

[illegible]

Name of Respondent Commonwealth Edison Company		This Report Is: (1) An Original		Date of Report (Mo./Da./Yr.)		Year of Report December 31, 2024		
EMPLOYEE DATA								
Instructions: 1. The data on number of employees should be reported for the payroll period ending nearest to October 31, or any payroll period ending 60 days before or after October 31. 2. If the respondent's payroll for the reported period includes any special construction forces, include such employees as part-time and temporary employees and show the number of such special construction employees so included. 3. The number of employees assignable to each department from joint functions of combination utilities may be determined by estimate, based on employee equivalents. Show the estimated number of equivalent employees attributed to each department from joint functions. 4. If respondent furnishes two or more kinds of utility service, general officers, executive and other employees not assignable to any particular department are to be reported in column (h). No employee is to be included more than once.								
Classification (a)	Electric (b)	Gas (c)	Water (d)	Heating (e)	(f)	(g)	Common (h)	Total (i)

CHARGES FOR OUTSIDE, PROFESSIONAL AND OTHER CONSULTATIVE SERVICES					
Instructions: 1. Report the information specified below for all charges made during the year included in any account (including plant accounts) for outside consultative and other professional services. (These services include rate, management, construction, engineering, research, financial, valuation, legal, accounting, purchasing, advertising, labor relations, and public relations, rendered for the respondent under written or oral arrangement, for which aggregate payments were made during the year to any corporation, partnerships organization of any kind, or individual (other than for services as an employee or for payments made for medical and related services) amounting to more than \$50,000 for utilities with operating revenues of \$25,000,000 or less and more than \$250,000 for utilities with operating revenues of more than \$25,000,000, including payments for legislative services, except those which should be reported in Account 425.4 Expenditure for Certain Civil, Political and Related Activities. (a) Name and Address of person or organization rendering services. (b) Description of services received during year and project or case to which services relate. (c) Basis of charges. (d) Total charges for the year, detailing utility department and account charged. 2. For any services that are of a continuing nature, give the date and term of contract and date of Commission authorization, if contract received Commission approval. 3. Designate with an asterisk associated companies.

GENERAL DESCRIPTION OF CONSTRUCTION OVERHEAD PROCEDURE				
Instructions: 1. For each construction overhead explain: (a) the nature and extent of work, etc., the overhead charges are intended to cover, (b) the general procedure for determining the amount capitalized, (c) the method of distribution to construction jobs, (d) whether different rates are applied to different types of construction, (e) basis of differentiation in rates for different types of construction, and (f) whether the overhead is directly or indirectly assigned. 2. Show below the computation of allowances for funds used during construction rates, in accordance with the provisions of Gas Plant Instructions 3(17) of the Uniform System of Accounts. 3. Where a net-of-tax rate for borrowed funds is used, show the appropriate tax effect adjustment to the computations below in a manner that clearly indicates the amount of reduction in the gross rate for tax effect. See Pages 44a, 44b and 44c for a General Description of Construction Overhead Procedure and the Computation of the Quarterly Allowance for Funds Used During Construction Rate.				
COMPUTATION OF ALLOWANCES FOR FUNDS USED DURING CONSTRUCTION RATES 1. For line 1(S), column (d) below, enter the rate granted in the last rate proceeding. If such is not available, use the average rate earned during the preceding three years. 2. Identify, in a footnote, the specific entity used as the source for the capital structure figures. 3. Indicate, in a footnote, if the reported rate of return is one that has been approved in a rate case, black-box settlement rate, or an actual three-year average rate.				
1. Components of Formula (Derived from actual book balances and actual cost rates):				
Line No.	Title (a)	Amount (b)	Capitalization Ratio (Percent) (c)	Cost Rate Percentage (d)
1	Average Short-Term Debt	S		
2	Short Term Interest			s
3	Long-Term Debt	D		d
4	Preferred Stock	P		p
5	Common Equity	C		c
6	Total Capitalization			
7	Average Construction Work in Progress Balance	W		
2. Gross Rates for Borrowed Funds = $s(S/W)+d(D/(D+P+C))(1-S/W)$				
3. Rate for Other Funds = $[1-S/W] [p(P/(D+P+C))+c(C/(D+P+C))]$				
Weighted Average Rate Actually Used for the Year: Rate for Borrowed Funds - Rate for Other Funds -				

Page 44, Item 1, Line No. 5, column (d) - The Common Equity Cost Rate Percentage used in the computations on pages 44b and 44c reflects the cost of common equity allowed in the ICC Order per Docket No. 22-0486/23-0055.

Name of Respondent This Report Is: Date of Report (Mo./Da./Yr.) Year of Report
Commonwealth Edison Company (1) An Original December 31, 2024

GENERAL DESCRIPTION OF CONSTRUCTION OVERHEAD PROCEDURE

Engineering

The salaries and expenses of engineers whose time can be directly assigned to specific projects are directly recorded to applicable capital projects. The salaries and expenses of engineers performing strategic services, system expansion and other safeguards to aid in system reliability not directly assigned are allocated to capital projects on the basis of direct labor costs and contract labor costs.

Certain Administrative, Legal and Injuries and Damages Costs

An analysis is made of certain administrative and general costs, legal costs and injuries and damages costs, including certain affiliated service company costs, to determine the portions of such costs accumulated in operation and maintenance expense accounts, which are applicable to construction. Amounts applicable to construction are charged to an overhead project and distributed to construction based on total costs of construction projects each month.

Workmen's Compensation, Incentive Compensation, Stock Compensation, Pensions, Employee Benefits and Payroll Taxes

The costs of workmen's compensation, incentive compensation, stock compensation, pensions, employee benefits and payroll taxes are accumulated in clearing accounts and projects provided for that purpose. The costs are allocated to construction projects on the basis of direct labor costs.

Supervision and Other Operations' Support Costs Includable in Direct Construction Costs and Information Systems Costs

The salaries and expenses of employees whose time can be directly assigned to specific projects are directly recorded as direct construction costs. The salaries and expenses of certain department heads, other supervisory employees, other operations' support employees and certain information systems costs are allocated to construction projects on the basis of direct labor costs and contract labor costs.

Illinois Use Tax

Illinois Use Tax is added to the cost of materials purchased and thus is expensed or capitalized in accordance with the accounting for the associated materials.

Allowance for Funds Used During Construction (AFUDC)

The computation of an annual AFUDC rate has been approved by the Chief Accountant of the Federal Energy Regulatory Commission. However, ComEd made quarterly computations during the year 2024. The rates used in 2024 are presented on pages 44b and 44c. The allowance is compounded semi-annually and is applied to construction expenditures for projects having a construction period exceeding 30 days and amounting to more than \$25,000. The computation period begins with the commencement of construction and ends with the in-service date. AFUDC is charged to specific overhead projects and distributed to construction based on direct charges to construction projects each month.

Capitalized Interest

ComEd uses Accounting Standards Certification No. 835, "Capitalization of Interest Costs," to calculate the costs during construction of debt funds used to finance its non-regulated construction projects.

Appendix C - Stakeholder Presentation

Rate Design Investigation

Page 310 of 580

Name of Respondent This Report Is: Date of Report (Mo./Da./Yr.) Year of Report
Commonwealth Edison Company (1) An Original December 31, 2024

COMPUTATION OF QUARTERLY ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION RATES

First Quarter 2024			
Title	Amount (in \$000)	Capitalization Ratio	Cost Rate
Average Short-term Debt	470,583		
Short-Term Interest			6.15 %
Long-Term Debt	11,809,786	45.21 %	4.05 %
Preferred Stock			
Common Equity	14,311,532	54.79 %	8.91 %
Total Capitalization	26,121,318	100.00 %	
Average CWIP Balance	1,299,481		
Gross Rate for Borrowed Funds		3.39%	
Rate for Other Funds		3.11%	
Weighted Average Rate Actually Used for the Quarter			
Rate for Borrowed Funds		3.39%	Note 1
Rate for Other Funds		3.11%	
Second Quarter 2024			
Title	Amount (in \$000)	Capitalization Ratio	Cost Rate
Average Short-term Debt	334,809		
Short-Term Interest			6.00 %
Long-Term Debt	11,809,786	45.21 %	4.05 %
Preferred Stock			
Common Equity	14,311,532	54.79 %	8.91 %
Total Capitalization	26,121,318	100.00 %	
Average CWIP Balance	1,231,834		
Gross Rate for Borrowed Funds		2.96%	
Rate for Other Funds		3.55%	
Weighted Average Rate Actually Used for the Quarter			
Rate for Borrowed Funds		2.96%	Note 1
Rate for Other Funds		3.55%	

Note 1 According to the FERC guidelines defining the components of the cost of construction, the formula to determine the proportion of costs from varying funding sources (Equity Capital, Long-Term Debt & Short-term debt) derives rates from funding sources other than STD by first allocating the portion attributable to STD. The calculation fundamentally first assigns short-term borrowing to capital investment. Using that premise, in situations where short-term borrowings exceed invested capital (CWIP), 100% of the AFUDC rate will be comprised of the estimated short-term borrowing rate for the calculation period. This treatment is also consistent with an ICC ruling that specifically states this position.

COMPUTATION OF QUARTERLY ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION RATES

Third Quarter 2024			
Title	Amount (in \$000)	Capitalization Ratio	Cost Rate
Average Short-term Debt	19,500		
Short-Term Interest			5.49 %
Long-Term Debt	11,809,786	45.21 %	4.05 %
Preferred Stock			
Common Equity	14,311,532	54.79 %	8.91 %
Total Capitalization	26,121,318	100.00 %	
Average CWIP Balance	1,342,873		
Gross Rate for Borrowed Funds		1.89%	
Rate for Other Funds		4.81%	
Weighted Average Rate Actually Used for the Quarter			
Rate for Borrowed Funds		1.89%	Note 1
Rate for Other Funds		4.81%	

Fourth Quarter 2024			
Title	Amount (in \$000)	Capitalization Ratio	Cost Rate
Average Short-term Debt	18,250		
Short-Term Interest			4.98 %
Long-Term Debt	11,809,786	45.21 %	4.05 %
Preferred Stock			
Common Equity	14,311,532	54.79 %	8.91 %
Total Capitalization	26,121,318	100.00 %	
Average CWIP Balance	1,396,172		
Gross Rate for Borrowed Funds		1.87%	
Rate for Other Funds		4.82%	
Weighted Average Rate Actually Used for the Quarter			
Rate for Borrowed Funds		1.87%	Note 1
Rate for Other Funds		4.82%	

Note 1 According to the FERC guidelines defining the components of the cost of construction, the formula to determine the proportion of costs from varying funding sources (Equity Capital, Long-Term Debt & Short-term debt) derives rates from funding sources other than STD by first allocating the portion attributable to STD. The calculation fundamentally first assigns short-term borrowing to capital investment. Using that premise, in situations where short-term borrowings exceed invested capital (CWIP), 100% of the AFUDC rate will be comprised of the estimated short-term borrowing rate for the calculation period. This treatment is also consistent with an ICC ruling that specifically states this position.

2024 Exelon Business Services Company Service Areas & Cost Assignment Methods

Exelon Business Services Company, LLC (BSC) provides services to the Exelon system of companies. For discussion purposes, BSC is divided into three groups: 1) core shared services, 2) utility focused services, and 3) corporate governance. The following are descriptions of the service areas and the cost assignment methods applied when billing the services.

The discussion below summarizes the cost assignment methods which generally require direct billing of services to the extent possible, then allocation based on cost causative allocation methods of costs that cannot be directly assigned.

1) CORE SHARED SERVICES AREAS

The Core Shared Services Areas provide a variety of shared support and management services for the Exelon system of companies. These shared services include Information Technology, Security, Supply, Legal Services, Human Resources, Transportation and Real Estate.

Information Technology

- Energy Delivery Solutions, Projects & Enterprise Solutions. Provides application support to the business units and centrally manages enterprise-wide applications and business unit specific projects.

Cost Assignment:

- Costs for information technology applications which are specific to one Client Company are directly charged to the respective Client Company.
- Costs for information technology applications which benefit all or more than one Client Company are allocated to the respective Client Companies based on an appropriate cost causative allocation methodology, which varies from project to project.
- Cloud and Infrastructure Engineering and Operations. Manages the enterprise IT infrastructure, provides infrastructure services, and ensures a safe and stable operating environment.

Cost Assignment:

- Service costs are directly charged to IT Application Portfolios on a unit price basis for services such as mainframe, email, telephone, LAN, etc. IT Application Portfolio costs are directly charged to Client Companies when specific to one Client Company. IT Application Portfolio costs that benefit more than one Client Company are allocated based on an appropriate cost causative allocation methodology.
- IT Governance. Comprises an IT Program Management Office and Business Office focused on establishing standard processes, procedures and methods and Enterprise Architecture and Planning responsible for comprehensive enterprise strategic planning and architecture standards and assurance.

Cost Assignment:

- Service costs are allocated to Client Companies based on an IT Service Billings ratio of each Client Company or an appropriate cost causative allocation methodology.

Corporate & Information Security Services (CISS)

Includes the costs of providing Corporate and Information Security services for the Client Companies

- Corporate Security and Analysis. Provides security policy development and alignment with policies and strategic initiatives; Intelligence gathering and analytical services across the corporation to include threat / risk assessments and recommendations.
- Information Security. Develop, maintain and enforce a security strategy, policy and standards framework that aligns Exelon business need, legislative and regulatory requirements, and industry standard practices.

Cost Assignment

- Costs for Corporate and Information Security services which are specific to one Client Company are directly charged to the respective Client Company.
- Service costs are allocated to Client Companies based on an IT Service Billings ratio of each Client Company or an appropriate cost causative allocation methodology which varies by service.

Supply

Includes the costs of providing services related to the supply function for the Client Companies. Does not include costs of the materials/services purchased under the Purchase Orders/Contracts established by BSC Supply Services group or the purchase or sale of power.

- Strategic Sourcing. Manages the sourcing of categories across Exelon, drives total cost of ownership, and manages supplier relationships.
- Supply Operations. Provides tactical support to business unit operations. Embedded Supply employees perform these services for the Utilities.
- Supply Support. Comprises e-business functions, supply projects, and diversity initiatives, as well as policies, programs, systems and decision support systems.

Cost Assignment:

- Whenever possible, service costs are directly charged to Client Companies.
- Remaining service costs are allocated to Client Companies based on various expenditure-spend methodologies (generally, the services and/or materials purchased by each Client Company).
- Accounts Payable. Processes invoices and administers the P-Card (purchasing-card) program.

Cost Assignment:

- Accounts payable service costs are directly charged to Client Companies on a unit price based on transactions processed for each Client Company.

Legal Services

- Corporate & Commercial. Provides legal support for commercial contract negotiations, acquisitions, intellectual property, strategy, securities, financial reporting, real estate, nuclear related issues, bankruptcy, credit and collections, environmental, general corporate, and other transactional matters.

- **Environmental.** Provides legal support for the defense of agency enforcement actions, compliance counseling, environmental matters relevant to permitting and re-licensing of generation facilities, support for safety and OSHA compliance, EHS compliance audits and NRC investigations.
- **Labor & Employment.** Represents Exelon's Client Companies in a wide range of employment related matters before agencies, arbitrators, and state and federal courts; provides advice and counsel on all labor and employment related matters.
- **Litigation.** Provides legal support for all forms of disputes, including breach of contract, commercial disputes, personal injury, and property damage.
- **Regulatory.** Represents Exelon's Client Companies before various regulatory agencies, including the Illinois Commerce Commission, the Pennsylvania Public Utility Commission, Maryland Public Service Commission, New Jersey Board of Public Utilities, Delaware Public Service Commission, Public Service Commission of the District of Columbia and the Federal Energy Regulatory Commission.
- **Client Services.** Comprised of the business functions of the Legal Department, including financial management, client billing, business planning and analysis, human resources, systems management, and general administration.

Cost Assignment:

- Costs for lawyers and paralegals are directly charged to Client Companies when possible.
- The remaining services are allocated on the Modified Massachusetts Formula, an average of each Client Company's Gross Revenues, Total Assets and Direct Labor to the totals of all Client Companies.

Human Resources

Human Resources is divided into two groups - (i) General HR activities, including support functions such as diversity, planning and development, employee health and benefits, compensation planning, management and employee development; HR planning, technology and metrics for HR field units; worker's compensation administration; benefits administration services; payroll processing; HR Solutions Hub, HR/Payroll system maintenance and HR process improvement support and metric reporting; (ii) Labor Relations, including development and management of labor relations strategy in support of business units with represented employees.

Cost Assignment:

- Whenever possible, service costs are directly charged to Client Companies.
- Most general Human Resources Activities costs are directly charged to Client Companies on a unit price basis based on the total employee headcount of each Client Company. Payroll processing costs are directly charged to Client Companies on a unit price based on paycheck counts of each Client Company.
- Labor Relations costs are directly charged to Client Companies on a unit price basis based on the headcount of represented employees of each Client Company or direct charged based on time and materials.

Transportation

- **Transportation.** Coordinates corporate aircraft services.

Cost Assignment:

- Service costs are directly charged to Client Companies on a unit price based on total occupied flight hours of each Client Company.
- Secure Executive Transportation. Ground transportation of executives

Cost Assignment:

- Whenever possible, service costs are directly charged to specific utility companies.
- The remaining service costs that cannot be directly charged are allocated to the Utilities based on the Modified Massachusetts Formula, an average of each utility's Gross Revenues, Total Assets and Direct Labor to the total of all Client Companies.

Real Estate

Includes real estate portfolio and asset management strategy, lease administration for facilities, land or infrastructure obligations, property management, mail services and other real estate consulting services, generally concentrating on non-utility and non-power plant operations.

Cost Assignment for the above mentioned area:

- Service costs are allocated to Client Companies based on occupied square footage.

2) EXELON UTILITIES AREA

Exelon Utilities is comprised of a small utility-focused corporate governance and oversight function that will facilitate collaboration among the utilities to achieve the highest standards of organizational effectiveness, operational excellence, and customer and stakeholder satisfaction.

Utility Strategy & Policy includes utility-wide strategy formulation and implementation, regulator policy/issue alignment and implementation, utility investment and business model strategy and scenario analysis and analytical support to the utilities.

Utility Oversight includes governance and oversight of a Peer Group structure that aligns across the client utilities to drive consistency, best practices and innovation in the core functions of the Management Model; tracks performance regarding key performance indicators, improvement initiatives and industry standards; analyzes opportunities and develops recommendations on issues pertinent to leadership; coordinate of the business planning process and provides oversight of Management Model documentation integration across the Utilities.

Cost Assignment for the above mentioned groups:

- Whenever possible, service costs are directly charged to specific utility companies.
- The remaining Utility Oversight costs that cannot be directly charged are allocated to the Utilities based on a utility variation of the Modified Massachusetts Formula, an average of each utility's Gross Revenues, Total Assets and Direct Labor to the totals of all utility companies.

Transmission Strategy & Compliance manages the Exelon Utilities' interface with the applicable regional transmission and reliability organizations, oversees the implementation of FERC Regulations, NERC Reliability Standards and EU Physical CISS Programs to ensure ongoing compliance, represents utilities' interests and implements corporate strategy in both PJM Regional Transmission Organization and Regional Reliability Organization stakeholder proceedings, and also provides market intelligence and analytic support to strategic transmission studies and other initiatives needed. .

Cost Assignment:

- Whenever possible, service costs are directly charged to specific utility companies.

- Remaining service costs that benefit participating utilities are allocated for transmission related activities based on transmission peak load allocation.

Transmission System Operations Operate, control, and monitor Exelon transmission systems. Perform Transmission Owner Scheduling, System Control, and Dispatch Service functions per PJM Open Access Transmission Tariff Schedule 1A and fulfill all associated PJM Operating Agreement and PJM Manual obligations of a local transmission control center for Exelon.

Cost Assignment:

- Whenever possible, service costs are directly charged to specific utility companies.
- Remaining service costs that benefit participating utilities are allocated for transmission related activities based on transmission peak load allocation.

Corporate Physical Security Services. Includes corporate security functions such as security investigations and assessments, crisis management response and security related training.

Cost Assignment:

- Cost for Corporate Physical Security services which are specific to one Client Company are directly charged to the respective Client Company.
- The remaining physical security cost are allocated on the Modified Massachusetts Formula, an average of each Client Company's Gross Revenues, Total Assets and Direct Labor to the totals of all Client Companies.

3) CORPORATE GOVERNANCE AREAS

The Corporate Governance Areas house employees who provide corporate governance services for the Exelon system of companies. The Corporate Governance Areas in BSC include:

Finance. Includes Senior Executive Vice President and CFO Exelon, Finance, Treasury (cash management services), Controller, External Audit fees, Tax (consolidated Federal and state returns), Financial Planning and Analysis, Investor Relations, Capital Markets, Insurance Services, and External Reporting.

Compliance, Audit and Risk Services. Includes three separate but complementary teams: Compliance & Ethics, Enterprise Risk Management, Exelon Audit Services (Sarbanes Oxley compliance).

Executives and General BSC Activities. Includes Exelon senior leadership positions including President and Chief Executive Officer and other Executive Committee members. Also includes general activities, such as income and other taxes, severance and interest, and Board of Directors costs and shareholder meetings.

Communications, Public Advocacy and Corporate Relations. Includes Exelon Corporation advertising/brand management, donations/contributions, sponsorships and annual report creation, shareholder/investor external communications, and other communication services; as well as Client Company public advocacy, advertising, coordination of donations/contribution approval, corporate/media relations, and corporate and external communications; public affairs activities; internal communications; and photography, videography and video production services. Embedded Communication employees also perform these services for the Utilities.

Governmental and Regulatory Affairs and Public Policy. Includes executive oversight; management services for compliance with Federal laws, regulations and other policy requirements including relationship management with Congress, Administration and regulators; strategy development and lobbying and advocacy related to Federal legislative and regulatory initiatives; competition initiative activities; PAC administration and operation; grassroots activities; and Federal public affairs activities.

Legal Governance. Includes General Counsel and the Corporate Governance group (including the corporation's compliance and ethics program and Corporate Secretary and shareholder services).

Corporate Development. Includes strategic expertise and governance in the evaluation and execution of merger and acquisition opportunities, evaluating company assets for divestiture opportunities, and providing financial and transactional support to restructuring projects.

Corporate Strategy, Innovation & Sustainability. Provides strategic support for senior leadership; program leadership for Exelon's sustainable growth strategy; and corporate-wide governance, oversight and support for the innovation, environment, and safety functions.

Investments. Includes determining the investment strategy and asset allocation of Exelon's pension funds, VEBA post retirement funds managing relationships with investment managers, overseeing daily investment activities and maintaining a well-diversified investment menu for the Employee Savings Plans. (Certain Investments Area costs are reimbursable by and therefore billed directly to the applicable funds and plans).

Cost Assignment for the Corporate Governance Areas:

- Whenever possible, service costs are directly charged to Client Companies.
- The remaining corporate governance costs that cannot be directly charged are allocated to Client Companies based on the Modified Massachusetts Formula, an average of each Client Company's Gross Revenues, Total Assets and Direct Labor to the totals of all Client Companies.

ACCUMULATED PROVISIONS FOR UNCOLLECTIBLE ACCOUNTS RECEIVABLE							
1. This page is required for utilities that have implemented an automatic adjustment clause tariff for uncollectibles under Sections 16-111.8 or 19-145 of the Public Utilities Act.							
2. Report below the specified information called for in this schedule. Electric and gas information shall be separately reported.							
3. In the comments section, provide an explanation or calculation of how the Illinois-jurisdictional amounts are derived.							
4. If the Accumulated Provision for Uncollectible Accounts Receivable is not used to record the Write-offs (Col. D) and Recoveries (Col. E), state so and provide the relevant Write-off and Recoveries data by ICC Account.							
5. The information may be reported in more detail if direct cost data is available.							
Line No.	Description	Balance at Beginning of Year	Reserve Accrual	Write-offs	Recoveries	Adjustments	Balance at End of Year
	(A)	(B)	(C)	(D)	(E)	(F)	(G)
1	Total Electric	86,250,851	70,648,877	41,745,155	—	28,091,065	143,245,638
2	Total Gas	—	—	—	—	—	—
3	Total	86,250,851	70,648,877	41,745,155	—	28,091,065	143,245,638
Explanation of how Illinois-jurisdictional amounts are derived: 100% Jurisdictional.

CONSTRUCTION OVERHEADS - Electric				
1. List in column (a) the kinds of overheads according to the titles used by the respondent. Charges for outside professional services for engineering fees and management or supervision fees and management or supervision fees capitalized should be shown as separate items. 2. On page 44 furnish information concerning construction overheads. 3. A respondent should not report "none" to this page if no overhead apportionments are made, but rather should explain on page 44 the accounting procedures employed and the amounts of engineering, supervision and administrative costs, etc., which are directly charged to construction. 4. Enter on this page engineering, supervision, administrative, and allowance for funds used during construction, etc., which are first assigned to a blanket work order and then prorated to construction jobs.

ELECTRIC DISTRIBUTION METERS AND LINE TRANSFORMERS

1. Report below the information called for concerning distribution watt-hour meters and line transformers.
2. Include watt-hour demand distribution meters, but not external demand meters.
3. Show in a footnote the number of distribution watt-hour meters or line transformers held by the respondent under lease from others, jointly owned with others, or held otherwise than by reason of sole ownership by the respondent. If 500 or more meters or line transformers are held under a lease, give name of lessor, date and period of lease, and annual rent. If 500 or more meters or line transformers are held other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of accounting for expenses between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

Line No.	Item (a)	Number of Watt-Hour Meters (b)	Line Transformers	
			Number (c)	Total Capacity (In MV) (d)
1	Number at Beginning of Year	4,441,031	508,933	54,225
2	Additions During Year:

Commonwealth Edison Company	(1) An Original		December 31, 2024

ENVIRONMENTAL PROTECTION FACILITIES

1. For purposes of this response, environmental protection facilities shall be defined as any building, structure, equipment, facility, or improvement designed and constructed solely for control, reduction, prevention or abatement of discharges or releases into the environment of gaseous, liquid, or solid substances, heat, noise or for the control, reduction, prevention, or abatement of any other adverse impact of an activity on the environment.

2. Report the differences in cost of facilities installed for environmental considerations over the cost of alternative facilities which would otherwise be used without environmental considerations. Use the best engineering design achievable without environmental restrictions as the basis for determining costs without environmental considerations. It is not intended that special design studies be made for purposes of this response. Base the response on the best engineering judgment where direct comparisons are not available. Include in these differences in costs, the costs or estimated costs of environmental protection facilities in service constructed or modified in connection with the production, transmission, and distribution of electrical energy and shall be reported herein for all such environmental facilities placed in service on or after January 1, 1969, so long as it is readily determinable that such facilities were constructed or modified for environmental rather than operational purposes. Also report similar expenditures for environmental plant included in construction work in progress. Estimate the cost of facilities when the original cost is not available or facilities are jointly owned with another utility, provided the respondent explains the basis of such estimations. Examples of these costs would include a portion of the cost of tall smokestacks, underground lines, and landscaped substations. Explain such costs in a footnote.

3. In the cost of facilities reported on this page, include an estimated portion of the cost of plant that is or will be used to provide power to operate associated environmental protection facilities. These costs may be estimations on a percentage of plant.

4. Report all costs under the major classifications provided below and include, as a minimum, the items listed hereunder:

A. Air pollution control facilities:

(1) Scrubbers, precipitators, tall smokestacks, etc.

(2) Changes necessary to accommodate use of environmentally clean fuels such as low ash or low sulfur fuels including storage and handling equipment.

(3) Monitoring equipment

(4) Other

B. Water pollution control facilities:

(1) Cooling towers, ponds, piping, pumps, etc.

(2) Waste water treatment equipment

(3) Sanitary waste disposal equipment

(4) Oil interceptors

(5) Sediment control facilities

(6) Monitoring equipment

(7) Other

C. Solid Waste disposal costs:

(1) Ash handling and disposal equipment

(2) Land

(3) Settling Ponds

(4) Other

D. Noise Abatement Equipment:

(1) Structures

(2) Mufflers

(3) Sound proofing equipment

(4) Monitoring equipment

(5) Other

E. Esthetic Costs:

(1) Architectural costs

(2) Towers

(3) Underground lines

(4) Landscaping

(5) Other

F. Additional plant capacity necessary due to restricted output from existing facilities or addition of pollution control facilities.

G. Miscellaneous:

(1) Preparation of environmental reports

(2) Fish and wildlife plants included in Accounts 330, 331, 332, and 335.

(3) Parks and related facilities

(4) Other

5. In those instances when costs are composites of both actual supportable costs and estimates of costs, specify in column (f) the actual costs that are included in column (e).

6. Report construction work in progress relating to environmental facilities at line 9.

Line No.	Classification of Cost (a)	Changes During Year			Balance at End of Year (e)	Actual Cost (f)
		Additions (b)	Retirements (c)	Adjustments (d)

ENVIRONMENTAL PROTECTION EXPENSES			
Instructions: Show below expenses incurred in connection with the use of environmental protection facilities, the cost of which are reported on page. 430. Where it is necessary that allocations and/or estimates of costs be made, state the basis or method used. Include below the costs incurred due to the operation of environmental protection equipment, facilities, and programs. Report expenses under the subheadings listed below. Under item 6 report the difference in cost between environmentally clean fuels and the alternative fuels that would otherwise be used and are available for use. Under item 7 include the cost of replacement power, purchased or generated, to compensate for the deficiency in output from existing plants due to the addition of pollution control equipment, use of alternate environmentally preferable fuels or environmental regulations of governmental bodies. Base the price of replacement power purchased on the average system price of purchased power if the actual cost of such replacement power is not known. Price internally generated replacement power at the system average cost of power generated if the actual cost of specific replacement generation is not known. Under item 8 include ad valorem and other taxes assessed directly on or directly relatable to environmental facilities. Also include under item 8 licensing and similar fees on such facilities. In those instances where expenses are composed of both actual supportable data and estimates of costs, specify in column (c) the actual expenses that are included in column (b).

ILLINOIS AMENDMENT NO. 1
TO
GENERAL SERVICES AGREEMENT
BETWEEN
EXELON BUSINESS SERVICES COMPANY
AND

EXELON CORPORATION; EXELON ENERGY DELIVERY COMPANY, LLC;
COMMONWEALTH EDISON COMPANY; PECO ENERGY COMPANY; EXELON
VENTURES COMPANY, LLC; EXELON GENERATION COMPANY, LLC; EXELON
ENTERPRISES COMPANY, LLC; UNICOM INVESTMENT INC.; AND THE
SUBSIDIARIES, AFFILIATES AND ASSOCIATES OF EACH LISTED ENTITY.

This ILLINOIS AMENDMENT NO. 1 TO GENERAL SERVICES AGREEMENT dated as of *November 9*, 2017 (this "Amendment") is made and entered into by and between Commonwealth Edison Company ("ComEd") and Exelon Business Services Company, LLC ("Services Company").

WHEREAS, ComEd, the Exelon entities listed above and Services Company entered into that certain General Services Agreement, dated January 1, 2001, (the "Agreement"); and

WHEREAS, ComEd and Services Company desire to amend the Agreement solely as between them as set forth herein.

NOW, THEREFORE, in consideration of the mutual covenants and agreements set forth in this Amendment, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Capitalized Terms. All capitalized terms used but not defined herein shall have the meanings ascribed thereto in the Agreement.

2. Amendments to Agreement. The Agreement is hereby amended as follows:

2.1 The first "WHEREAS" clause is deleted in its entirety and replaced with the following:

WHEREAS, Client Companies, including Exelon Corporation, Exelon Energy Delivery Company, LLC, Commonwealth Edison Company, PECO Energy Company, Exelon Ventures Company, LLC, Exelon Generation Company, LLC, Exelon Enterprises Company, LLC, Unicom Investment Company, LLC, Baltimore Gas and Electric Company, Atlantic City Electric Company, Delmarva

Page 2 of 8

Power & Light Company, Potomac Electric Power Company, PEPCO Holdings LLC, PHI Service Company, and the subsidiaries, affiliates and associates of each listed entity desire to have Services Company perform certain services for same;

2.2 The second "WHEREAS" clause is deleted in its entirety and replaced with the following:

WHEREAS, Services Company is a subsidiary centralized service company under the Public Utility Holding Company Act of 2005 (the "Act") and subject to the jurisdiction of the Federal Energy Regulatory Commission ("FERC") and is organized, staffed and equipped to render certain services to Client Companies;

2.3 The second paragraph under Section 2. Services to be Provided, shall be deleted in its entirety and replaced with the following:

Notwithstanding the foregoing paragraph, no change in the organization of the Services Company, the type and character of the companies to be serviced, the factors for allocating costs to associate companies, or in the broad general categories of services to be rendered subject to the Act, or any rule, regulation or order thereunder, shall be made unless and until the Services Company shall have filed with the FERC an appropriate declaration regarding such proposed change and the FERC shall have permitted such declaration to become effective.

2.4 The following sentence shall be added at the end of Section 3. Changes in Parties:

ComEd shall provide written notice of any change to affiliates as they occur through e-mail to the Illinois Commerce Commission Staff ("ICC Staff") at AccountingMgr@icc.illinois.gov.

2.5 The first two paragraphs under Section 4. Compensation of Services Company, shall be deleted in their entirety and replaced with the following:

As compensation for the services to be rendered hereunder, ComEd shall pay to Services Company all costs which reasonably can be identified and related to particular services provided by Services Company for or on ComEd's behalf.

The services described herein or contemplated to be provided hereunder shall be directly assigned, distributed or allocated by activity, project, program, work order or other appropriate basis. The factors for assigning or allocating Services Company costs to ComEd, as well as other associate companies, are set forth in Schedules 1 and 2 attached hereto. Attachments A and B to Schedules 1 and 2 are each expressly incorporated herein and made a part hereof.

Costs allocated pursuant to the Agreement shall be subject to Illinois Commerce Commission ("ICC") review based on the following standard: that the costs are

Page 3 of 8

just and reasonable and prudent and costs resulting from the unnecessary duplication of effort shall not be considered reasonable.

ComEd shall provide to the ICC Staff via e-mail at: AccountingMgr@icc.illinois.gov, a template of all allocation percentages to be used to charge ComEd pursuant to the Agreement. The template will be provided by March 1 for allocations used in the current calendar year.

At its discretion, Services Company may update the allocation percentages used to charge ComEd pursuant to the Agreement if there has been a change in circumstances that warrants an update. If there is a change in the affiliates that receive services from Services Company, Services Company shall update the allocation percentages used to charge ComEd pursuant to the Agreement. ComEd shall provide the updated allocation percentages to ICC Staff via e-mail at: AccountingMgr@icc.illinois.gov, within thirty (30) days of implementation of substantial changes to Services Company allocation factors with a description of such changes. A substantial change is defined as a change in the allocation basis for a function or a change in the calculation of the factor that results in an increase or decrease in Services Company costs allocated to ComEd by more than 5% or \$10 million, whichever is greater, relative to the prior calendar year.

- 2.6 Section 5, Securities and Exchange Commission Rules shall be deleted in its entirety and replaced with the following:

Section 5. Federal Energy Regulatory Commission Rules

It is the intent of the parties that the determination of the costs as used in the Agreement shall be consistent with, and in compliance with, the rules and regulations of the Federal Energy Regulatory Commission ("FERC"), as they now exist or hereafter may be modified by the FERC.

Services Company agrees that it will comply with 18 C.F.R. Part 367 - Uniform System of Accounts for Centralized Service Companies Subject to the Provisions of the Public Utility Holding Company Act of 2005, Federal Power Act and Natural Gas Act.

- 2.7 Section 9, EXELON CORPORATION and Section 10, Client Companies shall be deleted in their entirety and replaced with the following:

Section 9. Services Provided by the Services Company to Other Direct or Indirect Subsidiary Companies

Except as limited by law or order of the FERC, nothing in the Agreement shall be read to prohibit Services Company, their subsidiaries, affiliates and associates from providing services described herein to other Client Companies, their

Page 4 of 8

subsidiaries, affiliates and associates on the same terms and conditions as set out for the Services Company.

- 2.8 Section 11, Effective Date and Termination shall be deleted in its entirety and replaced with the following:

Section 10, Effective Date and Termination

This Amendment is executed and subject to the consent and approval of the ICC, and if so approved in its entirety, shall be deemed effective from 2017, and shall remain in effect from said date unless terminated by mutual agreement or by either party giving at least ninety (90) days' written notice to the other party prior to the beginning of any calendar year, each party fully reserving the right to so terminate this Agreement. ComEd shall file a copy of this Amendment on the ICC's e-Docket system in Docket No. 14-0312, with a copy provided via e-mail to ICC Staff at: AccountingMgr@icc.illinois.gov, within seven (7) business days of the execution of this Amendment.

This Agreement may also be terminated or modified to the extent that performance may conflict with any rule, regulation, or order of the FERC adopted before or after the making of this Agreement.

The parties' obligations under this Agreement which by their nature are intended to continue beyond the termination or expiration of this Agreement shall survive such termination or expiration.

- 2.9 Section 12, Access to Records: shall be deleted in its entirety and replaced with the following:

Section 11, Access to Records

Records of the Services Company will be maintained in accordance with 18 C.F.R. 368, Preservation of Records of Holding Companies and Service Companies, and in any event no less than seven (7) years following a transaction under this Agreement. ComEd may request access to and inspect the accounts and records of the Services Company, provided that the scope of access and inspection is limited to accounts and records that are related to such transaction, to the extent allowed under Section 7-101 of the Act (220 ILCS 5/7-101) and subject to Section 5-108 of the Act (220 ILCS 5/5-108).

During the term of this Agreement and for a period of seven (7) years after its expiration or termination as to the Services Company, the ICC shall have access to such records of the Services Company as the records relate to transactions between the Services Company and ComEd.

Page 5 of 8

2.10 The following section shall be added after Section 11:

Section 12. FERC Form 60

Services Company will file FERC Form 60 with the FERC on an annual basis, in accordance with 18 C.F.R. Part 369, Statements of Reports and Schedules. ComEd shall send a copy of the FERC Form 60 via e-mail to ICC Staff at: AccountingMgr@icc.illinois.gov, on the date that the FERC Form 60 is filed with the FERC.

2.11 The following sentence shall be added as the last sentence in the following section: Service Agreement Schedule 1, Allocation Ratios, General:

Cost allocation shall comply with 18 C.F.R. Part 35.44 Protections Against Affiliate Cross-Subsidization.

2.12 The following sentence shall be added as the last sentence in the following section:

Service Agreement Schedule 2, Services Including But Not Limited To: General: Cost allocation shall comply with 18 C.F.R. Part 35.44 Protections Against Affiliate Cross-Subsidizations.

2.13 The following exhibit shall be added after Exhibit C of the Agreement:

Exhibit D, Reporting Requirements

A report of the internal audit of the charges billed by the Services Company pursuant to this Agreement shall be provided to ICC Staff via e-mail at: AccountingMgr@icc.illinois.gov. The first such report shall cover the first full calendar year after the Agreement takes effect. Subsequent reports shall cover the annual period subsequent to the last filed report. The report shall be provided to the ICC Staff via e-mail at: AccountingMgr@icc.illinois.gov by October 31 following each annual period being audited. The report shall reflect the results of an internal audit that tests compliance with the processes outlined in this Agreement. ComEd shall use reasonable efforts to cause the internal audit to test compliance with the following:

Page 6 of 8

(a) Internal controls are adequately designed and operating effectively to ensure that costs associated with transactions covered by the Agreement are properly and consistently allocated and billed pursuant to Section 4 of this Agreement;

(b) Internal controls are adequately designed and operating effectively to ensure that costs are charged correctly for financial statement purposes;

(c) Allocation factors are sampled to confirm they are correctly calculated pursuant to Section 4 of the Agreement and item (c) and the sampled allocation factors are updated as required by the Agreement;

(d) Internal controls are adequately designed and operating effectively to ensure that Services Company costs are properly charged to ComEd;

(e) All costs charged pursuant to this Agreement are determined in accordance with either a direct charge or a consistent, predetermined allocation methodology as reflected in Schedule 1, attached hereto, and are based on the allocation in effect at the time the service was provided;

(f) Costs charged to ComEd reflect the Services Company's actual costs;

(g) Employees of the Services Company are provided current policies and procedures regarding time reporting and are notified when changes to time reporting policies and procedures occur;

(h) The Billing Report that summarizes the monthly charges to ComEd in the prior calendar year was provided by May 1 to the ICC Staff via e-mail at: AccountingMgr@icc.illinois.gov;

(i) The template of all allocation percentages to be used to charge ComEd was timely provided to the ICC Staff via e-mail at: AccountingMgr@icc.illinois.gov pursuant to Section 4 of this Agreement; and

(j) Included in the filing and made pursuant to Section 3 of this Agreement, ComEd shall provide notice of changes to affiliates as they occur.

3. Authority. The execution, delivery, and performance of this Amendment has been duly authorized by all requisite action of the ComEd and Services Company and this Amendment constitutes the legal, valid and binding obligation of ComEd and Services Company, enforceable against each party in accordance with its terms.

4. Counterparts. This Amendment may be executed by facsimile signature in any number of counterparts, each of which will be deemed an original, but all of which together will constitute one and the same instrument.

Page 7 of 8

5. Ratification of Agreement. Except as expressly modified by this Amendment, all of the terms, conditions, covenants, agreements and understandings contained in the Agreement shall remain unchanged and in full force and effect, and the same are hereby expressly ratified and confirmed by the parties. This Amendment is intended to and shall only be between ComEd and Services Company. Nothing in this Amendment is intended to, or shall alter or modify any rights or obligations under the Agreement of (i) Services Company as they apply to Client Companies other than ComEd, or (ii) Client Companies other than ComEd as they apply to Services Company. No amendment of the Agreement contained herein shall apply to or be enforceable by or against, Client Companies other than ComEd.

Service Agreement Schedule 1

Allocation Ratios:

General:

Direct charges shall be made so far as costs can be identified and related to the particular transactions involved without excessive effort or expense. Other elements of cost, including taxes, interest, other overhead, and compensation for the use of capital procured by the issuance of capital stock, shall be fairly and equitably allocated using the ratios set forth below.

Revenue Related Ratios:

Revenues
Sales - Units sold and/or transported
Number of Customers

Expenditure Related Ratios:

Total Expenditures
Operations and Maintenance Expenditures
Capital Expenditures
Service Company Billings
Service Company SLA Billings (Non-governance)

Labor/Payroll Related Ratios:

Labor / Payroll
Number of Employees

Units Related Ratios:

Usage (for example: CPU's, square feet, number of vendor invoice payments)
Consumption (for example: tons of coal, gallons of oil, MMBTU's)
Capacity (for example: nameplate generating capacity, peak load, gas throughput)
Other units related

Assets Related Ratios:

Total Assets
Current Assets
Gross Plant

Composite Ratios:

Total Average Assets and 12 months ended Gross Payroll
Modified Massachusetts Formula
Other composite ratios

Service Agreement Schedule 2

Services Including But Not Limited To:

General:

Direct charges shall be made so far as costs can be identified and related to the particular transactions involved without excessive effort or expense. Other elements of cost, including taxes, interest, other overhead, and compensation for the use of capital procured by the issuance of capital stock, shall be fairly and equitably allocated using the ratios set forth in Schedule 1.

Administrative & management services including but not limited to:

- accounting
 - bookkeeping
 - billing
 - accounts receivable
 - accounts payable
 - financial reporting
- audit
- claims
- communications
- customer operations
- customer services
- executive
- finance
- insurance
- information systems services
- investment advisory services
- legal
- library
- record keeping
- secretarial & other general office support
- real estate management
- security holder services
- tax
- treasury
- other administration & management services

Expected allocation ratios: Revenue Related, Expenditure Related, Labor/Payroll Related, Units Related, Assets Related, Composite

Personnel services including but not limited to:

- recruiting
- training & evaluation services
- payroll processing
- employee benefits administration & processing
- labor negotiations & management
- other personnel services

Expected allocation ratios: Labor/Payroll Related, Units Related, Composite

Purchasing services including but not limited to:

- preparation & analysis of product specifications
- requests for proposals & similar solicitations
- vendor & vendor-product evaluations
- purchase order processing
- receipt, handling, warehousing and disbursement of purchased items contract negotiation & administration
- inventory management & disbursement
- other purchasing services

Expected allocation ratios: Expenditure Related, Labor/Payroll Related, Units Related, Assets Related, Composite

Facilities management services including but not limited to:

- office space
- warehouse & storage space
- transportation facilities (including dock & port, rail sidings and truck facilities)
- repair facilities
- manufacturing & production facilities
- fixtures, office furniture & equipment

Expected allocation ratios: Expenditure Related, Labor/Payroll Related, Units Related, Composite

Computer services including but not limited to:

- computer equipment & networks
- peripheral devices
- storage media
- software

Expected allocation ratios: Expenditure Related, Labor/Payroll Related, Units Related, Assets Related, Composite

Communications services including but not limited to:

- communications equipment
- audio & video equipment
- radio equipment
- telecommunications equipment & networks
- transmission & switching capability

Expected allocation ratios: Expenditure Related, Labor/Payroll Related, Units Related, Assets Related, Composite

Machinery management services including but not limited to:

- equipment
- tools
- parts & supplies

Expected allocation ratios: Expenditure Related, Labor/Payroll Related, Units Related, Composite

Vehicle management services including but not limited to:

- automobiles
- trucks
- vans
- trailers
- railcars
- marine vessels
- aircraft
- transport equipment
- material handling equipment
- construction equipment

Expected allocation ratios: Expenditure Related, Labor/Payroll Related, Units Related, Composite

Operational services including but not limited to:

- drafting & technical specification, development & evaluation
- consulting
- engineering
- environmental
- safety
- nuclear
- construction

design
resource planning
economic & strategic analysis
research
testing
training
customer solicitation
support & other marketing related services
public & governmental relations
other operational services

Expected allocation ratios: Revenue Related, Expenditure Related, Labor/Payroll Related,
Units Related, Assets Related, Composite

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
Illinois Competitive Energy Association and Retail Energy Supply Association
("ICEA-RESA") Information Requests
ICEA-RESA 1.01 – ICEA-RESA 1.08
Date Received: April 30, 2025
Date Served: June 2, 2025

Given that there are three separate steps in the allocation of costs for rate-making, being Functionalization (allocation between regulated and unregulated functions), Classification (allocation into fixed, variable and customer costs) and Allocation (allocation to customer classes), please answer the following questions:

REQUEST NO. ICEA-RESA 1.03:

Please explain the economic rationale for not separating between fixed and variable costs for the USoA accounts that include both types of costs but use a single allocator. For the purposes of this question, a variable cost is one that depends on the amount of units sold whereas a fixed cost does not.

RESPONSE:

It is not clear which USoA accounts this data request is referencing. Generally, ComEd does use fixed (number of customers) and variable (kWhs or kW) allocators to allocate some of the costs. As shown below from Sch 2a of ComEd Ex. 2.01 in ICC Docket No. 24-0378, the 2026 Base ECOS, (see ICEA-RESA 1.01_Attach 1) there are several different allocators, including customer count-related and kW-related allocators. The kWh-related allocation is primarily assigned to the Illinois Electricity Distribution Tax. For a detailed description of the functionalization, and application and description of the allocators, see ICC Docket No. 24-0378, Leick Dir., ComEd Ex. 2.0, 13:251 - 23:395 and ComEd Ex. 2.03.

	Allocator	Total ICC Jurisdictional
1	OPERATION & MAINTENANCE EXPENSE	
2	High Voltage ESS	HV Class \$ 5,708,361
3	High Voltage Dist. Substations	CP 69kV & below \$ 124,607,941
4	High Voltage Dist. Lines	CP-ALL \$ 31,209,366
5	Shared Distribution Substations (At or Below 4kV)	CP<=4 KV \$ 870,536
6	Shared Distribution Substations (Over 4kV)	CP<69 KV \$ 14,465,057

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
Illinois Competitive Energy Association and Retail Energy Supply Association
("ICEA-RESA") Information Requests
ICEA-RESA 1.01 – ICEA-RESA 1.08
Date Received: April 30, 2025
Date Served: June 2, 2025

Given that there are three separate steps in the allocation of costs for rate-making, being Functionalization (allocation between regulated and unregulated functions), Classification (allocation into fixed, variable and customer costs) and Allocation (allocation to customer classes), please answer the following questions:

REQUEST NO. ICEA-RESA 1.04:

Why are there no customer-specific costs identified in USoA accounts other than Services?

RESPONSE:

ComEd understands this question to be referring to the allocation of costs in ComEd's ECOS on Sch 1a Functions where the costs for each USoA account is listed. All of the costs in each USoA account are costs related to customer-specific investments. Using the snip below from ComEd Ex. 2.01, the 2026 Base ECOS (see ICEA-RESA_Attach 1), the distribution plant investment in Account 368 Line Transformers (\$1.68 billion) as well as Account 369 Services (\$1.51 billion) both include the plant to serve our customers.

	Account Description	Account Code	Account Balance
11			
12	C. DISTRIBUTION PLANT		
13			
14	Land and Land Rights	360	\$ 76,579,232
15	Structures and Improvements	361	\$ 969,432,976
16	Station Equipment	362	\$ 4,679,936,258
17	Storage Battery Equipment	363	\$ 151,145
18	Poles, Towers and Fixtures	364	\$ 3,510,828,908
19	Overhead Conductors and Devices	365	\$ 5,178,335,506
20	Underground Conduit	366	\$ 1,188,740,550
21	Underground Conductors and Devices	367	\$ 9,238,804,836
22	Line Transformers	368	\$ 1,683,685,223
23	Services	369	\$ 1,513,741,068
24	Meters	370	\$ 927,248,665
25	Installations on Customer Premises	371&372	\$ 100,254,574
26	Street Lighting and Signals	373	\$ 163,201,059
27	Asset Retirement Costs-Dist. Plt.	374	
28	Subtotal - DISTRIBUTION PLANT	360-374	\$ 29,230,940,000

("ICEA-RESA") Information Requests
ICEA-RESA 1.01 – ICEA-RESA 1.08
Date Received: April 30, 2025
Date Served: June 2, 2025

Given that there are three separate steps in the allocation of costs for rate-making, being Functionalization (allocation between regulated and unregulated functions), Classification (allocation into fixed, variable and customer costs) and Allocation (allocation to customer classes), please answer the following questions:

REQUEST NO. ICEA-RESA 1.05:

Please identify the economic rationale for use of CP or NCP as an allocator where ComEd has elected to do so.

RESPONSE:

ComEd's Coincident Peak (CP) allocator is a delivery class's kW demand during the hour that the ComEd Zone has its system peak. The Non-Coincidental Peak (NCP) allocator is a delivery class's highest kW demand peak at any hour during the year.

ComEd uses a CP allocator for the allocation of costs related to high voltage lines and substations, and primary voltage lines and substations. The NCP allocator is used to allocate costs related to secondary voltage lines and transformers.

The economic rationale for using the CP and NCP allocators is that they represent how a delivery class is using the related distribution facilities, in comparison to other delivery classes, and represents the amount of investment required to build and maintain those facilities for each delivery class at the delivery class's time of highest system usage.

Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
Illinois Competitive Energy Association and Retail Energy Supply Association
("ICEA-RESA") Information Requests
ICEA-RESA 1.01 – ICEA-RESA 1.08
Date Received: April 30, 2025
Date Served: June 2, 2025

Given that there are three separate steps in the allocation of costs for rate-making, being Functionalization (allocation between regulated and unregulated functions), Classification (allocation into fixed, variable and customer costs) and Allocation (allocation to customer classes), please answer the following questions:

REQUEST NO. ICEA-RESA 1.06:

Given that ComEd allocates each USoA account using a single allocator, what is the economic rationale to allocate amounts into rates to be collected on a volumetric (kWh) or demand (kW) basis? Please use specific examples for mapping from Schedule 1a into 2a and your final results for accounts that are part of Metering (Z column in Sch 1a), Billing (AB column in Sch 1a) and Cust. Serv (AD column in Sch 1a).

RESPONSE:

See Leick Direct Testimony, ComEd Ex. 2.0 at 9:179 - 26:444, in the Rate Design Investigation (RDI) ICC Docket No. 24-0378, where an overview of ComEd's Embedded Cost of Service Study (ECOSS) is provided. See also ICEA-RESA 1.01_Attach 1 for an Excel model of the 2026 Base ECOSS. In the Excel file, on the Sch 1a Functions tab, the USoA accounts are assigned to sub-functions based on various factors provided in column I. Those factors include various other components as shown on the Sch 1b Function Factors tab, depending on the type of cost being assigned.

Regarding the economic rationale for collecting rates on a kW or kWh volumetric basis, versus a fixed charge basis, the determination is related to the types of costs being recovered. For example, the customer charge is a per customer rate and includes costs related to the call center, revenue protection, service drops, and billing department, which are all costs that could vary based upon number of customers. The volumetric charges, such as the Distribution Facilities Charges, are kW and kWh charges and they are related to how much of a distribution facility a customer uses. For example, a customer using 100 kW's would use a larger portion of the distribution lines and transformers compared to a customer using 5 kW's.

The specific cost categories referenced in this data request: Metering, Billing, and Customer Services are recovered based upon fixed charges. The metering costs are recovered from the Standard Metering Services Charge and the billing and customer service costs are in the Customer Charge.

Specifically, to trace one of the costs, using the Metering Services and referencing the 2026 Base ECOSS in ICEA-RESA 1.01_Attach 1 as an example (the other costs follow the same path in the rows next to Metering Service, but end up in Customer Related related costs and not Meter costs), the Metering Services costs start in Sch 1a Functions, excel column Z, in the column titled "Metering Services", then such costs are transferred to Sch 2a Allocation.

For example, in Sch 2a Allocation, the Metering Services O&M costs (Excel row 21) and Metering Services Depreciation Expense (Excel row 45) are two examples. All of the rows in

Sch 2a Allocation titled "Metering Services" and related costs continue down the column in Sch 2a Allocation to the Total Cost of Service (Excel row 265): \$190,035,806. These Metering Services costs in Sch 2a Allocation were allocated using the "Metering Study" (see cell D21 in Sch 2a Allocation), which includes costs related to the type of Standard Meter, and number of meters, and operational costs of the meters provided to the different delivery classes (see cells A335 through V369 in Sch 2a Allocation Factors in Sch 2a Allocation). This allocator then allocates \$99,069,258 (see cell F265 in Sch 2a Allocation) of the total \$190,035,806 to the Single Family without Electric Space Heating delivery class. Also see Excel rows 287 through 290 in Sch 2a Allocation for the summation of the costs assigned to the four groupings: Customer-related, Metering Services-related, Distribution-related, and Illinois Electricity Distribution Tax.

Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
Illinois Competitive Energy Association and Retail Energy Supply Association
("ICEA-RESA") Information Requests
ICEA-RESA 1.01 – ICEA-RESA 1.08
Date Received: April 30, 2025
Date Served: June 2, 2025

Given that there are three separate steps in the allocation of costs for rate-making, being Functionalization (allocation between regulated and unregulated functions), Classification (allocation into fixed, variable and customer costs) and Allocation (allocation to customer classes), please answer the following questions:

REQUEST NO. ICEA-RESA 1.07:

Did ComEd consider the impact on the Adjustable Block Program, other IPA procurements of renewable resources, net metering, or the DG Rebate when functionalizing or allocating costs? If so, please identify the instances where such a program was considered and explain how it was considered. If not, please explain why not.

RESPONSE:

Yes, such costs are considered. First, ComEd's ECOSSE allocates costs related to delivery (i.e., distribution) services and facilities and costs for certain other State mandated programs are recovered under riders specific to certain programs. Such impacts for the referenced costs were considered in the following ways:

The Adjustable Block Program costs are recovered under Rider REA - Renewable Energy Adjustment and are not specifically recovered under ComEd's delivery rates.

The IPA procurement of renewable resources are included in the determination of purchased electricity charges and miscellaneous procurement charges under Rate BES - Basic Electric Service and Rate BESH - Basic Electric Service Hourly.

Net metering related to delivery costs are included in updated billing determinants when customers reduce their energy delivered and the corresponding delivery class's Coincident Peak (CP) and Non-Coincident Peak (NCP) allocators change as the customers use their solar, or other renewable generation, facilities under net metering.

The DG Rebate related costs are included in the provisions of Rider DG Rebate Adjustment - Renewable Energy Distributed Generation Rebate Adjustment for allocation and recovery of the costs related to the rebates for distributed generation.

Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
Illinois Competitive Energy Association and Retail Energy Supply Association
("ICEA-RESA") Information Requests
ICEA-RESA 1.01 – ICEA-RESA 1.08
Date Received: April 30, 2025
Date Served: June 2, 2025

Given that there are three separate steps in the allocation of costs for rate-making, being Functionalization (allocation between regulated and unregulated functions), Classification (allocation into fixed, variable and customer costs) and Allocation (allocation to customer classes), please answer the following questions:

REQUEST NO. ICEA-RESA 1.08:

For all costs related to advertising or marketing without regard to the specific USoA account:

- a. Please identify which (if any) of such costs are functionalized to supply
- b. Does ComEd market or advertise on behalf of any of its supply rates? If so, please identify the marketing costs and how those costs are functionalized between supply and delivery.
- c. Does ComEd incur any costs for third parties to administer any aspect of any of ComEd's supply rates? If so, please identify such costs and how those costs are functionalized.

RESPONSE:

- a. ComEd does not market its Rate BES - Basic Electric Service supply rate and does not market its Rate BESH - Basic Electric Service Hourly supply rate to nonresidential customers, so it does not have any related marketing costs in those circumstances. Rate BESH for residential customers is managed under Rider RRTP - Residential Real Time Pricing, and that program is managed by a third party, Elevate Energy. The costs to run that program, and related marketing, are recovered under the application of a monthly charge on residential bills equal to \$0.06 per bill. See Rider RCA - Retail Customer Assessments, Sheet No. 257, section titled: Residential Real Time Pricing Program Cost Recovery Charges.
- b. See ComEd's response to subpart a.
- c. See ComEd's response to subpart a.

Solvable Issues to Send the Right Economic Signals to Customers

ComEd Allocation of Costs
24-0378 Order

July 23, 2025

Illinois Competitive Energy Association & Retail Energy Supply Association

What Is ComEd Doing Wrong With Cost Allocation, and How Should it Change?

- I. Introduction – Kevin Wright
 - II. Brief History of Litigation – Michael Strong
 - III. Analysis of ComEd's Approach – Dr. Leonardo Giacchino
 - IV. What Does this Mean for the Commission's Concerns – Michael Strong
-

Why Are We Here?

- **ComEd RDI Final Order**
 - “The Commission is concerned with the potential impacts caused by misallocation between supply and delivery service costs. The Commission finds that possible negative impacts on the State’s ability to meet P.A. 102-0662 procurement goals and incentivize participation in renewable programs is particularly concerning.” Docket No. 24-0378 Final Order at 35.
 - Because of the Commission’s concerns about the potential impacts caused by misallocation between supply and delivery service costs, the Commission directed Staff to conduct an investigation to determine the appropriate allocation method.
- **ComEd’s Submission**
 - ComEd has advanced, apparently at Staff’s request, an updated CCSA Study—which allocates certain call center costs to its supply function and its Switching (incremental or marginal cost of service) Study.
 - ComEd claimed that there will be rate shock for certain categories of customers if the ICEA and RESA allocation proposal is adopted.
- **Staff’s Tentative Position**
 - “Currently, Staff’s position with ComEd’s current identification of costs included in the allocation is appropriate and that no changes would be necessary for cost items. ComEd provides delivery services to all customers irrespective of who provided supply and ComEd is the provider of last resort.” (Workshop #2, June 3, 2025)

Why Are We Here? (cont'd)

- **ICEA-RESA Position**

- ICEA-RESA notes that while Staff is correct that ComEd provides delivery service to all of its customers, it only provides supply service to its default service customers, who do not pay the full costs for that supply service. This is because ComEd is misallocating certain costs to delivery services instead of supply because ComEd's methodology is missing a critical step in cost allocation – the Classification of Costs and the proper assignment between delivery services and supply;
- Our expert witness, Dr. Giacchino, will demonstrate that certain categories of costs need to be allocated between distribution and supply, that it can be done in a revenue neutral manner, and that it can be done without rate shock. but indicated that due to ComEd's failure to provide the necessary data, it was the best a non-ComEd expert could do and that his methodology and the allocation results it produced were a best efforts proxy.
- ICEA-RESA believes that the missing Classification of Costs step inherent in ComEd's cost allocation methodology reduces incentives for behind-the-meter solar and community solar; potentially impacts other CEJA policy goals, overcharges ARES' customers, and gives the utility a competitive advantage over ARES in the provision of electric supply service to retail customers by understating the true Price to Compare.
- ICEA-RESA believes that in the spirit of the Commission's Final Order in this docket and past cost allocation dockets and with Staff's due diligence responsibility as the neutral fact finder that Staff, to the extent it has any issues with the ICEA-RESA methodology, should work with ICEA-RESA to resolve any issues. Then Staff's final report to the Commission can meet ICEA-RESA's understanding of what the Commission expected to result from this investigation. Specifically, the Staff's final report should recommend that the Commission initiate proceedings to establish the proper allocation of ComEd's costs between distribution and supply functions.

II. Brief History of Litigation

Docket	Outcome
07-0566	Did not adopt marginal cost approach but insufficient evidence about embedded approach; docketed investigation (Final Order dated September 10, 2008 at 207-208.)
08-0532	Disagreed with marginal approach but not enough evidence about specific allocation factors; required ComEd to present embedded approach in next rate case (Final Order dated April 21, 2010 at 68-69.)
10-0467	Marginal cost approach due to fears regarding mass market switching (Final Order dated May 24, 2011 at 210-211) but reaffirming that O&M costs should be allocated based on a realistic assessment of cost causation (<i>id.</i> at 213.)
13-0387	RDI (predecessor to 16-105.5); ordered ComEd to properly allocate between supply and delivery (Final Order dated Dec. 18, 2013 at 57)
14-0312	Allocated on embedded basis call center; cited insufficient evidence on other topics (Final Order dated December 10, 2014 at 103-104.)

24-0378

- Emphasized concerns about impact on CEJA goals (Docket No. 24-0378, Final Order dated January 16, 2025 at 35) and directed Staff to conduct an investigation culminating in a report
- Specifically, the Commission directed that Staff's final report should recommend that the Commission what actions (if any) are required to properly allocate costs between supply and delivery.
- Declined to adopt ICEA-RESA proposal in docket due to:
 - Concerns about revenue neutrality for reallocation of capital costs
 - Concerns about rate shock

III. Analysis of ComEd's Approach

- ComEd does not separate default services and only allocates a small portion of customer care costs from delivery to supply. It keeps a large number of costs such as Billing, IT, Scheduling, etc. which are supply related and belong with the supply cost portion of supply default rates;
- ComEd Functionalizes and Allocates costs but does not classify them; Specifically, the Staff's final report should recommend that the Commission initiate proceedings to establish the proper classification and allocation of ComEd's costs between the distribution and supply functions;
- Missing One Step (Classification) Biases the Calculations: many USoA accounts have fixed cost components (and you should use kW as billing requirements) and variable cost components (and you should use kWh as billing requirements). For ComEd it appears to be all or nothing—a cost is either a delivery cost as the baseline assumption or a supply cost only to the extent the cost is expected to fall (in ComEd's assessment) with increased switching;
- The number of default services customers in the modeling of ComEd is not considered by ComEd, but it should matter; and
- Results from the ICEA-RESA Proposal May Appear to Cause Rate Shock Because of Bias in ComEd's Allocation Process: by showing examples of changes to the status quo the results converge to more consistent values. Rate shock can also be addressed in an allocation proceeding.

Example of Misallocation of Costs

- “For the IT costs allocated to ComEd, there would be no cost reduction at any level of switching because the IT equipment and services used to provide reliable electric service and related programs must be maintained at current levels regardless of the number of customers with a RES.” (RML 1.02 Supp. Attach 1 at 8)
 - Unless ComEd provides no IT support to its supply functions and those in supply are bereft of computers, software, internal applications, telephones, etc., some portion of the \$60 million cost is related to ComEd providing supply
 - ComEd makes no effort to identify whether any costs are related to its supply billing system, reconciling net metering (including reconciliation of community solar), or other supply functions

By ComEd failing to properly categorize costs, its ECOSSE methodology is locked into the same mistakes as are evident from its Switching Study

Billing Computation and Data Management

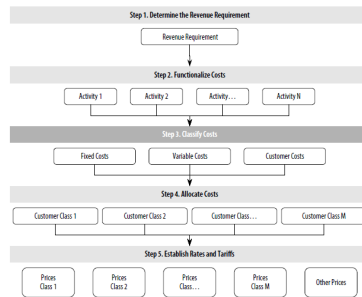

- ComEd identifies \$271,292,443 of operating expenses related to Billing – Computation and Data Management (cell AB221 in Tab “Sch 1a Functions” of ComEd Ex 2.01);
- ICEA-RESA Ex 5.01 allocates \$147,854,826 of those operating expenses as expenses for customers Taking Fixed Price Supply Service From ComEd (cell AB221 in Tab “Sch 1a Functions” of ICEA-RESA Ex 5.01 when Input Key is equal to 3 in cell D16 of Tab “Menu”);
- ComEd has not allocated a single dollar of those operating expenses to supply. All has been allocated to delivery, even though default services customers receive supply from ComEd and those kWhs generate expenses; and
- If ComEd is required to provide the necessary data, a correct methodology can be established.

ComEd as a Delivery Service Provider

- ComEd says that “ComEd also identified two categories of Customer Care costs – Metering Services and Advertising – that are not analyzed in the Study because they relate to ComEd’s role as a delivery service provider and will continue to be provided regardless of the level of switching from ComEd to a RES” (RML-2, p. 3).
 - However, ComEd provides billing service for supply too; either in ComEd’s own role offering default supply or to ARES (for which ARES are currently charged for consolidated billing under Rider PORCB)
 - Advertising may be legitimate, as ComEd is legally barred from advertising supply service (83 Ill. Admin. Code 452.240(a))
- By assuming that all metering services only support the delivery function ComEd directly assigns the cost category to delivery.
 - This is not correct because Default Service customers and RES customers are being served as supply customers with meters
 - Taking marginal cost approach (meters are required as a delivery service thus the meter is 100% delivery despite other uses) and the associated concept of “minimum distribution system” has been frowned upon by the Commission (see, e.g., ICC Docket No. 01-0423, Final Order dated March 28, 2003 at 137; ICC Docket No. 05-0597, Final Order dated July 26, 2006 at 164 (“ComEd and Staff oppose use of the [minimal distribution system approach] because such an approach does not accurately allocate costs to those who cause them to be incurred and they point out that the Commission has repeatedly rejected [that] approach.”))
- Footnote 1 of the Study removes Metering Services and mentions the provision of metering data to RESs. Metering data is needed to bill for supply services. Based on the description in the footnote, 100% of the costs are allocated to delivery and none to supply. Regardless if RES customers are 1% or 100% of the customers, it seems that the cost of billing for default services customers for their supply is paid by the delivery charges.

Why is Classification Important? and How do We Know that It Is Not in ComEd's Model?

Figure 7-2: Cost Classification

Lesser, Jonathan; and Giacchino, Leonardo (2024): "Fundamentals of Energy Regulation," Third Edition (Paperback), Regulatory Economics Publishing, Bethesda, Maryland, Figure 7.2, p. 196.

ComEd Ex. 2.01

Titles	Sch 1a Functions	Sch 1b Function Factors	Sch 2a Allocation	Sch 2b Allocation Factors	Sch 3 ECOSSE Compare
--------	------------------	-------------------------	-------------------	---------------------------	----------------------

Default Services in ComEd Modeling

- A Switching Study was rejected by the Commission in Docket 14-0312 because it was not an Allocation method; nothing in the Commission's order in Docket 24-0378 suggests that it wants to return to a Switching Study approach;
- ComEd Ex. 2.01 does not identify Default Services in the modeling;
- The understanding of why this is important can be seen by looking at two extreme cases:
 - 1% of customers purchase electricity from Retail Electric Suppliers ("RES") – Alternative 1; and
 - All customers purchase electricity from RESs – Alternative 2
- The existing model does not differentiate between customers on default service and those with RES and the impact on the allocation of costs between Supply and Delivery;
- Because there is no identification of fixed, variable and customer costs (Classification Step) by ComEd, changes in the number of Default Services customers in their existing model cannot be demonstrated that is Revenue Neutral because there is no correspondence among costs and prices based on being fixed or variable; and
- Making the necessary modifications in the ComEd model is not possible by a non-ComEd Expert because there is a need to classify costs at the USoA account level and the data has not been made available by ComEd. However, ICEA/RESA allocation model is best efforts proxy.

2025 ComEd Switching Study

- ComEd RML-2 Updated Switching Study.pdf includes the study and conclusions.
- The main conclusion is in page 1 of the study “The 2025 Switching Study determined that ComEd’s Customer Care costs do not **generally** change based on the levels of customers receiving supply service from ComEd” (bold added).
- It further adds in the same page that “costs for three departments would actually increase as customers switch to a RES, which would support costs being allocated to RES supply.”
- These three are Billing, Electric Supplier Services and Green Power Connection.
- The methodology is nonscientific and is done ad hoc by personnel from the thirteen departments.
- The study analyzes each department. To make the point in the lack of scientific method and unreliable conclusions, let’s look at the Customer Contact Center which is in pages 4 and 5.
- The Study concludes that “there is no direct correlation between call volume of billing-related calls and the percentage of customers receiving RES service” (page 5). That conclusion is reached by looking at the direction of calls handled and the percentage of customers receiving RES service for 2019, 2022 and 2024 only, while ignoring the other years in its data set.
- In statistics, you use CORRELATION ANALYSIS.

Examples of Bias in ComEd Model

ICEA-RESA Ex. 5.01 for presentation.xlsx

ComEd Ex. 2.01 – 2026 Base ECOSS ComEd.xlsx

There is No Rate Shock but Bias in ComEd's Calculations

Q: What happens if you calculate rates in cents per kWh for each customer class for each functionalized category of costs?

A: While at the overall level show in Table 3a the unit costs look reasonable, for each category of costs there is variation around the average that for some customer classes may be seen as too wide. After a thorough analysis of the allocation of costs by ComEd to each customer class, I conclude that there is a certain bias against residential classes in the methodology. For example, when dealing with billing costs, the ComEd model uses number of customers to allocate costs instead of revenues or kWh or a combination of all of those factors. Choosing number of customers allocate the most costs to residential customer classes and the least to other customer classes. A simple change in the model to switch the allocator for billing costs change dramatically the cost per kWh for the Taking Hourly Price Service From ComEd customers. If this bias were to be eliminated, several changes in the allocation factors should be implemented and would eliminate the variation in unit costs for different categories. I did not make this change in my model, but if the Commission or other stakeholders were concerned about rate shock, this approach would (prior to any other mitigants that the Commission may impose) mitigate rate shock.

ICEA/RESA Ex. 5.0, pp. 9-10.

IV. Why Does It Matter?

ComEd's practice of not fully allocating costs to default service:

1. Reduces incentives for behind-the-meter solar and community solar
2. Provides customers with misleading pricing information – Disincentivizes competing rates including time-of-use by setting prices lower
3. Inflates ComEd's profit by allocating capital costs to delivery (which gets an opportunity to earn an allowed rate of return) instead of supply (which also does but in a competitive manner)
4. Places ARES products and services at a disadvantage by allocating costs to delivery.

Under the traditional ratemaking formula for calculating a revenue requirement, utilities do not earn a rate of return on items that are not in ratebase. Therefore, reallocating non-ratebase distribution costs to supply service in equal measure should be revenue neutral to the utility.

- If that is not the case, the burden should be on the utility to demonstrate why.
- ICEA's proposal is consistent with the traditional ratemaking principle of cost causation - that costs should be paid by the customers that cause them to be incurred.

How Does Misallocating Costs Harm CEJA Goals?

Under 16-107.5(l)(3), community solar bill credits are priced at the “total price to compare” (“the rate or rates published by the Illinois Commerce Commission for energy supply for eligible customers receiving supply service from the electric utility”)

Under 16-107.5(n), as of January 2025, new behind-the-meter generation systems only earn net metering credits on supply—not delivery.

For every marginal increase in “total price to compare,” community solar customers are more accurately compensated. For every marginal increase in costs for utility supply rates for behind-the-meter solar customers, customers are more fairly compensated for exports.

How Does Misallocating Costs Harm CEJA Goals? (cont'd)

Under 16-105.17(f)(4), effects of time-of-use rates (or ARES TOU) will be diminished if bundled supply rate appears artificially lower and thus TOU will appear more risky.

Under 16-105.17(d)(11), affordability is impacted if ComEd earns a rate of return if the same (capital or capitalized) cost is in delivery services but not if in supply. The Commission could handle either way as long as costs are properly allocated across the supply and delivery function.

Example of Incorrect Assessments in the Switching Study

- "The GPC team also handles customer inquiries about ComEd-offered rebates with rate requirements that require participation in a time-variant rate and can result in customers switching suppliers to a RES with a time-variant rate, or away from RES supply (if they cannot find a satisfactory RES time-variant rate)."
- That's not what Rider DG Rebate requires for a 2B Rebate:
 - "Retail customers who are serviced by a Distributed Electric Renewable Generating Facility, for which a Resource 2B Rebate has been issued, must take service under a QUP for the life of the Energy Storage Facility." (IL C.C. No. 10, 2nd Revised Sheet No. 248.4).
 - "A Qualifying Utility Product (QUP) is a utility-offered product, related to either energy supply or the delivery of such energy supply which utilizes a time-variant pricing structure whereby a retail customer is charged at a higher volumetric rate during certain designated times, typically when system demand is high, and is charged at a lower volumetric rate during other designated times, typically when system demand is low." (IL C.C. No. 10, 11th Revised Sheet No. 247)
- ComEd is assigning costs to ARES based on ComEd's tariff quirk requiring ARES customers to switch to ComEd supply.

How Should Costs Be Allocated? [comments]

ICEA/RESA propose that utilities properly allocate those costs necessary to maintain a default supply offer to their default supply customers, consistent with NARUC ratemaking guidelines and traditional ratemaking principles.

- To meet NARUC's "fully allocated cost basis" principle, the costs for all resources that are utilized in the provision of default service must be included in the bucket of costs allocated to default supply service.
- "The prevailing premise of these Guidelines is that allocation methods should not result in subsidization of non-regulated services or products by regulated entities unless authorized by the jurisdictional regulatory authority." *NARUC Guidelines*, Section B, p. 2.

Regulation, it is said, is to be a substitute for competition. Hence, its objective should be to compel a regulated enterprise, despite its possession of complete or partial monopoly, to charge rates approximating those which it would charge if free from regulation but subject to the market forces of competition. In short, regulation should be not only a substitute for competition, but a closely imitative substitute.

Bonbright, James C., *Principles of Public Utility Rates*

Conclusions and Next Steps

Staff in its report should recommend to the Commission that the Commission:

- **Reject** ComEd's Switching Study
- **Direct** ComEd to classify its costs, as that term is defined in this presentation and by Dr. Giacchino
- **Initiate** a proceeding to assess cost classification so that costs can be properly allocated between supply and delivery.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.01:

Please provide a copy of ComEd's 2024 Performance Adjustment and Annual Adjustment filing, that is required to be filed no later than May 1, 2025. Please include copies of all workpapers, in native format.

RESPONSE:

ComEd objects to this request as it is not related to Staff's supply and delivery allocation investigation and the filing is available at the ICC eDocket page under Docket No. 25-0383 at:

<https://www.icc.illinois.gov/docket/P2025-0383/documents>

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.02:

Please explain whether ComEd believes that its rates should be designed to assign costs to the cost causers, to the extent practicable. If not, please fully explain in detail why not.

RESPONSE:

As a general matter, in establishing a rate design, ComEd takes a balanced and holistic approach using practical allocation methodologies approved by the Commission and seeks to ensure that its rates are reasonable, reflect cost causation, and are fair, just, and not discriminatory.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.03:

Please explain whether ComEd believes that using an allocator based upon the revenue collected from supply customers to assign its Customer Call Center costs assigns costs to the cost-causers, to the extent practicable. If so, please fully explain in detail how.

RESPONSE:

ComEd understands this data request to be referencing the allocation done in the Customer Care Supply Allocation (CCSA) Study attached as ComEd Ex. 5.06 in ICC Docket No. 24-0378 and provided as the attachment labeled as REACT 1.03_Attach 1. The Revenue Allocator (72.29% to Distribution and 27.71% to Supply) is used to allocate 1,674,931 calls in ComEd Ex. 5.06. The Description labels of those calls are shown in the table below. ComEd believes using a revenue-based allocator is a reasonable allocation for calls that are related to the topics shown, such as, but not limited to, payment-related matters.

Notwithstanding the response above, there are calls to the Call Center that are from RES-supplied customers and without a portion of the bill being directly assigned to RES-supplied customers and only a portion of costs directly assigned to ComEd-supplied customers, the methodology does not reflect cost causation in that it does not assign the costs RES-customers cause in a similar manner and they all remain in delivery charges.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.04:

Please explain whether ComEd believes that using an allocator based upon the number of lines on a retail bill to assign its Customer Call Center assigns costs to the cost-causers, to the extent practicable. If so, please fully explain in detail how.

RESPONSE:

ComEd understands this data request to be referencing the allocation done in the Customer Care Supply Allocation (CCSA) Study attached as ComEd Ex. 5.06 in ICC Docket No. 24-0378 (see REACT 1.03_Attach 1). The number of lines allocator, or "Bill Allocator" (75.8% to Distribution and 24.2% to Supply) is used to allocate 365,352 calls in ComEd Ex. 5.06. The Description labels of those calls are shown in the table below. ComEd believes using a Bill Allocator based upon the number of billing lines related to different charge types (Delivery, Supply and Tax/Other) and the types of customers (Residential and Nonresidential) is a reasonable allocation for calls that are related to the customer bill.

Notwithstanding the response above, there are calls to the Call Center that are from RES-supplied customers and without a portion of the bill being directly assigned to RES-supplied customers and only a portion of costs directly assigned to ComEd-supplied customers, the methodology does not reflect cost causation in that it does not assign the costs RES-customers cause in a similar manner and they all remain in delivery charges.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.05:

Please provide the following concerning when a consumer contacts the ComEd Customer Call Center:

- a. What information is used to identify the customer and their related account (e.g., name, account number, service address, phone number, etc.)
- b. What customer data and information is available to the call center customer service representative once the customer and related account have been identified (rate, riders, billing history, amounts due, participation in demand response, participation of net credits, etc.)
- c. Please describe fully and in detail the process that is used to determine what "Description" is assigned to a contact with the ComEd Customer Call Center (which then is used to assign the contact to the Revenue Allocator, Bill Allocator, or Distribution Allocator, as reflected in ComEd Ex. 5.06 from ComEd's rate design investigation proceeding, ICC Docket No. 24-0378 (attached)).
 - i. Who makes the assignment?
 - ii. At what point is a customer contact assigned to a particular "Description"?
 - iii. How are single customer calls that are related to multiple issues (that each separately could be assigned to a different Revenue Allocator, Bill Allocator, or Distribution Allocator category) assigned?

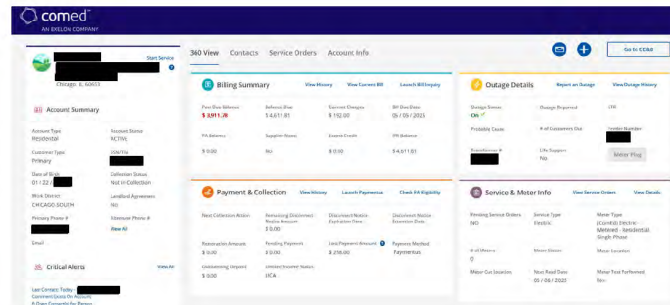

RESPONSE:

- a. The information used to identify the customer and their related account is their name, phone number, service address, and account number.
- b. All customer information contained in ComEd's billing system is available to Customer Service Representatives ("CSRs") by selecting from multiple tabs when the account is pulled up. See the attachments labeled as REACT 1.05_Attach 1 and REACT 1.05_Attach 2 for examples. Confidential customer specific information has been redacted.
- c.
 - i. The customer selects the reason why they are calling when they enter the Intelligent Virtual Assistant ("IVA"), formerly known as Interactive Voice Response ("IVR").

- ii. A description is assigned to a customer contact based upon the customer's last selection before they leave the IVA to talk to a CSR.
- iii. As described in the response to c(ii), a customer call that is related to multiple issues is assigned a description based on the customer's final selection before they leave the IVA to talk to a CSR.

Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.06:

How frequently are the assignments of customer contacts to the Descriptions audited, by whom, and how are corrections made and recorded? Please provide copies of the last two (2) audits that were conducted, along with all related workpapers, in native format.

RESPONSE:

There have been no audits performed by internal groups. However, in 2015 and 2018 an external third-party vendor, Olenick & Associates, performed data validation on the IVA system as ComEd migrated from one IVA system to a new IVA system. The data validation was intended to verify that when a call was transferred from the IVA to a CSR, the call type was categorized correctly. In addition to the data validation, there was a manual review of the exit points in the IVA with an associated call type. The exit point in the IVA would show the last topic that a customer selected during their call. The last topic is how the call would be categorized. This manual review was tested by having an individual call the IVA and make multiple selections, to then see if the call was categorized based on the last selection.

RESPONSE:

See the attachment labeled REACT 1.07_Attach 1.

COMED SUPPLY AND DELIVERY RATES

Current ComEd Supply and Delivery Rates

Current Electricity Supply Rates (by the season):

Summer (June to September) with May & October as relative months: Supply Rate is **6.98 Cents per kWh.**

- *Determined by adding Summer Electricity Supply Charge \$0.05445 & Transmission Services Charge \$0.01537 = \$0.06982 per kWh.*
- *Billing pricing varies based on Relative Bill Month. As a result, the customer may be charged the Non-summer price per kilowatt based on May and October being relative months.*

Non-Summer (November to April): Supply Rate is **6.55 Cents per kWh.**

- *Determined by adding Non-Summer Electricity Supply Charge \$0.05015 & Transmission Services Charge \$0.01537 = \$0.06552 per kWh.*

To calculate the ComEd **supply** rate you need to take the **Supply Charge plus** the **Transmission Services Charge**.

Note: for **Summer and Non-Summer:** Exact periods are based on the bill group.

Supply Charges(Effective January 2025)

Residential Supply Related Charges:

Customer Group	Summer Electricity Supply Charge (\$/kWh)	Non-Summer Electricity Supply Charge (\$/kWh)	Transmission Services Charge (\$/kWh)
Residential **	\$0.05445	\$0.05015	\$0.01537

Non-Residential Supply Related Charges:

Customer Group	Summer Electricity Supply Charge (\$/kWh)	Non-Summer Electricity Supply Charge (\$/kWh)	Transmission Services Charge (\$/kWh)
Watt-Hour Non-Electric Space Heating (kWh meter usage only)	\$0.05486	\$0.05046	\$0.01528
Demand Non-Electric Space Heating	\$0.05585	\$0.05096	\$0.01528
Non-Residential Electric Space Heating	\$0.04714	\$0.04922	\$0.01528
Dusk to Dawn Lighting	\$0.01913	\$0.02284	\$0.01439
General Lighting	\$0.04457	\$0.04668	\$0.01439

**The discount for the Residential Electric Space Heating Supply Charges has been phased out for residential customers under order by the Illinois Commerce Commission and the charges are the same for electric space heating and non-electric space heating residential customers.

(PTC) Customer Inquiry on Supply Charges and Customer Choice

ComEd is reminding consumers how to deal with higher-than-anticipated energy bills and is recommending strategies to cut back while staying comfortable. In addition, many of our customers have contracted with Retail Electric Suppliers (RES) and are seeing an increase in their energy costs due to the increased demand.

Reminder: Customers in the areas we serve have the right to choose their electricity supplier, whether the supplier is ComEd or a RES, this right to choose their electricity supplier is referred to as Customer Choice.

[What you need to know](#)

[What do you need to do](#)

[Powering People](#)

[Tips to educate customers - Considering a different supplier](#)

What you need to know

Below are some key responsibilities of ComEd, which is an **Integrated Distribution Company (IDC)**, that assure compliance with IDC and Affiliate Non-Discrimination Rules:

1. ComEd continues to provide the delivery of energy to all ComEd customers.
2. ComEd remains responsible for the wires, poles, meter reading and all outage restoration.
3. ComEd will treat all customers equally, regardless of their choice of electricity supplier.
4. ComEd supports Customer Choice and offers NO opinions or recommendation on suppliers; rather ComEd informs customers to visit choice websites such as the ICC's www.pluginillinois.org.

Within the last few years, many of our customers have elected to enroll or are part of a municipal aggregation program with a certified RES and often times inquire about

their **supply** charges (**Price to Compare**). For residential customers, these charges appear on the customers ComEd bills.

[Back to top](#)

What do you need to do

If a customer is enrolled with a RES and inquires about a high bill issue that is in part due to a change in their **supply** rate, you can use a comparison of the rate on the current month's bill with the rate on the customer's bill from the previous month, or the same month in the previous year. You can use the rate comparison in a strictly factual context such as "as shown on your bill your **supply** rate last month was xx cents per kwh, and this month it has risen to xx cents per kwh". If there are increases in usage or the distribution rate these should be included in the comparison. You can proactively educate customers about the **Price to Compare** paragraph on their bill.

The Illinois Commerce Commission (ICC) issued an order declaring that CSRs are permitted to:

- Discuss the bill language regarding **PTC**.
- Explain the **PTC** language on ComEd bills as disclosed on the Commission's website.
- Directing customers to their RES supplier.

You can utilize **PTC** information as shown on the customer **supply** rate (month over month) when educating customers who are calling about a high bill or questioning the **PTC**. This allows you to better analyze the account and to education the customer on the rate they are paying.

The IDC Rules Remain in place:

- CSRs should not make a negative comment about the rate or an opinion on the customer's choice.
- CSRs should not provide recommendations on whether the customer should or should not switch to a RES or discuss the quality of service of the RES.
- It is important to allow the customer to draw their own conclusion.

The role of the CSR is to educate the customer on the facts.

A recommended talking point to avoid any perception of opinion is:

"It is always best to talk to your supplier as we have no involvement in their contracts or want to cancel their contract. If you choose to change suppliers you may be subject to an early termination fee or other terms and conditions."

Do NOT offer any advice, or opinion on the customer's choice of supplier. You can share the

supplier's name, their website and/or phone number to help the customer. For additional pricing information on ComEd's rates or customer choice, you can refer the customer to visit the ICC's website for customer choice at www.pluqinillinois.org.

You can reinforce that ComEd is the delivery company and not able to respond to questions regarding how a RES determines **supply** charges (Price to Compare). You can still answer questions regarding their delivery charges, usage and metering.

If the customer has been experiencing challenges with the RES not responding to contacts, you may provide the customer with the telephone number for the ICC Consumer Services Division **1-800-524-0795**.

Please Mind Your IDCs. ComEd functions as an Integrated Distribution Company (IDC) and supports Customer Choice. ComEd Employees must not attempt to obtain or retain a customer for any retail electric **supply** service. ComEd employees must not give their opinions or comments regarding customer choice. Violations of these rules could result in loss of ComEd's IDC status and severe financial penalties.

Powering People

A series of initiatives in a broader assistance effort to help protect customers against fraud, offer more transparency around competitive energy choices and provide assistance to the most vulnerable customers. The three pillars of Powering People are to **Inform, Empower and Assist**.

1. Inform - Customers on how to spot scammers.
2. Empower - Customers with information on choosing energy suppliers.
3. Assist - Our most vulnerable customers with additional financial support.

Customers should never feel vulnerable when it comes to their energy bill

That's why we are eager to help empower customers with the information, tools and assistance they need to power their lives

[Back to top](#)

Tips to educate customers - Considering a different supplier

In an effort to educate customers, offer a few tips that customers can ask potential suppliers and direct them to the RES to provide the answers.

1. Are there any early termination fee(s)?
2. Can the **supply** rates change?
3. If the **supply** rates change, when and why?
4. Continue to direct customers to contact their RES for specifics about their particular contract including any special offers they received.

Bill Line Items & Itemization

To learn more about **bill itemization**, review the following chart:

Bill Line Item	Description	Calculation Fixed or Variable	Supply vs Delivery Charge
Customer Charge	- A monthly charge for service connection and billing. This charge will also include the Retail Customer Assessments rider (Rider RCA), which are charges for state funds for renewable energy resources, coal technology development, and low-income energy assistance (built into the Customer Charge). - This line item is applicable to every customer bill.	Fixed	Delivery Charge
Standard Metering Service Charge	- A charge for the costs of using the meter and meter reading services. Prior to 2007, this charge was included in the Customer Charge. - This line item is applicable to every customer bill.	Fixed	Delivery Charge
Distribution Facilities Charge	- The charge for the delivery of energy service. - A charge for using equipment to deliver energy, such as poles and wires. - This line item is applicable to every customer bill.	Variable	Delivery Charge
Capacity Charge	This charge is only applicable to customers who purchase their energy from ComEd with energy pricing that varies on an hourly basis.	Variable	Supply Charge
Price to Compare Charge (Previous Supply & Transmission)	- Charge to recover the cost of energy used by the customer. - A charge to recover the costs of using the transmission system/wires. - Charge to recover administrative costs related to purchasing energy supply. - ComEd purchases energy at market prices and passes the cost on to the customers with no markup. - This line item is only applicable to customers who receive their energy supply requirements from ComEd.	Variable	Supply Charge

Purchased Electricity Adjustment	• The difference between what ComEd must pay to purchase energy supply and what ComEd bills customers to provide that supply. • Applied as a credit or a debit, as applicable to the kilowatt-hours provided. • This line item is only applicable to customers who receive their energy supply requirements from ComEd.	Variable	Supply Charge
Zero Emission Standard	• This new line item supports zero-carbon energy supplied to Illinois.	Variable	Other Charge
Renewable Portfolio Standard	• An existing charge - which has been embedded in your supply charge is now a separate line item - that helps support the development of residential and commercial renewable energy from wind and solar in Illinois.	Variable	Other Charge
Environmental Cost Recovery Adjustment	• A charge to recover the costs associated to Methane Gas Plant related clean-up projects. This charge will be based on the difference between the projected costs the company expects to incur and any net reimbursements (funds received from any source other than through this rider) from the previous calendar year. • Determined annually and applied as a credit or a debit. • This line item is applicable to every customer bill. Rider ECR (pdf) Current Rider ECR Adjustment (pdf)	Variable	Other Charge
Local Government Compliance Cost	• This charge is imposed when a municipality incurs costs from a community improvement project or service being done by ComEd. The municipality may decide to pass the costs on to the customers within that municipality over the duration of the project until it is completed. • Applicable to both residential and non-residential customers.	Variable	Other Charge

Energy Efficiency Programs	- Residential - This line item funds new and expanded energy efficiency programs that can help ComEd customers save energy and money. The passage of the Future Energy Jobs Act helped to reduce this charge from the prior \$2/month average. - Commercial (0-100 kW) - This line item funds new and expanded energy efficiency programs that can help ComEd customers save energy and money. The passage of the Future Energy Jobs Act helped to reduce this charge. (Note: We removed the \$2/monthly average because it was not applicable to this customer group).	Variable	Other Charge
Energy Efficiency Credit	- Residential - A credit to customers for energy efficiency program charges that were collected from June 2016 - April 2017, but not utilized. - Commercial (0-100 kW) - A credit to customers for energy efficiency program charges that were collected from June 2016 - April 2017, but not utilized.	Variable	Other Charge
Energy Efficiency Adjustment	The April 2019 bills will include an Energy Efficiency Adjustment; some customer classes will see charges while others will see credits. This stems from the termination of the former Energy Efficiency program conducted under Rider EDA. Rider EDA was discontinued following the passage of the Future Energy Jobs Act (FEJA), which took effect in June of 2017. Monies that had been paid into the former program during a transition period were not spent. A refund was paid out to customers in October of 2017 that was larger than anticipated due to higher-than-normal energy consumption.	Variable	Other Charge
Energy Transition Assistance	A provision of the Clean Energy Law to support clean energy economic development and jobs training programs. The Charge is billed on each kWh.	Variable	Other Charge

	- Customers on NM1, NM2, NM3, or NM4 for net metering will receive credits for the charge based on each kWh generated. - The charge will be updated annually but cannot be higher than the current rate of \$0.00082 per kWh.		
Franchise Cost	- The franchise cost is a charge to recover costs directly related to the franchise agreement between ComEd and the municipality. - If a franchise agreement exists, the customer is being billed a franchise charge to recover the costs that ComEd incurs for using those municipalities' public rights-of-way and to recover the costs of providing free energy service to some of the municipalities building with free energy service (if applicable).	Variable	Other Charge
State Tax	- A kilowatt-hour-based tax charge. - This line item is applicable to every customer bill.	Variable	Other Charge
Municipal Tax	- This line item only appears on the bills of customers located in a municipality that imposes a municipal utility tax. - A kilowatt-hour-based tax charge.	Variable	Other Charge
Central Air Conditioning Cycling Program (Formerly Nature First)	- This is a rider that a residential single-dwelling customer may elect. - When this rider is elected, the customer agrees to allow ComEd to periodically cycle their air conditioning compressors. This program's purpose is to curtail load to reduce summer peak demand. The cycling of the AC compressor occurs during the weekday hours from 11:00 a.m. to 8:00 p.m. (CPT) and shall not exceed more than 20 days of summer (June 1 – September 30). - This rider has 2 options:	Fixed (2 options)	Optional Credit

	• AC Compressor <i>Cycling</i> Option – which provides a \$5.00 credit to each bill. No more than 6 hours a day alternating every 15 minutes. • AC Compressor Interruption Option – which provides a list of \$10.00 credits to each bill. No more than 3 hours/day alternating every 15 minutes or completely interrupted.		
IL Electricity Distribution Charge	• This charge provides for the recovery of the Illinois Electricity Distribution Tax and uncollectible costs associated with the application of that tax. It is a kWh-based charge. • This previously was part of the Distribution Facilities Charge (DFC) (prior to June 2011 billing). It now appears as a separate line item.	Variable	Delivery Charge
Miscellaneous Procurement Charge	• This charge is only applicable to customers that purchase their energy from ComEd with energy pricing that varies on an hourly basis and recovers procurement costs that are not captured under any other bill line item related to energy supply.	Variable	Supply Charge

(There may be additional line items on a customer's bill with additional services/charges such as:

- Budget Billing
- Late Payment
- Charges
- Past Due Balances
- Deposits
- Payment Arrangements
- Auto Pay)

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation
Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.08:

Please indicate the total annualized cost for the operation of the ComEd billing system in 2023 and 2024.

RESPONSE:

See the attachment labeled as REACT 1.08_Attach 1 for a table with the annualized cost for the operation of the ComEd billing system in 2023 and 2024.

Appendix C - Stakeholder Presentation
Rate Design Investigation

Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.09:

Please indicate the portion of total annualized cost incurred in the operation of the ComEd billing system in 2023 and 2024 that was attributable to ComEd providing supply service. Please explain fully and in detail how those costs are assigned to ComEd's supply function and how those costs are recovered.

RESPONSE:

All of ComEd's customers, regardless of supply choice, are delivery customers and ComEd incurs billing system costs to bill those customers. As provided in the attachment labeled as REACT 1.08 Attach 1, certain administrative and general costs use a Wages and Salaries allocator to assign costs, resulting in an amount allocated to ComEd's supply function and assigned to ComEd supply rates and recovered in Rate BES and Rate BESH.

Notwithstanding the response above, costs related to updating supply charge line items in ComEd's billing system are attributable to providing ComEd supply charges.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.10:

Please indicate the portion of total annualized cost incurred in the operation of the ComEd billing system in 2023 and 2024 that was attributable to ComEd customers served by retail suppliers. Please explain fully and in detail how those costs are assigned and recovered.

RESPONSE:

All of ComEd's customers, regardless of supply choice, are delivery customers and ComEd incurs billing system costs to bill those customers. As provided in the attachment to ComEd's Data Request Response to REACT 1.08 labeled as REACT 1.08_Attach 1, certain administrative and general costs use a Wages and Salaries allocator to assign costs, resulting in an amount allocated to ComEd's supply function, and assigned to ComEd supply rates, and therefore are not paid for by Retail Electric Supplier ("RES") supplied customers. The attachment labeled as REACT 1.08_Attach 1 also shows costs related to Electronic Data Interchange ("EDI") transactions that are assigned to Rider PORCB – Purchase of Receivables with Consolidated Billing (Rider PORCB) and assigned to RESs. See ICC Docket No. 23-0244 for the most recent completed reconciliation of Rider PORCB costs.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.11:

In ComEd's current cost allocation methodology does ComEd assign the same cost to each contact with the ComEd Customer Call Center? If not, please explain fully and in detail how ComEd differentiates those costs.

RESPONSE:

There is not a cost assigned to each customer contact in ComEd's Customer Care Supply Allocation ("CCSA") Study. See the attachment to ComEd's Data Request Response to REACT 1.03 labeled as REACT 1.03_Attach 1 for the 2023 CCSA. In ComEd's CCSA Study, each call is assigned the Revenue Allocator, Bill Allocator, 100% to Distribution or Not Used for Allocation in the CCSA Study (See Tab: "2023 Call Center" in the CCSA labeled as REACT 1.03_Attach 1) and the resulting Distribution and Supply percentages from that computation are used to assign Call Center costs to Distribution Service and Supply Service.

Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.12:

Please quantify the amount that each customer class has been charged for customer care costs for each of the last five (5) years.

RESPONSE:

ComEd understands this data request to be referencing the allocation of customer care costs in ComEd's Embedded Cost of Service Study ("ECOSS"). Using ComEd's 2026 Base ECOSS filed as ComEd Ex. 2.01 in ICC Docket No. 24-0378 and provided in the attachment to ComEd's Data Request Response to ICEA-RESA 1.01 labeled as ICEA-RESA 1.01_Attach 1, the Customer Care costs are included in Account 903 shown on Sch 1a Functions, Row 155. The costs in Account 903 are assigned to Metering Services (Customer Care costs would not be in this category), Indirect Uncollectibles, Bill Issue and Processing and Bill Computation and Data Management. The assignment of the costs by delivery class for Bill Computation and Data Management, Indirect Uncollectibles and Bill Issue and Processing can be found in ComEd Ex. 2.01, on Sch 2a Allocation, Rows 262, 263 ad 264, respectively.

ComEd has used the same ECOSS model for the prior five years and the allocation methodology is the same with some variation in the dollar amounts based on the costs reflected in each time period.

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests

REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.14:

Please quantify the number of contacts each customer class has had with the ComEd Customer Call Center for each of the last five (5) years.

RESPONSE:

ComEd objects to this request as being unduly burdensome to gather call center data for five years and calling for information that may no longer be in ComEd's possession, custody, or control due to changes in IT systems. Subject to and without waiving the foregoing specific objections, ComEd responds as follows:

ComEd provides two (2) tables below reflecting 2024 data. The first shows the delivery class of an identified customer and the second shows the supply choice (ComEd vs. RES) of an identified customer. The calls listed as "Unknown" were from phone numbers not associated with an existing ComEd account number. The totals include calls that went through to the Customer Service Representatives ("CSRs") queue, including calls that may have been dropped and not completed it by a CSR.

Group	Class	Count Unique	Percent of Known Class
1	Residential Single	1,116,714	52.9%
2	Residential Multi	719,343	26.0%
3	Residential Single Heat	26,203	1.3%
4	Residential Multi Heat	140,571	7.0%
5	Watt-hour Only	7,138	0.4%
6	Small (0-100)	88,813	4.7%
7	Medium (100-400)	7,896	0.4%
8	Large (400-1,000)	2,074	0.1%
9	Very Large (1,000-10,000)	1,498	0.1%
10	Extra Large (>10,000)	88	0.0%
11	High Voltage 0-10 MW	16	0.0%
12	High Voltage >10 MW	35	0.0%
	Unknown	1,772,594	

Supply Choice	Count Unique	Percent of Known Supply Choice
ComEd	1,591,531	75%
RES	518,858	25%

Information Requests
REACT 1.01 - REACT 1.15
Date Received: April 30, 2025
Date Served: June 2, 2025

REQUEST NO. REACT 1.15:

In the next workshop, please walk through the data contained in ComEd Ex. 5.06 from ComEd's rate design investigation proceeding, ICC Docket No. 24-0378 (attached).

- a. Please explain fully and in detail how this data is used to develop ComEd's rates.
- b. Please refer to page 7 of 7 and provide a copy of a redacted residential bill for each "Description" category (e.g., Single, Multi, Hourly, PORCB, Dual) and explain fully and in detail how the lines are attributed to supply and delivery.
- c. Please refer to page 7 of 7 and provide a copy of a redacted non-residential bill for each "Description" category (e.g., Hourly (400-1000), Demand (100-400), Demand (0-100), PORCB, Dual) and identify how the lines are attributed to supply and delivery.
- d. Please explain fully and in detail whether (and if so, how) the data in this exhibit reflects that the costs for the ComEd Customer Call Center are assigned to the cost causers, to the extent practicable.

RESPONSE:

- a. ComEd Ex. 5.06 in ICC Docket No. 24-0378 is ComEd's updated Customer Care Supply Allocation Study ("CCSA Study") for 2023. ComEd's CCSA Study, initially referred to as the "Alternative Study," was first approved in ICC Docket No. 14-0312. The purpose of this study is to calculate an allocation of direct and indirect costs incurred by ComEd's Customer Contact Center for Delivery Service and Supply Service. The allocation process is described in detail in Leick Reb., ComEd Ex. 5.0 at 35:662 - 43:798. The resulting allocation of costs to Supply Service are removed from the calculation of the delivery service revenue requirement and the costs are allocated to ComEd's supply riders. The costs that are allocated to ComEd's supply riders are included in the applicable per kWh charges to customers taking energy supply from ComEd and are recovered under Rate BES and Rate BESH. The costs not allocated to Supply Service are included in the Delivery Service revenue requirement and are recovered in Delivery Service rates.
- b. A typical ComEd bill is divided into three (3) sections: Supply, Delivery, and Taxes & Fees. The Supply section includes line items that pertain to the recovery of supply and transmission costs for each supply group. Customers served by a Retail Electric Supplier ("RES") on a dual bill will not have any line items under the Supply section. The Delivery section includes line items related to the recovery of the Commission-approved delivery revenue requirement. ComEd does not have Single Bill Option bills as those are provided by the RES.

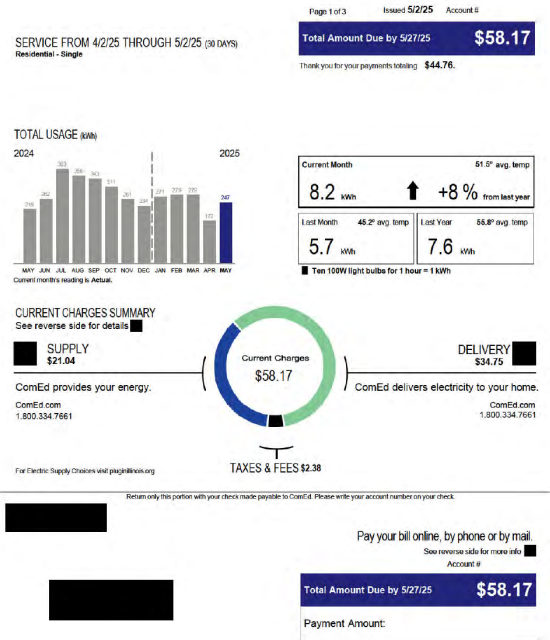

See the attachment labeled as REACT 1.15_Attach 1 for redacted sample bills of residential customers.

- c. A typical ComEd bill is divided into three (3) sections: Supply, Delivery, and Taxes & Fees. The Supply section includes line items that pertain to the recovery of supply and transmission costs for each supply group. Customers served by a RES on a dual bill will not have any line items under the Supply section. The Delivery section includes line items related to the recovery of the Commission-approved delivery revenue requirement. ComEd does not have Single Bill Option bills because those are provided by the RES.

See the attachment labeled as REACT 1.15_Attach 2 for a redacted sample of nonresidential customers.

- d. ComEd understands this request to refer to how the supply cost allocation is determined and assigned to ComEd supply rates using the CCSA Study. Based on this clarification, ComEd responds as follows:

The costs included in and allocated to supply in the CCSA Study attached to ComEd's Data Request Response to REACT 1.03 and labeled as REACT 1.03_Attach 1 are allocated based upon the methodology approved by the Commission in ICC Docket No. 14-0312. The assigned costs may not reflect cost causation because a portion is not assigned to RES customers.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 2.01 - REACT 2.04
Date Received: June 13, 2025
Date Served: July 7, 2025

REQUEST NO. REACT 2.01:

Please refer to ComEd's response to Request No. REACT 1.06 and provide copies of the 2015 and 2018 Olenick & Associates analyses, along with all supporting documents and workpapers in native format.

RESPONSE:

ComEd objects to this request as unduly burdensome in that it seeks documents that are not in ComEd's possession, custody, or control. Subject to and without waiving the foregoing objection, ComEd responds as follows:

ComEd is unable to locate an analysis or summary of the testing that was performed in 2015 and 2018 by Olenick & Associates.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 2.01 - REACT 2.04
Date Received: June 13, 2025
Date Served: July 7, 2025

REQUEST NO. REACT 2.02:

Please refer to ComEd's response to Request No. REACT 1.12 and provide a chart that contains the amount that each customer class has been charged for customer care costs for each of the last five (5) years.

RESPONSE:

See ComEd's Data Request Response to REACT 1.12, which describes how customer care costs are included in ComEd's ECOSSE. Using the response in REACT 1.12 to trace the customer care costs in ComEd's compliance ECOSSE from ComEd's 2022 Formula Rate Update (FRU), Docket No. 22-0302, ComEd Ex. 6.01, the resulting allocation by delivery class is provided in the attachment labeled as REACT 2.02_Attach 1. ComEd used this ECOSSE because it is the ECOSSE used to set rates in 2023 and as a basis to set rates in ComEd's multi-year rate plan filing for 2024 through 2027. Additionally, ComEd has used the same ECOSSE model back to 2020 (five years prior) and the allocation methodology is the same with some variation in the dollar amounts based on the costs reflected in each time period. Provided for convenience are the attachments labeled as REACT 2.02_Attach 2 - ComEd's ECOSSE from ICC Docket No. 22-0302, ComEd Ex. 6.01 and REACT 2.02_Attach 3 - the results of the 2021 Customer Care Supply Allocation (CCSA) Study, from ICC Docket No. 22-0302, ComEd Ex. 3.03, which is referenced in the attachment labeled as REACT 2.02_Attach 1.

(1) The total dollars vary slightly from the Allocator Percentages because the ECOSS applies a Revenue Adjustment Factor (See Sch 2a Allocation Line 237) to allow the computed revenue requirement. ECOSS model to match the final Revenue Policy computed revenue requirement.

(1) The \$97M in Call Center costs is from the 2021 Customer Care Supply Allocation (CCSA) study. The total Call Center costs analyzed, including indirects, was \$118M and \$21M was moved to supply which left \$97M for allocation in delivery rates. The indirect costs used in these values are based upon the factors in the CCSA.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 2.01 - REACT 2.04
Date Received: June 13, 2025
Date Served: July 7, 2025

REQUEST NO. REACT 2.03:

Please refer to ComEd's response to Request No. REACT 1.13 and provide a chart that contains the amount that each customer class has been charged for ComEd Customer Call Center costs for each of the last five (5) years.

RESPONSE:

See ComEd's Data Request Response to REACT 2.02. The attachment labeled as REACT 2.02_Attach 1 also includes the allocation of Call Center costs by delivery class.

Information Request
Re: ICC Docket No. 24-0378 Commonwealth Edison Company, Final Order
Supply-Delivery Cost Allocation Investigation

Commonwealth Edison Company's Response to
The Coalition to Request Equitable Allocation of Costs Together ("REACT")
Information Requests
REACT 2.01 - REACT 2.04
Date Received: June 13, 2025
Date Served: July 7, 2025

REQUEST NO. REACT 2.04:

Please refer to ComEd's response to Request No. REACT 1.14 and explain why there is such a high number of "unknown" customers. Please explain fully and in detail what steps could be taken to reduce the number of "unknown" customers.

RESPONSE:

ComEd Data Request Response to REACT 1.14 showed 1,772,594 calls categorized as "Unknown", meaning the rate class could not be determined. When someone calls ComEd and is being transferred from ComEd's Intelligent Virtual Assistant (IVA) to a Customer Service Representative (CSR), there is an interface to ComEd's billing and information system (CC&B) to see what account (if any) is associated with the phone number of the person calling. If the phone number is not in CC&B and associated to an account, or if the phone number is associated to multiple accounts or people, no account number will be captured and it would result in an "Unknown" categorization. If the customer is eventually connected and interacts with a CSR, the CSR does not link the call to the customer's account in this system (if any) and it will still maintain the "Unknown" designation.

ComEd was able to run a query focused on the "Unknown" calls where the account number was not captured. As noted above, if a phone number was associated with multiple accounts or people, the call was designated as "Unknown." To associate some of these unknown calls to accounts, in cases where the phone number was assigned to one person with multiple accounts or where the phone number was associated with multiple people and different accounts, the query assigned the call to the newest account and assigned the call to that rate class. Based on this query, the calls classified as "Unknown" were reduced from 1,772,320 to 451,611.

The 451,611 calls still being shown as "Unknown," are primarily because the phone number didn't tie to any person in CC&B or the account the phone number was associated with didn't have any service agreements with a tariff type associated to them.

The results and updated listing of calls by rate class are shown below.

Group	Class	Count	Percent of Known Class
1	Residential Single	1,749,926	51.0%
2	Residential Multi	1,231,830	35.9%
3	Residential Single Heat	39,193	1.1%
4	Residential Multi Heat	222,016	6.5%
5	Watt-hour Only	10,293	0.3%
6	Small (0-100)	162,498	4.7%
7	Medium (100-400)	10,107	0.3%
8	Large (400-1,000)	2,700	0.1%
9	Very Large (1,000-10,000)	2,278	0.1%
10	Extra Large (> 10,000)	78	0.0%
11	High Voltage 0-10 MW	99	0.0%
12	High Voltage >10 MW	55	0.0%
	Unknown	451,611	

Supply Choice	Count Unique	Percent of Known Supply Choice
ComEd	2,746,111	80%
RES	684,962	20%
Unknown	451,611	

Investigation Into the Allocation of ComEd Customer Care Costs

Pursuant to ICC Docket 24-0378 Order

RESPONSE TO
COMMONWEALTH EDISON COMPANY'S UPDATED SWITCHING STUDY
OF THE COALITION TO
REQUEST EQUITABLE ALLOCATION OF COSTS TOGETHER
(REACT)

COMPRISED OF:
CHARTER DURA-BAR, LLC (F/K/A WELLS MANUFACTURING, INC.)
CITGO PETROLEUM CORP.
MAGID GLOVE AND MANUFACTURING COMPANY
METROPOLITAN WATER RECLAMATION DISTRICT OF GREATER CHICAGO

FOR DISCUSSION PURPOSES ONLY

General Observations: Background

- ComEd surveyed various program departments to identify whether changes in customer switching would result in changes in operating costs
- ComEd asserted that only some programs were deemed sensitive to levels of customer switching
 - Sensitive: Billing; Electric Supplier Service; Green Power Connection
 - Not Sensitive: All others
- ComEd’s 10-page report provides limited data and analysis for 16 programs that amount to \$223 million in annual expenditures

Cost Categories	Costs at Switching level of 23%	(Decrease)/Increased Costs	
		@ 1% Switching	@ 100% Switching
Metering Services	\$16,233,048	\$0	\$0
Advertising	\$0	\$0	\$0

Total Costs Analyzed	\$223,167,216	-\$3,200,615	\$9,971,562
Amounts Not Analyzed	\$532,324	\$0	\$0
Total of Study	\$239,932,588	-\$3,200,615	\$9,971,562

Specific Observations: Customer Contact Center

- **Customer Contact Center** had the most detail and data available for analysis (\$55 million in costs in 2024)
- ComEd Approach:
 - “ComEd analyzed the customer calls that the Customer Contact Center handled in 2024, which related to a variety of customer concerns including, but not limited to, storm and emergency restorations and moving and relocation. Those types of calls relate to ComEd’s delivery service, and are not related to customer Switching.” (Page 5)

Cost Categories	Costs at Switching level of 23%	(Decrease)/Increased Costs	
		@ 1% Switching	@ 100% Switching
Metering Services	\$16,233,048	\$0	\$0
Advertising	\$0	\$0	\$0

Customer Relations	\$1,176,147		
Green Power Connection	\$1,217,798	-\$119,000	\$976,740
Other	\$3,519,779		
Total Costs Analyzed	\$223,167,216	-\$3,200,615	\$9,971,562
Amounts Not Analyzed	\$532,324	\$0	\$0
Total of Study	\$239,932,588	-\$3,200,615	\$9,971,562

Specific Observations: Billing Calls from Customers

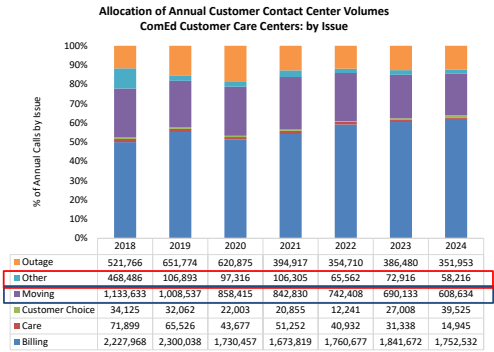

- ComEd examined data relating to billing inquiries to the Customer Care Centers
- "Billing-related call volumes have fluctuated between 1.6 million and 1.8 million per year for the last five years, meaning calls related to billing have both increased and decreased in years when switching increased."
- ComEd observed that customer switching to RES supplier did not correlate to an increase or decrease in the number of bill balance and payment-related customer calls received. Therefore, ComEd concludes that Customer Switching has no impact to Customer Contact Center costs.

Table 2 – CSR-Handled Call Volumes and Percentage of Customers Receiving RES Service

	2024	2023	2022	2021	2020	2019	2018
Percentage of Customers Receiving RES Service	22.9%	22.3%	19.8%	23.6%	28.6%	30.9%	33.9%
Handled CSR Call Volume	2,825,805	3,049,547	2,976,530	3,089,978	3,372,743	4,164,830	4,457,877
Billing	1,752,532	1,841,672	1,760,677	1,673,819	1,730,457	2,300,038	2,227,968
Care	14,945	31,338	40,932	51,252	43,677	65,526	71,899
Customer Choice	39,525	27,008	12,241	20,855	22,003	32,062	34,125
Moving	608,634	690,133	742,408	842,830	858,415	1,008,537	1,133,633

Outage	351,953	386,480	354,710	384,917	620,875	651,774	521,766
Total	2,825,805	3,049,547	2,976,530	3,089,978	3,372,743	4,164,830	4,457,877

Specific Observations: ComEd Analysis was Nominal

- ComEd Analysis considered:
 - Number of calls related to billing
 - Total number of calls
- ComEd Analysis failed to consider:
 - Changes in relative volume of calls across categories
- Why it matters:
 - Including call volumes that are completely unrelated to switching (e.g., Moving) in the analysis skews results by dampening correlation between customer switching and call volumes in other categories.
 - Poorly categorized data with massive volumetric swings (e.g., "Other") can also skew analysis.

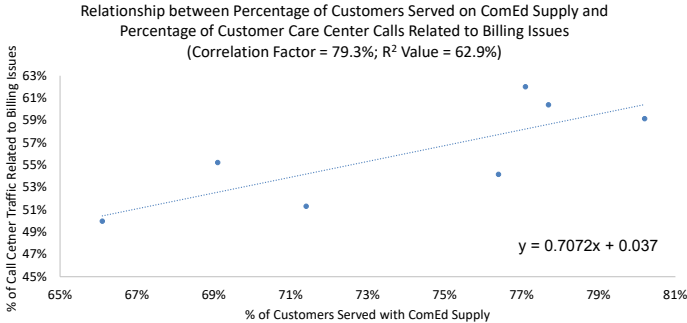

Specific Observations: Longitudinal Change

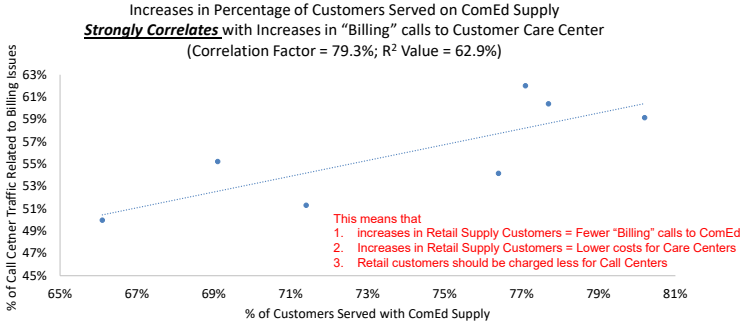

- ComEd asserts no relationship between the nominal levels of Billing calls and customer switching (red box)
- Analysis should consider the how the percentage of Billing calls on an annual basis changes over time (green box)
- The appropriate correlation analysis should compare switching to the percentage of annual calls related to Billing (blue box)

YEAR	SUPPLY ALLOCATION		CALL CENTER TOPICS

Specific Observations: Strong Correlation Identified

Specific Observations: Strong Correlation Identified

Specific Observations: Specific Modeled Cost Allocation

- The R2 formula ($y = 0.7072x + 0.037$) allows us to accurately estimate the allocation of Customer Care Center between Supply and RES customers (columns A, B C, D)
- 2024 cost of Customer Care Center Calls for "Billing" (column E) calculated as the number of calls for "Billing" multiplied by the average cost per call in 2024 (\$19.75)
- Modeled allocation of Customer Care Center costs to Supply customer in 2024 (77.1% customers served on ComEd Supply)
 - **\$20.2 million (defensible allocation)**

Specific Observations: ComEd Cost Allocation

- Top Table summarizes ComEd’s current approach to cost allocation, Assigns calls to three allocator categories and then factors those volumes based on ComEd’s revenue from Supply customers (Revenue Allocator) and the number of lines on a monthly bill (Bill Allocator)
- ComEd’s approach results in 27.09% of “Billing” calls to Customer Care Center being allocated to Supply
 - \$9.4 million (indefensible allocation)
 - \$10.8 million under-allocation of costs to Supply customers

Allocator	Reported Number of Calls (2023)	% Delivery		% Supply	
		% Calls Allocated	# Calls Allocated	% Calls Allocated	# Calls Allocated
Projected Call Center Volumes and Allocations re: Billing (2024 data applied to 2023 data)					
Revenue Allocator	1,438,707	72.29%	1,040,042	27.71%	398,666
Bill Allocator	313,825	75.76%	237,754	24.24%	76,071
Distribution	0	100.00%	0	0.00%	0
Totals	1,752,532	72.91%	1,277,795	27.09%	474,737

Variable	Math	Value
Number of Call Center Calls related to Billing	A	1,752,532
Calls Allocated to Supply (%)	B	27.09%
Calls Allocated to Supply (#)	C = A * B	474,737
Average Cost per Call Center Call (2024)	D	\$19.75
Total Annual Call Center Cost for Billing (2024)	E = C * D	\$9,377,770

ICC INVESTIGATION ON SUPPLY-DELIVERY COST ALLOCATION
July 18, 2025**

Question 1.01. Does REACT agree that based on the updated Switching Study findings that since there is no longer a forecasted reduction in Call Center costs with increased switching to 100% of ComEd customers on Retail Electric Supplier (RES) supply, then there should not be an allocation of Call Center costs to the ComEd supply rates? If the answer is "No", please explain in detail why not and provide any work papers.

RESPONSE:

No. REACT disagrees with the findings of the updated Switching Study. ComEd's analysis and conclusions concerning the nature and drivers of Call Center volumes contained in the Switching Study are based only on a cursory scan of nominal data which fails to identify and then address the strong correlation between the levels of customers served by ComEd Supply and the percentage of Call Center call volumes that relate to "Billing" issues. ComEd's data indicates that the percentage of total Call Center call volumes related to "Billing" increased when the percentage of ComEd customers served by ComEd Supply increases. The strong statistical correlation between these variables indicates causality. As such, the data supports REACT's contention that RES-supply customers are less likely to utilize the ComEd Call Center and therefore should be allocated a much lower percentage of the costs of operating the ComEd Call Centers.

Additionally, in many cases, the Switching Study conveys limited or no data to support any reasonable level of analysis or conclusions. For example, the Switching Study does not identify the drivers for Customer Care Center call volumes falling by almost 1/3 between 2018 and 2024. The failure of ComEd to address such a material issue indicates that the level of analysis applied by ComEd was cursory, at best. As such, REACT finds the analysis within the Switching Study to be incomplete and its conclusions to be flawed and unreliable.

Rather than rely upon the flawed and unreliable updated Switching Study, the costs should be allocated based upon the service that ComEd is providing; if a cost is incurred to support ComEd providing a supply service, it should be recovered in ComEd's supply rates.

ICC INVESTIGATION ON SUPPLY-DELIVERY COST ALLOCATION
July 18, 2025**

Question 1.02. Does REACT agree that based on the updated Switching Study findings that since there are increased costs associated with the Electric Supplier Service Department (ESSD), Billing and Green Power Connect with increased switching to 100% Retail Electric Supplier (RES) supply, then there should be an allocation of those department costs to Retail Electric Suppliers (RESs) or RES-supplied customers? If REACT does not agree, please explain in detail why not and provide any work papers.

RESPONSE:

No. REACT disagrees with the findings of the updated Switching Study; it is flawed and unreliable. (See REACT Response to ComEd Question 1.01.) REACT specifically disagrees with the updated Switching Study findings concerning the cost sensitivity of ESSD, Billing, and Green Power Connect to customer switching. The lack of verified data and analyses on these issues renders ComEd's conclusions to be simple assertions made by parties that have an interest in supporting ComEd's previously-stated positions; these assertions should not be accepted at face value. More in-depth analysis should be conducted for these and all other customer care costs reported by ComEd.

Question 1.03. In reference to the CCSA provided as ComEd Ex. 5.06 which allocates Call Center costs to ComEd supply rates:

- a. Does REACT agree that RES-supplied customers use ComEd's Call Center?
- b. If ComEd continues to allocate a portion of the Call Center costs to ComEd supply customers, should a portion of the Call Center costs be allocated to Retail Electric Suppliers (RESs) or RES-supplied customers? Why or why not.
- c. If REACT agrees that a portion should be assigned to RESs or RES-supplied customers, how does REACT recommend those costs be assigned to and recovered from RESs or RES-supplied customers.

RESPONSE:

- a. REACT agrees that RES-supplied customers use ComEd Call Centers.
- b. REACT disagrees that RESs should be charged when RES customers contact the ComEd Call Centers. RES customers are also delivery services customers of ComEd and should be able to contact ComEd on delivery-related issues under ComEd's obligation to serve.
- c. The calls to the ComEd Customer Care Centers should be categorized based upon the topic addressed in the call. For instance, if a RES customer is calling to request the current ComEd supply rate pricing, then the purpose of the call is supply-related and these costs should be recovered through ComEd's supply charges. If a RES customer is calling about a delivery service issue, then the purpose of the call is delivery services-related and the costs should be recovered in ComEd's delivery services charges. If a RES customer is calling about their RES supply price, then they should be directed to contact their RES thereby alleviating ComEd of the cost associated with responding to such questions.
