CH to PULP (003) – EAP Program

STAFF OF THE DEPARTMENT OF PUBLIC SERVICE
RESPONSE TO INFORMATION/DOCUMENT REQUEST

Central Hudson Gas & Electric Corporation
Cases 23-E-0418 and 23-G-0419
Electric and Gas Rates

Request No.:	CH-009
Requested By:	Central Hudson Forecasting and Rates Panel
Date of Request:	November 22, 2023
Response Due Date:	December 4, 2023
Date of Response:	December 4, 2023
Name & Position of Respondent:	Staff Forecasting Panel
Subject:	Sales Forecasts

Question:

With respect to the Panel's testimony on page 21, lines 7 – 13, regarding sales data not reflecting rebilled sales resulting from cancels, please confirm Staff's understanding that the Company's response to DPS-629 was with respect to specific months in 2021 that showed negative customers and sales values.

Response:

The Panel's understanding is that, the Company's response to DPS-629 was with respect to specific months in 2021 that showed negative customers and sales values. The Panel also understands that the Company's workpaper "ComIndGasData.xlsx", that was the subject of Staff's information request DPS-629, similarly contained a negative sales value for the TransCom rate group in January of 2022 which is outside of calendar year 2021. In addition, with respect to the Panel's testimony on page 21, lines 7 – 13, which pertains to the more recent actual January 2023 through September 2023 data that the Company provided in response to DPS-630, the Panel's understanding is that those data are also more varied and lower based upon the cancelled/rebilled phenomenon that was referred to in the response to DPS-629. This is based on an informal phone call between the Panel and Company subject matter experts on November 2, 2023 related to Staff's questions about the lower level of the updated data provided in response to DPS-630.

As an example, the graph below showing monthly commercial gas heating customers over the period of January 1996 through September 2023 indicates that commercial heating customer counts in the data series are relatively more varied and lower in the first nine months of 2023.

Cases 23-E-0418 and 23-G-0419
Electric and Gas Rates

Request No.:	CH-010
Requested By:	Central Hudson Forecasting and Rates Panel
Date of Request:	November 22, 2023
Response Due Date:	December 4, 2023
Date of Response:	December 4, 2023
Name & Position of Respondent:	Staff Forecasting Panel and Rates Panel
Subject:	Sales Forecasts – Post Model Adjustments

Question:

On page 52, lines 11-16 of the testimony of the Staff Forecasting Panel (SFP), the Panel acknowledges making post model adjustments to gas. Please elaborate on the following:

- A. Please confirm the SFP's sales forecast includes a post model adjustment for gas in the same amount as reflected by the Company which was a reduction to gas sales in the Rate Year by 13,654 Mcf.
 - i. Please quantify the revenue impact of the post model adjustment that is not yet reflected in the Staff Rates Panel (SRP) revenue price out, as acknowledged in the SRP testimony on page 8 lines 4-10. If an exact quantification is not available please provide a qualitative assessment of whether the associated revenues would compare to the Company's revenue price out related to the gas heat pump post forecast adjustment.
 - ii. Please describe the impact this forthcoming update from the SRP would have on the proposed Rate Year rate increase.
- B. Please clarify whether the SFP included any post model adjustments for electric in the Panel's Rate Year sales forecast.
- C. If the answer to part B confirms post model adjustments were made, please confirm whether the SFP reflected adjustments in the same amount as the Company which included an increase of 148,898 MWh related to heat pumps and EVs and a decrease of 158,885 MWh related to PV.
 - i. Please quantify the revenue impact of the post model adjustment that is not yet reflected in the Staff Rates Panel (SRP) revenue price out, as acknowledged in the SRP testimony on page 8 lines 4-10. If an exact quantification is not available please provide a qualitative assessment of whether the associated revenues would compare to the Company's revenue price out related to the electric heat pump, electric vehicle and PV post forecast adjustments.

Electric and Gas Rates

CH-010 continued.

- ii. Please describe the impact this forthcoming update from the SRP would have on the proposed Rate Year rate increase.

Response:

- A. Staff's initial gas sales forecast filed on November 21, 2023 included no post model adjustment for heat pumps. In reviewing the Company's workpapers in attempt to confirm the reduction to gas sales in the Rate Year of 13,654 Mcf, Staff has identified two issues. First, Staff could not identify the source of the 13,654 Mcf rate reduction referred to in this information request, and questions if this information request should refer to the workpaper for the Company's Exhibit FRP-3, schedule F. Both this workpaper and the Company's exhibit show a total reduction of 8,460 Mcf for the rate year. Second, in the process of applying this 8,460 Mcf reduction to Staff's forecast, it became apparent that the Company's heat pump post model adjustment should be adjusted to reflect that Staff's forecast were estimated on a historic data period that include the most recent nine months of available actual data through September 2023 that was provided in response to DPS-630. This results in an overall reduction of a total of 6,208 Mcf in RY1
 - i. The revenue impact of the post model adjustment that is not yet reflected in the Staff Rates Panel (SRP) forecast would be a revenue reduction of \$58,715.
 - ii. See response to A.b.i.
- B. No post model adjustments were applied to Staff's electric forecast.
- C. In the process of applying the Company's PV, EV and Heat Pump post model reductions to Staff's electric forecast, it became apparent that the Company's heat pump post model adjustment should be adjusted to reflect that Staff's forecast were estimated on a historic data period that include the most recent nine months of available actual data through September 2023 that was provided in response to DPS-630. For the PV out-of-model adjustments, Staff found an apparent mistake in the Company's out-of-model adjustment, which appears to use cumulative instead of de-trended, incremental values. While this methodology is consistent with adjustments made by the Company when it was using the "add-back" method of forecasting, current model output should only be adjusted by the incremental (over the existing trend) adoption. Staff also notes that the Company's adjustment appeared to add-back cumulative PV that went all the way back to January 2018. Thus, Staff made two primary changes to the Company's PV post model adjustment. First, Staff calculated the change in cumulative EVs over the period January 2018 through December 2028. Staff then adjusted the out-of-model adjustments so that

STAFF OF THE DEPARTMENT OF PUBLIC SERVICE
RESPONSE TO INFORMATION/DOCUMENT REQUEST

Central Hudson Gas & Electric Corporation
Cases 23-E-0418 and 23-G-0419
Electric and Gas Rates

CH-010 continued.

the incremental adjustment for the period January 2023 through September 2023 was 0, since these new PV installations are now included in the model data. Staff discovered a similar error in the Company's work papers regarding the EV adjustments. The Company appeared to adjust each year by the cumulative effect of adopted EVs, instead of the incremental. Using the 2.75 years of data available in the Company's workpapers (2021, 2022, and 2023 up to September) Staff calculated an annual incremental trend of 2,601 new EVs each year. These historically trended EVs were then subtracted from the higher exponentially forecasted growth in cumulative EV registrations to isolate those new EV additions that are not reflected in the existing modelled data.

- i. The revenue impact of the total of the heat pump and EV adjustments would be an increase in revenues of \$10.556 million . The impact of Staff's PV adjustment would be a reduction in revenues of \$92,717.
- ii. See response to C.i.

STAFF OF THE DEPARTMENT OF PUBLIC SERVICE
RESPONSE TO INFORMATION/DOCUMENT REQUEST

Central Hudson Gas & Electric Corporation
Cases 23-E-0418 and 23-G-0419
Electric and Gas Rates

Request No.:	CH-061
Requested By:	Central Hudson Forecasting and Rates Panel
Date of Request:	November 28, 2023
Response Due Date:	December 8, 2023
Date of Response:	December 8, 2023
Name & Position of Respondent:	DPS Staff Forecasting Panel
Subject:	Saturations and Efficiencies

Question:

On page 20, lines 12 through 17, the Panel describes that it separated out the underlying components of the SAE variables and included them as distinct explanatory variables in your models. Regarding this statement:

- A. Please confirm whether the Panel included each of the underlying components or only select components of the Company's SAE variables.
 - a. If only select components were utilized by the Panel, please describe if and how the Panel incorporated appliance saturation and efficiencies in your models.
- B. Please list the underlying components of the SAE variables the Panel utilized in each electric and gas model.

Response:

- A. The Panel's referenced testimony was intended to convey the fact that the SAE variables are composite variables synthesized from multiple underlying variables. The Panel did not include each of the underlying components in any model, and only used economic variables where appropriate.
 - a. The Panel did not include any appliance saturation variables in our model.
- B. The Panels utilized the following economic variable components of the SAE variable in its electric forecasts:
 - Residential Non-heat customers
 - Households
 - Commercial Demand Customers
 - Non-Manufacturing Employment
 - Commercial Non-Demand Customers
 - GDP
 - Residential Heat Sales
 - Electric prices

STAFF OF THE DEPARTMENT OF PUBLIC SERVICE
RESPONSE TO INFORMATION/DOCUMENT REQUEST

Cases 23-E-0418 and 23-G-0419
Electric and Gas Rates

CH-061 continued.

- Heating Degree Days
- Residential Non-Heat Sales
 - Electricity prices
 - Household Income
- Commercial Demand Sales
 - Electricity Prices
- Commercial Non-Demand Sales
 - Heating Degree Days

The Panel utilized the following SAE component variables in its gas forecasts:

- Residential Heat customers
 - The Panel's residential heat customers model used Households as an explanatory variable. Although not included as a component in Households_Ind, we note that real household income is an additional explanatory variable in our residential heat customers model.
- Residential Non-Heat customers
 - The Panel did not use any SAE component variables from EconVars.Households_Ind in our residential non-heat customers model.
- Commercial Heat customers
 - The Panel did not use any SAE component variables from EconTrans.NonanEmp_Ind in our Commercial Heat customers model
- Commercial Non-Heat customers
 - The Panel did not use any SAE component variables from EconTrans.TotEmp_Ind in our Commercial Non-Heat customers model. The Panel notes that the employment variable FENMPNYP06 in our Commercial Non-Heat customer model.
- Residential Heat use per customer
 - The Panel did not use any SAE component variables from the SAE variable ResSpHtVars.XHeat in our residential heat use per customer model. Although The Panel did not use the EconVars.Prc_Ind_ResSpHt price variable sub-component of ResSptVars.Xheat, our residential heat use per customer used the real price of residential gas as an explanatory variable.
- Residential Non-Heat use per customer
 - The Panel did not use any SAE component variables from the SAE variable ResNHtVars.HUseMul in our residential non-heat use per

Cases 23-E-0418 and 23-G-0419
Electric and Gas Rates

CH-061 continued.

customer model. Although the Panel did not use the EconVars.Prc_Ind_Res price variable sub-component of the ResNHtVars.HUseMul variable, our residential non-heat use per customer model used the real price of residential gas as an explanatory variable.

- Commercial Heat use per customer
 - The Panel did not use any SAE component variables from the SAE variable StructureVars.Heat_SpHt in our commercial heat use per customer model. Although the Panel's commercial heat use per customer model did not use the EconTrans.ComSpHt_PriceIndex price component of StructureVars.Heat_SpHt, our commercial heat use per customer model used a price index for the real price of commercial gas as an explanatory variable.
- Commercial Non-Heat use per customer
 - The Panel did not use any SAE component variables from the first SAE variable SAE variable StructureVars.Heat.GS in our commercial non-heat use per customer model. The Panel also did not use any SAE component variables from the second SAE variable StructurVars.Other_SpHt in this model. Although the Panel did not use any of the components of StructureVars.Heat.GS, or from StructurVars.Other_SpHt, our commercial non-heat use per customer model contains the economic driver employment variable FENMPNYP06.

Central Hudson Gas & Electric Corporation
Case No. 23-E-0418 and 23-G-0419
INTERROGATORY / DOCUMENT REQUEST

Request No.: CH to Key Capture Energy (KCE) (001)

Request Date: 11/24/2023

Response Due: 12/4/2023

Information Requested by: Forecasting and Rates Panel

Information Requested of: Key Capture Energy

Subject/Topic: Rate and Tariff Applicability

Reply Date: 12/4/2023

Response Provided by: James Bride

QUESTION:

On page 6 of your testimony, you describe that your testimony is focused on stand-alone, front-of-the-meter, battery energy storage systems greater than 5 MW intended to provide wholesale services in the NYISO market and interconnected at voltages of 69 kV and higher. On page 7 you describe that “based on Central Hudson’s discovery responses and publicly available information, it appears that Central Hudson’s currently proposed rates will make it very difficult for bulk storage to be economically developed in the Company’s service territory.”

Please clarify your understanding of which “rates” are being referred to on page 7, line 4. In your response, please list the applicable tariff filed by Central Hudson, which Commission the tariff is on file with (NYS Public Service Commission or FERC), and the applicable class or service within the tariff.

RESPONSE:

The statement “Central Hudson’s currently proposed rates will make it very difficult for bulk storage to be economically developed in the Company’s service territory” reflects both (a) Central Hudson’s current SC 14 – Standby SC 13 rates and (b) the proposed SC 14 – Standby SC 13 rates submitted into the Allocated Cost of Service (ACOS) and Standby rate proceeding in Case 15-E-0751 in July 2022. Those rates, or ones similar to them, make it very difficult for bulk storage to be economically developed in the Company’s service territory. These rates, and the relationships between them, are described in further detail in Section IV “Central Hudson Rate Assignments for Bulk Storage Projects” of the Key Capture Energy testimony.

Based on the Company’s information requests (see e.g., Exhibit KCE-16 [KCE-01, IR-033]; Exhibit KCE-19 [KCE-01, IR-039]), under the Company’s existing tariff, stand-alone, front-of-the-meter battery energy storage systems greater than 5 MW would take service for charging under SC 14 – Standby service for charging. Of such systems, those that are interconnected at

Central Hudson Gas & Electric Corporation
Case No. 23-E-0418 and 23-G-0419
INTERROGATORY / DOCUMENT REQUEST

voltages of 69 kV and higher (i.e., “bulk storage projects”) would take service under the SC 14 – Standby SC 13 service class (see e.g., Exhibit KCE-08 [KCE-02, IR-044]; Exhibit KCE-10 [KCE-03, IR-069]). The effective SC 14 – Standby SC 13 service rate is on file with the NYS Public Service Commission under PSC Electric Tariff No. 15, Leaf 272.3.2. According to the Company, these “are the only rates available at the time of this response [October 30, 2023]” (Exhibit KCE-19 [KCE-01, IR-039 Update 10/30/2023]).

We are aware of the ongoing ACOS and Standby rate proceeding in Case 15-E-0751 and understand that a compliance filing with an updated Standby rate is due in that docket before January 1, 2023 (“Order Establishing Updated Standby Service Rates and Implementing Optional Mass Market Demand Rates”, Case 15-E-0751, pp. 3-5 [October 13, 2023]; Exhibit KCE-17 [KCE-04, IR-081]). The Central Hudson Forecasting and Rates Panel indicated that any rate design changes pertaining to Standby rates would occur later in this proceeding based on any determination made by the Commission in Case 15-E-0751 (Forecasting & Rates Panel Direct, pp. 61-62).

In Table KCE-2 of the Key Capture Energy testimony, there is a comparison of the current Central Hudson SC 14 – SC 13 Standby rate with the alternative SC14 – SC 13 Standby rate design resulting from a revised ACOS that was submitted as a compliance filing into Case 15-E-0751 in July 2022. Central Hudson directed Key Capture Energy to this filing until the pending filing is available (Exhibit KCE-17 [KCE-004, IR-081]). As shown in Table KCE-2, the change in cost between the current Standby rate and the rate proposed in Case 15-E-0751 is not material enough to make it economically feasible to develop bulk battery storage in Central Hudson’s service territory.

Finally, we understand that storage projects “purchasing wholesale electric supply from the NYISO will be billed pursuant to the Wholesale Distribution Service tariff on file with the FERC when the WDS tariff becomes effective” (Exhibit KCE-16 [KCE-01, IR-033]). As stated by the Company, the forthcoming WDS tariff will be on file with FERC, however, the Company has not yet filed such a tariff (Central Hudson Gas & Electric, Direct Testimony of the Accounting and Tax Panel, p. 36, ll. 13-22; Exhibit KCE-16 [KCE-001, IR-033]). The Company has stated that the forthcoming WDS tariff will be based on the Company’s proposed Standby rates presented in the ACOS proceeding (Exhibit KCE-03 [KCE-02 IR-049(f)]) (“The Company intends to leverage those same Standby and Buyback rates filed with the PSC in December 2023 as the basis for developing Wholesale Distribution Service rates for filing with FERC. The Company is still evaluating what costs included in the Standby and Buyback rates filed with the PSC will be included in the development of the rates filed with FERC”).

Central Hudson Gas & Electric Corporation
Case No. 23-E-0418 and 23-G-0419
INTERROGATORY / DOCUMENT REQUEST

Request No.: CH to Multiple Intervenors (MI) (002)

Request Date: 11/22/2023

Response Due: 12/4/2023

Information Requested by: Forecasting and Rates Panel

Information Requested of: MI Witness Pollock

Subject/Topic: Revenue Allocation

Reply Date: 12/4/2023

Response Provided by: Jeffry Pollock

QUESTION:

With respect to your proposal on page 28, lines 7 – 12, that in the event the Commission authorizes a lower electric delivery increase, classes earning more than 300 basis points above the proposed rate of return receive no increase:

- A. Please provide all workpapers supporting any analysis conducted to measure the impact of your proposal on the other classes. Such analyses should include but are not limited to revenue allocation, rate design and resulting bill impacts.
- B. Please provide a qualitative assessment of the impact your proposal would have on classes that are not earning a return more than 300 basis points above the Company's proposed rate of return.

RESPONSE:

- A. Mr. Pollock has not conducted the requested analyses.
- B. The Electric S.C. 6 Residential Time-of-Use, S.C. 3 Primary, and S.C. 9 classes account for less than 3% of the total Electric Delivery Revenues at present rates. Maintaining the current rates to these classes will have only a minimal impact in determining the spread of an authorized electric delivery increase among the remaining classes.

Similarly, the Gas S.C. 11T class accounts for less than 2% of the total Gas Delivery Revenues at present rates. Maintaining the current rates to this class will have only a minimal impact in determining the spread of an authorized gas delivery increase among the remaining classes.

Central Hudson Gas & Electric Corporation
Case No. 23-E-0418 and 23-G-0419
INTERROGATORY / DOCUMENT REQUEST

Request No.: CH to Public Utility Law Project (PULP) (003)

Request Date: 11/22/2023

Response Due: 12/4/2023

Information Requested by: Forecasting and Rates Panel

Information Requested of: PULP Witness Yates

Subject/Topic: EAP Program

Reply Date: 12/4/2023

Response Provided by: William D. Yates, C.P.A.

QUESTION:

With respect to the statement made on page 37, lines 13-17 of your testimony regarding the Rate Year funding for EAP electric and gas bill discounts and the use of the Company's allocation from the \$200 million appropriated in the New York State Budget for 2023-2024:

- A. If the budget appropriation were fully utilized to fund EAP bill discounts, what level of EAP program funding do you propose after the conclusion of the Rate Year?
- B. Do you propose that the EAP discount funding be reduced by the amount of the allocated state budget funds after the conclusion of the Rate Year?

RESPONSE:

- A. PULP objects to this request to the extent that it mischaracterizes PULP's proposal: PULP did not propose that the budget appropriation be used to fund EAP bill discounts; PULP proposed that the cap on Central Hudson's EAP budgets for the Rate Year be raised by the lesser of the Company's allocation from the \$200 million appropriated, or the amount that EAP electric and/or gas budgets for the Rate Year are ultimately determined to exceed the 2% Cap.

Subject to and without waiving the foregoing objection, PULP provides the following response:

PULP did not propose a level of EAP funding after the conclusion of the Rate Year. PULP did propose that the EAP Working Group in Case 14-M-0565 incorporate consideration of whether to use a similar approach to limit the possibility for discounts reductions at other utilities (Yates at 37, Lines 20 – 22), and anticipates that such considerations could extend for all utilities (including Central Hudson) beyond Central Hudson's Rate Year in these proceedings.

- B. See response to "A." above.

The following is a listing of all the Panel responses to Information Requests relied upon in the development of our rebuttal testimony:

DPS-269 – Gas Flat Rate Billing – Bill Impacts
DPS-629 – Negative Historical Gas Sales and Customer Data
DPS-630 – Updated Forecasting Data (Updated 11/3/2023)
DPS-697 – High Volume Discount Rate Customers
DPS-736 – Block Rate Flattening Scenarios
DPS-752 – Gas Revenue Allocation

UIU-005
UIU-036

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

Request No.: DPS-03, IR-269 Update 11/2/2023
Requested By: DPS - Andrew Carpenter and Jeff Tengeler
Date of Request: August 21, 2023
Witness: Forecasting and Rates Panel
Subject: Gas Flat Rate Billing – Bill Impacts

Question:

In all interrogatories, any requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

Provide, in Excel format, an updated Exhibit__(FRP-16) that shows the Rate Year (RY) ending June 30, 2025 bill impacts resulting from achieving equal block rates over two years, as proposed by the Company, and achieving equal block rates over three years. In addition, provide in additional columns the corresponding customer distribution by usage, and low-income customer distribution by usage.

Provide any updated rate design workpapers that would compute the RY block rates to be leveled over a three-year span.

Response:

“DPS-269 Attachment 1.xlsx” provides rate design scenarios that show the progression to flat rates over a two-year period with rates for both scenarios based on the Rate Year 1 revenue requirement and billing determinants.

“DPS-269 Attachment 2.xlsx” provides rate design scenarios that show a progression to flat rates over a three-year period based on the Company’s current RY3 rates in effect from Case 20-G-0429 prior to any proposed change in revenue requirement or billing determinants in the Rate Year presented in the Company’s filing (i.e. utilizing the same revenue requirement and billing determinants for RY3 in order to show only the impact of a rate design change).

“DPS-269 Attachment 3.xlsx” provides rate design scenarios that show a progression to flat rates over a three-year period, rather than the two year period proposed by the Company and illustrated in DPS-269 Attachment 1, with rates for all three scenarios based on the Rate Year 1 revenue requirement and billing determinants.

The steps taken to flatten the gas blocks are consistent with the steps that were used for SC Nos. 1 & 12 and SC Nos. 2, 6 low volume & 13 presented in Exhibit__(FRP-16) with the SC No. 6 high volume remaining constant for all design scenarios. The Panel has provided customer distribution and low-income customer distribution by usage range for four months based on actual billing data ranging from April 2022 – January 2023 which represents a cross section of the data found in “DPS-115

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

Attachment 1.xlsx". The Company does not maintain historical data in the format requested for low-income customers. As a result, the Company has provided customer distribution for low-income customers by defining low income customer as a customer that received a low income bill discount at any point during the years shown in the attachment.

Update 11/2/2023

For purposes of presenting comparable results to DPS-736, the Company is concomitantly providing an updated response to DPS-269 showing updated bill impacts for 2- and 3-year phase out reflecting the same corrections identified in DPS-697 as well as the same corresponding phase out of the high volume discount.

In order to only show the impact of base rate increases, annual bills under proposed rates do not reflect changes to the ARP, EAM, RAM, NPA and GSC.
EAM, RAM, and ARP have been included at July 3, 2023 rates.
GSC is included using a 12 month average of Jun 1, 2022- May 31, 2023

In order to only show the impact of base rate increases, annual bills under proposed rates do not reflect changes to the ARP, EAM, RAM, NPA and GSC.
EAM, RAM, and ARP have been included at July 3, 2023 rates.
GSC is included using a 12 month average of Jun 1, 2022- May 31, 2023

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

Request No.: DPS-23, IR-629
Requested By: DPS - Daniel Gadomski
Date of Request: October 4, 2023
Witness: Forecasting and Rates Panel
Subject: Negative Historical Gas Sales and Customer Data

Question:

In all interrogatories, any requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

- a) Referring to the Forecasting and Rats Panel's (Panel) Gas "Customer Model Review 2024" workpaper, explain the negative customer values for the following:

Customer Model Review.xlsx		
Customer Class	Tab and Cell Reference	Date(s)
ResT_SpHt	Tab RHT, Cell E311	October 2021
ResT_NHt	Tab RNH, Cell E311 & E312	October 2021, November 2021
TransCom	Tab CNH, Cell E311 & E312	October 2021, November 2021
TransCHt	Tab CHT, Cell E311 & E312	October 2021, November 2021
TransPA	Tab OPA Cell E311 & E312	October 2021, November 2021
TransInd	Tab IND, Cell E311 & E312	October 2021, November 2021

- b) Referring to the Panel's "ComIndGasData" workpaper, Tab "Sales," explain the negative sales values for the following:

ComIndGasData.xlsx		
Customer Class	Tab and Cell Reference	Date(s)
TransCom	Tab Sales, Cells D323, D324, & D326	October 2021, November 2021, January 2022
TransCHt	Tab Sales, Cells F323 & F324	October 2021, November 2021
TransInd Tab Sales, Cells H323 & H324	TransInd Tab Sales, Cells H323 & H324	TransInd Tab Sales, Cells H323 & H324

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

- c) Referring to the Panel's Gas "Sales Model Review 2024" workpaper, Tab "RHT," explain why each monthly Cell value in the following range (C254 through C277) does not equal the Actual Sales divided by the Actual Customers of the same range for Columns "L" and "I", respectively.
- d) Referring to the Panel's Gas "Sales Model Review 2024" workpaper, Tab "CHN," explain why each monthly Cell value in the following range (C254 through C277) does not equal the Actual Sales divided by the Actual Customers of the same range for Columns "L" and "I", respectively.

Response:

- a) The referenced months/cells represent billing data in which the customers and/or sales recorded in a business month reflected more canceled bills than bills resulting in a negative net value for the class. As can be seen in the referenced files, the number of customers and/or sales in subsequent months is higher when these customers are then re-billed.
- b) Please refer to the response to part a.
- c) The values shown in the referenced workpaper were inadvertently entered incorrectly. The correct results can be found in DPS-629 Attachment 1 and can also be derived from the workpapers titled "ResGasData" and "ComIndGasData" provided in response to DPS-001.
- d) See response to part c.

Request No.: DPS-23, IR-630 Update 11/3/2023
Requested By: DPS - Daniel Gadomski
Date of Request: October 4, 2023
Witness: Forecasting and Rates Panel
Subject: Updated Forecasting Data

Question:

In all interrogatories, any requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

- a) Provide the latest historical actual monthly customer and sales data starting January 2023 for each electric and gas class listed on page 14 of the Forecasting and Rates Panel's (Panel) testimony.
- b) Provide the average residential and non-residential sales in Albany, Catskills, Dutchess, and Newburgh for calendar years 2020 through 2022 that were used to compute the weights for the composite economic drivers, as referred in the Panel's testimony (page 15, line 19, through page 16, line 1).
- c) Provide updates to all data contained in the Panel's "BilledHDD and BilledCDD" workpaper to reflect actual weather data through August 31, 2023.

Response:

Original Response: 10/12/2023

- a) Please see attachments titled "DPS-630 Attachment 1.xlsx" and "DPS-630 Attachment 2.xlsx" for the latest historical actual monthly customer and sales data from January 2023 through September 2023. The data can be found on the 'Sales&Customers' tab of each of the files. The actual light fixture data for area light, street light, and traffic signals as of 09/30/2023 can be found on the 'Lighting Fixtures' tab. The Company does not extract lighting fixture inventory from the CIS system monthly and as a result the monthly fixture inventory from January 2023 through September 2023 for Service Classification Nos. 5, 8 and 9 is not readily available.
- b) For Electric, please see the previously provided workpaper titled "Electric Customers - Sales by County.xls". For gas, please see the attachment titled "DPS-630 Attachment 2.xlsx" on the 'Avg. Sales by County' tab.
- c) Updates pertaining to actual weather data through August 31, 2023 for electric can be found in attachment titled "DPS-630 Attachment 1.xlsx" in the last four tabs of the attachment. The data for gas can be found in the attachment titled "DPS-630 Attachment 2.xlsx" on the tabs titled 'ResBldDD and ComBldDD'.

Update 11/03/2023

Please refer to additional attachment titled "DPS-630 Attachment 2 Update 1103203.xlsx" that contains updated sales and customers for residential heating and

Request No.: DPS-29, IR-697
Requested By: DPS - Andrew Carpenter and Jeff Tengeler
Date of Request: October 16, 2023
Witness: Forecasting and Rates Panel
Subject: High Volume Discount Rate Customers

Question:

In all interrogatories, any requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel, or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

Regarding gas S.C. 6 customers who are eligible for the high-volume discount rate:

- a) Confirm if the Company's revenue price out incorporated high-volume customer sales priced out at the high-volume discount rate in the Rate Year.
- b) If the answer to question (a) is no:
 - i. Explain whether the Company considers it appropriate to account for revenue from the high-volume sales priced out at the current discount rate in the revenue price out.
 - ii. What is the impact to the Company's revenues from applying the projected Rate Year high volume customer sales priced out at the current high volume discount rate?
 - iii. Provide an update to the Company's "Gas Revenue Allocation with Block Rates" workpaper, "Rate Design – RY" tab, by updating the following for S.C. 2, 6, and 13:
 1. Column B – Mcf Units.
 2. Column D – Current Rates.
 3. Column E – Current Revenue.
 4. Column G – Projected Rates .
 5. Column H – Projected Revenue.
 6. Remove tail block discount in cell B30.
- c) For the 105 high volume discount customers, provide the name of each customer and bill impacts under the Company's proposed revenue requirement.

Response:

- a) The Company's price out model inadvertently continued to price out high volume customer sales at the tail block rate rather than the high volume discount rate.
- b)
 - i. Yes, it would be appropriate to price out the sales associated with high-volume customers at the current discount rate to determine forecasted revenue.
 - ii. The Company did not explicitly develop a separate forecast for SC 6 high volume customers. Based on the estimate of high volume sales, determined as percentage of Rate Year SC 6 total sales, as shown on the tab 'Tail Block Discount' in the workpaper titled "Gas Revenue Allocation with Block Rates", the resulting revenue difference would be a decrease of \$2,085,300 if SC 6 high

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

volume sales had been priced out at the high volume discount rate. This calculation is based on a revenue differential of \$19,860 per customer multiplied by the assumption of 105 customers.

iii. Please refer to DPS-697 Attachment 1 which contains an update to the Company's workpaper titled "Gas Revenue Allocation with Block Rates.xlsx". Any formulas or values that have been corrected in response to part b.iii. have been highlighted in green on the tab titled 'Rate Design – RY'. It should be noted due to the change in pre-rate relief revenue as noted in response to part b.ii the targeted Rate Year revenue in cell E38 has been modified in order to achieve the same Rate Year revenue requirement for SC Nos. 2, 6 and 13 as was shown in the original workpaper.

- c) Please refer to DPS-697 Attachment 2 Confidential. Any customer billed on a SC6 high volume rate over the past twelve months is included in the attachment. For purposes of bill impacts only months in which a customer was billed on the SC6 high volume rate are included. As SC6 is reserved for firm transportation service by the Company of customer-owned gas, the same supply price was assumed that was used for SC2 in order to calculate a total bill impact as was also used in the Company's response to DPS-265.

Request No.: DPS-35, IR-736
Requested By: DPS - Andrew Carpenter and Jeff Tengeler
Date of Request: October 24, 2023
Witness: Forecasting and Rates Panel
Subject: Block Rate Flattening Scenarios

Question:

In all interrogatories, any requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

- a) Using the Company's proposed revenue requirement, provide an update to the Company's response to IR DPS-269, that includes block rate flattening rate design for the class groupings S.C. No. 1 & 12, S.C. No.2, 6, & 13, and S.C. No. 6 – High Volume Customers from present rates and:
 - i. Block rates flattening over a 4-year period.
 - ii. Block rates flattening over a 5-year period.
 - iii. Block rates flattening over a 6-year period.
- b) Along with the scenarios in question (a), provide the rate adjustments needed for the S.C. No. 6 High Volume Discount Rate to be equal to the flattened block rates under each flattening time period.
- c) Provide the estimated bill impacts for each scenario listed in question (a) and (b).

Response:

A) Please refer to the attachments listed below. With the exception of current Rate Year 3 rates effective July 1, 2023, each year shown in the attachments is based on the Company's proposed Rate Year revenue requirement and utilizing a different phase out period. The steps taken to flatten the gas blocks are consistent with the steps that were used for SC Nos. 1 & 12 and SC Nos. 2, 6 low volume & 13 presented in Exhibit__(FRP-16) and the Company's response to DPS-269 except the Rate Year rate increase used to develop the block rates is premised on the correction described in the Company's response to DPS-697b.iii and shown in DPS-697 Attachment 1. For purposes of presenting comparable results, the Company is concomitantly providing an updated response to DPS-269 showing updated bill impacts for 2- and 3-year phase out reflecting the same corrections identified in DPS-697. The attachments show current rates effective July 1, 2023, which represent a 60% movement to flat rates as established in Case 20-G-0429 and the following % progression to flat rates:

Year	Attachment 1 – 4 years	Attachment 2 – 5 years	Attachment 3 – 6 years
1	70%	68%	66%
2	80%	76%	73%

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

3	90%	84%	79%
4	100%	92%	86%
5		100%	93%
6			100%

- i. Please see DPS- 736 Attachment 1 for block rate phase out over a 4-year period.
- ii. Please see DPS-736 Attachment 2 for block rate phase out over a 5-year period.
- iii. Please see DPS-736 Attachment 3 for block rate phase out over a 6-year period.

B) All attachments include scenarios for the phase out of the high volume discount rate over the same period as the block rates. As SC6 is reserved for firm transportation service by the Company of customer-owned gas, the same supply price was assumed that was used for SC2 in order to calculate a total bill impact as was also used in the Company's response to DPS-265. A single usage range has been shown for the SC 6 high volume class as all customers at or above this usage level realize essentially the same bill impact given that all usage is priced out at the same rate.

C) All attachments include estimated bill impacts. Estimated bill impacts are shown both: 1) from the prior year to the current year, for example 80% compression to 90% compression, as well as 2) from the current Rate Year 3 effective July 1, 2023 to the proposed year's compression.

In order to only show the impact of base rate increases, annual bills under proposed rates do not reflect changes to the ARP, EAM, RAM, NPA and GSC.
EAM, RAM, and ARP have been included at July 3, 2023 rates.
GSC is included using a 12 month average of Jun 1, 2022- May 31, 2023

Service Classification Nos. 2, 6 & 13

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

Request No.: DPS-40, IR-752
Requested By: DPS - Andrew Carpenter and Jeff Tengeler
Date of Request: November 1, 2023
Witness: Forecasting and Rates Panel
Subject: Gas Revenue Allocation

Question:

In all interrogatories, any requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

Referring to the Company's workpaper titled "Gas Revenue Allocation with Block Rates," in the "Rev Alloc – RY" tab:

- a) Confirm that allocating the Company's interruptible imputation bundled with its revenue requirement would allocate some of the interruptible imputation total to S.C. No 11 – EG, which does not receive a reduction for imputation in rate design.
- b) Confirm if the interruptible imputation should be allocated separately from the revenue requirement and exclude S.C. No. 11 – EG from both the allocation and rate design.

Response:

- a) Yes, under the proposed revenue allocation, S.C. No 11 – EG would receive a portion of the revenue requirement related to the interruptible imputation while the class does not receive a reduction for imputation in rate design.
- b) Yes, the Company agrees that the interruptible imputation should be allocated separately from the revenue requirement to better match the revenue allocated to the benefit that is received by the respective S.C.

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

Request No.: KCE-03, IR-080 (3.12)
Requested By: Key Capture Energy, LLC
Date of Request: November 7, 2023
Witness:
Subject:

Question:

In all interrogatories, any requests for workpapers or supporting calculations shall be construed as requesting any Word, Excel, or other computer spreadsheet models in original electronic format with all formulae intact and unlocked.

Please provide the following information:

Do all of Central Hudson's customers pay surcharges on their bills (e.g., Rate Adjustment Mechanism, Revenue Decoupling Mechanism, System Benefit Charge, VDER Cost Recovery, etc.)? If some do not, why?

Response:

No, not all of Central Hudson's customers pay surcharges. Some customers are exempt from surcharges pursuant to the rules of any special programs they are participating in as defined in the applicable General Information Section of the Company's tariff. For example, customers participating in the Excelsior Jobs Program ("EJP") are exempt from the Revenue Decoupling Mechanism ("RDM") for their EJP load pursuant to General Information Sections 41 and 45 of the Company's electric and gas tariffs, respectively. Furthermore, customers participating in the Recharge New York ("RNY") program are exempt from both the RDM and System Benefits Charge on their RNY load pursuant to General Information Section 40 of the Company's electric tariff.

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

Request No.: UIU-01, IR-005
Requested By: Utility Intervention Unit
Date of Request: October 3, 2023
Witness:
Subject:

Question:

Unless noted otherwise, each of the following information requests pertains to both electric and gas services of Central Hudson (or the Company). Please provide a separate answer to each such information request as it pertains to (a) electric and (b) gas.

The August 24, 2021 Joint Proposal, in Cases 20-E-0428, 20-G-0429, and 20-M-0134, discusses the following gas tail block rate customer notification procedure on page 39:

The Company shall mail a letter to each Energy Affordability Program gas customer who, based upon their gas usage in the 12-months ending April 30, 2021, would experience a delivery bill impact of 9% or more solely due to changes in the tail block structure in the Rate Year beginning July 1, 2021.

Question: Please provide a copy of the letter sent to each Energy Affordability Program gas customer as mentioned on page 39 of that August 24, 2021 Joint Proposal. How many Energy Affordability Program gas customers were notified based on the criteria mentioned above? On what date(s) was that letter sent to these customers?

Response:

The Company did not send any letters. Please refer to the Gas Tail Block Notification filed by Central Hudson on December 30, 2021 in Case 20-G-0429.

Central Hudson Gas & Electric Corporation
Case Nos. 23-E-0418 & 23-G-0419
Response to Interrogatory / Document Request

Request No.: UIU-06, IR-036
Requested By: Utility Intervention Unit
Date of Request: November 1, 2023
Witness:
Subject:

Question:

Unless noted otherwise, each of the following information requests pertains to both electric and gas services of Central Hudson (or the Company). Please provide a separate answer to each such information request as it pertains to (a) electric and (b) gas.

Please provide the total bill impact tables for monthly usage using present rates versus proposed rates in each residential service class or subclass for January 2023 and July 2023. Please provide the monthly bill usages ranging from 0 usage to the maximum usage experienced in each class. Please also provide the number of customers and number of low-income customers in each billing usage range.

Please include all rate and usage assumptions in your answer. In addition, please provide a copy of the requested information in one or more unlocked, working electronic spreadsheet files that are compatible with Microsoft Excel, with all data, formulas and links intact.

Response:

As it relates to electric SC6 TOU bill impacts, the Company objects to this request on the grounds that it is overly burdensome and would require a complex and difficult to understand special study for a population of customers that represents less than 1% of residential customers. Subject to and without waiving the foregoing objection, the Company is providing information for electric and gas SSC1 customers, which make up 99% of residential customers. Please see UIU-036 Attachment 1 for total bill impacts under present and proposed rates. Gas bill impacts and bill distributions for all SC 1 customers and low-income customers can be found on the tab labeled "Gas Bill Impacts" while the same information for electric can be found on the tab labeled "SC 1 Electric Bill Dist". To only show the impact of base rate increases, bills under present and proposed rates do not reflect changes for all commodity and surcharges.
