

BICKEY RIMAL
VICE PRESIDENT

Mr. Rimal has over 17 years of progressive experience in the energy and environmental sector. He is a testifying expert on matters related to cost of service and rate design, and has contributed to engagements related to energy market assessments, valuations of energy assets, and utility performance benchmarking. His work often involves financial modeling, statistical analysis, and regulatory research. Mr. Rimal has provided expert testimony on cost allocation issues on multiple occasions on behalf of electric, natural gas, water, and wastewater utilities. He has extensively used Concentric's Excel-based macro-driven Allocated Class Cost-of-Service ("ACCOS") model for various electric, gas, and water utility clients, modifying and updating the model as needed to suit the specific needs of the clients. Mr. Rimal has a Masters in International Public Affairs with a focus on Energy Policy from the University of Wisconsin in Madison. Prior to enrolling in the graduate program, Mr. Rimal worked at a global energy and environmental consulting firm for three years. While there, Mr. Rimal was extensively involved in projects dealing with policy design and implementation, economic impact analysis, regulatory evaluation, and environmental risk assessment.

REPRESENTATIVE PROJECT EXPERIENCE**Regulatory Proceedings and Litigation Support**

Mr. Rimal has been involved in projects dealing with all aspects of regulatory ratemaking process. Mr. Rimal has extensively used Concentric's excel-based macro driven Allocated Class Cost-of-Service ("ACCOS") model for various utility clients. He has modified and updated the model as needed to suit the specific needs of the clients.

Representative engagements have included:

- Conducted various cost allocation studies, functional studies, and minimum system studies and filed testimony supporting those studies for a vertically integrated Midwest electric utility.
- Supported the development of an allocated class cost of service study and rate design for another vertically integrated Midwest electric utility. Mr. Rimal was directly involved in conducting special cost allocations and functional studies; developing cost of service studies; designing the rates and calculating the associated bill impacts.
- Supported the development of an allocated class cost of service study and rate design for a distribution only electric utility in Pennsylvania. Mr. Rimal modified Concentric's ACCOS model to incorporate three distinct test years simultaneously and automated the results creation process.
- Responsible for the development of various cost allocation studies for two electric utilities in New York as part of the cost of service study.
- Supported the developed revenue requirement model to comply with a new performance based formula ratemaking process for a Midwest electric utility.

- Supported cash working capital studies on multiple cases by conducting billing lag analysis involving extremely large data sets utilizing SPSS and R software.
- Created model in R to statistically compare hourly load data between two distinct types of meters to assist a utility in its load research program.
- Created an excel based benchmarking model that have been used on multiple occasions to assess performance of several utilities against various peer groups.
- Supported the development of a rate model to calculate the annual cost of service rates as well as a levelized rate for conversion of an oil pipeline into a natural gas pipeline.

Market Assessment and Asset Optimization Review

- Involved on projects, with two different gas utilities in the Northwest, that forecasted the evolution of demand for compressed natural gas and liquefied natural gas in the transportation sector in their respective territories. Mr. Rimal developed models to analyze the market penetration of different transportation fuels under various fuel price spread scenarios and other market dynamics.
- Estimated the impact on electricity prices due to pre-mature closure of certain nuclear facilities using regression analysis. Validated the price impacts by analyzing the generation supply curve for the location in question.
- Annual assessment of asset manager's performance on multiple occasions by conducting asset optimization analysis of client's natural gas portfolio consisting of both transportation and storage assets.

Valuation

- Created a Discounted Cash Flow ("DCF") model to value a generic regulated natural gas local distribution company ("LDC"). The model was customized to create valuation for any LDC covered by SNL Financial by automating the data retrieval process from SNL based on user input. The model had an added functionality of triggering a revenue enhancement when the earned ROE was outside certain pre-established thresholds.
- Created Discounted Cash Flow ("DCF") models to assess the profitability of various generic units operating in the New York Control Area for NYISO.

Capacity Price Forecasting

- Updated and modified Concentric's Capacity model used to forecast capacity prices for various regions within NYISO based on existing and planned generation, planned retirements, transmission constraints, market mitigation rules, gross and net CONE estimates, and other relevant demand curve parameters.

Relevant ICF Experience

- While at ICF, Mr. Rimal was part of a team that assisted the EPA's Clean Air Market Division (CAMD) in analyzing the effect of environmental policies on power generation sector. As a part of this effort, he was significantly involved in executing as well as maintaining and updating the Technology Retrofit and Updating Model (TRUM). The TRUM model simulates the action of the electric utilities industry under a multi-pollutant emissions trading program.

- Assisted in the creation of an excel model that assessed the impacts of GHG mitigation policies on the competitiveness of the US manufacturing industries.
- Provided support to the Hours of Service regulation by analyzing different crash related data to identify main causes of fatigue among drivers by utilizing logistic regression models.

PROFESSIONAL HISTORY

Concentric Energy Advisors, Inc. (2011 – Present)

Vice President
Assistant Vice President
Senior Project Manager
Project Manager
Senior Consultant
Consultant
Assistant Consultant

Higher than Interconnection Voltage

Question 8:

Should the Customer Charge be set to a predetermined level and any difference in costs and revenues be re-allocated?

Question 9:
Is the cost a tax-related to either a specific asset or cost which varies with customer demand?

Result (Customer, Local, Shared, or Allocate b/w Shared & Local)

Exclude Local Costs from Buyback Rates? (if applicable)

FERC
Account Description

Question 1:
Is the cost linked to a type of asset?

Question 2:
Are all the costs attributable to customer demand?

Question 7:
Does the cost apply to all cost categories?

Plant, Reserve, Depreciation Expense

301-303	Intangible Plant	Yes	Yes	NA	NA	NA	Shared
310-345	Production Plant	Yes	Yes	NA	NA	NA	Shared

Transmission Plant and O&M

Q1: Yes, Transmission Plant and associated Transmission O&M expenses listed above are linked to the Company's transmission assets.

Q2: Yes, since transmission costs are classified as entirely demand related in the Company's ECOS.

Q3: Yes, a decrease in demand would not result in entirely unused assets as this equipment serves all customers.

Q4: Yes b/c Transmission Costs are allocated using CP allocator.

Q5: No, an increase in non-coincident peak demand does not necessarily increase transmission costs.

920-935 Administrative and General

Q1: No

Q7: Yes

Q8: No

Q9: No

		Higher than Interconnection Voltage						
FERC Account	Description	Question 1:	Question 2:	Question 7:	Question 8:	Question 9:	Result (Customer, Local, Shared, or Allocate b/w Shared & Local)	Exclude Local Costs from Buyback Rates? (if applicable)
		Is the cost linked to a type of asset?	Are all the costs attributable to customer demand?	Does the cost apply to all cost categories?	Should the Customer Charge be set to a predetermined level and any difference in costs and revenues be re-allocated?	Is the cost a tax-related to either a specific asset or cost which varies with customer demand?

360-362 Plant and associated O&M (580-582, 588-589, 590-591, 598); and Intangible and General Plant

- Q1: Yes, these Plant and associated O&M expenses listed above are linked to the Company's distribution assets.
Q2: Yes, since these costs are classified as entirely demand related in the Company's ECOS.
Q3: No, a decrease in demand would not result in entirely unused assets as this equipment serves all customers taking service at Primary and Secondary voltage.
Q4: Yes b/c these costs are partially shared and increase in coincident demand can increase the cost.
Q5: Yes, an increase in non-coincident peak demand does increase these costs because these costs are allocated using NCP demand.
Q6: No, reverse power flow will would not increase the cost, except for Station Equipment (362)

364-367 Plant and associated O&M (583-584, 593-594)

- Q1: Yes, these Plant and associated O&M expenses listed above are linked to the Company's distribution assets.
Q2: Yes, since these costs are classified as entirely demand related in the Company's ECOS.
Q3: No, a decrease in demand would not result in entirely unused assets as this equipment serves all customers taking service at Primary and Secondary voltage.
Q4: No b/c these costs are allocated using NCP demands and is the interconnection voltage for Primary customers.
Q5: Yes, an increase in non-coincident peak demand does increase these costs because these costs are allocated using NCP demand.
Q6: Yes, reverse power flow will would not increase the cost, except for Station Equipment (362)

Higher than Interconnection Voltage

Question 8:

Should the Customer Charge be set to a predetermined level and any difference in costs and revenues be re-allocated?

Question 9:
Is the cost a tax-related to either a specific asset or cost which varies with customer demand?

Result (Customer, Local, Shared, or Allocate b/w Shared & Local)

Exclude Local Costs from Buyback Rates? (if applicable)

FERC
Account Description

Question 1:
Is the cost linked to a type of asset?

Question 2:
Are all the costs attributable to customer demand?

Question 7:
Does the cost apply to all cost categories?

Plant, Reserve, Depreciation Expense

301-303	Intangible Plant	Yes	Yes	NA	NA	NA	Shared
310-345	Production Plant	Yes	Yes	NA	NA	NA	Shared
389-399	General Plant	Yes	Yes	NA	NA	NA	Shared

Expenses

920-935	Administrative and General	No	NA	Yes	No	No	Customer

Production Plant and O&M

Q1: Production Plant and associated Production O&M expenses listed above are linked to the Company's production assets.

Q2: Production Costs are classified as entirely demand related in the Company's ECOS, except for Hydro costs. For standby ACOS, all Production Costs are treated as Demand related.

920-935 Administrative and General

Q1: No

Q7: Yes

Q8: No

Q9: No

		Higher than Interconnection Voltage						
FERC Account	Description	Question 8:						
		Question 1: Is the cost linked to a type of asset?	Question 2: Are all the costs attributable to customer demand?	Question 7: Does the cost apply to all cost categories?	Should the Customer Charge be set to a predetermined level and any difference in costs and revenues be re-allocated?	Question 9: Is the cost a tax-related to either a specific asset or cost which varies with customer demand?	Result (Customer, Local, Shared, or Allocate b/w Shared & Local)	Exclude Local Costs from Buyback Rates? (if applicable)
Plant, Reserve, Depreciation Expense

Transmission Plant and O&M

- Q1: Yes, Transmission Plant and associated Transmission O&M expenses listed above are linked to the Company's transmission assets.
Q2: Yes, since transmission costs are classified as entirely demand related in the Company's ECOS.
Q3: Yes, a decrease in demand would not result in entirely unused assets as this equipment serves all customers.
Q4: Yes b/c Transmission Costs are allocated using CP allocator.
Q5: No, an increase in non-coincident peak demand does not necessarily increase transmission costs.

920-935 Administrative and General

360-362 Plant and associated O&M (580-582, 588-589, 590-591, 598); and Intangible and General Plant

- Q1: Yes, these Plant and associated O&M expenses listed above are linked to the Company's distribution assets.
Q2: Yes, since these costs are classified as entirely demand related in the Company's ECOS.
Q3: No, a decrease in demand would not result in entirely unused assets as this equipment serves all customers taking service at Primary and Secondary voltage.
Q4: Yes b/c these costs are partially shared and increase in coincident demand can increase the cost.
Q5: Yes, an increase in non-coincident peak demand does increase these costs because these costs are allocated using NCP demand.
Q6: No, reverse power flow will would not increase the cost, except for Station Equipment (362)

364-367 Plant and associated O&M (583-584, 593-594)

- Q1: Yes, these Plant and associated O&M expenses listed above are linked to the Company's distribution assets.
Q2: Yes, since these costs are classified as entirely demand related in the Company's ECOS.
Q3: No, a decrease in demand would not result in entirely unused assets as this equipment serves all customers taking service at Primary and Secondary voltage.
Q4: No b/c these costs are allocated using NCP demands and is the interconnection voltage for Primary customers.
Q5: Yes, an increase in non-coincident peak demand does increase these costs because these costs are allocated using NCP demand.
Q6: Yes, reverse power flow will would not increase the cost.
