISO and ETI, and filed any disputes with MISO; provided
6 any regulatory support for ETI filings at the PUCT related to generation or MISO
7 operations; provided MISO operations policy and procedure support for the Energy
8 Management Organization ("EMO") and Local Balancing Authority ("LBA") operations;
9 provided analytical support for coal decommissioning efforts; and provided Meter Data
10 Management Agent services for ETI as well as oversight of ETI's assets in the MISO
11 Commercial Model. Additionally, this position provided executive and strategic leadership
12 over the personnel that provided analytical, policy, and training support to the LBA and
13 EMO, as well as broader regulatory compliance for SPO.

14 In February 2025, I was named to my current role as Vice President, Reliability.
15

16 Q3. WHAT ARE YOUR CURRENT JOB RESPONSIBILITIES AS VICE PRESIDENT,
17 RELIABILITY?

18 A. I am responsible for overseeing all aspects of electric service and reliability to
19 approximately 459,000 retail electric customers that are served by EML in parts of 45
20 counties in western Mississippi. My specific responsibilities include, but are not limited to,
21 overseeing or managing safety, operations, construction, reliability improvement, customer
22 service, engineering, asset planning, distribution dispatching, meter services, contract

1 new customer growth in a way that strengthens the grid efficiently. The Company's
2 commitments support reliability and reasonable rates for *all* customers while also
3 maintaining EML's financial health as the Company faces the opportunities and challenges
4 of new customer growth and economic development. I also discuss EML's commitment
5 to its customers as evidenced through certain customer programs.

6
7 Q6. PLEASE IDENTIFY THE OTHER WITNESSES FILING TESTIMONY WITH THE
8 FRP SUBMITTAL AND THE TOPICS COVERED IN THEIR TESTIMONY.

9 A. The other witnesses are as follows:

10 Chris E. Barrilleaux – Mr. Barrilleaux is the Senior Manager, Regulatory Filings. Mr.
11 Barrilleaux discusses in detail the mechanics of Schedule FRP and the results of the 2026
12 Evaluation Report and the 2025 Look-back, including the drivers of those results. He also
13 discusses certain technical details of the 2026 Evaluation Report, including the known and
14 measurable adjustments, and the 2025 Look-back.

15 David A. Gibbs – Mr. Gibbs is Director, Regulatory Affairs. Mr. Gibbs discusses Entergy
16 Mississippi's request for an order from the Commission regarding the treatment of nuclear
17 production tax credits ("PTCs"). He also discusses that the Company has included in the
18 2026 Evaluation Report a known and measurable revenue increase to occur in 2026 and
19 that absent such known and measurable revenue increase, EML's 2026 Evaluation Report
20 would result in an Annual Rate Adjustment increase for customers. Finally, Mr. Gibbs
21 discusses bill impacts for customers.

1 **II. OVERVIEW OF THE FRP SUBMITTAL**

2 Q7. PLEASE PROVIDE AN OVERVIEW OF ENTERGY MISSISSIPPI'S 2026 FRP
3 SUBMITTAL.

4 A. EML's 2026 Evaluation Report and 2025 Look-back submittal is the eleventh filing under
5 Schedule FRP-7 and its predecessor Schedule FRP-6. The Company is submitting both an
6 Evaluation Report for the twelve-month period ending December 31, 2026 ("2026
7 Evaluation Report") and a look-back for the twelve-month period ended December 31,
8 2025 ("2025 Look-back"), containing accounting and operational data based on actual
9 results for the 2025 calendar year, as adjusted pursuant to provisions of Schedule FRP.

10 As described in more detail in the direct testimony of Mr. Barrilleaux, the
11 Company's Look-back Benchmark Rate of Return on Rate Base of 7.69%, which was the
12 Benchmark Rate of Return on Rate Base reflected in the Joint Stipulation approved by the
13 Commission's June 17, 2025 Order, establishes a Bandwidth from 7.19% to 8.19%. The
14 Company's Look-back Earned Rate of Return on Rate Base is 8.05% and falls within the
15 Bandwidth. Because the Look-back Earned Rate of Return on Rate Base of 8.05% is within
16 the Bandwidth, there is no Change in Rider FRP Revenues from the Bandwidth calculation,
17 although there is a small outside-the-bandwidth item – the DSM True-up – that reflects an
18 over-recovery and results in a reduction in rates, as described by Mr. Barrilleaux.

19 For the 2026 Evaluation Report, the Company's Benchmark Rate of Return on Rate
20 Base is 7.80%, which establishes a Bandwidth from 7.30% to 8.30%. The Company's
21 Earned Rate of Return on Rate Base is 7.64%, which is within the Bandwidth.
22 Accordingly, Schedule FRP-7 provides that the Bandwidth Calculation produces no
23 change in the Annual FRP Rate Adjustments.

1 management, and emergency restoration for the Company's transmission and distribution
2 systems.

3
4 Q4. HAVE YOU TESTIFIED BEFORE THIS COMMISSION, OR IN OTHER
5 REGULATORY PROCEEDINGS, PREVIOUSLY?

6 A. I have not previously testified before the Mississippi Public Service Commission (the
7 "Commission"). I have, however, filed written testimony on behalf of Entergy Texas, Inc.
8 ("ETI") before the Public Utility Commission of Texas ("PUCT"), in Docket No. 57134,
9 *Application of Entergy Texas, Inc. for Authority to Reconcile Fuel and Purchased Power*
10 *Costs*. I also testified in PUCT Docket No. 54057, *Application of Entergy Texas, Inc. for*
11 *Authority to Reconcile Fuel and Purchased Power Costs*.

12
13 Q5. WHAT IS THE PURPOSE OF YOUR TESTIMONY AS PRESENTED HEREIN?

14 A. The purpose of my testimony is to support the Company's 2026 submittal under Formula
15 Rate Plan Rider Schedule FRP-7 (Third Revised) ("Schedule FRP-7," "Schedule FRP,"
16 "Formula Rate Plan" or "FRP"). Accordingly, I provide an overview of EML's 2026
17 Evaluation Report and 2025 Look-back Evaluation Report. In doing so, I address some of
18 the same topics that EML has previously discussed in testimony before the Commission,
19 including the reliability-driven infrastructure improvements that EML is continuing to
20 make for the benefit of our customers.

21 I highlight a new, transformative chapter for the Company: Superpower
22 Mississippi. As I will discuss in more detail in my testimony, Superpower Mississippi
23 incorporates Entergy Mississippi's reliability plan to ensure that all customers benefit from

1 As further discussed in the testimonies of Mr. Barrilleaux and Mr. Gibbs, because
2 Schedule FRP-7 does not produce a change in the Annual FRP Rate Adjustment, there is
3 no corresponding bill impact to customers, except for the small decrease related to the
4 outside-the-bandwidth item described by Mr. Barrilleaux.

5
6 **III. BUILDING ON RELIABILITY THROUGH EML'S FRP**

7 Q8. DISCUSS THE COMPANY'S RECENT HISTORY OF MAKING RELIABILITY
8 IMPROVEMENTS FOR CUSTOMERS, WHILE MANAGING THE RATE IMPACTS
9 OF THOSE IMPROVEMENTS.

10 A. In 2014, Entergy Mississippi proposed its Bright Future plan to the Commission, a time
11 when the Company was both facing major changes in the industry and could point to
12 specific ways in which EML had prepared to meet those challenges. EML was facing a
13 period of rapid industry transition and modernization. The Company was also managing
14 storm restoration costs, new environmental regulations, and mandatory NERC reliability
15 standards. To meet these challenges, the Company had, among other efforts, acquired two,
16 natural gas-fired generators (Attala and Hinds), completed upgrades at Grand Gulf Nuclear
17 Station, acquired additional Grand Gulf capacity from Entergy Arkansas, LLC, and
18 successfully joined MISO.

19 EML also proposed to modernize its rates and rate structure to timely reflect both
20 the costs and benefits of the developments it outlined so that the Company would have the
21 capital to support necessary investment in utility infrastructure, remain a strong partner in
22 Mississippi's economic development efforts, and respond to the transformative challenges
23 facing the industry. EML was also transparent with the Commission, noting that the steps

1 the Company took to meet the ever-growing challenge of providing an ample supply of
2 affordable, reliable electricity to customers then and into the future, brought a rate increase
3 initially, but would result in substantial, long-term benefits and savings to customers in the
4 coming years.

5 For over a decade, EML has upheld its promises to customers, making capital
6 improvements driven by aging infrastructure, evolving customer expectations, and
7 economic development opportunities. In addition to Attala and Hinds, mentioned above,
8 Entergy Mississippi has also acquired the Choctaw unit, adding to its modern, efficient,
9 and cleaner combined cycle generating resources, and to address capacity and energy needs
10 for customers. These units, combined, now account for approximately 1,720 MW of
11 Entergy Mississippi's generating capacity and provide important base-load and load-
12 following capabilities to meet customers' needs. In 2025, the Commission approved EML
13 acquiring an additional approximate 209 MW of Grand Gulf capacity, and related energy,
14 from Entergy Louisiana, LLC. *See* Docket 2024-UN-112. EML's investment in its
15 approximate 3,042 line miles of transmission reflects measurable reliability progress, and
16 support for economic development, with fewer customer outages and faster restoration
17 times for outages that occur on EML's transmission lines, as further described in the
18 Company's November Transmission and Distribution ("T&D") Plan filings.

19 The Company's plant in service growth from 2015 to 2025 demonstrates the
20 Company's commitment to capital improvements for the benefit of customers. EML's
21 plant in service as of December 31, 2015, was \$4.1 billion. As of December 31, 2025,

1 EML's plant in service was \$8.4 billion.¹ As EML looks forward to 2026, the Company
2 expects to make approximately \$[REDACTED] million in infrastructure improvements, a
3 significant portion of which are from distribution capital additions, and the Company will
4 make these improvements without increasing its 2026 Annual Rate Adjustments.

5
6 Q9. WHAT IS ENTERGY MISSISSIPPI'S PLAN TO CARRY FORWARD THIS
7 COMMITMENT TO RELIABILITY AND OTHER IMPROVEMENTS?

8 A. In September 2025, the Company announced that it was undertaking a new multi-year
9 reliability strategy, included in its "Superpower Mississippi" strategy. The goals of the
10 reliability strategy are to reduce customer interruptions ("CIs") by 50%, improve day-to-
11 day service delivery, optimize work management, and remain focused on continuous
12 improvement. As of December 31, 2025, EML's System Average Interruption Frequency
13 Index ("SAIFI") was 1.45, and EML's System Average Interruption Duration
14 Index ("SAIDI") was 323.7. As defined by FRP-7 (as may be revised from time to time),
15 Attachment F, interruptions of service to EML's retail customers longer than 5 minutes in
16 duration are "includable service interruptions," except for those excluded by FRP-7. EML
17 follows the IEEE 1366 Standard for Electric Power Distribution Reliability.

18 The Superpower Mississippi reliability strategy involves the development of
19 prioritized reliability work plans for the Company's recurring distribution programs to
20 address the two leading CI causes, vegetation and equipment failures, to improve overall
21 distribution performance. Another key driver of distribution performance that the

¹ This amount is higher than the per book net plant in service reported in the 2025 Look-back, which uses average balances pursuant to the FERC Method for calculating net plant in service – thirteen-month averages for power generation and transmission and beginning ending averages for distribution and general.

1 reliability strategy considers is customer density and customer experience. The reliability
2 strategy uses new technology to analyze equipment performance data, customer outage and
3 survey data, and vegetation data, including satellite imagery, to produce targeted, efficient
4 reliability work plans that use the tools EML has used successfully to mitigate specific
5 outage causes.

6 The reliability strategy indicates an initial prioritization from 2026 to 2028 of work
7 in the Jackson, Clinton, and Brookhaven networks (“JCB Networks”). The reliability
8 strategy, however, also targets work throughout other portions of EML’s distribution
9 system. For example, in 2026, EML expects to target 18 geospatial sections in the JCB
10 Networks and 9 geospatial sections in the other networks. After 2028, EML expects an
11 increase in work in its non-JCB networks, while continuing to work throughout its
12 distribution system.

13
14 Q10. CONSIDERING THE RELIABILITY IMPROVEMENTS DESCRIBED ABOVE, HOW
15 DOES EML’S AVERAGE RESIDENTIAL RATE COMPARE TO AVERAGE
16 NATIONAL RATES?

17 A. EML’s average residential rate continues to be below national averages.²

²The last available data from the U.S. Energy Information Administration (as of February 2026) shows November 2025 sales and revenue data.

IV. EML'S 2026 PLANNED CAPITAL ADDITIONS

Q11. WHAT ARE EML'S PLANNED CAPITAL ADDITIONS REFLECTED IN THE 2026 EVALUATION REPORT?

A. In 2026, EML plans to expend approximately \$[REDACTED] million on its infrastructure, a significant portion of which is from distribution plant additions, as shown in the confidential table below.

2026 Capital Additions Included in Adjustment AJ05A – Plant Transfers	
Capital Description	Capital Additions Amount (\$)
Production Plant	[REDACTED]
Transmission Plant	[REDACTED]
Distribution Plant	[REDACTED]
General Plant	[REDACTED]
Total Capital Additions	[REDACTED]

I summarize the major capital additions, and further details will be provided in Attachment I to the Evaluation Report.

Q12. WHAT IS DRIVING THE DISTRIBUTION CAPITAL ADDITIONS FOR 2026?

A. The majority the 2026 distribution capital additions, approximately \$[REDACTED] million, are attributable to Recurring Distribution Programs ("RDPs"). The RDPs include the programs that are part of the Superpower Mississippi commitment I discussed above; they also include the Distribution Revenue program, which is driven by customer activity; the Distribution Storm program; and the Distribution Failure/Emergency program.

1 Q13. PLEASE DESCRIBE THE DISTRIBUTION REVENUE PROGRAM.

2 A. The Distribution Revenue program captures the construction of distribution facilities to
3 provide electric service to customers. Such facilities can range from a large underground
4 installation for a new subdivision to extending a single overhead service to a residential
5 construction site. Although historical spending is important in developing a spending
6 target for this program, economic projections are also taken into account. In 2026, EML
7 expects Distribution Revenue program capital additions to be approximately \$[REDACTED] million.
8 An example of a Distribution Revenue program project to be completed in 2026 is the
9 Yandell Road project in Madison County. This project, which has a cost of \$[REDACTED] million,
10 will increase conductor capacity to serve multiple planned subdivisions that, in total, have
11 over 1,000 residential lots.

12
13 Q14. IN 2026, WHAT IS THE EXPECTED AMOUNT OF DISTRIBUTION STORM
14 CAPITAL ADDITIONS?

15 A. For 2026, EML has planned for distribution storm capital additions of \$[REDACTED] million. This
16 amount is consistent with EML's experience with increasing storm activity. For reference,
17 in its 2023 Evaluation Report, EML reflected \$25.2 million for distribution storm capital
18 addition, but actual distribution storm capital additions turned out to be much more, \$109.9
19 million. In its 2024 FRP Submittal, EML noted that the prior three years of distribution
20 storm capital additions had averaged \$91 million, and EML conservatively proposed
21 distribution storm capital additions of \$61.4 million based on its experience. In the 2025
22 Evaluation Report, EML proposed distribution storm capital additions of \$61.2 million.

1 The 2026 level of distribution storm capital additions is in line with previous amounts
2 included in EML's recent Evaluation Reports.

3
4 Q15. IS EML REQUESTING RECOVERY OF AMOUNTS SPECIFICALLY INCURRED BY
5 THE COMPANY AS A RESULT OF THE SEVERE WINTER STORM WHICH BEGAN
6 ON JANUARY 23, 2026, DECLARED A MAJOR DISASTER BY FEMA ON
7 FEBRUARY 6, 2026, AND WHICH CAUSED DAMAGE TO EML FACILITIES
8 THROUGHOUT THE STATE ("2026 WINTER STORM")?

9 A. No. The proposed distribution capital additions referenced in the prior question are
10 planned to address storm capital needs not related to a major disaster. EML will update
11 the Commission soon regarding its plans for cost recovery related to the 2026 Winter
12 Storm.

13
14 Q16. HAVE EML'S PREVIOUS STORM HARDENING INVESTMENTS PRODUCED
15 BENEFITS FOR CUSTOMERS?

16 A. Yes. For example, as the Commission may recall, the sharp increase in 2023 actual storm
17 expenditures related, in part, to the March 2023 tornado that destroyed nearly 300 homes
18 and damaged more than 700 power poles in Rolling Fork, Mississippi. EML has since
19 rebuilt that area's power grid with stronger infrastructure, including replacing the older,
20 wooden poles destroyed by the tornado with larger, stronger poles. During the 2026 Winter
21 Storm, those improvements benefited customers because Rolling Fork's grid was more
22 resilient to the severe winter weather, which allowed EML's storm response teams to
23 restore power to customers quickly, safely, and efficiently. EML currently estimates that

69 poles in or near Rolling Fork required replacement after the 2026 Winter Storm. Of these 69 poles, 66 were old (not replaced after the 2023 tornado). Only 3 of the new poles needed to be replaced after the 2026 Winter Storm.

Q17. WHAT IS THE AMOUNT OF CAPITAL ADDITIONS ASSOCIATED WITH THE FAILURE/EMERGENCY RECURRING PROGRAM?

A. The 2026 planned capital additions associated with this program total \$[REDACTED] million. This program targets the replacement of failed or damaged equipment not associated with storms. These capital additions continue to be primarily driven by trees falling from outside the right-of-way and overhanging limbs following the severe drought of 2023 (along with the pine beetle infestation) that affected over 12,500,000 pine trees in Mississippi as of September 2024. In 2024 and continuing into 2025, EML saw a significant increase in customer interruptions caused by trees falling from outside the right-of-way and overhanging limbs. After filing its 2025 T&D Plan, EML advised the Commission in its 2025 FRP submittal that the Company had decided to increase its vegetation management spending in 2025 to address the significant increase in the number of customer interruptions caused by dead trees. The current 2026 planned spending level is greater than the revised 2025 planned spending level with the largest spending increases expected in cycle trimming and hazard tree/skylining costs, consistent with the new reliability strategy discussed above. With the new reliability strategy, future vegetation management will become more targeted and more effective using satellite imagery. In 2025, EML conducted satellite scans to identify Hazard Trees with 95% accuracy. The Company is incorporating this Hazard Tree information into its geospatial analyses to

1 prioritize its vegetation management activities with its other reliability improvement work.
2 Additionally, EML plans to address in geospatial sections selected for work vegetation
3 needs identified through its terrestrial inspections. This would allow the Company to utilize
4 resources that are already in the area to perform additional vegetation management work,
5 such as out-of-cycle trims targeting certain spans or circuits, to maximize efficiency of
6 those resources.

7
8 Q18. YOU MENTIONED EARLIER THAT ENTERGY MISSISSIPPI IS BEGINNING TO
9 IMPLEMENT ITS SUPERPOWER MISSISSIPPI RELIABILITY STRATEGY. HOW
10 IS THAT STRATEGY AFFECTING THE COMPANY'S RECURRING
11 DISTRIBUTION PROGRAMS?

12 A. EML's new reliability strategy represents a major change to how the Company plans its
13 Distribution Reliability program, which targets work based on specific outage drivers, and
14 Distribution Infrastructure program, which replaces aging and failing equipment before the
15 equipment causes an outage. The strategy employs a new planning approach based on
16 geospatial technology and data so that EML can target and group infrastructure
17 improvements and vegetation management solutions to produce the most reliability benefit
18 for customers. 2026 will be a transition year to this new reliability strategy. EML plans to
19 complete previously planned reliability projects early in 2026 and transition to projects
20 using the new geospatial approach during the second quarter of 2026. In 2025, EML
21 completed projects through these two programs with a total cost of \$28.0 million. In 2026,
22 EML expects to complete projects with a total cost of over \$■ million.

STATE OF MISSISSIPPI

COUNTY OF HINDS

Personally appeared before me, the undersigned authority in and for the jurisdiction aforesaid, KAMISHA M. QUATES, who after being by me first duly sworn states that she is Vice President, Reliability of Entergy Mississippi, LLC, and that as such is fully authorized to make this affidavit; and further states that the matters and things contained in the foregoing Direct Testimony are true, accurate, and correct as therein set forth to the best of her knowledge, information, and belief.

KAMISHA M. QUATES
VICE PRESIDENT, RELIABILITY
ENTERGY MISSISSIPPI, LLC

SWORN TO AND SUBSCRIBED before me, this the 19 day of February 2026.

NOTARY PUBLIC

My Commission Expires:

 A. Past Nuclear PTCs (2024)..... 4

 B. Future Nuclear PTCs (2025 Going Forward) 7

III. IMPACT OF LARGE CUSTOMER REVENUE 12

IV. RESIDENTIAL CUSTOMER BILL IMPACTS..... 13

LIST OF EXHIBITS

EXHIBIT DAG-1	2024 Nuclear PTC Transaction Agreements (Confidential, Highly Sensitive Protected Materials)
EXHIBIT DAG-2	Unit Power Sales Agreement Attachment H

I. INTRODUCTION AND BACKGROUND

Q1. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is David A. Gibbs. I am employed by Entergy Mississippi, LLC ("Entergy Mississippi," "EML," or the "Company") as Director, Regulatory Affairs. My business address is 308 East Pearl Street, Jackson, Mississippi 39201.

Q2. PLEASE DESCRIBE YOUR EDUCATIONAL AND PROFESSIONAL BACKGROUND.

A. I have a Bachelor of Professional Accountancy degree and a Master of Professional Accountancy degree from Mississippi State University. I am a Certified Public Accountant licensed to practice in Mississippi. I began my career with Entergy Corporation ("Entergy") in 1999 as an analyst in Entergy's nuclear business development group. In 2006, I was promoted to Director, Business Services for Entergy's unregulated nuclear power plant fleet. In that role, I provided financial oversight for the revenue, operations and maintenance costs, and capital expenditures for the fleet. In 2019, I began supporting Entergy Mississippi, LLC as Director of Finance. Since November 2023, I have been Director, Regulatory Affairs for Entergy Mississippi, LLC.

Prior to my employment with Entergy, I worked for Davenport, Holliday and Spring, CPAs, for approximately one year. I began my career in public accounting at KPMG LLP in 1995.

1 Q3. WHAT IS YOUR CURRENT POSITION AT ENTERGY MISSISSIPPI, AND WHAT
2 ARE YOUR JOB RESPONSIBILITIES IN THAT POSITION?

3 A. I am currently the Director of Regulatory Affairs. In that position, I provide oversight for
4 EML's compliance requirements for its formula rate plan filings, rider filings, and other
5 required submittals, among other responsibilities to support EML Regulatory Affairs.
6

7 Q4. IS THIS THE FIRST TIME YOU HAVE FILED WRITTEN TESTIMONY WITH THE
8 MISSISSIPPI PUBLIC SERVICE COMMISSION ("COMMISSION")?

9 A. Yes.
10

11 Q5. WHAT IS THE PURPOSE OF YOUR TESTIMONY AS PRESENTED?

12 A. I am providing testimony to support Entergy Mississippi's request for an order from the
13 Commission regarding the treatment of past (2024) and future (2025 and going forward)
14 nuclear production tax credits ("PTCs"). I am also providing testimony about the impact
15 of large customer revenues and customer bill impacts.
16

17 **II. NUCLEAR PRODUCTION TAX CREDITS**

18 Q6. WHAT ARE NUCLEAR PTCs, AND HOW DO EML CUSTOMERS BENEFIT FROM
19 THEM?

20 A. The Inflation Reduction Act ("IRA") of 2022 created a tax credit for electricity produced
21 at qualified nuclear power facilities and sold by a taxpayer to an unrelated person in tax
22 years beginning after December 31, 2023, and before January 1, 2033.¹ This IRA creation

¹ See I.R.C. § 45U.

1 is the “zero-emission nuclear power production credit,” also called nuclear PTCs. EML
2 customers are entitled to the economic benefit of a portion of the nuclear PTCs generated
3 by the Grand Gulf Nuclear Station because of EML’s entitlement to the capacity, and
4 specifically the related energy (since the nuclear PTCs are tied to production) of the Grand
5 Gulf Nuclear Station.

6 As the Commission is aware, Grand Gulf Nuclear Station is located in Port Gibson,
7 Mississippi and is the largest power plant in MISO Load Resource Zone 10, which is
8 Entergy Mississippi’s MISO load zone. The plant began operations in 1985 and through
9 life-of-unit contracts with affiliate companies, provides Entergy Mississippi with
10 approximately 700 MW of generation capacity and energy. Grand Gulf is the only power
11 plant that uses nuclear fuel in Entergy Mississippi’s generation fleet.

12
13 Q7. YOU MENTIONED THE ECONOMIC BENEFIT OF THE NUCLEAR PTCs BEING
14 BASED ON EML’S ENTITLEMENT TO GRAND GULF CAPACITY AND RELATED
15 ENERGY. WILL EML CUSTOMERS RECEIVE AN INCREASED SHARE OF
16 NUCLEAR PTCs BENEFITS STARTING WITH THE EFFECTIVE DATE THAT THE
17 COMMISSION APPROVED THE TRANSFER OF ADDITIONAL ENTITLEMENT
18 FROM ENTERGY LOUISIANA, LLC (“ENTERGY LOUISIANA”) TO EML?

19 A. Yes, EML customers will receive the economic benefit of the nuclear PTCs from the
20 energy associated with this transfer (*see* Docket 2024-UN-112) starting with the
21 Commission’s approved effective date of the transfer, which was January 1, 2025. This
22 means that the benefit of the nuclear PTCs associated with 2024 Grand Gulf Power Station
23 energy production will be subject to pre-transfer SERI allocations, but all nuclear PTCs

1 associated with energy produced by Grand Gulf Power Station on and after January 1, 2025
2 will include this additional entitlement for EML customers.

3
4 Q8. DESCRIBE THE NUCLEAR PTCs BENEFIT AVAILABLE TO EML CUSTOMERS.

5 A. I will classify the nuclear PTCs benefit available to EML customers as (1) "past," meaning
6 nuclear PTCs for year 2024 production, and (2) "future," meaning nuclear PTCs for 2025
7 going forward.

8
9 **A. Past Nuclear PTCs (2024)**

10 Q9. DISCUSS THE MONETIZATION OF PAST NUCLEAR PTCs.

11 A. In 2025, Entergy pursued an opportunity to monetize the 2024 nuclear PTC credits for the
12 benefit of customers. Entergy Services, LLC made a FERC filing, which was approved
13 and is discussed in detail, below. Although there was insufficient time to make a filing
14 with the Commission before closing the transaction, EML discussed the planned
15 transaction with the Commission and the Mississippi Public Utilities Staff. As a result of
16 this transaction, EML received \$71.2M related to EML's entitlement to the 2024
17 production of the Grand Gulf Nuclear Station.

18
19 Q10. YOU MENTIONED THE MONETIZATION OF NUCLEAR PTCs. HOW DOES
20 MONETIZATION WORK?

21 A. Under certain provisions enacted by the IRA, the value of nuclear PTCs can be captured
22 through either: (1) transferring (i.e., selling) the nuclear PTCs to a third party, or (2)
23 offsetting the taxpayer's federal income tax liability. For past nuclear PTCs, EML assessed

1 that a sale to a third party was expected to provide more benefits to EML customers than
2 using the PTCs to offset Entergy's consolidated federal income tax liability. As I will
3 discuss later in my testimony, EML continues to assess that it is likely to receive more
4 value for customers by monetization through a transfer/sale.

5
6 Q11. WHAT WERE THE BASIC TERMS OF THE SALE FOR PAST NUCLEAR PTCs?

7 A. For the nuclear PTCs that were generated by Grand Gulf in 2024, System Energy agreed
8 to a market-based sales price with the third-party purchasers of the PTCs. System Energy
9 received cash totaling \$133.8 million. System Energy also agreed to indemnify the third-
10 party purchasers of the PTCs for identified costs in the event that the IRS issues a
11 determination that denies or reduces the value of some or all of the PTCs. These identified
12 costs include taxes, additions or increases to tax, or interest or penalties assessed or
13 imposed by the IRS, plus reasonable third-party attorney or advisor fees that arise from an
14 IRS determination that denies or reduces the value of some or all of the PTCs. This
15 indemnification language is set forth in section 6.1 of the highly sensitive confidential
16 agreements, which are attached as Confidential Exhibit DAG-1.

17
18 Q12. PLEASE DESCRIBE THE FERC PROCEEDING ADDRESSING THE ABOVE-
19 DESCRIBED SALE.

20 A. Because the entitlement to Grand Gulf energy and capacity is allocated to specified Entergy
21 Operating Companies by FERC-jurisdictional tariffs (in particular, the Unit Power Sales
22 Agreement ("UPSA")) and because the existing tariff did not previously specify the
23 ratemaking treatment for PTCs that were sold or transferred by System Energy, Entergy

1 Services, LLC made a filing at FERC in FERC Docket No. ER25-2890 requesting
2 modification of the UPSA to clarify how the risks and benefits of System Energy's sale of
3 the PTCs would be allocated to wholesale purchasers under the UPSA. This proposal was
4 subsequently amended on October 10, 2025, and accepted (as amended) by the FERC on
5 December 9, 2025. *System Energy Res., Inc.*, 193 FERC ¶ 61,195 (2025). Pursuant to the
6 proposed UPSA revisions, the net benefit of the nuclear PTCs subject to the UPSA would
7 be paid to wholesale customers within 30 days of the receipt of cash from the sale of the
8 nuclear PTCs or a FERC order accepting the UPSA tariff revisions. Also, under the
9 proposed UPSA revisions, the deferred tax asset (*i.e.*, asset ADIT) representing the PTCs
10 and any associated FIN 48 liability are to be excluded from FERC ratemaking. This is
11 consistent with the fact that as soon as the nuclear PTCs are monetized, the UPSA provides
12 for the net benefits of that sale to be transferred to System Energy's wholesale customers,
13 leaving any retail rate making treatment to the respective retail regulators of those
14 customers. If the IRS determines that Entergy is unable to recognize all or a portion of the
15 nuclear PTCs, the cash initially paid to the purchasing operating company (in this case,
16 EML) for the nuclear PTCs, plus indemnification costs, will promptly be flowed back to
17 System Energy through the UPSA. *See* UPSA, Attachment H, Effective December 9, 2025
18 which is attached as Exhibit DAG-2.

1 Q13. WHAT OTHER KEY TERMS WOULD YOU LIKE TO HIGHLIGHT FOR THE
2 COMMISSION THAT ARE EXPECTED TO APPLY TO FUTURE
3 TRANSACTION(S)?

4 A.

19 **B. Future Nuclear PTCs (2025 Going Forward)**

20 Q14. DISCUSS THE "FUTURE" NUCLEAR PTCs.

21 A. I include 2025 nuclear PTCs with future-year nuclear PTCs because, although EML
22 already knows the energy production of the Grand Gulf Nuclear Station for 2025, Entergy
23 has not yet transacted with a third-party to monetize these nuclear PTCs. EML currently

1 estimates that EML customers will benefit from 2025 PTCs expected to be purchased by a
2 third-party for approximately \$[REDACTED] [REDACTED] \$[REDACTED], which represents an estimate that accounts
3 for current market conditions and transaction costs. [REDACTED]

4 [REDACTED]

5 [REDACTED]

6 [REDACTED]

7 [REDACTED]

8 [REDACTED]

9 [REDACTED]

10 [REDACTED] EML is not able to provide an estimate for the value of nuclear PTCs for
11 production years 2026 and beyond, because those amounts will be based on both actual,
12 yet-to-be determined production from, and MISO revenues received for, the Grand Gulf
13 Nuclear Station, as well as the market value of the nuclear PTCs.

14
15 Q15. DESCRIBE THE BASIC TERMS OF A FUTURE SALE THAT WOULD BENEFIT
16 CUSTOMERS, SPECIFICALLY NOTING ANY TIMING SENSITIVITIES FOR THE
17 SALE OF 2025 NUCLEAR PTCs.

18 A. The 2025 nuclear PTC sale proceeds must be paid in cash prior to the filing of Entergy's
19 2025 consolidated federal income tax return, which is no later than October 15, 2026.

4 [REDACTED]
5
6 Q17. IS EML REQUESTING THE SAME RETAIL REGULATORY RATE TREATMENT
7 FOR PAST AND FUTURE NUCLEAR PTCs AND, IF SO, WHAT IS THAT REQUEST?

8 A. Yes, EML is requesting consistent regulatory treatment for all nuclear PTCs, as EML
9 believes that regulatory treatment produces the greatest benefits for customers.
10 Specifically, EML is seeking an order from the Commission regarding the treatment of the
11 benefit of nuclear PTCs whereby EML, rather than customers, will bear the risks of
12 indemnification described above. While EML bears this risk, the Company proposes that
13 it will wait to provide the benefits of the nuclear PTCs to customers until after the IRS
14 makes a final determination on the recognition of the nuclear PTCs that Entergy claimed
15 with respect to Grand Gulf. If the IRS does not allow any value for the nuclear PTCs,
16 customers will not receive any benefits. However, customers will also not be responsible
17 for any of the resulting indemnification costs. If and when the IRS allows recognition of
18 all or a portion of the nuclear PTCs, EML and the Commission, in consultation with the
19 Staff, will mutually agree upon a ratemaking treatment and timeline for flowing back the
20 benefits of these nuclear PTCs to customers. Such benefits will include a carrying charge
21 at a rate equal to the Company's average cost of debt, with such debt rate to be determined
22 by EML's debt rate in its current Formula Rate Plan filing. The average cost of debt is the
23 appropriate measure for carrying charges because the risk associated with an adverse IRS

1 determination is being borne by the Company. The carrying charge will be determined
2 based on the net cash benefits from the portion of the nuclear PTCs allowed by the IRS,
3 and will be calculated from the date such cash benefits were received by EML to the date
4 of the IRS determination.

5
6 Q18. WHAT IS THE COMPANY'S PROPOSED ACCOUNTING TREATMENT FOR
7 NUCLEAR PTCs?

8 A. Based on the uncertainty involving the calculation of nuclear PTCs, Entergy recognized
9 and recorded the 2024 nuclear PTCs as of June 30, 2025, and Entergy recognized and
10 recorded the 2025 nuclear PTCs as of December 31, 2025. The Company accrued a
11 liability for the net cash proceeds from the PTCs and potential IRS interest and penalties
12 from the end of the 2024 tax year until the IRS makes its determination. EML plans to
13 account for nuclear PTCs similarly for future years. Since EML will bear the risk
14 associated with the nuclear PTCs, this liability shall be excluded from rate base for all rate
15 making purposes.

16 As discussed above, if the IRS determines that Entergy is unable to recognize all or
17 a portion of the nuclear PTCs, customers would not receive any benefits related to such
18 portion of the nuclear PTCs. However, because of EML's proposed regulatory treatment,
19 customers would not be responsible for any of the indemnification costs or interest thereon.
20 EML's proposal highlights an important advantage for customers. By waiting to provide
21 the benefit of the nuclear PTCs until the IRS issues a favorable determination, customers
22 avoid the risk of any bill impact for the costs that would result from an unfavorable IRS
23 determination.

1 Q19. ASSUMING THE IRS ALLOWS RECOGNITION OF NUCLEAR PTCs, WHAT
2 TIMELINE DOES EML PROPOSE FOR FLOWING BACK BENEFITS TO
3 CUSTOMERS?

4 A. At the earliest, EML is proposing providing the benefits of nuclear PTCs to customers after
5 a favorable IRS determination. Upon a favorable IRS determination, EML would
6 recognize a regulatory liability in the determination of rate base for the portion of nuclear
7 PTCs that had not yet been returned to customers. This would effectively provide
8 customers with a WACC return on the unreturned portion of nuclear PTCs from the time
9 of the IRS determination until the full value of IRS-allowed nuclear PTCs has been
10 provided to customers. This is important because, as discussed above, it is EML rather than
11 customers bearing indemnification risks while that determination is pending. And again,
12 if and when the IRS allows recognition of all or a portion of the nuclear PTCs, EML and
13 the Commission, in consultation with the Staff, will mutually agree upon a ratemaking
14 treatment and timeline for flowing back the benefits of these nuclear PTCs to customers.
15

16 III. IMPACT OF LARGE CUSTOMER REVENUE

17 Q20. IN YOUR ROLE AS DIRECTOR, REGULATORY AFFAIRS, ARE YOU AWARE
18 WHETHER EML CAN RECOGNIZE THE IMPACT OF CERTAIN DEVELOPMENTS
19 IN 2026 IN ITS 2026 EVALUATION REPORT?

20 A. I am. As discussed in the direct testimony of Mr. Barrilleaux (*see* Question and Answer
21 No. 8 in Mr. Barrilleaux's Direct Testimony) EML's Schedule FRP-7 permits the
22 recognition of "known and measurable" changes, including but not limited to revenue
23 changes for known, new large customers, when determining rate levels. As further

1 discussed by Mr. Barrilleaux, the Company is proposing to include known and measurable
2 revenue changes for 2026 (*see* Question and Answer No. 39 in Mr. Barrilleaux's Direct
3 Testimony) in the 2026 Evaluation Report through Adjustment AJ05Q. This known and
4 measurable revenue adjustment uses the agreed-to monthly payment formula, and
5 demonstrated large customer load to-date. EML believes the adjustment is appropriate.
6

7 Q21. HOW DOES THE INCLUSION OF THE ABOVE-REFERENCED KNOWN AND
8 MEASURABLE REVENUE CHANGE AFFECT THE 2026 EVALUATION REPORT?

9 A. EML's 2026 Evaluation Report would have produced a rate increase for customers, but for
10 the inclusion of the known and measurable revenue change. In recent FRP filings, the
11 Company discussed the benefits of economic development for all customers. In the 2026
12 Evaluation Report, those benefits specifically result in no Annual Rate Adjustment for
13 customers.
14

15 IV. RESIDENTIAL CUSTOMER BILL IMPACTS

16 Q22. WHAT IS THE BILL IMPACT IN APRIL 2026 OF THE CHANGE IN ANNUAL AND
17 INTERIM RATE ADJUSTMENTS?

18 A. There will be no bill impact to customers, as there will be no change in rates from annual
19 or interim rate adjustments beginning in April 2026.

1 Q23. WHAT IS THE BILL IMPACT IN JULY 2026 OF THE CHANGE IN ANNUAL AND
2 INTERIM RATE ADJUSTMENTS FOR THE FRP-7?

3 A. Assuming the Commission approves EML's 2026 Evaluation Report and 2025 Look-back,
4 as filed, a residential customer using 1,000 kWh per month would see a net decrease of
5 \$0.03 in their July 2026 bills (as compared to their June 2026 bills) from the FRP Annual
6 and Interim Rate Adjustments, when including the temporary effects of the percentage of
7 base rate schedules (e.g., Schedules MSE, PMR, UPC, MISO), resulting in a total
8 residential monthly bill of \$165.10 per 1,000 kWh beginning July 2026.

9
10 Q24. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY AT THIS TIME?

11 A. Yes, at this time.

STATE OF MISSISSIPPI

COUNTY OF HINDS

Personally appeared before me, the undersigned authority in and for the jurisdiction aforesaid, DAVID A. GIBBS, who after being by me first duly sworn states that he is Director, Regulatory Affairs of Entergy Mississippi, LLC, and that as such is fully authorized to make this affidavit; and further states that the matters and things contained in the foregoing Direct Testimony are true, accurate, and correct as therein set forth to the best of his knowledge, information, and belief.

**THIS EXHIBIT HAS BEEN FILED CONFIDENTIALLY. DUE TO THE NATURE OF
THE INFORMATION CONTAINED IN THIS EXHIBIT, A REDACTED VERSION IS
NOT BEING PROVIDED**

System Energy Resources, Inc.
2024 Tranche of IRS Code Section 45U Production Tax Credits

WHEREAS, during the period January 1 - December 31, 2024 ("2024 Tax Year"), System Energy Resources, Inc. ("SERI"), Entergy Arkansas, LLC ("EAL"), Entergy Louisiana, LLC ("ELL"), Entergy Mississippi, LLC ("EML"), and Entergy New Orleans, LLC ("ENOL") were parties to the Unit Power Sales Agreement (within System Energy Resources, Inc. Rate Schedule No. 2); and

WHEREAS, ELL is participating in this agreement based on ELL's purchases of energy and capacity from SERI during the 2024 Tax Year and they do not intend any aspect of this agreement to alter the terms of the SERI-LPSC Partial Settlement Agreement or the divestiture contemplated thereunder; and

WHEREAS, SERI has taken the position on the Entergy Corporation 2024 federal income tax return that the energy produced by Grand Gulf Nuclear Station during the 2024 Tax Year generated federal nuclear production tax credits ("PTCs") under Internal Revenue Code Section 45U; and

WHEREAS, EAL, ELL, EML, and ENOL have considered the relative risks and benefits of SERI selling the PTCs versus utilizing them on future federal income tax returns to directly offset Entergy's federal income tax liability; and

WHEREAS, EAL, ELL, EML, and ENOL recognize that SERI has sold the PTCs at commercially reasonable terms to one or more third parties when the credits were still eligible to be transferred; and

NOW, THEREFORE, in consideration of the terms and conditions hereinafter set forth, SERI, EAL, ELL, EML, and ENOL hereto agree with each other as follows:

1. Transfer of 2024 PTC net sale proceeds.

- a. Within 30 days of the receipt of proceeds from the sale of the PTCs or a Commission order accepting this Attachment H, SERI shall transfer to EAL, ELL, EML, and ENOL, via an intercompany payment, a proportionate share of the net proceeds¹ based upon the following percentages: EAL – 24.1853%; ELL – 16.1319%; EML – 39.9461%; ENOL – 19.7367%.²
- b. SERI shall provide documentation evidencing the amount of the payment to EAL, ELL, EML, ENOL, and representatives of their respective retail regulators, within 15 business days of the payment date.
- c. At no time prior to or following the resolution of the tax position resulting in the generation or recognition of the PTCs with the IRS shall SERI include in UPSA monthly billings any regulatory assets or liabilities associated with the PTCs nor any deferred tax asset or liability or any other cost/expense or revenue for the (1) generation of the PTCs and (2) the uncertain tax positions (i.e. the taxes accrued for a "FIN 48 liability") associated with the PTCs. Specifically, any subaccounts within the following FERC accounts that are established to record the PTCs for the 2024 Tax Year, their sale (including any indemnification obligations), or their uncertainty,

¹ Prior to transferring the proceeds, SERI shall deduct its share of the transaction costs (including but not limited to broker fees, and outside counsel fees) and prevailing wage compliance costs to determine the "net proceeds."

² These percentages intentionally include the MSS-4 Replacement Tariff allocations applicable to the PTCs generated by Grand Gulf Nuclear Station.

shall be excluded from UPSA monthly billings; these include but may not be limited to: 131, Cash; 146, Accounts receivable from associated companies; 182.3, Regulatory asset; 186, Miscellaneous deferred debits; 190, Deferred tax asset and FIN 48 entries; 232, Accounts payable; 234, Accounts payable to associated companies; 236, taxes accrued, FIN 48 liability – noncurrent, and Income taxes payable; 283, Deferred tax liability; 409.1, Current tax expense and FIN 48 expense; 410.1, Deferred tax expense; and 411.1, Deferred tax expense.

2. Repayment of hold harmless or indemnification commitment associated with SERI's sale of 2024 PTCs.
 - a. If the third-party purchaser(s) of the PTCs exercise(s) the hold harmless or indemnification provisions contained within their sale agreement(s) with SERI, and SERI is obligated to indemnify such third-party purchaser(s) for any additions to tax or interest imposed by the IRS, then EAL, ELL, EML, and ENOL agree to repay SERI their proportionate share (set forth in 1.a) of net proceeds from the sale, plus any indemnification and transaction costs that SERI incurs (the net proceeds, indemnification costs, and transaction cost amounts, together, are “the hold harmless costs”) that are due to the purchaser. If SERI incurs such hold harmless costs, it shall provide to EAL, ELL, EML, and ENOL notice and documentation evidencing its payment of the hold harmless costs to the third-party purchaser(s) within 30 days of such payment, and EAL, ELL, EML, and ENOL shall pay SERI their proportionate share (set forth in 1.a) of the hold harmless costs, via intercompany payment, no later than sixty days after their receipt of the notice and documentation of the hold harmless costs. If any governmental penalties are assessed, SERI shall not seek to recover them from EAL, ELL, EML, or ENOL.
 - b. EAL, ELL, EML, and ENOL shall provide documentation evidencing the completion of payment(s) described above in 2.a to representatives of their respective retail regulators within 15 business days of the final payment date.
 - c. Aside from the obligations described in 2.a and 2.b above, EAL, ELL, EML, and ENOL shall have no further obligations or liabilities in connection with SERI's sale of the 2024 PTCs.
3. This attachment and agreement are limited to the 2024 tranche of IRS Code Section 45U PTCs, and shall have no precedential effect on any other tranche of PTCs.
4. ELL agrees to remain bound by the terms of this Attachment H to the UPSA even after it is removed as a party to all other aspects of the UPSA.
5. If the tax position is resolved favorably by the IRS and no indemnification or hold harmless payment is required, then no further action is required by SERI, EAL, ELL, EML, and ENOL under this Attachment H.
6. Amounts transferred pursuant to 1.a above and, if applicable, repaid pursuant to 2.a above, will be grossed up for taxes.

LIST OF EXHIBITS

EXHIBIT CEB-1	Prior Testimony History of Chris E. Barrilleaux
EXHIBIT CEB-2	List of Pro Forma Adjustments

I. INTRODUCTION AND BACKGROUND

Q1. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Chris E. Barrilleaux. My business address is 639 Loyola Ave, New Orleans, Louisiana 70113.

Q2. BY WHOM ARE YOU EMPLOYED, AND WHAT IS YOUR CURRENT POSITION?

A. I am employed by Entergy Services, LLC ("ESL"). My present position is Senior Manager, Regulatory Filings.

Q3. WHAT ARE YOUR DUTIES AS SENIOR PROJECT MANAGER, REGULATORY FILINGS?

A. In this role, I am responsible for the development, preparation, and analysis of retail regulatory filings for several of the Entergy Operating Companies, including Entergy Mississippi, LLC ("EML", "Entergy Mississippi" or the "Company").

Q4. PLEASE DESCRIBE YOUR EDUCATIONAL AND PROFESSIONAL BACKGROUND.

A. I have a Master of Business Administration degree from the A.B. Freeman School of Business at Tulane University and a Bachelor of Science degree in Accounting from the University of New Orleans. I am a Certified Public Accountant licensed to practice in Louisiana. I am a member of the American Institute of Certified Public Accountants, and Society of Louisiana Certified Public Accountants.

1 I have been employed by subsidiaries of Entergy Corporation for approximately 38
2 years and have held various positions in the Accounting and Regulatory Services
3 organizations. Prior to my employment with the Entergy Companies, I was employed by
4 the New Orleans & Company (formerly known as the New Orleans Metropolitan
5 Convention and Visitors Bureau, Inc.) in a key accounting position.

6
7 Q5. ON WHOSE BEHALF ARE YOU SUBMITTING THIS DIRECT TESTIMONY?

8 A. I am submitting this Direct Testimony to the Mississippi Public Service Commission
9 ("Commission") on behalf of Entergy Mississippi.

10
11 Q6. HAVE YOU TESTIFIED BEFORE THE COMMISSION PREVIOUSLY?

12 A. Yes. I have previously filed written testimony with the Commission in Docket No. 2023-
13 UN-142. Additionally, I have testified before other regulatory authorities many times. A
14 listing of my prior testimony before these other authorities is provided in Exhibit CEB-1.

15
16 Q7. WHAT IS THE PURPOSE OF YOUR TESTIMONY AS PRESENTED HERE?

17 A. My testimony addresses multiple topics pertinent to EML's submittal pursuant to the
18 Formula Rate Plan Rider Schedule FRP-7 (Third Revised) ("Schedule FRP-7" or "FRP-
19 7"). First, I discuss the mechanics of the FRP-7. Second, I discuss the results of the look-
20 back for the twelve-month period ended December 31, 2025 ("2025 Look-back") and the
21 Evaluation Report for the twelve-month period ending December 31, 2026 ("2026
22 Evaluation Report"). Third, I discuss the realignment of a portion of the Section 22
23 Facilities Revenue Requirement from the Interim Facilities Rate Adjustment to the Annual

1 Rate Adjustment.¹ Fourth, I discuss the drivers of the 2025 Look-back and the 2026
2 Evaluation Report results. Lastly, I discuss the development of the FRP submittal.
3 Therein, I explain the source of the per book data and the calculation of the DSM True-up
4 for Program Year 2025. I also summarize certain pro forma adjustments included in the
5 2025 Look-back and the 2026 Evaluation Report, including the adjustments for known and
6 measurable changes.

7
8 **II. OVERVIEW OF SCHEDULE FRP-7**

9 Q8. PLEASE PROVIDE AN OVERVIEW OF SCHEDULE FRP-7.

10 A. FRP-7 is very similar to EML's predecessor formula rate plan schedules. FRP-7 continues
11 to incorporate future net investment based on historical costs adjusted for known and
12 measurable changes, including electric plant, accumulated depreciation and amortization,
13 and accumulated deferred income taxes. In addition, Schedule FRP-7 provides that the
14 Mississippi Public Utilities Staff (the "Staff") and the Company may propose other
15 adjustments for known and measurable changes, associated with other future costs subject
16 to approval by the Commission. FRP-7 allows the Company to propose adjustments to
17 historical costs in the following specific categories:

¹ For informational purposes only, I reference the Section 22 Facilities Revenue Requirement True Up being filed separately in Docket 2023-UN-142.

Category	Known and Measurable Changes
Rate Base	Plant in Service Construction Work in Progress Accumulated Depreciation Accumulated Deferred Income Taxes Pension and OPEB Liabilities Regulatory Assets Other
Revenues	Known new large customer(s) Loss of existing large customer Material impact from demand-side management program
Expenses	Operations & Maintenance (non-payroll) Administrative and General Payroll Depreciation Ad Valorem Tax Regulatory Tax Regulatory Debits and Credits Pension and OPEB Other

The adjustments to the historical accounting data are for (1) changes to rate base, expenses, or revenues that with a high degree of certainty will occur (whether increase or decrease) during the evaluation period and are accurately and objectively measurable or (2) new recurring operating expenses that with a high degree of certainty will occur and can be measured with a high degree of accuracy.

Q9. IS THE ANNUAL RATE ADJUSTMENT FORMULA IN FRP-7 THE SAME AS THE FORMULA IN ITS PREDECESSOR SCHEDULE?

A. Yes.

Q10. DESCRIBE THE FRP-7 FORMULA FOR ANNUAL RATE ADJUSTMENTS.

A. FRP-7 provides a formula for calculating the Company's Earned Rate of Return on Rate Base ("ERORB" or "Earned Return") for the Evaluation Period (the calendar year of the FRP filing). In computing any revenue or rate adjustments under the FRP, this Earned Return is compared to the Benchmark Rate of Return on Rate Base ("BRORB" or "Benchmark"). Subject to the bandwidth described below, any required rate adjustment is determined by calculating the difference in the Company's Earned Return versus the FRP Point of Adjustment, and computing the revenues represented by this difference. FRP-7 provides that for "each annual Evaluation Report [. . .] the amount of such revenue increase shall not exceed 4% of the Company's unadjusted Evaluation Period revenue."² This unadjusted Evaluation Period revenue is shown on Attachment G, Page 1, Line No. 15. These are per books or unadjusted revenues.

The Benchmark is developed using a weighted average of the Company's embedded cost of long-term bond debt, preferred equity, and cost of common equity. The cost of common equity is based on comparable electric utilities' computed cost of equity using both a Discounted Cash Flow ("DCF") model and a regression analysis. The DCF and regression analysis outcomes are averaged together, and a 12.5 basis point flotation adjustment is added to that average to arrive at the Evaluation Period Cost of Equity ("EPCOE"). The EPCOE is adjusted upwards or downwards by a Performance Rating Adjustment ("Performance Adjustment") that measures and holds the Company

² FRP-7, page 4, Section III. C. 2. b. ("Rules for Changing Annual Rate Adjustments"). See *Rankin Cnty. v. Mississippi Pub. Serv. Comm'n*, 393 So. 3d 1031, 1039 (Miss. 2024) (affirming the Commission's July 12, 2022, Order in EML's FRP-7, including the Commission "properly [] constru[ing] the plain language of the Formula Rate Plan to apply two separate 4 percent caps on revenues, one under the Evaluation Report and one under the Look[-]Back Report.")

1 accountable for its performance in the areas of customer service, customer reliability, and
2 customer price.³

3 FRP-7 contains a Bandwidth, called the Rate of Return on Rate Base Range
4 (“Bandwidth” or “ROR Range”), around the Benchmark within which no rate adjustments
5 will be made; this is called a “range of no change.” The upper limit of the Bandwidth (or
6 ROR Range) is 0.50% above the Benchmark and the lower limit is 0.50% below the
7 Benchmark. Under FRP-7, rate adjustments are provided for if EML’s Earned Return is
8 outside of the Bandwidth. There are no rate adjustments if EML’s Earned Return is within
9 the Bandwidth. This Bandwidth provides the Company with the opportunity to earn near
10 its Benchmark return each year but without any guarantee of such earnings level.

11
12 Q11. HOW IS AN ANNUAL RATE ADJUSTMENT DETERMINED IF ENTERGY
13 MISSISSIPPI’S EARNED RETURN IS ABOVE OR BELOW THE BANDWIDTH?

14 A. If EML’s Earned Return is above or below the Bandwidth, then FRP-7 provides for a rate
15 adjustment that permits EML to earn a return on rate base equal to the Point of Adjustment,
16 which is expressed as a percentage and is calculated pursuant to a formula set forth in FRP-
17 7. The Point of Adjustment formula considers EML’s performance in the previous
18 calendar year with respect to price, customer satisfaction, and reliability. The resulting
19 Annual Rate Adjustments are calculated to begin recovery of the Change in Rider FRP
20 Revenues.

³ FRP-7, Attachment F, provides that the Company “may... update its Evaluation Report on or before April 30 of the filing year to reflect any subsequent FERC Form 1 data that becomes available.” However, in Docket 2023-UN-142, the Commission held that “beginning with the 2025 Evaluation Report, EML will no longer be required to incorporate updated FERC Form 1 data regarding the Customer Price Rating Adjustment that was not available as of the March 1 filing of the Evaluation Report.” Order at p. 10 (June 13, 2024).

1 Q12. IS THERE A LIMIT ON THE ANNUAL CHANGE IN FRP REVENUES FOR THE
2 ANNUAL RATE ADJUSTMENT?

3 A. Yes. As I discussed above, FRP-7 limits the annual Change in Rider FRP Revenues to 4%
4 of retail unadjusted Rate Schedule Revenues. A similar, but separate, 4% limit applies to
5 the FRP-7 Look-back Change in Rider FRP Revenues.
6

7 Q13. IS THERE ANY PROTECTION FOR THE COMPANY OR THE CUSTOMER IN THE
8 EVENT THAT REVENUE OR COST LEVELS DEVIATE FROM THOSE EXPECTED?

9 A. Yes. FRP-7 provides for a "look-back" at the prior calendar year. The Company calculates
10 its actual earned return, called the Look-back Earned Rate of Return on Rate Base
11 (abbreviated as "LRORB" in FRP-7) for the Look-back Evaluation Period and compares it
12 to the BRORB calculated for the previous Evaluation Period. If the LRORB exceeds the
13 Upper Point of the BRORB Bandwidth, then FRP-7 provides that there shall be an interim
14 rate adjustment to reduce the LRORB to the previous Point of Adjustment for the previous
15 Evaluation Period. If the LRORB is less than the Lower Point of the BRORB Bandwidth,
16 then FRP-7 provides that there shall be an interim rate adjustment to increase the LRORB
17 to the previous Point of Adjustment for the previous Evaluation Period.
18

19 Q14. UNDER FRP-7, WHEN DO REVISED ANNUAL RATE ADJUSTMENTS BECOME
20 EFFECTIVE?

21 A. FRP-7 provides for temporary implementation of Net Rate Adjustments that result from
22 the Evaluation Report filing, subject to a cap on the Change in Rider FRP Revenues of 2%
23 of Evaluation Period Retail Revenues. These Net Rate Adjustments become effective for

1 the first billing cycle of April, are subject to refund, and are secured by a bond or other
2 security approved by the Commission. In years when the Evaluation Report filing
3 produces a revised annual rate adjustment, EML secures these Net Rate Adjustments on a
4 temporary basis with an already existing letter of credit. In years when the Evaluation
5 Report filing produces a required rate adjustment that exceeds the 2% cap, then the
6 permanent approval of the Change in Rider FRP Revenues becomes effective with a
7 Commission order, typically for the first billing cycle of July.

8 9 III. DETAILED FRP-7 RESULTS

10 Q15. PLEASE SUMMARIZE THE RESULTS OF THE 2025 LOOK-BACK.

11 A. The Company's Look-back Benchmark Rate of Return on Rate Base of 7.69%, which was
12 the Benchmark Rate of Return on Rate Base reflected in the Joint Stipulation approved by
13 the Commission's June 17, 2025 Order,⁴ establishes a Bandwidth from 7.19% to 8.19%.
14 As shown in the graph below, the Company's Look-back Earned Rate of Return on Rate
15 Base is 8.05% and falls within the Bandwidth. Because the Look-back Earned Rate of
16 Return on Rate Base of 8.05% is within the Bandwidth, there is no Change in Rider FRP
17 Revenues from the Bandwidth calculation.

⁴ In Docket 2024-UN-129, the Commission approved the Joint Stipulation setting the Benchmark Rate of Return on Rate Base for the 2025 Evaluation Report. See Order at p. 6 (June 17, 2025).

Illustration of the 2025 Look-back Results

Q16. DO ANY OUTSIDE-THE-BANDWIDTH ITEMS CAUSE A CHANGE IN RIDER FRP REVENUES IN THE 2025 LOOK-BACK?

A. Yes. In the 2025 Look-back, EML proposes to set its Interim Rate Adjustments to reduce rates by \$292,918; as shown on Attachment G, Line 19 in the 2025 Look-back. This amount reflects a change in one outside-the-bandwidth item. Attachment K to the FRP provides that the DSM True-up, which occurs every year, shall be recovered outside of the bandwidth calculation. The 2025 DSM True-up is an over-recovery that reduces rates by \$292,918.

Q17. PLEASE SUMMARIZE THE RESULTS OF THE BANDWIDTH CALCULATION IN THE 2026 EVALUATION REPORT.

A. The Company's Benchmark Rate of Return on Rate Base is 7.80%, which establishes a Bandwidth from 7.30% to 8.30%. As shown in the graph below, the Company's Earned

1 Rate of Return on Rate Base is 7.64%, which is within the Bandwidth. Accordingly,
2 Schedule FRP-7 provides that the Bandwidth Calculation produces no change in the
3 Annual Rate Adjustments.

Illustration of the 2026 Evaluation Report Results

4 Q18. WILL EML IMPLEMENT ANY INITIAL ANNUAL RATE ADJUSTMENTS IN APRIL
5 2026 RELATED TO THE 2026 EVALUATION REPORT?

6 A. No.

7
8 Q19. WILL EML IMPLEMENT ANY CHANGE TO THE ANNUAL RATE ADJUSTMENTS
9 IN JULY 2026 RELATED TO THE 2026 EVALUATION REPORT?

10 A. No.

1 Q20. WILL EML IMPLEMENT ANY CHANGE TO THE ANNUAL RATE ADJUSTMENTS
2 RELATED TO SECTION 22 FACILITIES?

3 A. Yes. As described in Section III. D (2) of FRP-7, the revenue requirement associated with
4 Section 22 facilities is recovered through Interim Facilities Rate (“IFR”) Adjustments.
5 EML filed a true-up to its 2025 IFR Adjustments in a separate docket (Docket 2023-UN-
6 142); that change is reflected in the Net Rate Adjustments in Attachment A to FRP-7.
7 However, as is also described in Section III. D (2) of FRP-7, at the conclusion of a prudence
8 review of a Section 22 project and such project being placed in-service throughout a full
9 calendar year, the Company realigns the Section 22 Facilities Revenue Requirement for
10 the project from the Interim Facilities Rate Adjustment to the Annual Rate Adjustment.
11 On December 13, 2024, the first phase of a three-phase transmission project went into
12 service. The first phase of the project consisted of upgrading EML’s existing Catlett
13 Substation and constructing the new Virililia Substation (the “Virililia/Catlett project”). In
14 Docket 2024-UA-101, the Company requested that the Commission conduct a prudence
15 review of the Virililia/Catlett project costs as of the in-service date. The Commission’s
16 review concluded on May 1, 2025, with a finding that these costs were prudently incurred.⁵
17 As such, it is now appropriate for the Company to realign the Section 22 Facilities Revenue
18 Requirement for the Virililia/Catlett project.

⁵ See Order, dated May 1, 2025, Docket No. 2024-UA-101.

Q21. OTHER THAN THE REALIGNMENT OF THE COSTS ASSOCIATED WITH THE VIRLILIA/CATLETT PROJECT, ARE THERE ANY OTHER CAPITAL ADDITIONS OR OTHER EXPENSES ASSOCIATED WITH SECTION 22 FACILITIES REFLECTED IN THE ANNUAL RATE ADJUSTMENT?

A. No. All other capital additions and expenses associated with Section 22 facilities have been removed in the 2025 Look-back and the 2026 Evaluation Report, as discussed below.

IV. DRIVERS OF THE FRP RESULTS

Q22. HAS THE COMPANY ANALYZED THE MAJOR DRIVERS OF THE 2025 LOOK-BACK BANDWIDTH CALCULATION RESULTS?

A. Yes. The Company has compared the 2025 Look-back Earned Rate of Return on Rate Base, which reflects 2025 actual operating results, to the expected Earned Rate of Return on Rate Base from the Commission's approval of the 2025 Evaluation Report, which reflects expected operating results for 2025. The table below shows the differences in expected and actual Total Rate Base and the expected and actual Net Utility Operating Income between the two reports.

Rate of Return on Rate Base Comparison 2025 Approved Evaluation Report versus 2025 Look-back (\$millions)			
	2025 Approved Evaluation Report	2025 Look-back	Difference
Expected and Actual Total Rate Base	4,634	4,625	(8)
Expected and Actual Net Utility Operating Income	356	372	17
ERORB and LRORB	7.68%	8.05%	0.37%
Note: Amounts may not tie due to rounding.			

Q23. DOES THE ABOVE COMPARISON SUPPORT WHY THE 2025 LOOK-BACK DOES NOT RESULT IN INTERIM RATE ADJUSTMENTS?

A. Yes. As shown in the table, the LRORB is 37 basis points above the ERORB from the approved 2025 Evaluation Report. Thus, the LRORB fell in the BRORB bandwidth, which does not trigger a Change in Rider FRP Revenues, as I explained earlier in my testimony.

Q24. HAS THE COMPANY ANALYZED THE MAJOR DRIVERS OF THE 2026 EVALUATION REPORT RESULTS?

A. Yes. The Company has compared the 2026 Earned Rate of Return on Rate Base from the 2026 Evaluation Report to the 2025 Look-back Earned Rate of Return on Rate Base. The table below shows the differences in Total Rate Base, Net Utility Operating Income, and returns on rate base between the two reports.

Rate of Return on Rate Base Comparison 2025 Look-back versus 2026 Evaluation Report (\$millions)			
	2025 Look-back	2026 Evaluation Report	Difference
Actual and Expected Total Rate Base	4,625	4,889	264
Actual and Expected Net Utility Operating Income	372	373	1
LRORB and ERORB	8.05%	7.64%	0.41%
Note: Amounts may not tie due to rounding.			

Q25. WHY DOES THE 2026 EVALUATION REPORT NOT RESULT IN A CHANGE IN THE ANNUAL RATE ADJUSTMENTS?

A. The 2026 Evaluation Report does not result in a change to the Annual Rate Adjustments because the increase in rate base expected in 2026 is small and the increase in Net Utility Operating Income expected in 2026 is imperceptible. Additionally, the Benchmark Return

1 on Rate Base calculated for the 2026 Evaluation Report decreased only slightly as
2 compared to last year's approved Benchmark Return on Rate Base in the 2025 Evaluation
3 Report. The combination of those three small changes between the 2025 Look-back and
4 the 2026 Evaluation Report produces an ERORB in the 2026 Evaluation Report that falls
5 within the 2026 Evaluation Report range of no change, 7.30% to 8.30% Thus, the above
6 comparison accurately depicts the major drivers in the 2026 Evaluation Report and
7 supports why the 2026 Evaluation Report does not trigger a change to the Annual Rate
8 Adjustments.

9 10 **V. DEVELOPMENT OF THE FRP SUBMITTAL**

11 **A. Per Books Data**

12 Q26. FROM WHAT SOURCES WERE THE HISTORICAL DATA INCLUDED IN
13 ENTERGY MISSISSIPPI'S FRP SUBMITTAL DEVELOPED?

14 A. The FRP submittal is based upon audited financial information derived from the
15 Company's accounting records.

16
17 Q27. PLEASE DESCRIBE THE SYSTEM OF ACCOUNTS USED IN MAINTAINING THE
18 COMPANY'S BOOKS AND RECORDS.

19 A. The Company complies with the Uniform System of Accounts ("USofA") established by
20 the Federal Energy Regulatory Commission ("FERC"). The Company also applies
21 Generally Accepted Accounting Principles ("GAAP") established by the Financial
22 Accounting Standards Board and the accounting regulations and guidance established by
23 the Securities and Exchange Commission ("SEC").

1 Q28. WHAT STEPS ARE TAKEN TO ASSURE THAT THE ACCOUNTS ARE KEPT IN
2 THE PROPER MANNER?

3 A. The Company's financial processes and systems are well-designed, well-controlled, and
4 are operated by trained professionals, resulting in reliable and accurate financial reporting.
5 The financial statements of the Company and its affiliates are audited annually by an
6 independent external audit firm, Deloitte & Touche LLP, which provides an opinion on
7 whether the Company's financial statements are fairly presented and comply with the
8 USofA and GAAP. Additionally, the external auditor conducts tests of the system of
9 internal financial controls, as required by the Sarbanes-Oxley Act of 2002, and has
10 expressed unqualified opinions since the implementation of this legislation as to the
11 effectiveness of the Company's system of internal controls over financial reporting.
12

13 Q29. HOW WERE THE PER BOOK AMOUNTS IN THE COMPANY'S ACCOUNTS
14 DEVELOPED FOR THIS FILING?

15 A. The per book financial information supporting this filing was compiled under my direction
16 and control. To the best of my knowledge, information, and belief, the historical financial
17 information included in this filing was taken from the Company's books and records and
18 presents fairly the rate base of the Company as of December 31, 2025.

1 Q30. LAST YEAR, THE COMPANY REPORTED DISCOVERING AN ACCOUNTING
2 ERROR WITH RESPECT TO THE RESULTS OF THE COMPANY'S OPERATIONS
3 FOR THE TWELVE-MONTH PERIOD ENDED DECEMBER 31, 2024. WAS THAT
4 ERROR CORRECTED IN 2025?

5 A. Yes. Last year, the Company discovered that the per book amount for Regulatory Debits
6 and Credits - Account 407 overstated regulatory credits by approximately \$21.0 million,
7 due to miscalculated tracking entries related to the Grid Modernization Rider ("GMR").
8 EML corrected the accounting error in the 2024 Look-back and the 2025 Evaluation Report
9 through a pro forma adjustment, and in 2025, EML corrected this error in its books and
10 records. This year, in the 2025 Look-back and 2026 Evaluation Report, EML has included
11 an adjustment eliminating this correction, Adjust AJ06I, which is discussed later in my
12 testimony.

13
14 Q31. ARE THE PER BOOKS RATE BASE AMOUNTS SHOWN IN THE 2025 LOOK-BACK
15 AND THE 2026 EVALUATION REPORT CALCULATED CONSISTENT WITH THE
16 PROVISIONS OF THE FRP?

17 A. Yes. In the 2025 Look-back, first, the Company calculated per book plant in service and
18 accumulated depreciation using the FERC Method. Second, the Company calculated per
19 book ADIT primarily using the beginning/ending average of each account, except in the
20 case of fifteen accounts, for which the Company used the thirteen-month average. Third,
21 the Company calculated per book customer deposits using the beginning/ending average
22 of the pertinent accounts.

1 In the 2026 Evaluation Report, the per book amounts for plant in service,
2 accumulated depreciation, plant acquisition adjustment, amortization acquisition
3 adjustment, ADIT, and customer deposits start with the December 31, 2025, balances of
4 the pertinent accounts.

5
6 Q32. HOW DID YOU CALCULATE ADJUSTED NET UTILITY OPERATING INCOME?

7 A. The adjusted net utility operating income includes adjustments as provided by FRP-7 (e.g.,
8 Attachment C, Attachment K, etc.). The effect of these adjustments is shown in summary
9 form on Attachment B of the 2026 Evaluation Report and 2025 Look-back.

10
11 **B. DSM True-Up for Program Year 2025**

12 Q33. PLEASE DESCRIBE HOW ATTACHMENT K AFFECTS THE 2025 LOOK-BACK.

13 A. Attachment K requires a true-up of the estimated 2025 DSM expenditures outside of the
14 Look-back bandwidth formula to reflect the actual 2025 DSM expenditures.

15
16 Q34. WHAT IS THE AMOUNT OF THE DSM TRUE-UP?

17 A. The DSM True-up amount reflects an over-recovery that reduces rates by \$292,918, which
18 will be included in the Interim Rate Adjustment effective with the first billing cycle of July
19 2026. Last year, EML estimated its 2025 DSM expenditures to be \$16.4 million. EML's
20 actual 2025 DSM expenditures were \$13.9 million. Thus, the resulting regulatory asset,
21 net of ADIT and amortization, is less than previously estimated. The calculation of the
22 true-up amount is included in the 2025 Look-back in Workpaper MD 1.4.

1 Q35. ARE THERE ANY OTHER STEPS TO THE DSM TRUE-UP?

2 A. Yes. In order to prevent the true-up from occurring twice, Paragraph 5 of Attachment K
3 requires the difference in the estimated revenue requirement and the actual revenue
4 requirement to be removed from the calculation of the Look-back Return on Rate Base
5 calculation. To accomplish this, Adjustment AJ06B includes the estimated 2025 DSM
6 Regulatory Asset, net of ADIT, and related amortization from the 2025 Evaluation Report
7 in the 2025 Look-back.

8
9 **C. Pro Forma Adjustments**

10 Q36. DOES SCHEDULE FRP-7 ALLOW EML TO MAKE ADJUSTMENTS TO THE PER
11 BOOK DATA?

12 A. Yes. Attachment C and Attachment K to Schedule FRP-7 define the instances in and
13 methods by which actual data for each Evaluation Period shall be adjusted. For example,
14 Section 5 of Attachment C allows EML to make adjustments to the Evaluation Period to
15 reflect future net investment and known and measurable changes to operating expenses
16 including, but not limited to, a defined list of categories of rate base, revenues, and
17 operating expenses. Section 6 further provides that, "Nothing in this Schedule shall
18 preclude the Company or Public Staff from proposing additional adjustment(s) beyond
19 those described in Adjustments 1-5. However, if the Company or Public Staff proposes
20 such adjustment(s) it shall be required to establish that such adjustment(s) are consistent
21 with the general philosophy and structure of this Schedule FRP."

1 Q37. DO THE 2026 EVALUATION REPORT AND 2025 LOOK-BACK CONTAIN ANY
2 PRO FORMA ADJUSTMENTS?

3 A. Yes.
4

5 Q38. DID THE COMPANY PROPOSE ANY ADJUSTMENTS TO REFLECT KNOWN AND
6 MEASURABLE CHANGES IN THE 2026 EVALUATION REPORT?

7 A. Yes. As shown in EXHIBIT CEB-2, the Company made thirty-nine pro forma adjustments
8 to reflect known and measurable changes pursuant to Attachment C, Section 5 of Schedule
9 FRP-7. Most of these adjustments are the same type that were made by Entergy Mississippi
10 in previous Evaluation Reports and accepted by Orders of the Commission.
11

12 Q39. DOES THE COMPANY PROPOSE ANY KNOWN AND MEASURABLE
13 ADJUSTMENTS TO RATE SCHEDULE REVENUES?

14 A. Yes. In Adjustment AJ05Q, EML proposes to adjust Rate Schedule Revenue to reflect
15 [REDACTED] revenue of \$[REDACTED] million on an annual basis. This adjustment includes additional
16 revenue EML expects to receive during 2026. In Adjustment AJ05Q, EML also proposes
17 to adjust Rate Schedule Revenue to reflect [REDACTED] revenue of \$[REDACTED] million on an annual
18 basis. This adjustment relates to the remaining portion of breach of contract funds that
19 EML received during 2025 that did not flow through the Power Management Rider
20 Schedule PMR-14 (Revised) and which will not recur in 2026.

1 Q40. ARE THERE ANY KNOWN AND MEASURABLE CHANGES TO PLANT IN
2 SERVICE AMOUNTS?

3 A. Yes. Adjustment AJ05A adjusts Plant in Service, Accumulated Depreciation, and ADIT
4 for expected additions and retirements in calendar year 2026. To develop this adjustment,
5 subject matter experts from the various functions (Transmission, Distribution, etc.) were
6 consulted and confirmed the capital projects that are expected to close to Plant in Service
7 in 2026. The total additions for 2026 are \$[REDACTED] million. Company witness Kamisha Quates
8 discusses the major capital additions in her Direct Testimony. The Company
9 functionalized each addition based upon the 300-level functional FERC plant account to
10 which an addition was anticipated to close. Adjustment AJ05A [REDACTED] Plant in Service
11 by \$[REDACTED] million, Accumulated Depreciation and Amortization by \$[REDACTED] million, and ADIT
12 by \$[REDACTED] million.

13
14 Q41. ARE ALL CAPITAL ADDITIONS IDENTIFIED IN ATTACHMENT I INCLUDED IN
15 ADJUSTMENT AJ05A?

16 A. No. EML initially recovers the cost of some capital additions through other rate
17 mechanisms before the costs are reflected ultimately in the Annual Rate Adjustments from
18 an Evaluation Report. For example, the Company initially recovers the costs associated
19 with Section 22 projects through the Interim Capacity & Facilities Rate Adjustments. The
20 Company initially recovers the costs associated with the Resiliency Ramp Up with its
21 acceleration of transmission wood pole replacement through the GMR. Therefore, EML
22 does not include the costs associated with these projects in Adjustment AJ05A.

1 Q42. WHAT IS THE PURPOSE OF ADJUSTMENT AJ05B (DEPRECIATION
2 ANNUALIZATION)?

3 A. This adjustment annualizes the depreciation expense based on the changes to Plant in
4 Service expected to occur in 2026 and reflected in Adjustment AJ05A, discussed above.
5 The adjustment in total [REDACTED] depreciation and amortization expense by \$[REDACTED] million.
6

7 Q43. WHAT IS THE PURPOSE OF ADJUSTMENT AJ05D (ADIT)?

8 A. Adjustment AJ05D adjusts ADIT balances to either the average of the beginning and
9 ending year balance as of December 31, 2026, or the thirteen-month average end-of-the-
10 month balance for December 2025 to December 2026, consistent with the rate base
11 calculation. This adjustment [REDACTED] rate base by \$[REDACTED] million.
12

13 Q44. WHAT IS THE PURPOSE OF ADJUSTMENT AJ05F (NON-PAYROLL O&M)?

14 A. Adjustment AJ05F adjusts non-payroll O&M for the rate effective test year by removing
15 expenses associated with (1) solar development feasibility cost near Gerald Andrus Steam
16 Electric Station; (2) surplus inventory from the Gerald Andrus Steam Electric Station; and
17 (3) the amortization of the remaining nine months of 2026 of the recovery for Attorney
18 General litigation cost. The adjustment [REDACTED] O&M by approximately \$[REDACTED] million.
19

20 Q45. WHAT IS THE PURPOSE OF ADJUSTMENT AJ05H (PENSION)?

21 A. Adjustment AJ05H adjusts rate base to reflect that 2026 pension contributions are [REDACTED]
22 [REDACTED] and adjusts O&M expense to reflect 2026 expense levels
23 for pension, supplemental pension, and affiliate OPEBs based on information supplied by

1 EML's actuary. The adjustment also [REDACTED] the amortizations of the pension settlement
2 deferral and the OPEB credit deferral to the level currently expected for 2026. Overall, the
3 adjustment [REDACTED] rate base by approximately \$ [REDACTED] million and [REDACTED] pensions and
4 benefits expense by \$ [REDACTED] million.

5
6 Q46. WHAT IS THE PURPOSE OF ADJUSTMENT AJ05I (PAYROLL)?

7 A. Adjustment AJ05I adjusts payroll and related expenses to an annualized level reflective of
8 the January 2026 headcount as required by FRP-7. This adjustment [REDACTED] O&M by
9 \$ [REDACTED] million and [REDACTED] taxes other than income by \$ [REDACTED] million. To calculate the
10 change associated with payroll expense billed to EML by ESL, EML used the historical,
11 actual 2025 percentage of ESL payroll expense billed to EML.

12
13 Q47. WHAT IS THE PURPOSE OF ADJUSTMENT AJ05J (CUSTOMER DEPOSITS &
14 INTEREST)?

15 A. First, this adjustment adjusts the customer deposits to the average of the beginning and
16 ending year balance as of December 31, 2026. To calculate the December 31, 2026
17 balance, the Company multiplied the December 31, 2025 balance by the average annual
18 growth rate over the period 2023 through 2025. The first part of the adjustment [REDACTED]
19 rate base by \$ [REDACTED] million.

20 Second, this adjustment also adjusts interest expense reclassified above the line in
21 Adjustment AJ04F to the level resulting from the Commission-approved interest rate for
22 2026, 4.28%, times the average balance described above. The second part of the

1 adjustment [REDACTED] the reclassified interest expense from Adjustment AJ04F by \$ [REDACTED]
2 million.

3
4 Q48. WHAT IS THE PURPOSE OF ADJUSTMENT AJ05M (DSM RECOVERY)?

5 A. The purpose of Adjustment AJ05M is to include the DSM regulatory assets in rate base
6 and the associated amortization in O&M expense at the appropriate levels for the 2026
7 Evaluation Report. In the 2025 Evaluation Report, the rate base amount attributable to the
8 2021, 2022, 2023, 2024, and 2025 DSM regulatory assets was \$ [REDACTED] million. In the 2026
9 Evaluation Report, the rate base amount attributable to the 2021, 2022, 2023, 2024, 2025,
10 and 2026 regulatory assets is \$ [REDACTED] million, an [REDACTED] of approximately \$ [REDACTED] million. In
11 the 2025 Evaluation Report, the associated amortization in O&M expense was \$ [REDACTED]
12 million. In the 2026 Evaluation Report, the associated amortization in O&M expense is
13 \$ [REDACTED] million, an [REDACTED] of approximately \$ [REDACTED]. Additionally, Adjustment AJ05M
14 [REDACTED] rate schedule revenues by \$ [REDACTED] million, which was \$ [REDACTED] million [REDACTED] than the
15 2025 evaluation report.

16
17 Q49. WHAT IS THE PURPOSE OF ADJUSTMENT AJ05O (INCENTIVE COMPENSATION
18 AND STOCK OPTIONS)?

19 A. The purpose of the adjustment is to eliminate certain incentive compensation, system
20 executive retirement plan-related pension expense, and stock option expense. The
21 adjustment [REDACTED] O&M expense by \$ [REDACTED] million.

1 Q50. HAS THE COMPANY PROPOSED ANY ADJUSTMENTS PURSUANT TO SECTION
2 6, ATTACHMENT C TO FRP-7?

3 A. Yes. The Company has proposed seven adjustments, Adjustments AJ06A, AJ06B, AJ06C,
4 AJ06D, AJ06H, AJ06I, and AJ06J.
5

6 Q51. WHAT IS THE PURPOSE OF ADJUSTMENT AJ06A (OTHER – ACCRUAL, BILL
7 CREDIT, AND AMORTIZATION REVERSAL)?

8 A. The purpose of this adjustment is to exclude rate-related accruals and amortizations that
9 would distort the calculation of Net Utility Operating Income in the 2025 Look-back and/or
10 the 2026 Evaluation Report. For example, if the Company did not exclude the amortization
11 associated with a previous Look-back under-recovery from the calculation of Net Utility
12 Operating Income, the Company might recover these debits a second time through the rate
13 adjustments approved in the current year.

14 Adjustment AJ06A has the following effects:

- 15 • Exclusion of the true-up of the \$80 SERI Bill Credits return ordered by the
16 Commission in June 2022 and⁶
- 17 • Exclusion of the amortization associated with the 2024 Annual Rate Adjustment
18 in excess of 2% regulatory asset.
19

20 Q52. WHAT IS THE PURPOSE OF ADJUSTMENT AJ06B (DSM REG ASSET)?

21 A. The purpose of this adjustment is to include in rate base DSM regulatory asset, net of ADIT,
22 at the estimated level included in the 2025 Evaluation Report and to facilitate the true-up

⁶ See Order, dated June 23, 2022, Docket No. 2018-AD-141.

of the 2025 DSM Regulatory Asset. Also, the Adjustment AJ06B includes the 2023 DSM Regulatory Asset at the appropriate level for the 2025 Evaluation Report. The true-up is returned or recovered outside of the Look-back bandwidth, whatever the case may be. As discussed earlier, in this instance, the true-up will return \$292,918 to customers beginning in July 2026. This adjustment [REDACTED] rate base by \$ [REDACTED] million and [REDACTED] O&M by \$ [REDACTED] million. This adjustment is only included in the 2025 Look-back.

Q53. WHAT IS THE PURPOSE OF ADJUSTMENT AJ06C (OTHER – INTERIM RATE ADJUSTMENT)?

A. The purpose of this adjustment is to exclude from Rate Schedule Revenues the revenue and credits from various interim rate adjustments so that they do not affect Net Utility Operating Income in the 2025 Look-back and the 2026 Evaluation Report. Such revenue and credits resulted from the 2023 ACC and DSM True-ups; the 2024 DSM and Restructuring Credit Rider True-ups; and the 2025 IFR Adjustments and the 2024 IFR True-Up. If these items are not eliminated from the calculation of Net Utility Operating Income, then the 2025 Look-back and the 2026 Evaluation Report could produce results that over- or under-recover from customers the Company's cost of service. This adjustment [REDACTED] operating revenues by \$ [REDACTED] million.

Q54. WHAT IS THE PURPOSE OF ADJUSTMENT AJ06D (OTHER – COVID BAD DEBT)?

A. The purpose of this adjustment is to include in rate base the COVID Bad Debt regulatory asset, net of ADIT, at the appropriate level. In the 2025 Look-back, this adjustment [REDACTED] rate base by \$ [REDACTED] million. In the 2026 Evaluation Report, this adjustment also

1 annualizes the amortization of the COVID Bad Debt regulatory asset and [REDACTED] rate
2 base by \$[REDACTED] million and [REDACTED] O&M by \$[REDACTED] million.

3
4 Q55. WHAT IS THE PURPOSE OF ADJUSTMENT AJ06H (INTERIM FACILITIES)?

5 A. The purpose of this adjustment is to exclude the 2025 calendar year costs included in the
6 calculation of the IFR Adjustments pursuant to Section 22 from the 2025 Look-back and
7 2026 Evaluation Report. Such costs include the cost of Section 22 facilities that closed to
8 plant in service in 2025 and related depreciation. This adjustment prevents EML from
9 potentially recovering these costs a second time from customers through the Look-back or
10 Evaluation Report. Because of the realignment discussed earlier of the Section 22
11 Facilities Revenue Requirement for the Virililia/Catlett project from the Interim Facilities
12 Rate Adjustment to the Annual Rate Adjustment, this adjustment only excludes the 2025
13 calendar year cost associated with the Virililia/Catlett project from the 2025 Look-back but
14 not from the 2026 Evaluation Report. In the 2025 Look-back, this adjustment [REDACTED]
15 rate base by approximately \$[REDACTED] million and operating expense by \$[REDACTED] million. In the
16 2026 Evaluation Report, this adjustment [REDACTED] rate base by approximately \$[REDACTED]
17 million and operating expense by \$[REDACTED] million.

18
19 Q56. WHAT IS THE PURPOSE OF ADJUSTMENT AJ06I (OTHER GRID MOD)?

20 A. The purpose of this adjustment is to eliminate from the 2025 Look-back and 2026
21 Evaluation Report the correction related to the accounting error discussed earlier with
22 respect to the results of the Company's operations for the twelve-month period ended
23 December 31, 2024. In both the 2025 Look-back and in the 2026 Evaluation Report, this

1 adjustment [REDACTED] operating expense by \$ [REDACTED] million.

2
3 Q57. WHAT IS THE PURPOSE OF ADJUSTMENT AJ06J (OTHER REVENUE)?

4 A. The purpose of this adjustment is to remove other revenue for the rate effective year. In the
5 2025 Look-back and in the 2026 Evaluation Report, this adjustment [REDACTED] operating
6 revenues by \$ [REDACTED] million.

7
8 Q58. DESCRIBE THE RATEMAKING TREATMENT THAT ENTERGY MISSISSIPPI IS
9 APPLYING TO CERTAIN CONTRIBUTIONS IN AID OF CONSTRUCTION (CIAC)
10 AND DEFERRED REVENUE AND EXPLAIN WHY THIS TREATMENT IS
11 APPROPRIATE.

12 A. With a goal of maintaining rate stability for customers in the coming years and as required
13 by the Commission's order in the 2025 FRP,⁷ Entergy Mississippi has excluded from rate
14 base: (1) unused CIAC, and (2) the unamortized balance of deferred revenue.

⁷ In Docket 2024-UN-129, the Commission found that the treatment of these contributions was proper in the 2025 FRP filing and that EML should treat future customer contributions like these in the same manner. See Order at p. 6 (June 17, 2025) ("[T]he Commission finds that the company properly excluded from rate base the customer contributions (deferred revenue and prepaid contributions in aid of construction "CIAC") received from one or more large customers. [...] "The Commission finds that EML should treat future customer contributions, like those considered in this FRP, in the same manner as it has in the 2025 FRP filing.").

VI. CONCLUSION

Q59. ARE THE 2026 EVALUATION REPORT AND 2025 LOOK-BACK CONSISTENT WITH THE PROVISIONS OF SCHEDULE FRP-7 AND, THEREFORE, JUST AND REASONABLE?

A. Yes. The 2026 Evaluation Report and 2025 Look-back are consistent with FRP-7 and, accordingly, are just and reasonable.⁸

Q60. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes, at this time.

⁸ See the Commission's December 20, 2019 Compliance Order in consolidated Dockets 2014-UN-132 and 2018-UN-205, in which the Commission found that Schedule FRP-7 "is just and reasonable."

STATE OF LOUISIANA

PARISH OF ORLEANS

Personally appeared before me, the undersigned authority in and for the jurisdiction aforesaid, CHRIS E. BARRILLEAUX, who after being by me first duly sworn states that he is Senior Manager, Regulatory Filings of Entergy Services, LLC, and that as such is fully authorized to make this affidavit; and further states that the matters and things contained in the foregoing Direct Testimony are true, accurate, and correct as therein set forth to the best of his knowledge, information, and belief.

CHRIS E. BARRILLEAUX,
SENIOR MANAGER, REGULATORY FILINGS
ENTERGY SERVICES, LLC

SWORN TO AND SUBSCRIBED before me, this the 25th day of February 2026.

NOTARY PUBLIC

My Commission Expires:

At Death
